Flemish is the Belgian variant of Dutch. They're very
close, perhaps comparable to the difference between
British and American English (OK, OK, not so close).
Some scholars hold that they have diverged sufficiently
since the 16th century to warrant being described as
separate languages.

Subject: SA-077

IOTA SA-077

If you are looking for another requested Brazilian IOTA, the best thing to do is to contact our first amateur radio DX-pedition to Frances Island, IOTA SA-077, in the Santana Archipelago, which is located at the opposite side of the city of Macae, in the east coast of the State of Rio de Janeiro. Latitude: 22=BA 24' S - Longitude: 41=BA 41' W . Locator: GG97do.

Activity period: From Jul. 5 till 8, 2001. Full time operation.

Modes : CW and SSB.

Bands : 6 to 80 meters, including the newer bands, depending on propagation.

Calls and Operators : PU1NEZ/p (Carl), PY1AMF/p (Mar), PY1LVF/p (Zeca) , PY1NEW/p (Pete) and PY1NEZ/p (Lima).

QSL Route : Via home-call or thru the Bureau.

Suggested frequencies (in MHz, +/- 10 KHz):

CW - 3,530 / 7,030 / 10,115 / 14,040 / 18,098 / 21,040 / 24,920 / 28,040 /50,100

SSB - 3,755 / 7,055 / 14,260 / 18,128 / 21,260 / 24,950 / 28,460 /50,100

Please feel free to contact us either through ours e-mails or mailing addresses in Brazil:

PU1NEZ: Carlos Guilherme Correa, 9/306 Presidente Backer,24220-045 Niteroi, RJ, e-mail: < pu1nez@bol.com.br >

PY1AMF: Am=E9lio Alves de Marins Filho, QSL via PY1NEZ.
e-mail: < py1amf@ig.com.br >

PY1LVF: Jose Luiz Vieira Fernandes, P. O. Box 18009, 20722-970 Rio de Janeiro, RJ e-mail: < py1lvf@cxpostal.com >

Walt, it was my first encounter at the age of eleven with a thing called "computer"... Kids nowadays would be traumatized if they had to deal with command prompts with very cryptic instructions...
No harddisk, monochrome monitors (you could count the pixels at 20m distance hi), it had floppies of an unusual size (between 3.5" and 5.25", don't recall it excact, but they costed almost 10Euro a piece at that time)... In fact, the whole thing costed big $$$ at the time...

No sign of DOS there, and Windows were still things you were looking through...

I believe CP/M was developped by Digital Research, they later came up with DR-DOS (nono, *not* Doctor DOS! hi)...

sigh ahh, those pioneering days...

OK Peter, now you've gone too far...
Belgian beer cannot be compared to Heineken...
We call that "p*sswater" and compare it to the water you just washed the dishes in...

I believe they stole the recipe from the English brewers...

73 de Franki ON4CLN
Belgium, where "beer" may be called beer...

I recently retired from a company which used a component
insertion machine operated by a CP/M computer. Our IT guys
always looked down their noses at it and said "when it dies, it's
out the door". Some of the IT guys have left, but the machine is
still going.

I don't know if there's a message there, just thought it mildly
amusing. :-)

Try Logger then, its free and will do most of what anyone needs in a robust station.

Controls radios, keeps track of number of awards, had PSK included.

A good way to 'check' on possible calls is to go to:

http://oh2w.kolumbus.com/dxs/qin.html and put in the call you are looking for.
I put in 'S2G' and did not get a hit, but there were two hits on 'H2G' during
the WPX contest from two differant sources... so I am betting on the H2G.

I worked that station three times in that period and received the card from the March 2000 QSOs in March 2001. Didn't need it for a 'new one' per se as I had worked and confirmed SM0AGD/XW8 in 1979.

Patience and I think that the cards will eventually get here.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, N3SL, W3UR & The Daily DX, KJ4Z, N4AA & QRZ DX, AA5XE, KM6HB, AA8LL, K8YSE, AE9B, KU9C, K0JGH, BD7NQ, DJ7ZG, DL1EK & DX News Letter, DL2VFR, AI5T, E21EIC, F5PHW, F6AJA & Les Nouvelles DX, F8BBL, G3NUG, HK5MQZ, HL1VAU, LA4LN, OH1EH, PS7AB, PS7ZZ, PY1NEZ, RN3OA, SP6ECA, SV1DKL, VK4FW, XE1KK and ZS5BBO for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 3/June, through Sunday, 10/June there were 213 countries active. Countries available: 3A, 3B8, 3B9, 3C, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5Z, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J6, J7, JA, JD/o, JT, JW, JX, JY, K, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S2, S5, S9, SM, SP, SU, SV, SV5, SV9, T32, T7, T9, TA, TF, TG, TI, TK, TL, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VP2E, VP2V, VP5, VP6, VP9, VQ9, VR, VU, XE, XU, XW, XZ, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity".

NEWS FLASH!!!!!!!!! (You have another chance)
HK0, MALPELO ISLAND. Just before going to print (or should I say getting ready to hit the "SEND KEY"), OPDX received word that Jairo/HK5MQZ and Hiro/HK5QGX set sail Sunday from Buenaventura aboard a Colombian Naval Force towards Malpelo Island, and the duo is expected to land early in

the morning of June 13th. Possibly starting the operation on the same day (this was not made clear). However, on June 16th, they should be operational on all bands 80-6 meters. They plan to climb on top of a mountain to try to improve conditions towards the U.S. West Coast and also the Pacific, mainly to Japan. The 80/40/30 meter bands will be operated with wire dipoles and an amplifier, and the others bands with yagis. Jairo will operate as HK5MQZ/OM on SSB. QSLs only via HK5MQZ (Jairo Vargas, P.O. BOX 10862, Cali, Colombia). Hiro will sign HK5QGX/OM (operating on CW only). QSL via JA0MGR. They will reply QSLs directly ONLY, and since the Colombian postal rates have risen, please send two green stamps or 2 IRCs. Suggested frequencies are:
SSB - 3745, 7088, 14195, 18145, 21195, 24945, 28495, 50110
CW - 3504/3745, 7004, 10104, 14195, 18072, 21022, 24894, 28022, 50110

5R, MADAGASCAR (IOTA Activity). Jacques, F6BUM, will be here from September 2-27th. He will also be active from Ste Marie Island (AF-090) from September 3-7th and from Nosy Be (AF-057) from September 23-26th.

BY, CHINA. Terry, BD7NQ, informs OPDX that they are planning to run a China DX Net once a week. They would like to let many DX stations work China and help more China DXers and novices work DX. The net will run on frequency 21410 kHz, the time will start at 1300z or 2300z on Saturday. They will pick up a better time depending on the propagation. They welcome any DX station checking in to their net and making a QSO with any China station. To search for QSL information on Chinese stations, go to URL: http://www.chinaqrz.com

C6, BAHAMAS. Members of the University of Tennessee Amateur Radio Club will be active from Eleuthera in the Bahamas (NA-001) from July 13-22nd. Mike/KJ4Z, Dan/K2VOL and Bret/K4TKE will be signing portable home calls and will be active on 80-10 meters SSB, CW, and RTTY. Their logs and photos will be available during the expedition on the group's web site at: http://www.utarc.org/bahamas/
QSLs for all operators should go to KJ4Z (Mike Coffey, P.O. Box 7033, Oak Ridge, TN 37831-3333).

CT3, MADEIRA ISLAND. Glen/K0JGH and XYL Pamela/N0ICF will be active and on a holiday near Funchal, Maderia, June 20-26th. Activity will be on the WARC bands, RTTY, with some SSTV and PSK31 between sightseeing and pooltime. Their equipment will be IC-706, with a 6 band dipole with coverage from 30-10 meters, a laptop with writelog and MixW software for all the modes.

FO, FRENCH POLYNESIA. Yves, F6CTL, will be on Rangiroa Island (OC-066) from mid-June to mid-July and probably will sign FO/F6CTL. He will be with Alain, FO0CLA, who is the QSL Manager for.

HS, THAILAND. There will be plenty of Thai hams active in the All Asian CW Contest next weekend. Look for the following operators/callsigns to be active:
Yong, HS4BPQ - Single Op/21 MHz/Low Power
Choon, E20HHK - Single Op/28 MHz/Low Power

Son, HS6NDK - Single Op/14 MHz/Low Power
Nut, E20RRW - Single Op/ 7 MHz/Low Power
Champ, E21EIC - Single Op/Multi-band/Low power (Look for him
on 3524 kHz at 1930-2230z.
QSL HS6NDK via HS1CKC. QSL HS4BPQ, E20HHK, E20RRW and E21EIC via
E21EIC, address: Champ C. Muangamphun, P.O.BOX 1090, Kasetsart,
Bangkok 10903 THAILAND.

IOTA NEWS.....
AS-NEW. Rafal, SP6TPM, will be joining the TA2KI crew on Kefken Island,
which will take place from June 23-25th. This operation is
subject to receiving special permision from local authorities
to enter the island which is under military control.

AS-090. Han, HL1VAU, informs OPDX that a team will be active from
Tokchok Island, July 27-29th. Operators are Kim/HL1OYF (Team
Leader), Phil/HL1TXQ, Han/HL1VAU, Jeon/DS3BGI and Jeon/DS1EVQ.
They will be active as homecall/2 on 40-10 meters (except
the WARC bands) CW and SSB. They will have two stations active
with 4 element beams and dipoles with a 500w linear amplifier
for this expedition. The team expects to participate in IOTA
Contest. Particularly, Hans will join in as a Single Op/12H
category. All QSLs for this operation are OK via HL1OYF either
direct or via bureau. His address is as follows: Kim HL1OYF,
P.O.Box 54, Dong-Jak, Seoul, 156-600, South Korea. Detailed
information will be available at following web site (still
under construction and no files exist, but will be updated
very soon: http://www.qsl.net/hl1vau/iota2001/
A log search will also be available at that web page after
the expedition is over.

EU-023. Look for 9H4JB to participate in the IOTA Contest for 12 or
24 hours from Gozo Island.

EU-042. Ruediger, DJ3XG, will be active from September 17-25th, from
Hallig Hooge (German Island Award N-22). During that time
he will occassionally go to Japsand (same IOTA, N-32). Activity
will be on 7030 and 10115 kHz on QRP. QSL via bureau.

EU-060. A team of Greek operators will be active June 15-25th, using
the special event station callsign SW1SPA to celebrate the 2001
Cultural Festival of Aedipsos from Euboea Island. Operation
will take place at an envious site on the beach of Aedipsos,
and they will try to be "On-Air" around the clock. Team organizer
is Kostas, SV1ENI, who has offered the operating site and
accomodation for the participating members. The team consists
of Kostas/SV1ENI, Manos/SV1DZB, John/SV1DKR, Stathis/SV1DKL
and Antonis/SV1ENG. They plan to have 2 stations with antennas
for all bands active, especially during the weekends (June
16-17th and 23-24th). Their operating modes will be mainly
SSB and CW, but they will try to put on some QSOs on the digital
modes too. The main attraction of Aedipsos is the SPA TOURISM

with its sanative baths and the wild beauty of the surrounding
emvironment. More info on Aedipsos in the northern part of
Euboea Island can be found at URL: http://www.aedipsos.gr
You can also E-mail for info at: aedipsos@aedipsos.gr.
QSL Manager for the event is Kostas, SV1ENI, and the handling
will be either via bureau or direct.

EU-098. Mathias, DL3KUD/p, will be active from July 27-29th and during
the IOTA Contest (24H, CW) from Poel Island.

EU-132. (Special Event). Look for station HF1UKF to be active during
the 40th Polish VHF Convention, June 10-17th, from Miedzyzdroje
on Wolin Island (SP Island Award SZ-02, WW Loc JO73FW). There
will be two stations on the air, one on HF 160-10 meters on
CW/SSB/RTTY/PSK and the second on 50/144/432/1296 MHz. QSL
via bureau to SP1MVG.

EA-132. Rafal, SP6TPM, will be active as 3Z0WI from Wolin Island
June 14-17th. Activity will be on CW/SSB. QSL via SP4KIE.

EU-186. Rafal, SP6TPM, will be active from Gokceada as TA0/SP6TPM/m
from June 26-28th June. QSL via CBA. For more information,
check the web page: http://www.qsl.net/sp6tpm/eu186.htm

NA-045. A group of 7 hams from Quintana Roo will be active from Contoy
Island on June 21-22nd. They will be active as XF3CI on 80-10
meters SSB, CW and RTTY. This is a first time operation from
this national park island. QSL Manager is XE3OYJ. Send direct
to Box 1883, Cancun, Q. Roo. 77501 MEXICO or via the bureau.

NA-144. Henry, KC6VNA, will be active from Santa Rosa Island, June
17-19th. Activity will be SSB QRP on 14260 kHz. QSL via K6FQ.

SA-077. The first Brazilian amateur radio DXpedition to Frances Island,
in the Santana Archipelago, which is located at the opposite
side of the city of Macae in the east coast of the State of
Rio de Janeiro (Lat: 22"24'S - Long: 41"41'W. Loc: GG97do),
will take place July 5-8th. This will be a full time operation
on 80-6 meters CW/SSB, including the newer bands, depending on
propagation. The callsigns and operators are: PU1NEZ/p (Carl),
PY1AMF/p (Mar), PY1LVF/p (Zeca), PY1NEW/p (Pete) and PY1NEZ/p
(Lima). QSL via their home callsign or through the Bureau.
Suggested frequencies are (+/- 10 KHz):
CW - 3530, 7030, 10115, 14040, 18098, 21040, 24920, 28040, 50100
SSB - 3755, 7055, 14260, 18128, 21260, 24950, 28460, 50100

ADDED IOTA NOTES:
Ric, DL2VFR, Editor of IOTA-POST, states to check the following Web
page for IOTA Contest operations: http://www.iota-post.com

Neville, G3NUG, Chairman of CDXC (Chiltern DX Club), The UK DX Foundation,
reports that 232 applications for the IOTA 2000 certificates have been
processed to date. The winners, by category, are shown on the CDXC web

pages at: http://www.cdxc.org.uk
Congratulations to all the certificate winners. These certificates will be mailed before the end of June and possibly sooner. A reminder, the closing date for IOTA 2000 applications is December 31, 2001.

JD, OGASAWARA. JD1BFA was active over the past weekend on 40/20/15 meters CW. Check 15 meters between 2230-0130z. Check 20 meters after 1115z, but 40 meters before this time. QSL via JA3EMU.

JW, SVALBARD (IOTA Op). Tom, LA4LN, will again be operating as JW4LN from Spitsbergen (IOTA EU-26) and Bear Island (IOTA EU-27) July 6-23rd, while on business. He will be on the radio mainly in the evenings (local time) and when time permits. Check the lower CW portions, especially on the 40/30/20 meters bands; and 6 meters (50110 +/- 10 kHz). His equipment will be an ICOM IC-706 MkII with mainly wire antennas. Operations on PSK-31 and RTTY are possible. While on Bear Island, a 60 Ah battery and solar panels will be used for power. Please QSL direct to Tom's home address: Tom V. Segalstad, P.O. Box 15 Kjelsas, N-0411 OSLO, NORWAY.

KG4, GUANTANAMO BAY (Update). The planning continues by Pat/W5OZI and Dale/AA5XE, who will operate from here during the period of June 29th through July 5th, as KG4ZI and KG4XE, respectively. QSL to their home callsign. Please refer to OPDX.514 for more details.

LIGHTHOUSE ACTIVITY. An operation from Cabo Sao Roque Lighthouse (DFB RN-06, LH ??? for the WLH Award) is planned on June 13-17th. Look for PQ7ZZ to be active on all bands SSB, RTTY, PSK and CW. Operators will be PS7ZZ, PS7HF, PS7KC and possibly others (to be confirmed). QSL via PS7ZZ: Francisco EdvaldoP de Freitas, Av. Sao Miguel dos Caribes 31 - Conj Jiqui, 59086-500 Natal, Rio Grande do Norte, Brasil.

MD, ISLE OF MAN. Wade/AA8LL and Liz/K8LIZ have planned a holiday operation from here June 15-17th. They will sign MD/AA8LL and MD/K8LIZ on 40-10 meters SSB. Wade requests, "Please be gentle with the YL operator as this is her first time." QSL to home callsigns.

PJ2, NETHERLANDS ANTILLES. Tom/AE9B and Marty/NW0L will be active from this area with one of the PJ2T guys during the WAE Contest, September 8-9th. You can look for them to be active the week prior as PJ2/AE9B and PJ2/NW0L.

QSL INFO AND NEWS.....
QSL REQUEST ANSWERED. Last week OPDX was asked to find out what the QSL status of the XR0ZY operation that took place in April 2000. Apparently, many throughout the world have received their QSL card with no problem. XR0ZY was an operation by KM9D. The QSL Manager is OM2SA: Juraj Sipos, 93013 Trhova Hradska 550, Republic of Slovakia, Europe.

QSL REQUEST. Stations VO7A, VO1W, and VO1X were active in the CQ WPX CW Contest. Does anyone have QSL info for these unusual callsigns?

3B6RF UPDATE: Steve, N3SL, informs OPDX that he now has the "official" logs from 3B6RF after the cleanup. The cleanup was able to happen thanks to the forethought of Riki, 4X4NJ, to have paper (log) backups. Steve states in case some other errors in band or mode were missed, he will be happy to accept requests for log checks from anyone who still sees a discrepancy. Steve's E-mail address is: N3SL@aol.com Cards are still on track to be delivered to the group at Friedrichshafen (the last weekend of June), so Steve expects the N.A. batch to arrive stateside in mid-July. They will start going out as soon as possible. The label program is ready, and the cards are sorted. People should expect them no earlier than late July-early August.

6W1/F5PHW and J28BS LOGS ONLINE. Phil, F5PHW, informs OPDX that his logs for his old DXpeditions are now available. For his J28BS operation (January 1993, October-November 1994, April 1999) go to the Web page: http://www.ve9dx.com/f5phw/j28bs.html
For his 6W1/F5PHW operation (April-May-June 1994, May 1997) go to the Web page: http://www.ve9dx.com/f5phw/6w1-f5phw.html

Jean, F6AJA, reports that all direct requests for F6BFH/P from Molene Island are now on their way. Also, all HPx/F5PAC direct requests from Joel are on the way.

Lot, DJ7ZG, informs OPDX that direct QSLs for both him and his XYL as HI9/DJ7ZG and HI9/DL7AFS in March 2001, have been sent out. They made 16500 QSOs. QSLs for their ZB2 and EA9 operation in April/May 2001, are now at the printers'. They made 13300 QSOs. All QSLs are via Babs, DL7AFS. Their home page includes their logs at: http://www.qsl.net/dl7afs

FG/RW3QC was active from Guadeloupe Island in the CQ WPX CW Contest. QSL via bureau or direct to RN3OA: Igor Zakharov, P.O. Box 381, Voronezh, 394000, Russia.

QSLs for J6/LA4LN and J73ALN (December 2000/January 2001) received before April 1st have all been answered. QSLs received after that date will hopefully be answered before Tom, LA4LN, leaves for JW. NOTE: Postage in Norway will be increased 25% July 1st. After that date one "green stamp" will no longer cover the postage for one QSL card from Norway.

A QSL MANAGER'S QSL MANAGER! Well known QSL Manager Steve, KU9C, announced this week that he will have the honor of serving as W3HNK's QSL Manager (yes, that isn't a mistake!) for his operation earlier this year in FS5/PJ7. Steve states, "To put a face along with one of the more famous calls in the hobby of DXing, I've done a picture QSL card ..... and I've just received delivery information on the card. I expect to have the card in hand around June 20th....and expect to have all of the direct QSL requests out by the end of June.

The station signing TM6JUN, which was active until June 10th from Utah Beach, is to be QSLed via F2RO.

Edwin, ZS5BBO, will be going QRT beginning about June 23rd for a few months. The reason is that Edwin and Janet/ZS5JAN have bought a new QTH and will be relocating. Edwin also states, that his QSL Manager duties will also take a break as well while they settle down. However, he mentions that he posted a couple hundred cards recently. So if you have sent a card for any of the callsigns listed below, please don't send another card as your cards will be answered. Please be patient. Edwin is the QSL Manager for the following: ZS5BBO, ZS5JAN, ZS5T, ZS3MM, 7Q7BO, GM3WOJ, GM7V, GM8V and GZ7V.

SV9, CRETE. Laurent, F8BBL, will be active as SV9/F8BBL from June 25th through July 2nd. Activity will be on 160-10 meters CW/SSB/FM. He will use an IC-706MKII (100w) with a 80m longwire into AH4 ICOM. Suggested frequencies are:
CW - 1833, 3533, 7033, 10133, 14033, 18083, 21033, 24903 and 28033
SSB - 1843, 3833, 7083, 14133, 18133, 21133, 24933 and 28133
FM - 29533 kHz
QSL via French Bureau or direct to CBA 2001.

TX0, CHESTERFIELD ISLAND (Update/Help Needed). Bill, VK4FW, informed the DX community that they have lost some of the operators who were going on this dxpedition. Primarily, most of them have not been able to get the necessary time off work. If you would like to go on this trip, please E-mail Bill direct at: vk4fw@spiderweb.com.au
Dates for the operation are September 1-19th. Each operator is paying 2500 USD for their spot without personal expenses. Most of the equipment is secure and finalized. The primary goal of this operation is to make sure that anyone who needs this for a new one will get in the log at least once. Time is short. If you would like to go, you will need to E-mail Bill now.

WRTC2002 ON THE ROAD. Ari, OH1EH, reports the following: "If you are looking for an opportunity to meet the WRTC2002 representatives, some of them will visit several hamventions and meetings in the near future. Some of these happenings will have a separate WRTC stand where contributions to the WRTC2002 are warmly accepted. Meet the WRTC2002 representatives as follows:

HamCom 2001, Arlington, TX, USA - June 8-10th - Meet Martti/OH2BH and Dennis/K7BV during the HamCom.
(HamCom schedule:http://www.hamcom.org/Programs.htm)

Friedrichshafen - Ham Radio Fair 2001, Germany - June 29th-July 1st- Meet Ari/OH1EH, Timo/OH1NOA, Dennis/K7BV and Jari/OH2BU.

Hietahami 2001 - Oulu, Finland - July 5-8th - Meet several WRTC2002 representatives in the official summer camp of the Finnish Amateur Radio League - the biggest annual ham radio event in Finland.

ZK1, SOUTH COOK ISLANDS (IOTA Op). Mark, KM6HB, will again be operating from the South Cook Islands from August 7-17th. He will visit a few of their IOTAs while there signing ZK1AHB. His schedule is as follows:
August 7-8th - Rarotonga Island, IOTA OC-013

August 9-11th - Mangaia Island, IOTA OC-159
August 11-16th - Autituki Atoll, IOTA OC-083
August 17th - Back to Rarotonga Island
Operations will be on all modes including RTTY and PSK31 with activity
on 40-6 meters. QSL via KM6HB or W6 Bureau.

ZONE 2. Jim, W2RA, will be back in Iqaluit on Baffin Island (NA-047),
June 11-17th and plans to be on the air as his work schedule permits.
Activity will be mainly 20 and 17 meter CW, and possibly 30 and 15 meter
CW depending on propagation. Iqaluit is at 63.75N 68.50W. Sunrise 0643Z,
sunset 0225Z. QSL via W2RA.

ZS, SOUTH AFRICA. Edwin/ZS5BBO and Gary/ZS5NK will be active in the
HF World Championships in July. They will be operating on all bands
on phone only using the callsign ZS5T. QSL via ZS5BBO.

Excerpts and distribution of The OPDX Bulletin are granted as long as
KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS
online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with
the Sysop or send via InterNet Mail to:
kb8nw@barf80.nshore.org - OR - kb8nw@arrl.net
Use the VOICE or FAX answering machine at 440-237-8208 which shares the
same phone line as BARF-80 BBS using a data/fax/phone switch. To access:
1) Dial Number. 2) Wait for first ring (the second ring should be a false
ring from the fax/data switch box) and then dial four quick ones ("1111").
(NOTE: Some FAX machines that send single "BEEPS" every second will not
have to do this step.) 3) The phone will pick up and after the "BEEP"
leave your voice message or FAX.

Amateur Radio Lighthouse Society (ARLHS)
<http://ARLHS.COM>

Dear Editor:

The ARLHS is the world's largest amateur radio society devoted exclusively to ham radio and lighthouses. Less than a year old, our membership already totals several hundred worldwide, with an average of 2 new members being added every day. In addition to sponsoring expeditions to lighthouses and lightships around the world on a weekly basis, we also sponsor four operating events throughout the year. The next events are the immensely popular NLLW and ILLW annual operating events. (The latter event is in co-sponsorship with GM4SUC.) We offer an extensive lighthouse awards program and maintain perhaps the internet's largest and most complete list of the lighthouses and lightships of the world.

Any publicity you can give our NLLW and ILLW lighthouse operating events would be appreciated. Full details can be found on our web pages.

(1) National Lighthouse / Lightship Weekend -- NLLW
August 4 & 5, 2001. Guidelines are on the web page
<http://www.waterw.com/%7eweidner/arlhs/page2a.html>
For the first time awards and prizes are offered for this event.
The prize drawing is an exquisitely detailed miniature collectible lighthouse, signed limited edition, donated by one of our sponsors, Harbour Lights.

(2) International Lighthouse / Lightship Weekend -- ILLW
August 18 & 19, 2001. Guidelines are on the web page
<http://www.waterw.com/%7eweidner/arlhs/page2b.html>

Our main web site is at <http://arlhs.com> and it contains our stated purposes in sponsoring expeditions to remote lighthouses as well as details about our worldwide organization, the largest ham radio society devoted to lighthouse/lightship operations. Membership details and FAQs are also accessible from this main page.

I still own mine as a backup to my FT1000MP. Great receiver in every
aspect - love the slope tuning. I only wish it had a spinner knob and band
buttons. Best buy on the used market by far. The FT990 is supposed to be
nice also and has spinner knob, band buttons, and optional ac power supply.
Most give the TS850 the edge in the receiver performance, but not by much.
Good luck. --- Steve KK9ZZ

They're getting a bit old now, but still one of the best rigs
around. Be sure to get one with the built in antenna tuner,
since it was an option.

I used one for many hears and finally upgraded to a TS-870S
mainly because I wanted to try out the digital filters, which did
prove to have a slight edge, but not all that much.

You won't be sorry.

73, Bill W7TI

1621. Callsign prefix/location database?

Hi all,

I am looking for a freely available database of callsign prefixes,
country and location (lat/long) for use with software I am developing
for grid locator/bearing conversions and satellite tracking. I
searched but only found some software related to my projects but no
separate database file.

Thanks in advance and 73's from 5B4AZ

BID: $OPDX.516
June 18, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, KF2TI, WA2YMX, W3UR & The Daily DX, N4AA & QRZ DX, W4WX, KM6IU, K8YSE, WZ8D, K9OT, KE9KD, W9DC, 9A6AA, 9V1YC, DL1EK & DX News Letter, DM5TI, DS1DBX, EA7FTR, F5NOD, F6AJA & Les Nouvelles DX, GM3WOJ, GM0CLN, JI3DST, JR4QZH, OH1EH, OZ6OM/OZ7M & OZ 50 MHz DX Bulletin, PA3GEO, S53AU, SP6TPM, UR5WCW, VE2MBS, VO1MX/VO2ZZ and ZL1AMO for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 10/June, through Sunday, 17/June there were 203 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 3X, 4J, 4L, 4S, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5X, 5Z, 7Q, 7X, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE0Z, CE9, CM, CN, CT, CT3, CU, CX, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FW, FY, G, GI, GJ, GM, GU, GW, HA, HB, HC, HI, HK, HK0/a, HK0/m, HL, HP, HS, HZ, I, IS, J2, J3, J7, JA, JD/o, JT, JW, JX, JY, K, KH0, KH2, KH6, KL, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S9, SM, SP, SU, SV, SV5, SV9, T5, T7, T9, TA, TF, TG, TI, TK, TR, TU, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, VE, VK, VP2E, VP5, VP6, VP9, VQ9, VR, VU, XE, XU, XW, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZL, ZL7, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity".

C6, BAHAMAS. John, WZ8D, will be leaving for Abaco Island (NA-080) on June 21st and will be there until July 2nd. He will be signing C6AIE. His main bands of operation will be 6 and 2 meters (Grid Square FL16iq). During slow times, he will be on 40-10 meters. His equipment is a Kenwood 2000, 4 element beam on 6 meters, 7 element beam on 2 meters and 3 element

on 10 meters. He will also have a vertical and dipoles for the other bands. Power will be 250 watts on all bands. QSL to WZ8D: John Walker, 1930 Meredith Dr., Loveland, Ohio 45140-7216 USA. U.S. stations include a SASE. All others SAE and at lease 1 IRC or USD. Please, NO cards through the Bureau.

DX-CENTRAL WEBSITE (Change). Kelly, KE9KD, wants the readers to know that the DX-Central Website has been redesigned. There seems to be some "paranoia" about the use of cookies so the new redesign allows visitors to use the site even if they have cookies disabled. There have also been some changes in the user interface and features of the site. Kelly states, "Hopefully these changes will make it a little easier to use. As always, if anyone has comments or suggestions, feel free to let me know." The Web site is at: http://www.dx-central.com

FP, ST. PIERRE AND MIQUELON. Pete/NN9K, Peg/KB9LIE and Paul/K9OT will be active from Miquelon (NA-032) starting Thursday, July 26th until August 1st. Activity will include the IOTA Contest July 28-29th. Their activity before the contest will be mainly WARC bands and PSK31. They will be using FP/homecall outside of the contest and FP/K9WM during the contest. They also plan to operate 80-10 meters with a possibility of 6m CW/SSB plus PSK31. QSL via home callsigns The contest FP/K9WM callsign goes to NN9K.

HA, HUNGARY. Robert, PA3GEO, will be active from July 14-31st as HA5ORP. He plans to be active on CW/SSB on HF and also on VH. QSL via PA3GEO. His Web page is: http://people.zeelandnet.nl/pa3geo

HK0M, MALPELO ISLAND. Jairo/HK5MQZ and Hiro/HK5QGX are now active. Jairo is operating as HK5MQZ/0M on SSB. QSLs only via HK5MQZ (Jairo Vargas, P.O. BOX 10862, Cali, Colombia). Hiro is signing HK5QGX/0M (operating on CW only). QSL via JA0MGR. Again, suggested frequencies are (+/- few kHz):
SSB - 3745, 7088, 14195, 18145, 21195, 24945, 28495, 50110
CW - 3504/3745, 7004, 10104, 14022, 18072, 21022, 24894, 28022, 50110

IOTA NEWS.....
AS-NEW. (Update) Remember to look for Kefken Island to be activated June 23-25th. The callsign to be used will be YM0KI. Activity will be on 2-3 bands (one SSB, one CW, and one sporadically on SSTV depending on propagation).
AS-049. Takeshi, JI3DST, will activate Tokara Archipelago (Kuchinoshima, Toshima-mura, Kagoshima-gun, Kagashima-ken) from 0800z, June 28th through 0100z, July 5th. He will sign JI3DST/6 on 40/17/15/ 12/10/6/2 meters on SSB. QSL via JI3DST.

AS-103. Operators Doji/JH3JWW and Takeshi/JI3DST will activate the Taiwan island Penghu (aka Pescadores), 0900z July 20th through 0200z July 22nd. They will sign BV9A/JH3JWW and BV9A/JI3DST. Activity will be on 40/20/17/15/12/10/6/2 meters on SSB. QSL via home callsigns.

AS-148. Members/Operators of club station HL0C, will be active as HL0C/4 from Wi Island between August 2-8th. Wi Island belongs

to the Chollabukto Province Group (Korea). Activity will be on SSB, CW and RTTY on 80, 40, 20 and 15 meters. Please send QSL cards to CPO Box 4397 Seoul, KOREA zip code: 100-643 (QSL via BURO also OK).

EU-008. A team from the Cockenzie and Port Seton Amateur Radio Club (C&PS ARC) will once again operate from the Isle of Tiree (reference number IOSA NH04 and WAB NM04), which is the most westernly of Scotland's Inner Hebridean Islands. Activity will be during the RSGB IOTA (Islands on the Air) Contest, which runs from 1200z July 28th through 1200z July 29th. The team, which consist of Cambell/MM0DXC, John/GM7OLQ, John/MM0CCC, Colin/GM0CLN, Bob/GM4UYZ, Ron/GM0NTL, Landles/GM4XZZ, Tony/GM3PGY (the island's only resident radio amateur), Iain/MM1CPP, Robert/ MM0ANT, Brian/M5BAP, Ron/GM4IKU and Bob GM0BWU, will be using the special contest callsign GM2T. The QSL Manager for all GM2T operations is Bob, GM4UYZ. Updates will be posted on the club's web page at: http://www.cpsarc.com/

EU-012. (Advance Notice) For the CQ WW SSB Contest at the end of October 2001, Chris/GM3WOJ and Keith/GM4YXI will again be active as GZ7V from the Shetland Islands, a separate multiplier for CQ WW scoring. They will also be active on the WARC bands for 3 days before the contest, mostly on CW. The Shetland Islands also have a IOSA reference number SH1.

EU-016. (Lighthouse Activity) Emir, 9A6AA, IOCA Manager, informs OPDX that Luka/9A7Z and Neno/9A2FL will activate the Islands of Vrhovnjaci (Reference Numbers - Glavat Lighthouse LH-0170 and IOCA CI-144) for the first time ever and only for one day, June 22nd. Activity will be on 40/20/15 meters SSB.

EU-028. John, I2ZGA, will be signing IA5/I2ZGA from Elba Island from July 1-14th. He will be active on CW only from 80-10 meters.

EU-121. Jeremy, EJ3HB, will be operating from Sherkin Island on July 28-29th. Activity will be on all bands. QSL via WA2YMX.

EU-124. A team of "Barry Amateur Radio Society (B.A.R.S.)." operators will be going out to Flatholm Island, August 24-29th. Their activity will be on CW, SSB, PSK31, RTTY and SSTV using 160 through 70cm plus 6 meters. OPDX was told that since the Isle of Anglesey is deleted, the Welsh coastal Flatholm Island will be very much needed. The team intends to be active on at least 1 band and mode for the whole expedition. Their callsign will be GB5FI. QSL via GW0ANA CBA or Bureau.
HISTORICAL NOTE: Glyn, GW0ANA, informs OPDX that it was on this island on the May 10,1897, that Marconi made the first ever "Wireless TX and RX" across water. Then on the May 18, 1897, he made DX working England from Wales, thus the first DX in the world and the first ever IOTA expedition.

EU-175. Alvaro, CU3EE, is active during his free time from Terceira Island and can be found sometimes around the IOTA frequencies. QSL via EA7FTR.

OC-021. Erizal, YC1GTS, is active during his free from Bogor, normally working 6 meters. QSL via EA7FTR.

NEW HEARD ISLAND VIDEO. James Brooks, 9V1YC, has informed OPDX that he has updated his web site with full details of the new Heard Island/VK0IR video release: http://home.pacific.net.sg/~jamesb/vk0irvideo.htm James states,"For those that saw the original DXpedition video, this one might interest them even more, as it includes extremely rare footage of the first Americans and Australians to ever visit Heard Island. For your information (FYI) - since 1998 the film ("Outpost at the Edge") has been shown to a few million people worldwide on television, but only just made available for home video. See, we originally made two programs from the original footage I shot - one video for the hams (without all the archive footage, history, extra wildlife etc...) and one TV program for the general public (which includes some of the ham stuff too - but not all). This new release is the 'general public' version which many DXers had been asking about for years." According to his Web page, the video will be released June 30th, first mailing July 2nd.

OH9, FINLAND. OH9A will be active in this year's IARU using the same kind of equipment as the WRTC2002 competitors will use next year (100w, wires, tribander). Operators are Ari/OH1EH and Pasi/OH1MM. The log will be available from the WRTC2002 web site.

OZ & SM, DENMARK AND SWEDEN. Shigeru "Eddy", JR4QZH, will be staying with his family in Copenhagen, Denmark, and Gothenburg, Sweden, this coming July. He has already received his licenses. Look for him to sign OZ/JR4QZH/p from a very popular IOTA EU-029 between July 12-16th, and SM6/JR4QZH between July 16-19th in the Gothenburg area. No details of band/mode activity were provided.

QSL INFO AND NEWS.....
QSL REQUEST. OPDX has been asked to find out what the QSL status is on the following Andorra special HF event stations active during March 2000. These stations were asking everyone to contact as many special event stations as possible, and on as many bands. These stations were using the callsigns like c34ji, c36hk, c35pr... etc. They asked that the cards go to the Andorra club station, Box 1150 Andorra. Has anyone received their cards or have info on these station's QSLs?

QSL REQUEST ANSWERED. Regarding the VO7A, VO1W and VO1X QSL requests from last week, these were simply missed copied callsigns during the CQ WPX CW Contest. Dan, VO1MX/VO2ZZ, informed OPDX that the "Industry Canada" hasn't issued any of these callsigns and apparently has no intention of doing so! Many reports indicate that these callsign were 4O7A, 4O1W, and 4O1X. It is possible that maybe somebody heard/received the letter "V" instead of number "4". However, Matt, S53AU, provided the following QSL information for these stations, which should be: 4O7A via YU7AV, 4O1W via YZ1AU and 4O1X via YU1DX. Also, heard in the

same contest were the following stations signing the "4O" prefix:
4O1B (QSL via YT1BB), 4O1J (QSL via YU1JW), 4O7L (QSL via YU7JX)
and 4O7M (QSL via YU7GMN).

3Y0C QSL STATUS. QRZ-DX is reporting that Mac, WA4FFW, does not expect
to start sending out the 3Y0C cards until September/October at the
earliest.

FR/F6KDF/T QSL STATUS. Gil, F5NOD, reports that a batch of 1500 QSLs
have been mailed June 14th. All QSLs received before April 2001 are
now sent. He also mentioned that he now has new web pages addresses:
F5NOD Page: http://www.qsl.net/f5nod
DIFOpage : http://www.qsl.net/f5nod/difo.html
FR/F6KDF/T Log: http://www.qsl.net/f5nod/frt_log.html

H40RW QSLS. Ron, ZL1AMO, informs OPDX that the first posting of H40RW
cards will begin Monday, June 18th. He expects to catch up on the backlog
over the next 2 or 3 weeks.

Mike, W0YR, was in Europe on business (as usual), but was going to
try to squeeze in an /OH0 operation from Mariehamn, Aland Island, this
past weekend, June 16-17th. He was expected to work 20/40 meters CW only
and PSK31. If you were lucky to work him, QSL to W0YR CBA w/SASE or
IRC.

V5/DM5TI and ZS/DM5TI QSLs. Hartmut, DM5TI, informs OPDX that all QSLs
(direct and via Bureau) for his March 2001 operations have been sent
out. His complete logbook is available at the following Web page:
http://www.qsl.net/dm5ti/africa

SPECIAL EVENT. A special event station signing EN1WJP will be active
June 22-27th, to celebrate Pope John Paul's II visits to the Ukraine and
Lviv city. Activity will be on all bands and all modes. QSL via UR4WG,
either direct (P.O.Box 7072, LVIV, 79018, Ukraine) or via the bureau. A
commemorative award will be given for all those who make 5 QSOs with
Lviv's amateurs (usually the letter W follows after the prefix). A QSO
with EN1WJP is essential. Duplicate QSOs are permitted on different
bands or modes, so the special event station can be worked 5 times.
The fee for the award is 3 IRCs or 2 USD. GCR lists must be sent to UR4WG.

SPECIAL EVENT. The Montreal Amateur Radio Club has been given permission
by the Radio Amateurs of Quebec to use the station callsign VC2A at the
Dorval (Quebec) Canada Day event on July 1, 2001. The station will operate
between 1800z July 1st through 0200z, July 2nd. The station will be in
the Canada Day Contest. QSL via VE2ARC through the bureau or direct (only
for this July 1st operation) via: Montreal Amateur Radio Club,
c/o VC2A Canada Day Station, C.P. 53047, C.S.P. Dorval, Dorval, Quebec,
Canada H9S 5W4. They expect to get the QSL cards from RAQI sometime
in August or September. For more information, see the MARC News
Bulletin at: http://www.marc.qc.ca/news0132.html/

SV5, DODECANESE. Look for Mike, SV5/NA9Q/p, and Arlyce, SV5/NB9Q/p, to
be active from Afondou Beach between June 20th and July 3rd. They will

be active on SSB/CW/PSK31 on 40-10 meters with a portable antenna. QSL via homecalls.

SV9, CRETE. Ron, WB2GAI, will be on the island of Crete (EU-015) from June 29th through August 12th and will sign SV9/WB2GAI/p. Look for him on the IOTA and QRP designated CW frequencies. He will be using wire antennas for 160-10 meters, Yaesu FT100D and FT817. Activity will be CW only.

T5, SOMALIA. Baldur/DJ6SI and Tom/DL1QW, are currently active as T5X and T5W, possibly until June 21st. Most of Baldur's operations/activity will be on CW, however, Tom operates CW, SSB and RTTY. So far their activity seems to be on the following frequencies (+/- 5 kHz):
RTTY - 14082, 21080, 28080
CW - 3508, 7005, 10102, 14025, 18085, 21025, 24890, 28025
SSB - 14195, 18140, 21295, 24945, 28495
QSL T5X via DJ6SI and T5W via DL1QW.

T5, SOMALIA. Bruce, WD4NGB, announced this week that he has received his license last week for T5. He is planning a trip to Somalia and will be active in the September/October time frame. He was issued the callsign T5DX which is valid from July 1, 2001, through July 1, 2002. It was issued by the new Transitional Government that was put into office last Fall.

VP2 & V2, MONTSERRAT AND ANTIGUA. Bill, W4WX, member of the Florida DXPedition Group (FDXPG), will be operating from Montserrat June 19-22nd as VP2MHX and V2/W4WX from Antigua June 23-26th. He will be active on RTTY and some SSB, including the WARC bands. QSL via home call.

ZD8, ASCESNION ISLAND. Frank, DL8YHR, will be active as ZD8EME from August 9-13th. He is expected to be on 2 meters EME and 6 meters.

We are planning on running PSK31 at our Field Day site. We are not use to using it, and it will be kind of a playing around and testing phase for us. I know there is a lot of band that digital can be used, but is there any special frequency that you can find someone on the bands?

Not sure if this is of much help, but I also worked 1A0KM in July 2000. I sent a card to IK0FVC (via the callbook address) and did receive a card back, so he is the correct contact and does reply to (at least some) QSL requests. I believe that I enclosed 1 IRC and an SAE with the request.

Does anyone know for sure what was after the "stroke" in the call?

Was it HK5MQZ/HK0?

I heard him repeat it several times, and worked him, but he was a bit busy with the pile-up and I couldn't discern the full call. He was just on 24.945.

Thanks for your help.

I have had one since 1994. I used it 99% for CW and it is a great rig for that purpose. The QST review for it said its receiver is better than the TS-940. However, the review says that it is not the finest SSB rig. A recent "Hints and Kinks" article in QST a few months ago indicated that a number of them were made with a "floating ground" for the mike input, that causes them to be susceptible to rf feedback. I put some of those MFJ magnets right next to the mike connector and that took care of that problem for me. I have never used it on SSB other than with the hand mike that comes with it, and I suspect I will improve my audio with a better mike.

As I said, on CW, the rig is nothing short of fantastic. Even without the optional crystal filters (I have all three CW filters), it has a lot of QRM fighting features, including a variable passband from both above and below the center frequency. It has a built in memory keyer, which is really nice. I really love the radio, but you may want something else unless you are a CW nut like me.

For better and/or worse, Field Day brings out the people who never operate in a contest the rest of the year - and often, the ones who only operate HF once a year. I suppose some of them don't believe a valid callsign can start with the letter G!

Be gentle with them. Many of our best HF ops got hooked on HF at Field Day; you may have worked two or three of America's future super-ops...

Actually it took me a few minutes to get you logged - I thought I had to log something in the QTH field - so I tried "DX", and "G", and even "TN" - and it wouldn't take it unless I munged your call to G3NYY/W4. Finally learned if I left the QTH field *blank* it would accept DX calls.

Err, many of these stations are being operated by people who are not
the control operator, and so are bound by third party traffic rules.
The easy way to make sure these rules are followed is to NOT work any
DX stations.

It may be an error, but it's an error of excess on the side of
following the rules. Not everyone enjoys sailing close to the wind.

As long as the operator has privileges on the frequency he's using, he isn't
bound by the 3rd party rules and is free to work as much DX as he wants.

I suppose it's possible in some cases, the operators in question were indeed
VHF-only ops working under the 3rd party rules, but in my experience at
several FD operations most of the folks you work on HF do hold HF licenses.

I spent about 17 hours on 14.162 MHz and I can guarantee that a lot of the stations I worked were being operated by non-Extra hams (if they were even hams).

: I have been trying to get a QSL for a 1A0KM 12 meter contact in July of
2000.
: I have tried the advertised manager, IK0FVC, two times and sent a follow
up
: email with no response. Does anyone know if their is an alternate route
or
: who the operators were so I can try one of them directly?
:
: Thanks!

1677. Re: Kenwood TS850SAT

I would say that it has an excellent SSB transmit signal, 2S above radios with audio speech processor. The high-boost feature which boosts high frequencies gives a large boost in legibility under difficult conditions. Both processor and high-boost can be left on at all times without any complains of harsh processing or "tinny" signal.

Some complain that TS-850 it does not have a separate hand-key input or rx antenna. The PBT feature works great but be cautios with narrow SSB filters. In my early model, 2nd IF filters leak at -60db level, which can be ignored most of the time.

I have mine with 3 extra filters: 2.1 KHz from IRC at 2nd IF (don't get 1.8!), Kenwood 500 Hz stock at 2nd IF (OK), and Kenwood 250 Hz at 3rd IF (sharp but ringy). I also replaced the stock ceramic SSB filter at 3rd IF with a crystal one with much improved skirts. Any filter can be switched in any mode, which is great for PSK-31.

Ignacy, NO9E

Okay have spoken with a few of the contester op's in the area .. they think I need multi-radios for different bands, I have a tech and can only do 6 meters and up (freq.'s) so I was thinking on the Kenwood TS-2000, the Yeasu FT-847 or Icom 706mkIIg (something to grow into) but the locals say I should get a radio for each band segment...is there much to this argument or is it they don't trust the new radios?

My personal so far is towards the Kenwood (most power, most freq.'s I can use now, fewest add-ons needed...most are included in the radio to start with.)

what are your views?

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K2KW, KA2BZS, N3SL, W3UR & The Daily DX, K4ANA, KJ4UY, N4AA & QRZ DX, N4GN, KM6IU, K8BN, K8YSE, N6RO, K9APW, W9DC, 4N7RGH, 9A2WJ, 9A3ZG, 9A7K, DL1EK & DX News Letter, DL2VFR, DM5JBN, E21EIC, EI6FR, F5NGL, F5PBL, F6AJA & Les Nouvelles DX, IK0REH, JA3AAW, LU6EF, OH6NJ, RA0FF, SV8DTL, UA6LQ, VA3RJ and VK4AAR for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 17/June, through Sunday, 24/June there were 202 countries active. Countries available: 3B8, 3B9, 3V, 3W, 4J, 4L, 4S, 4U1I, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GW, HA, HB, HB0, HC, HC8, HI, HK, HK0/a, HK0/m, HL, HP, HR, HS, HZ, I, IS, J2, J6, J8, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T30, T5, T7, T8, T9, TA, TF, TG, TI, TK, TL, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V3, V5, VE, VK, VK9N, VP2M, VP2V, VP5, VQ9, VR, VU, XE, XU, XW, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZB, ZC4, ZD7, ZD8, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity".

5R, MADAGASCAR (Callsign Change). Fidy, 5R8FV, General Secretary of the Madagascar Amateur Radio Association (M.A.R.A)., reports that Albert, 5R8O is now signing 5R8GZ. His old callsign 5R8O was a special callsign issued by the Malagasy Authority Transmission because his station was operating from Antananarivo Gendarmerie County.

EX, KYRGYZSTAN. John Janssen, K4ANA (ex-KZ5RQ, WA4WKY, C9RJJ, C91J and KH2/K4ANA) is now living and working in Kyrgyzstan. He has been on the air signing as EX/K4ANA. Anyone needing John's card from EX-land can QSL via the #4 QSL bureau to K4ANA or via the #2 QSL bureau to W2PS. Direct requests can be mailed to: Ben Bond, W2PS, 55 Eberle Road, Latham, NY 12110 (w2ps@nycap.rr.com for E-mail requests).

HK0M, MALPELO ISLAND. Reports now indicate that Jairo/HK5MQZ and Hiro/HK5QGX will take down their antennas (from on top of the mountain) and end their operation as HK5MQZ/0M and HK5QGX/0M on June 25th around 1300z. However, Jairo, HK5MQZ, was heard saying that they hopes to set up dipole(s) again halfway down the mountain and may be on one or two more days. The operators will leave Malpelo Island on June 27th. QSL HK5MQZ/0M to: Jairo Vargas, P.O. BOX 10862, Cali, Colombia. QSL HK5QGX/0M via JA0MGR.

IOTA NEWS .....
AS-149. The RK0FWL teams plan to visit Moneron Island in August. It is the first Marine National Park in Russia. If interested in joining this DXpeditions, please contact Ken, RA0FW at: prokushev@stmobile.ru
Ken is the team leader of this operation. There may be a possibility of undersea sail with an aqualung. For some information on the island (map and photos), check the RA0FF special Web page at: http://dx.bgtelecom.ru/moneron/island.html

EU-036. Uwe, DG1RUG, will be active from Averoya (Grid JP33), August 9-22nd, as LA/DG1RUG. His activity will be on 2 meters SSB (144.180) and MS (Perseiden) 6 meters. QSL via homecall.

EU-057. Operators DL2SWW, DL2RTK, DH7NO, DH1LA and DL2VFR will be active as DL0KWH from Hiddensee Island (GIA O-05) during the IOTA Contest. Activity will be from July 27-29th. Operators will be active before/after the contest with their own individual callsigns.

EU-107. Didier/F6ELE and Bertrand/F6HKA reportedly signed homecall/P from Les Sept Iles on June 23-24th. They were expected to be active on SSB and CW on all bands.

EU-122. The WestNet DX Group will be active from Rathlin Island now through Tuesday June 26th. Their callsign will be MI/EI7NET/P. QSL via EI2GX.

EU-129. Eddy/DM5JBN and his son DO1CSH/DN1CR will be active from Usedom Island, July 26-31st (this includes the IOTA Contest). Activity will be on 80-2 meters on CW, SSB, PSK31 and RTTY. QSL via DM5JBN.

EU-136. Emir/9A6AA and Ewald/9A5ID (DK3ID) will activate the Island of Unije (IOCA CI-135) for only one day, June 25th. Activity will be on 40/20/15 meters SSB between 0800 and 1200z.

EU-170. Kresimir, 9A7K, will be active as 9A7K/p from Pag Island (CI-82) during the period of July 1-10th. Kresimir informs

OPDX that he will also activate 2 lighthouses located on Pag Island, Stara Novalja CLH-135 and Zaglav CLH-195. They are valid for the Croatian Lighthouse Award. QSL is OK via the bureau or direct to 9A7K. For more information on this DXpedition and the Croatian Lighthouse Award, check the the following Web page at: http://www.qsl.net/9a7k

EU-174. Look for Panos/SV8DTL and his wife Evi, SV8DTZ, to be active as SW8T from Thassos Island, July 28-29th. They plan to operates on all bands 80-10 meters. QSL via home call.

EU-184. Operators OH6HJE, OH6UV, OH6MTG and OH6NJ will be active as OH6AW/8 from Hailuoto Island, July 29th and August 4th. QSL via OH6AD. Operation will be on HF, 6m, 2m and 70cm. A Web page is available at: http://www.qsl.net/oh6mtg/hailuoto.html

NA-083. Nat, WZ3AR/4, will be active from Chincoteague Island, VA (USI VA-002S), from June 25-30th. This operation also counts for the relatively rare Accomack County, VA, as well as ARLHS USA-021. Activity will be kept nearly exclusively to the IOTA SSB frequencies of 28460, 24950, 21260, 18128 and 14260 +/- QRM with some minor trips to the ARLHS and County Hunter frequencies. Nat will try and spot himself on DX Summit whenever he's operating. All QSLs are via WZ3AR either direct or through the bureau.

OC-182. (Rare IOTA/Possible New Entity!) The Pitcairn Island Amateur Radio Association announces that it will undertake an IOTA DXpedition to Ducie Island, with operations to begin at 0000z on November 16, 2001. This operation will utilize three stations operating around the clock, with emphasis on providing contacts to as many different individual stations as possible. The leader of the DXpedtion is well known operator Tom Christian, VP6TC, president of PIARA. Other DXpedition members are VP6DB, JA1BK/VP6BK, JA1SLS/ex-VR6BB, JF1IST, and three other operators to be named later. This international DXpedition will be attempting to provide worlwide coverage for this rare IOTA. Satellite logchecking is planned by the team. The QSL Manager will be Garth Hamilton, VE3HO, and the Pilot station will be Dr. Bill Avery, K6GNX. Further information will be provided as the date approaches.

NEW LIGHTHOUSE ACTIVATED. Bernard/F5LRC and Phil/F5OGG were expected to activate a new lighthouse called "Pilier" (LH 0622) on June 24th for the World Lighthouse Award. Their expected callsigns were F5LRC/P and F5OGG/P. QSL via home callsigns.

OH0, ALAND ISLAND (YL Ops). According to a press release by Tim, N4GN, a group of YLs from Finland and Sweden have "madly been bitten by the DXpedition bug, and plan to be active from Aland Islands as OH0YLS, June 29th through July 5th. Operators will be Raija/SM0HNV, Eine/SM0UQW and Marjatta/OH1MK. Look for them on 14185, 21285, 28485 kHz and CW

occasionally. Another station will be active on 40 and 80 meters. The special feature of this operation is that all direct QSLs will be answered from Aland Islands using attractive Aland postage stamps. You can take a look at the Aland Islands on the Web site: http://www.aland.fi Please note their specific location in the island group of Brando (IOTA EU-002). QSL via the address: Marjatta Kaistila, OH1MK, Nahvontie 5B1, FIN-25410 Suomusjarvi, FINLAND.

QSL INFO AND NEWS.....
QSL REQUEST. OPDX was asked to find out what the QSL status is on the following Andorra special HF event stations (c34ji, c36hk, c35pr... etc.) active during March 2000. Well, OPDX was informed that the Andorra URA stated that they have some 16,000 QSLs and 1000 special certificates to process. It appears the cards are awaiting manpower to get them answered.

3B6RF QSL STATUS. Steve, N3SL, reports: "The QSL for 3B6RF, will be a full color, trifold job, and it made it to the publisher in time (allegedly) to be printed (35,000 copies) and delivered at Friedrichshafen the last weekend in June. According to plans in place today (always subject to change, as we so painfully and expensively discovered), Kenton Dean, HB9DOT (also NK6F), is due to fly back to the U.S. for a visit on July 2nd (the Monday after Friedrichshafen). He will bring 3000 cards with him (to California) and immediately ship them to me. IF all this goes according to plan, the first cards should hit the postal service by July 15 or so.

CROATIAN INFO. Denis, 9A3ZG, informs OPDX that the official URL address of the Croatian Amateur Radio Association is now: http://www.hamradio.hr For the moment, everything is only in the Croatian language. The most interesting thing on the Web page is the news about the future and all past activities from all islands qualifying for the "Croatian Islands of Croatia Award" (IOCA). Also, if you click on the callbook on the main menu, and then in the appropriate field write any 9A callsign, you will get the address you are interested in. Denis states, "Every suggestion is welcome. I am the chief editor of the Web page and Kreso, 9A5K/K5CRO, is the webmaster. The E-mail address to contact them are: 9a3zg@hamradio.hr or 9a5k@hamradio.hr

Claude, F5PBL, informs OPDX readers that he has received the 3W2KF cards from the printer and he has just started answering the direct requests. Claude apologized for the delay which was due to his participation in the JW0PK expedition. He will do his best to answer all direct QSLs which have been received as of June 24th. The correct address to use is: Claude TERRIER, 18 allee du Mail, F-92360 Meudon-la-Foret, France.

CORRECTION: Goran, 4N7RGH, reports that QSLs for 4O1X go to YU1NW.

Daniele, IK0REH reports that cards for SV8/IK0REH/p, June 9-20th, from Zakynthos Island can be sent to IK0REH via the bureau. Those who need a direct card should use Daniele's new address: Daniele Casini, P.O. Box 31, 06010 Citerna - PG, Italy. Cards will be ready in 45 days.

Logs are available at: http://digilander.iol.it/ik0reh

Alan, VK4AAR, reports that Rex, C21RH, will be making periodic trips to Nauru and has asked Alan to look after his QSL cards. QSL to VK4AAR: Alan Roocroft, POB 421, Gatton 4343, Australia.

Champ, E21EIC, reports he is the QSL Manager for the following:
E20HHK/p (AS-053) -- QSL via E21EIC
HS4BPQ -- QSL via E21EIC

John, K4ANA, reports that he expects to have the last of the KH2/K4ANA bureau requests (approx. 700-800) in the mail as of last week.

Raul, LU6EF, GACW Coordinator, reports that electronic confirmation for GACW's past expeditions can be asked for via the "eqsl.cc" Web page. These include LU7X, L8D/X and LU3ZI, but others will be included in the future.

UPDATE/CORRECTION. Dr. Dima Tonkopi, UA1ACX/PJ5, informs OPDX that Vladimir, RV1CC, is the QSL Manager for ONLY his ex-USSR operations. All QSL information is availabe on his Web page at:
http://www.qrz.com/ua1acx
He also mentions that he will NOT confirm any cards via bureau, except his ex-USSR Republics operations.

Ivan, UA6MF, is the QSL Manager for the following stations: 9X1A, A61AR (op. Alex), R3RRC/6 - (RR17-02), R100P - (RR17-04), UE6ADI - (RR17-01), UE6ADI/p - (RR17-01), UE6LRD, RV6LNA, 9X/RV6LNA, A71/RV6LNA, UK6LAL, UZ6LWJ, RK6LWJ and UV6LUA. He has all the logs and QSLs. QSL to the bureau or direct to: Ivan A. Gudima, PO Box 4102, 344103, Rostov-on-Don-103, Russia. ADDED NOTE: If you send QSLs direct, please use REGISTERED MAIL or Scotch tape to prevent mail theif. Ivan's E-mail address is: ua6mf@dx.aaanet.ru

SPECIAL EVENT. Gary Capek, K8BN, Event Chairman for Central Arizona DX Association (CADXA) informs OPDX that the members of the Central Arizona DX Association will conduct a special event operation honoring the late Senator Barry M. Goldwater on October 20 and 21st (0000z Friday through Sunday night local, 0200z, i.e. 50 hours). The callsign used will be the famous K7UGA. Operation will be on both SSB and CW, 160-6 meters. A special commemorative QSL card will be available for stations that send direct requests. QSL via the club station trustee, KC7V, at 6545 E Montgomery Rd., Cave Creek, AZ 85331, for commemorative QSLs, or via the W7-Bureau. Bureau reply QSL cards may not be the same. Any and all proceeds from this event will go to the CADXA Scholarship fund administered by the ARRL. As such, donations are appreciated. Please direct your questions or comments regarding this press release to: Gary Capek, K8BN, Event Chairman, CADXA, via his E-mail address: k8bn@arrl.net

SPECIAL EVENT. The Dragon Amateur Radio Club celebrates the "Coast Wireless Stations Centenary" with amateur radio station GB100HD at Holyhead "HD". Look for GB100HD to be active on 3537, 3773, 7037 and 7073 kHz (+/- QRM). Reference numbers are: WAB SH24, Loc. IO 73 TE, NGR SH 244-828 and

IOTA EU-124. Part of the GB100HD operation will take place from the operating room used in 1901. The Dragon Amateur Radio Club (GW4TTA) of Anglesey is one of ten radio clubs around the coast of UK and Ireland, and is collaborating to make it possible for this unique centenary celebration of the 1901 Marconi stations. Operation will be on 80 and 40 meters, SSB and CW, on June 30th and July 1st. "Dedicated QSL from each station, via bureau." A Certificate to commemorate the centenary is available on request + certified copies of log showing QSOs with a minimum 4 participating stations qualify + voluntary contribution to RNLI funds. Apply to GW3PRL.

ST, SUDAN. Two stations were active this past week. Zedan, JY3ZH, was signing JY3ZH/ST2. His activity was on June 20th on 18150 kHz around 1615z. Also, active was Sid, ST2SA, on June 22nd, on 21230 kHz around 1500z. QSL via DJ9ZB. No other details are available on these two stations. WFWL!

T5W AND T5X QRT. Baldur/DJ6SI/T5X and Tom/DL1QW/T5W went QRT June 21st around 1000z. QSL T5X via DJ6SI: Baldur Drobnica, Zedernweg 6, D-50127 Bergheim, Germany. QSL T5W via DL1QW: Thomas Lind, Saturnstr. 1, D-44579 Castrop-Rauxel, Germany. Some information about T5-land and their operation could be found on the following Web page at: http://www.qsl.net/dl1dcy/t5.html

V31, Belize (IOTA Activity). Rick/W7AV and Darleen/K6JEN will be on Ambergris Caye (NA-073) as V31TE now through June 29th. They will be active on 80-10 meters CW/SSB/PSK31. QSL direct to W7AV.

V4, ST. KITTS AND NEVIS. Lawrence, KJ4UY, will be traveling back to St. Kitts and Nevis on July 19th. He will be operating from V44NK's on Nevis from July 20th through July 31st and also operating the IOTA contest. His activity will be 160-6meters, with the primary bands being 20 meters through 10 meters. Operations will be on SSB, CW, RTTY and maybe PSK31. During his second week, he is expected to be joined by RB, WB4FNH, his proposed callsign to be V47FNH. Please QSL V47UY via KJ4UY and V47FNH via WB4FNH with SASE for USA stations and SAE plus IRC or USD for return postage. They will be returning to the USA on August 1st.

V7, MARSHALL ISLANDS. Bruce, AC4G, is expected to be active again from Kwajalein signing V73CW, June 26-30th. He will mainly be active on 40 and 6 meters, also AO-10. QSL via AC4G.

VP5, TURKS AND CAICOS ISLANDS. Dick, K9APW, informs OPDX that he will be here beginning Thursday evening, August 2nd, through Sunday morning, August 12th, as VP5/K9APW from North Caicos Island (NA-002), and NOT Providenciales! He states, "While this is the same IOTA, it is a different grid square for the 6 meter fans." His operations will be from the villa owned by K4ISV on Whitby, North Caicos Island. His main emphasis will be on 6 meters, hoping to give out not only a new DXCC for many USA and EU 6 meter fans, but also a new grid square for the deserving. Operations will be CW/SSW on all bands, 160 through 6 meters. QSL to home call, CBA, which has been good for past 25 years.

W1AW/6 (Special Activity). Excerpts from a press release by Ken, N6RO, state that for 24 hours, from 1200z on July 14, to 1200z (that's 8 AM Eastern time, 5 AM Pacific, etc.), July 15, 2001, the ARRL Headquarters station callsign will be activated from CALIFORNIA as W1AW/6 for the duration of the IARU HF World Championship Contest. Prominent contest operator teams in Northern California Contest Club territory will make this unique station callsign available to the world, and attempt to top the IARU Headquarters competition category in this event. Activity will be on CW/SSB on 160-10 meters. Look for W1AW/6 near the following frequencies for USA/DX:
CW - 1818/1833, 3538/3508, 7038/7008, 14038, 21038, 28038
SSB - 1848, 3838/3798, 7238/7158, 14238/14158, 21338, 28338
A certificate will be awarded to each station achieving a QSO with W1AW/6 on 8 of the possible 12 band modes for North American stations, 6 band-modes for those outside NA. Stations working W1AW/6 on all 12 band-modes will receive a special endorsement on the certificate. More details on the awards and the operation can be found at: http://www.nccc.cc/
Web site includes lots of hints on "how to work W1AW/6", including propagation information, best times on the low bands, etc. The IARU Contest rules are available on page 111, April 2001 QST. or on the Web page at: http://www.arrl.org/contests/announcements/rules-iaru.html
Please QSL via ARRL. Questions by hams should go to N6RO at: n6ro@arrl.net

1684. Yaesu FT-50R

Newsgroup: rec.radio.amateur.dx
Date: 2001-06-26 08:32:47 UTC
From: Peter Jansson <e96pj@efd.lth.se>
Message-ID: <993544369.472830@proxy2>
Source record: 16689

Hello!

My name is Peter Jansson an I live in the Southern of Sweden.
I have just bought a Yaesu FT-50R.
I now have some troubles with the repeatershift.
It seems to work fine on the 2m band with a negative shift of 0.6MHz.
But, on the 70cm band it fails with the Swedish bandplan. We have a
negative shift of 1.6MHz. The FT-50R gives me a shift of 7.6MHz. The
OUT frequencies of the repeaters lies in the range of 434.600 MHz and
434.975 Mhz. As mentioned before, the shift shuold be 1.6MHz negative.

Anyone know if I can program the device to set this repeatershit for these
frequencies only? Or any other good solution?

Thank you for your help!
Peter Jansson

Could be some of us Extra-lites :-) Newly minted extras and generals.

Been on HF about a little more than a year now. I *think* I'm operating
correctly. My main trouble is remembering the other party's call. In
a contest I just listen to the next CQ or contact to get the call I just worked.
That way I don't waste their time.

Any hams in North Dakota? It's the only state I haven't made a QSO yet
in my informal "worked all states" (informal in that I haven't collected the
cards and probably won't put in for the wallpaper, I know that I (will) did it).

Worked K5FD, "kilo five field day". Must be a vanity call and field day
contest nut.

No the ones that I refer to were obviously kids being coached from the
bleachers.

Whatever works. What you're doing is fine if you knew who you were calling in
the first place.

I know a couple of DXers that tell me that they just cruise the pileups and drop
in their call. When they get an answer they go check the packet cluster to see
who they worked. I personally don't use packet radio. They are on the "honor"
roll and I'm not.

>
>Any hams in North Dakota?

There are at least 7 of them <g>. That's the number I worked during FD.

>It's the only state I haven't made a QSO yet
>in my informal "worked all states" (informal in that I haven't collected the

Fine by me. I've been licensed for 43 years and still don't have a WAS award
even though I've worked, and confirmed, it many times. Gotta get the EME
antenna back together and get the last ten for 2M, then maybe I'll apply <g>.

You don't need a separate radio for each band or band segment. I use an
ICOM 746 for 80 through 2 meters (100 watts). The Kenwood will do fine.
NOTE: It's a bit too pricey for my retired budget!

After much research and deliberation, I too decided on the Icom 746 and haven't regretted it! It's a great radio for the $. If you want 440, the Yaesu 847 might be a good choice as well. Otherwise, I highly recommend the Icom 746.

Hi folks,

I have found a really beautiful and useful software for you:

http://xplanet.sourceforge.net

Works with all Unix/linux systems and can also be used in a
Win-environment, provided you have the necessary tools to do the compile
on your own (cygwin does that job). On the software's homepage you will
also find a wide variety of maps for use with this program; mine is a
hi-res one with 1600x1200 downscaled to fit my 1024x768 notebook screen.

The installation is really trivial; a ./configure && make && make
install should do the job and you will be rewarded with the perfect tool
to do your grayline calculations in the future.

xplanet uns on my gnome desktop's root window and is updated every ten
minutes.

A friend of mine has written a perl-script to use the marker function of
the software and I have adapted it to display all 333 DXCC countries
with their prefixes on the map. Edit the marker file and you can adapt
it in such a way that it reflects your worked countries in green and
needed ones in red.

Screenshots of my desktop can be viewed here:
http://www.qsl.net/df5jt/screenshot-large.jpg (620k)
http://www.qsl.net/df5jt/screenshot-small.jpg (100k)

The marker file with the prefixes and their locations is here:
http://www.qsl.net/df5jt/earth
Edit as you wish.

And the script for the automatic start with gnome is here:
http://www.qsl.net/df5jt/xplanet-gnome-start
You will have to edit your path and possible the font settings. It is
just meant to give you an idea of what you can do on the command line.

Have fun!

Hi Folks

Does anyone know of a web site where I can print out a listing of DXCC countries, with a chart including all the HF bands. You know the thing, where you can tick off each country worked on each band.
Just thought I'd ask before I started making myself one, in case someone had already done it.

cheers all
Jack

Check this site, there is a nice Microsoft Excel sheet to track band mode
etc and it gives you a summary sheet too.

1714. Questions About A 2-Meter Dipole Antenna

Newsgroup: rec.radio.amateur.dx
Date: 2001-06-29 19:08:09 UTC
From: Eldridge22@safe-mail.neT
Message-ID: <88c06554.0106291108.46d5ee2f@posting.google.com>
Source record: 16619
Cross-posted to: rec.radio.amateur,rec.radio.amateur.antenna,rec.radio.amateur.dx

I do not have my license yet, but there is a burly blacksmith in my head, pounding ideas and concepts into my brain, whhich has led me to some questions:

1) How do I make a dipole antenna for the 2m band? In theory, it can be done, but I need to know...

2) What ohm level should I have as far as coax? I'm guessing 73, but I don't know.

3) Will it be good for DX? (Not on EME or OSCAR satelites, since it's obvious those will be good for DX)

1715. Re: Questions About A 2-Meter Dipole Antenna

Take an asperin for the blacksmith. You make the 2 meter dipole just like any other dipole. Two conductors about 19 to 20 inches long seperated by about half an inch. Trim for lowest SWR.

The coax should be 70 ohm stuff, but there is no problem using the 50 ohm stuff as the swr will be around 1.5 to 1. By the time you get to the rig the swr will almost be 1:1 with the 50 ohm stuff unless you have very low loss coax.

As far as DX , on two meters it depends on what you mean by DX. The 2 meter band is not very good for working DX on a regular basis. It is possiable to use ssb and a good beam and a few hundered watts and work to about 200 miles or so regulary. It will open up to about halfway across the country very seldom but it will. I have worked Flordia and New York from North Carolina on 432 using 25 watts on two ocasions using a ground plane but that is very rare. While I have worked Flordia to Texas to the New York area from NC, I don't expect to do it very often. I usually use about 400 watts to an 8 element beam to do that with. Seems that I do get into the Cape Cod area much more than anywhere else from here.

If you want to work some DX, then get on 6 meters before the summer is over. YOu can work DX on many days now using simple antennas and low power.

1716. BQ9P QSL status

Newsgroup: rec.radio.amateur.dx

Message-ID: <9hj0bcoqv1@nntp9.atl.mindspring.net>
Source record: 16622

Well, hopefully some of you have found the W3HNK QSL card in your mailbox. I've about finished that task...and now on to BQ9P. Here is the status:

I expect the BQ9P QSL card to find it's way to my doorstep on/about July 13. However, due to some family commitments, I'm going to be a bit slower than normal in getting these out, as I have some things scheduled in July that will keep me away from the QSL cards (yes, even managers take a vacation now and then!)

I will begin processing the cards immediately, but as I have some 6500 envelopes to fill, I don't anticipate having the cards out completely before mid-august. I don't think that will create any award submission problems, and I will do the best I can to improve on this schedule.

When all direct cards are out, I'll post a note. Please don't email asking me if I have your card, if I've mailed your card, etc...until that time. Someday I'll post a picture of what my 'process station' looks like, but with perhaps 12,000 envelopes in the 'queue', I can find yours, but it takes an amount of time that I'd rather devote to sending cards!

73 es DX is!

FLASH! I just had a brief contact to ND last night! That completes my
informal WAS. Checked into the Century net on 40M and did it there.
And my antenna is poor on 40M. Now I realize this news ain't gonna set
the Internet on fire, but it did make my day...

1722. Efficiency of 'No Radial' Verticals

Newsgroup: rec.radio.amateur.dx
Date: 2001-07-01 07:25:55 UTC
From: John <j@warburton.nospam.prestel.nospam.co.uk>
Message-ID: <9hmjaifqn1@phys-ma.sol.co.uk>
Source record: 16627

I use a ground plane antenna on 40mtrs but am restricted by the number of radials I can get down (the XYL cherishes the lawn!). The vertical element is slightly loaded, overall length about 27feet. I currently have two buried radial wires and can probably get a further four down. The antenna always gets me reports from DX stations a few S points lower than those I give them, presumably due to its inefficiency (i.e. lack of radials).

My question is: Will any of the 'no radials required' verticals eg. Cushcraft R8 or Hy-Gain DX77 type verticals provide a more efficient solution? I would be interested in hearing comments.

Thanks
John, G4IRN.

Thanks Steve and ..

I think you've just taught something else by posting this!

Confirm, if you would, the thought I just had from reading
it if there are *TWO* or more different station's cards
any given QSL manager is going to get from you!

I bet you'll agree that *EACH* different station involved
should be sent as a separate envelope, as a stand-alone
reguest, with separate return capability and postage
or return consideration!

As well, it won't hurt to mark EACH call an envelope is
for, on the OUTSIDE of the envelope, so you can spot it
quickly as a request that is, perhaps, different from
25,000 cards now all coming in on Tickle Tongue Island!

Otherwise, logic says this might result in a card for one
of them arriving a lot later! It would simply result as
any now-available card is held in the single envelope until
all the process has cycled for the second later card not
available until ... !

Same thing you get, in reality, when you work via the
'bureau' and wait until (X#) of cards have accumulated
there! Tickle Tongue Island is there, but not four of
five cards needed for the 'pack' ..

Is this the way real-life works? And, yes, that despite
the added cost for overseas work, even as bad as it is now!

There's First Class and Coach here too?

I'll gladly take the flack here for saying I didn't realize this after
50 years of chasing DX until you posted your comment!

It never occurred to me that a 'dedicated' QSL manager for multiple
operations has to make the same decisions as a general bureau
until you posted! I'll send you two envelopes tomorrow! Grin!

--> Sleep well; OS2's still awake! ;)

1724. Re: BQ9P QSL status

Newsgroup: rec.radio.amateur.dx
Date: 2001-07-01 19:49:18 UTC
From: Steven Wheatley <ku9c@arrl.net>
Message-ID: <9hnuun$bs0$1@nntp9.atl.mindspring.net>
Source record: 16629

Mike, I manage about 100 different calls. While I do accept multiple calls in an envelope, I recommend that, if at all possible, the station send (it's ok, and I WOULD PREFER HONESTLY, if all of this were sent to me in ONE sase).....this is the 'ideal situation'

QSL cards or a list of qsos desired to be confirmed
SAEs for each callsign (note, SAE, not SASE)
sufficient postage for either all SAEs,

The reason for not sending SASEs...but SAEs and stamps or greenstamps or whatever, is it allows me to use the extra stamps, etc for bureau mailings, etc. Saves me cutting the stamps off and attempting to reuse them. In the world of self-adhesive stamps, this has been painful...HI.

It allows me to make the best decision of how to get the cards back to you. If you send 10 calls and 10 sases, you may get back 3, 6, 9 even 10 envelopes. But it tells me you're allowing me to make some decisions.

Now, if you send me ONE SASE with 10 calls, your envelope goes thru the process 10 times, and can get stuck in a LONG queue waiting for a log to arrive. It's tough for me to do much, and with one SASE, you've told me you're quite willing to wait.

Most managers will deal with whatever is dealt with them. However, I'd ask someone to imagine several thousand envelopes, several calls, several logs, several piles of blank qsl cards, and the fact that a manager has a life beyond doing YOUR qsl.....when you send one in.

Oh.....those extra stamps.....I take them to the local A&P and pick up a six pack now and then! RIGHT! Actually, when you get a card from KU9C via the bureau, or a pretty full color card with your SASE, or one of the stations I manage is on a new band/mode with some equipment that was sent (doing 6 meter cards for one of my CO guys as I type...).....THAT is where the extra stamps went....

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 24/June, through Sunday, 1/July there were 229 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 4J, 4L, 4S, 4U1I, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HK0/m, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T2, T30, T32, T33, T7, T9, TA, TF, TG, TI, TK, TL, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, VE, VK, VK9N, VP2M, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XT, XU, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity".

3W, VIETNAM. Michal, 3W7TK, has been very busy lately on 15 meters CW/SSB. Check between 1245 and 1830z on or around 21255 or 21012 kHz. QSL via OK2HWB.

9H, MALTA. NODXA's good friend Holger, DL7IO, informs OPDX that he is happy to announce their first DXpedition with the newborn Xenia. Holger and the girls (Birgit/DL7IQ, Saskia and Xenia), along with Olaf/DJ7TO left for Gozo Island (EU-023) on Sunday, July 1st, and by the time you read this, they should be active as 9H3O for the next two weeks (July 15th). Birgit/DL7IQ will use her 9H3TZ. They plan to have two stations up with legal power, directional antennas for 20-10m and verticals/dipoles for the lower bands. Activity will be on 160-10 meters, mostly CW. Their main activity will take place between July 6-9th. They got permission to use the location of the Gordon Fanal Lighthouse on Gozo (130m over NN, 360 degree view) during that time and will do so with both stations. QSL route is of course via DL7VRO. ADDED NOTES: As the editor was putting the final touches on the bulletin, 9H3O was heard active on 17/15/12 meters between 1200-1600z. Check around 18080, 21007 and 24900 kHz.

CONTEST ANNOUNCEMENT/CHANGE. Rob, HK3CW, Director of Contests and Awards of the Liga Colombiana de Radioaficionados (LCRA), informed OPDX that this year's Colombian Independence Day Contest will be held on July 21st, 0001-2400z. This has not been publicized. The contest committee decided to change the date and rules to make it more competitive for DX to work the contest and avoid other DX contests that occur on the same date. Details can be found on the Web page: http://hk3cw.freehomepage.com (Sadly it is in Spanish)

DXCC NEWS RELEASE (June 26, 2001): Bill Moore, NC1L, DXCC Manager, has announced the following: DXCC is pleased to announce the addition of the 12-Meter Single Band DXCC award. Applications for this award will be accepted beginning July 2, 2001. 12 Meter DXCC certificates will be dated but not numbered. 12 meter credits will not count toward the DeSoto Cup competition until October 1, 2001, but they will be included in the DXCC Challenge totals. If you do not know what credits you have on 12 meters, you may contact DXCC for a copy of your record. Note: the 12-meter band was added to the printout on January 1, 2001. If you received a copy since then, you already have a copy of your 12-meter credits. This will help avoid duplicates and additional costs. If you have web access and can handle ADOBE (.pdf) files, contact DXCC at dxcc@arrl.org for a copy of your record. If you do not have web access, please send a note to DXCC along with $2.00 for postage and handling. For further information, please contact DXCC at dxcc@arrl.org

EY, TAJIKISTAN. This is the week that a group of mountaineers and EY amateurs are planning an expedition to the Sarez Lake. The group will climb a nameless mountain (5800m) and name it "Radio Amateurs Peak". The operators will be Vladimir/EY8HB, Nodir/EY8MM and Faruh/EY8AV. However, Faruh will stay in the base camp and coordinate all the activities while Vladimir and Nodir climb the mountain. Once the expedition team reaches the peak, the two operators will use the special callsign EY1ARP (Amateur Radio Peak) only for about one or two hours. For more information on this expedition, check the Web page at: http://www.qsl.net/ey8mm/ey1arp.html

HB0, LIECHTENSTEIN. Karesz, HA8EU, will be active from here now through July 3rd. Activity will be pon 80-10 meters, primarily on CW with some

SSB. QSL via HA2NM, direct or Bureau.

IOTA NEWS.................
AF-NEW. Hrane, YT1AD, is preparing a DXpedition to Galite Island for July 5-12th. Possible callsigns may be 3V2GI or 3V8GI.

AS-056. Masa, JA6GXK, Masa will be active from Danjo Archipelago (Meshima Island), on the following dates: July 13-24th, August 14-24th and October 5-16th. This is not a DXpedition, and he will be active in his spare time. Suggested frequencies are: 7 MHz, 14260 +/- 10 kHz or 21260 +/- 10 kHz. QSL only via the Bureau.

EU.174. The EDR Vestfyn branch will participate in the annual VHF field day from July 3rd, 1400z to July 4th, 1400z, using the callsign OZ5VF/P from JO45XG near Ebberup on the Island of Fyn. Activity will be on or around (+/-QRM) 50.173 MHz, 144.173 MHz or 144.273 MHz and 432.173 MHz. The team will consist of OZ4CQ, OZ6CQ and OZ6OM/OZ7M along with others. All are qualifed VHF operators.

EU-184. (CORRECTION) Operators OH6HJE, OH6UV, OH6MTG and OH6NJ will be active as OH6AW/8 from Hailuoto Island now through July 5th (not July 29th-August 4th as reported last week). QSL via OH6AD. Operation will be on HF, 6m, 2m and 70cm. A Web page is available at: http://www.qsl.net/oh6mtg/hailuoto.html

NA-031. Mark, AA1AC, will be active during the upcoming IOTA contest from Aquidneck Island, Rhode Island, as AA1AC/1. QSL to home callsign.

NA-076. Fred, KF9YL, will be operating from Cedar Key, FL, during the 2001 IOTA Contest. QSL direct (PO Box 291891, Davie, FL 33329-1891) or via the bureau.

NA-148. Tony/WF1N and Lou/W1DIG will be on the Thacher Island, July 27-29th. Operation will start around 1500z Friday and end about 1800z Sunday. Look for activity before and during the IOTA Contest. They will use a tribander and amp on/near the usual IOTA frequencies, (40m, 7260 +/- at the top of the hour), SSB. QSL to home callsigns direct (SAE and postage, please) or Bureau. Tony can be contacted at: megahertz260@mindspring.com

SA-052. Pablo/OA4DJW, Sergio/OA4DKC and Manuel/OA4AHW report that their scheduled date for the San Lorenzo Island operation had to be postponned possibly until the last weeks of August or the beginning of September. The reason for the change of date is due to the delay of the permission paperwork, licenses and some logistic problems. They state that they are very enthusiastic about this small DXpedition, however big for them, project. They are trying to fix all the problems as fast as posible and trying to also increase the crew so they can work more people.

JW, SVALBARD. Remember to look for Tom, LA4LN, as JW4LN on Spitsbergen from July 6-23rd He is actually working there and can only operate on CW on 40/30/20/6 meters during his spare time in the evening hours. During his stay there he will also visit Bear Island.

LIGHTHOUSE ACTIVITY.....
(Lighthouse/IOTA/Special-Event). To celebrate the 10th anniversary of the Croatian Navy - HRV.Ratna Mornarica, look for special event station 9A10HRM to be active from the lighthouse on Brijuni Islands (EU-110, CLH-101, CI-139 and WLH-1651). This operation is organized by Kresimir, 9A7K, along with 5 to 7 operators of the Croatian IOTA Hunters Group and Members of ARC "Koprivnica". Activity will be July 27th through August 3rd (with a possibility of 2 or 3 extra days). Operations will be on HF, UHF, WARC and 6M. Also, look for 9A0LH to be active during the IOTA Contest July 28-29th. Hams interested in these DXpeditions and the Croatian LightHouse Award can get all the details on the following Web page at: http://www.qsl.net/9a7k
QSLs for 9A10HRM and 9A0LH go to 9A7K: Kresimir Juratovix, P.O. Box 88, HR-48001 Koprivnica, CROATIA.

The Orkney Amateur Radio Club will be active as GB5RO from Hoy High Lighthouse on the Island of Graemsay for Lighthouse Weekend, August 18-19th. Graemsay is OR-20 for the Islands of Scotland Award, and EU-009 for IOTA Award. Operation is from mid-afternoon on the 18th until 12 noon on the 19th. QSL to GM4DZX.

(Lighthouse/IOTA/Special-Event). Brent, KO4PY, reports that for the IOTA Contest, they will activate Bodie Island Lighthouse (North Carolina - Dare County near Oregon Inlet - IOTA NA-067). This is where Wrights' First Flight (Centinneal of non-powered glider flights of 1901) took place, and the special event callsign W1F (Wrights' 1st Flight) will be used during the IOTA Contest. Setup will take place July 27th, and possibly be on the air about 1600z (as KO4PY and N4YDU). For the IOTA contest period only, they will operate as W1F on 10, 15 and 20 meters. Possible overnight 40 meters operation may take place, depending on local conditions. QSL for W1F is KO4PY.

On August 3-4th, look for special event W0MTL - "Mark Twain Memorial Lighthouse", from Hannibal, MO (ARLHS USA-915). A Photo QSL and certificate will be available. Send QSL card and a 9x12 SASE with 55 cents postage to W0MTL CBA. This is a joint special event by the Hannibal, MO ARC and Western Illinois ARC.

Members of the Castalia Island DX Association and the Tar River ARC of Rocky Mount, NC, will participate in the International Lighthouse Weekend August 18-19th with an operation near the Currituck Beach Lighthouse (USA 212) on the Outer Banks of North Carolina. The callsign for the operation will be K4UP. QSLs go to K4UP. More information can be found at: http://www.qsl.net/cidxa/currituck.html

New Lighthouse To Be Activated! Mike, UA0MF, will visit the "Skryplev" Lighthouse (LH 1309) on July 2nd from 0200-1200z for a reconnaissance before the main one week expedition in late July. He will operate as

UE0LLH with a FT-900 and GP on 15/20 meters during his stay. This island is IOTA AS-066 as well. The main expedition's exact date will be announced later. QSL direct to: Mike Filippov, Box 20, Vladivostok, 690021, Russia.

A list of scheduled amateur radio operations at lighthouses all over the world during this weekend can be found at:
http://vk2ce.com/illw/2001.htm

LT1, ARGENTINA (Live Webcam). The "BadPower Team" will be active during the IARU Contest with a live Webcam feed for people around the world to see and hear themselves being worked by LT1F. The Webcam can be seen at:
http://www.badpower.com.ar/
This has been done before, though this would be the first time a LU station will be airing a contest feed online for the world to see. The Team is: LU1FAM/Luc, LU1FGE/Fabi, LU1FKR/Kar, LU3FZW/Ber and LU5FHM/Joe. The station's description is:
10m - 4x4 + 6 element mono-bander 40m - 3 element mono-bander
15m - 5x5 80m - wire vertical
20m - 4x4 160m - inverted "V"

LX, LUXEMBOURG. A Dutch team will be active as LX9SW from September 15-22nd. They will concentrate on CW and SSB, 160-10 meters, but there will also be active on RTTY and PSK31. Suggested frequencies are (+/- QRM):
CW - 1820, 3520, 7020, 10120, 14060, 18070, 21020, 24900, 28020
SSB - 1845, 3785, 7080, 14185, 18150, 21280, 24950, 28480
2 meters - 144.325 and 144.020
They will listen up 5 kHz. QSL via PA1KW. QSL is OK by the bureau or direct with an IRC or greenstamp.

OH, FINLAND (also OH0 and ES). Bernie, W3UR, Editor of "The Daily DX" is on his way to Finland, the site of the 2002 World Radio Team Championship (WRTC). His first stop will be Helsinki, Finland, on July 3rd, where he will be active for a day or two as W3UR/OH2 from the QTH of Martti Laine, OH2BH. While there he will tour the "Ring Three", the main road circulating Helsinki where all 50+ WRTC stations of next year's event will be located. He will also attend Hietahami 2001 (http://oh8ta.oulu.fi/hietahami/), the SRAL (Finnish Amateur Radio Society) Summer Camp. This is a hamfest and field day event with lots of demonstrations of many Amateur Radio activities. This is the primary reason for Bernie's trip as he will be the guest speaker at both the DX and Contest forums, presenting 4W/W3UR and A61AJ. Also, look for W3UR/OH0 to be active from Brando Island (EU-002), in the Aland Islands (http://www.aland.fi) from July 7-10th. Assisting him on the air will be his hosts OH2RF, OH2BE, OH2BH, OH2JTE and possibly others. On July 11th, the group will be visiting Enn, ES1AR, and friends in Tallinn, Estonia. There may be some activity as W3UR/ES1 for a few hours. A special QSL card will be created for this WRTC-2002 introduction operation. QSL via W3UR.

OH0, ALAND ISLAND. Team OH0V will be active July 24-31st on atop of Geta Mountain. Activity will be on 160-10 meters, plus 6 and 2 meters with

various callsigns. Look for them on HF, digimodes and 2m meteorscatter (available on 144.139 MHz). The OH0V international team of operators are: DJ2QV, DK3DM, DK5DQ, OH6LI and OH6QU. QSL to OH6LI via bureau or direct: Jukka Klemola, Aarontie 5, 31400 SOMERO, FINLAND.

OY, FAROE ISLANDS. The "DX Newletter" reports that Fabian, DL1YFK, will be active July 7-11th; no callsign mentioned. Activity will be on CW on 40-10 meters. He will then travel to Iceland afterwards.

QSL NEWS AND INFO.....
7O1YGF DXCC Status. Franz, DK1II, has informed Andy, NX1Q, that "it doesn`t look too good for getting a piece of paper from the Yemeni authorities." Dominik, DL5EBE, a member of 7O team was just recently again in Sana'a, where they "still have good relations with the responsible persons in the Ministry of Communications, but the answer he got there was not encouraging." Franz states (repeats), "we entered Yemen and did our operation, we had the firm oral promise, that our operation was approved by all relevant authorities and that we would get an approval in writing. Due to several circumstances which were not in our control and not caused by ourselves (!), there happened a change in mind......! But we assume, that we brought some movement in the issue of legalizing amateur radio in Yemen! This is the only info I can give you now! Sri!"

Gil, F5NOD, reports that all FR/F6KDF/T QSLs received before April have been sent. If you didn't receive yours, please resubmit to F6KDF, the QSL Manager. Gil reminds everyone to put the name of your country on the SAE. Also, there will be NO QSL mailing before September ...

Laurent, KM5M/F5JTL, informs OPDX that he has talked to Jean-Claude, TR8XX, who used to be his next-door neighbor in France. He told him that he is going back to France for the summer and QSL cards should be sent to his F2XX callsign/address while he is there. The Gabon post office doesn't always work well, and it would be a lot safer to send directly to his French address for the next 2 months.

QSL Manager, Steve, KU9C, reports that he expects the BQ9P QSL card to find its way to his doorstep on/about July 13th. However, due to some family commitments, he is going to be a bit slower than normal in getting these cards out, as he has some things scheduled in July that will keep him away from the QSL cards (yes, even QSL Managers take a vacation now and then!). He will begin processing the cards immediately, but as he has some 6500 envelopes to fill. He doesn't anticipate having the cards out completely before mid-August. He doesn't think that this will create any award submission problems, and he states he will do the best he can to improve on this schedule. When all direct cards are out, Steve will post a note. Steve requests to please not E-mail him asking him if he has your card or if he has mailed your card, etc...

OS4OSA was a special event station for the Cutty Sark Tall Ships Race from Antwerp. A special QSL card will be received via the bureau for every contact, or if you prefer send a direct card to ON7SS:

Marc Domen, Ferdinand Coosemansstraat 32, B - 2600 Berchem (Antwerpen), BELGIUM.

Complete and final logs for the VE8PW Southampton Island (NA-007) and VE8PW King William Island (NA-131) operations are available at:
http://www.qrz.com/va3rj/search_ve8pw.html

Complete and final logs for the VK8PW/8 South Goulburn Island DXpedition (OC-229) are available at:
http://www.qrz.com/va3rj/search_vk8pw.html

VA3RJ now has 2700 plus on-line log searches at:
http://www.qrz.com/va3rj/frame_logs.html

Tom, GM4FDM, reported this past weekend that the first batch of VP8SDX QSL were put in the mail June 30th.

SPECIAL EVENT. The Radio Club Chajari celebrates its 30th anniversary through December 31st, using the special callsign L30J (Lima three zero Juliett), only during international contests and a few special events.
QSL via the bureau or direct to LU5JC:
Radio Club Chajari, Casilla de Correo 2, E3228 Chajari, Argentina

SPECIAL EVENT CANCELLED. Vernon, VE2MBS, informed OPDX Sunday, July 1st, of the following about the special event VC2A by the Montreal Amateur Radio Club: "Sorry for the notice. I was told a few minutes ago that the special event station has been canceled because of thunderstorms in the area. I was about a half a mile away from the Canada Day site in Dorval about twenty minutes ago and the lightning was quite a sight! Again, sorry but that's the way it goes I guess...... Vernon"

T48, CUBA. Fabrizio, IN3ZNR, will be operating from Cuba with the special callsign T48Z during the IARU HF Championship. This effort will be together with some Cuban Hams, like CO8HF and CO8TW. Some hours of operation will be possible also before the start of the contest. QSL via IN3ZNR his callbook address.

TI, COSTA RICA. William, AK0A, will be going to Costa Rica for the CQWW RTTY Contest in September and the TARA PSK31 Rumble in October. His callsign will be issued upon his arrival.

EP3SMH is the correct route, but he does not qsl to dollars or IRC's. Save your money and forget it.

(100% high octane BS snipped)

You know, it's got to be bad when they stoop to posting false
FCC news releases. The late Mike KA4MUJ was right when he
said this 14.313 crap was a disease, and that once it dissappeared
from the airwaves, the former preponderants would go completely
out of their heads. They won't be able to shake it off as it's
so ingrained into their minds. Total Obcessive Compulsive Disorder
in action right here, brought on by years of QRM'ing on 14.313 ....
Now that it's all gone, their worse than a cocaine or heroin
addict who can't get their daily "fix" anymore. It's COLD TURKEY boys!!
Enjoy the ride.

Boy oh boy was Mike Galego right on the money with
this observation when he said it 10 years ago !
I still have the tape of his exact words.

You might find a 1/2 wave design performs better since the
ground resistive losses will be much lower. A good ground
radial system is much, much critical under a 1/4 wave design.

Pete

It could help if your ground is fairly lossy, but I would elevate the
half wave type antenna. They don't require the radials to complete the
antenna, but the ground losses can still be fairly high if you ground
mount without radials. If you elevate one a bit, even if only 10-20 ft
, it will work much better. I ran a full size ground plane on 40m at
36 ft with 4 radials, and knew a guy also here in town with an R7 at
about 15 ft . When we worked VK from here, he compared to my signal
quite well considering his was shorter and lower. I bet one at 1/4
wave up would do pretty well to dx. MK

Check out ICOM's WWW site. In particular:

http://www.icomamerica.com/downloads/bandchar.pdf

It requires an Adobe Acrobat reader, but is very beutiful.

1738. HELP - Interference is 20 OVER !

Newsgroup: rec.radio.amateur.dx
Date: 2001-07-04 06:18:22 UTC
From: Dave Schmidt <n9nlu@earthlink.net>
Message-ID: <Oyy07.52$oa1.9480@newsread1.prod.itd.earthlink.net>
Source record: 16643

Hi all,

I need some help. I recently moved to a quite little village, but its not so quiet on the radio bands. There is so much electrical interference that it totally blots out broadcast AM stations, creates havoc receiving local 2 meter repeaters, and forget about working SSB here... ya just can not work any DX with a 20 over interference noise level.

Just by listening to the noise, I can tell its 2 different sources, maybe more. One of the sources is a constant buzz that goes on and off, as if it was switched on .... like a floresent light or something. The other is more of an arcing noise. The arcing noise isn't as strong as the buzz, but still, its an S5-S8 on my 706MKII. I've somewhat located the noise by driving through the neighborhood with the 706. I've called the electric company with pole numbers and street locations on this one. That was over 1-1/2 months ago. Its still arcing away and tearing up the bands.

Its this pesky buzz that is so strong that wipes out broadcast AM radio and wipes the HF signals off the map. I have a strong feeling that one of the people in my new neighborhood has a very noisy dimmer switch or a floresent light that is noisy.

My questions are:

1 - Does anyone have any plans/instructions for a compact HF antennas that can be used for directional interference locating?

2 - If I should find that its one of my neighbors that is creating this noise (unintentionaly).... does anyone have any sugestions how to aproach them about their faulty equipment that is making noise?

3 - Anyone in SE Wisconsin (around West Bend) that wants to do a little "live" intereference hunting, feel free to e-mail me so we can put our heads together and solve this MAJOR problem here.

4 - How can I set a fire under the electric companys ass to get them to fix the arcing noise? --- Do I have to chop down their pole or something??? -) ---

Thanks for your time

Dave

Dave, the ARRL has a Web page dedicated to this very problem.
Visit:

http://www.arrl.org/tis/info/rfi-elec.html

and you'll find resources that should help get you started.

Good luck.

I'm going to do a simplified listing of HQ stations
announced for the forthcoming 2001 IARU Contest:

http://www.ng3k.com/Misc/iaru2001.html

If you'd like to have your HQ operation listed please send
the details (Callsign, Country, Class, QSL Info, Operators)
to: Bill@ng3k.com

Please, only HQ operations for this one.

Thanks,

Bill/NG3K

And yes you are, thanks for finally admitting it :-) see the smiley
face

So lemme see if I gits this.

You are working your little pileup as that rare dx from Peenietown Ohya
and what?? You check every callsign to make sure that the caller is
within his allocation?? Wow!!! You must get a run rate of what?? 1 or 2
possible 4?

So what is you secret on knowing that you are working the slim? Duz that
person say..hey Brian..The name here is Slim?? What if that person is
like say..Slim Whitman? Do they say, hey, I don;t have a license.

And how do you know WHILE you're having a qso that they are not in their
authorization? What you check some out of date database? You must not
work many DX stations then. How do you know WHILE you're working them
that they're operating illegally? Do you have some special equipment on
your radio that ID's them?

You seem to have the answers that the DX world is looking for. HAve you
told the Big Gun DX'ers of this trick yet? I am sure that there are book
publications that would love to have your secrets in writing.

I am taking the liberty of sending this to the DX NG so that they too can
share in the secrets of knowing when a slim is on WHILE operating. Hell,
you personally will change the policy of WFWL. I AM impressed.

Damn, Brian! You are the individual who is spouting the silliness. Our anonymous friend here simply pointed it out in a way which made your statements look even more ridiculous. I don't know why you'd object to seeing your nonsense in the DX newsgroup. You've paraded yourself as a fool often enough in this newsgroup.

If you don't mind being one of those boxing Bozo's, always springing back to take one more verbal punch, there are those who will oblige you by taking the shot. You continue to bray about things you don't comprehend. How're those letters to the French and Tanzania licensing authorities coming along?

Thanks, Rich. That explains things. Yesterday and today, I received
direct QSLs snd IRCs. It's nice to feel wanted, but.....
73,
Ian (G3OHX).

1756. Re: HELP - Interference is 20 OVER !

Rick Littlefield, K1BQT, wrote up an excellent noise DF
receiver project in QST earlier this year. I think he is selling
inexpensive kits.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 519
BID: $OPDX.519
July 9, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1VV, NG3K, W3UR & The Daily DX, K4JZ, W4SAA, K5KG, K7BV, K8AZ, K8YSE, NE8Z, KU9C, W9DC, 9A6AA, DL1EK & DX News Letter, EA5RM, F5NQL, F5OGG, G3XTT, GM0HCQ, GW3KJN, HA8IC, HA0HW, JA1ELY, JH1ORA, JQ1SUO, LU7DW, LY1DR, OH1EH, S57AW, SM4DDS, UR5LCV, VE7DP and YS1AG/G5AYU for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 1/July, through Sunday, 8/July there were 220 countries active. Countries available: 3A, 3B8, 3B9, 3C, 3D2, 3V, 3W, 4J, 4L, 4S, 4W, 4X, 5A, 5B, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, E4, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J6, J8, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S2, S5, S9, SM, SP, SU, SV, SV5, SV9, T30, T32, T7, T9, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VP2E, VP2V, VP5, VP8, VQ9, VR, VU, XE, XT, XU, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity".

3B8, MAURITIUS. Taher, 3B8DB, was active this past weekend on 12 meters CW. Watch between 24894 and 24900 kHz between 0900 and 1400z.

4W, EAST TIMOR. Thor, 4W6MM, was heard this past weekend with very few takers on 20 meters CW. Watch 14002 kHz as early as 0545z and as late as 1430z. He was also heard around 7025 kHz at 1030z and also at 1130z. There was one QSN on 10 and 15 meters this week. Check 28490 kHz at 0215z and 21003 kHz at 0445z.

E4, PALESTINE. Gunter, E4/OE1GZA, was heard this past weekend on 21287 kHz between 1145 and 1330z. QSL via Gunter Zwickl, BOX 1133, Ramalah, Palestine.

DX VIDEOS.....
VK0IR HEARD ISLAND - "Outpost at the Edge" (Editorial by KB8NW)
This broadcast television documentary is a must for any DXer who collects DXpedition videos. James Brooks, 9V1YC, who has written and filmed the video, provides 50 minutes of interesting facts and history of this isolated island. The video not only contains footage of the famous, very expensive VK0IR DXpedition, but also rare film on the first expedition to the island. You will learn about the history of the island from the early 19th century American sealing industry through the Austrialian occupation in the 1950s. If you enjoyed James's other videos, you will really like this one. For more details, visit the web site: http://home.pacific.net.sg/~jamesb

Dennis, K7BV, introduced his "Fernando de Noronha - PV0F - CQ WPX 2001" video at the Ham Radio 2001 Convention in Friedrichshafen, Germany, last weekend. A World High Power 3rd place finish is claimed for his operation. The professionally produced video is 14 minutes long and features an entertaining tour of the island, its history and the QTH of its most famous occupant, Andre, PY0FF. It is currently available in NTSC format and will be made available in PAL if there is sufficient interest. For more information, send E-mail to Dennis at: k7bv@aol.com

IARU 2001 ANNOUNCED HQ OPERATIONS. Bill, NG3K, has created a listing of HQ and official stations announced for the forthcoming 2001 IARU Contest (July 14-15th) and can be found on the Web at:
http://www.ng3k.com/Misc/iaru2001.html
If you'd like to have your HQ/official operation listed, please send the details (Callsign, Country, Class, QSL Info, Operators) to: Bill@ng3k.com (Please, only HQ/Official operations for this one.)

IOTA NEWS.....
AS-041. Eiji/JQ1SUO and JH4WXV will be active from Oki Island between August 11-14th, as JQ1SUO/4 and JH4WXV/4. Activity will be on 160-10 meters CW/SSB. QSL via their home callsigns via the CBA.

EU-091. The Salento DX Team will be on the air from Grande Island (I.I.A. LE-002) during the IOTA Contest. Callsign is not known. Operators will draw lots for the uses of callsign/p. QSL via IK7JWX or via CBA.

EU-170. A Hungarian team will operate from the Croatian Island of Pasman from July 21-30th. The members of the team are:

Zsolt/HA6PS, Tibor/HA6ZV and Laci/HA6NL. Their callsigns
will be 9A/homecall/p on all HF-bands. They are going to be
active on 2m and 70cm from the JN73 grid square. They plan
to participate in the IOTA Contest. QSL should be sent to
their respective home callsigns and will be answered the
same way as received.

EU-177. Kjell, SM4DDS, will be active as 8S4C/5 from Stora Alo, July
9-14th. His activity will be on CW and SSB. QSL via bureau is
OK and direct QSLs via his home callsign SM4DDS:
Kjell Bonerfalt, Oskarsvagen 4B, S-702 14 Orebro, SWEDEN.

NA-141. Joe/W4SAA and Dick/N4RP will operate a 100w CW DXpedition
station from Virginia Key, FL, for the IOTA Contest, July
28-29th. Antenna improvements have been made over last year's
operation. QSL cards are printed. Pleasse QSL via the new
address: Joe Hornbach, W4SAA, 13691 NE 25 AVE, North Miami
Beach, FL 33181-3502 USA (SASE PSE).

SA-055. Operators LU1BCE, LU3DW, LU7AWP and LU7DW will activate the
Island of Martin Garcia as L80AA/D during the IOTA Contest.
There will be activity outside the contest, and it will be
mostly on SSB and on the WARC bands. They hope to be able
to have a 160m dipole up, even if conditions in July may not
be so good for that band.

Scheduled Croatian IOTAs and IOCAs to be active provided by Emir, 9A6AA,
IOCA Manager:
Callsign IOTA Island IOCA Date

9A4A EU-170 Pag CI-082 until September 2001
9A6AA EU-136 Losinj CI-058 until September 2001
9A/DL1BKK EU-110 Pulari CI-205 July 15th-August 7th
9A/ON4IPA EU-136 Cres-Losinj area July (last week)
9A/OE5EMS EU-136 Krk CI-046 IOTA contest
9A9R EU-136 Krk CI-082 IOTA contest
9A5JR/p EU-170 Sestrice CI-103 August (Lighthouse event)
9A2V/p EU-170 Sestrice CI-103 August (Lighthouse event)

J7, DOMINICA. George, K5KG, will be active as J75KG from IOTA NA-101
from July 7-17th. He will operate 160-10 meters, with a concentration
on CW, WARC and the low bands. He will also operate in the IARU Contest
as a mixed mode. QSL via KU9C.

KH0, MARIANA ISLANDS. Keiko/JJ1CRV and Kaz/JH1ORA will be on vacation
here from July 13-16th and will be active as KI8CT/KH0 (JJ1CRV) and
KD1OS/KH0 (JH1ORA). Activity will be on CW/SSB on 40/20/15/10/6 meters
(possibly 160 and 80 meters) and the WARC bands. QSL via the JARL Bureau
to their home callsigns or direct to JJ1CRV. ADDED NOTE: KD1OS/KH0 will
participate in the IARU HF Championship.

LY0, LITHUANIA. Look for LY0HQ activity in the IARU Contest 2001 by the HQ station from Lithuania. QSL via LY1DR: Saulius Zalnerauskas, P.O.Box 922, Kaunas 3005, Lithuania.

MUSEUM SHIP SPECIAL EVENT WEEKEND will be held beginning 0001z July 21st until 2359z July 22nd and is sponsored by the USS Salem Radio Club, K1USN, Quincy. MA. U.S.A. During the "Museum Ship Special Event" you will be able to work warships, submarines, lightships and various motor vessels from WWII (earlier USA, Russian, German U Boats, British and much more). By working these ships you will be able to collect unique QSL cards which have their histories going back almost 100 years!! A certificate is usually available from the sponsors of these ships. See the USS Salem Web page for the list of participating ships with operating frequencies and certificate information at: http://www.qsl.net/k1usn/event.html
Also, every one of the U.S. WWII ships has an individual historic record on the web which you can read from the US Navy records at: http://www.ibiblio.org/hyperwar/USN/USN-ships.html

QSL INFO AND NEWS.....
D68C QSL STATUS. Don, G3XTT (D68C publicity officer), reports that the D68C QSLing is now well underway. Many cards have already gone out, and a large batch for U.S. hams will be mailed very soon. Of course, with the biggest DXpedition of all time, it will take several weeks to catch up with the cards already on hand. Once those are out the way, it should be possible to deal with any new incoming cards pretty quickly. He requests to PLEASE NOT E-mail Phil, G3SWH, about your cards as answering E-mails simply takes him away from the QSLing task! Don states, "We would, of course, have wanted to get cards out even earlier, but with so many sponsors who, naturally, looked for proper recognition on the card, we needed time to run the design past them before we went to print. And simply printing something like 80,000 cards (in Germany) and getting them shipped to the UK took time too. But when you see the cards, I'm sure you will all be delighted."

Wendell, K4JZ, reports that the QSL cards for the Poor Boy DXpedition, FP/K4JZ, June 15-18th, will be replied to as soon as he receives the cards from the printer (In approx. three weeks).

Dr. Rick, NE8Z, was active this past week as WW8DX/8 from Rattlesnake Island, Michigan, which has been known to be infested at times with poisonous Eastern Massassagua Rattlesnakes. Rattlesnake Island is MI-051L for the U.S. Islands Award. QSL via WW8DX QRZ.COM or NE8Z at: Rick Dorsch, Box 616, Hamburg, MI 48139 USA

NOT THE QSL MANAGER! Igor Zeldin, UR5LCV, President of UARL, informs OPDX that he is not or has never been the QSL Manager for RU9CI. He continues to receive direct request from many U.S. stations.

Frank, VE7DP, informs OPDX that QSL cards for the February 2001 IOTA operations from the Philippines have arrived from the printer. The processing of direct requests has already begun, and the first batch will be in the mail this week. It may take him about 4 weeks to clean up the backlog. Bureau cards will be sent out later to every station

in the log. It is not necessary to send him cards via Bureau!! The QSO totals are as following:
OC-091 1600 VE7DP/DU1 & DU1KGJ/p OC-126 2100 4I1P
OC-244 3900 4I1P OC-093 4100 4H2B
He mentions that the documentation to have the operations accredited is on its way to G3KMA. Some cards are arriving also for 4G1A, but Frank is NOT the QSL Manager. Cards for the 4G1A contest station should be sent direct to 4G1A/DX1CW.

The YV5/NE8Z QSLs for the IOTA SA-035 operation from Islas Los Roques have been printed and direct requests will be sent out on or about July 25th.

SPECIAL EVENT. Look for special station HG8SDS to be active only once a year between August 14-21th, in Veszto-Magor to celebrate "Sarret Days" (HG8 Sarret DayS). A contact with this station is good towards the "Sarret Award" (10 points). Activity will be on 80-10 meters CW and SSB. For more details on the award and HG8SDS, check the Web site at:
http://www.qsl.net/hg8sds

SPECIAL EVENT. Gene, UA9AB, President of the Troisk Amateur Radio Club, reports that the TARC will celebrate its 30th anniversary on July 23rd. During their celebration, they will be active using the special callsigns UE9ATC and UE9ATC/P from July 20-27th. A special colored QSL card will be issued for contacts during this period. Also, any station that makes contact with 3 members of the club during this period will receive a Special Award.

T8, PALAU. Hideki, JE8BKW, will be active as T88BB from the evening of July 8th through the morning of July 11th. Look for Hideki on 80-6 meters, SSB and CW. QSL via the JARL bureau or direct to his new address at:
Hideki Sanada, 4-2-11-312, 24-Ken 2-Jo, Sapporo, 063-0802 JAPAN.

TG, GUATEMALA. A Spanish team consisting of EA1QF, EA3CUU, EA4BT, EA4KA, EA7AAW, EA7JB, EB1ADG and EB4EE will be in Guatemala from September 17-26th, installing a digital radio emergency network as was done in El Salvador and Honduras in past years. At the same time, a HF operations will take place on all bands from 160-6 meters on SSB, CW and RTTY with special emphasis on CW and the WARC bands. They have requested the callsign TG0R, but the final approval from the Guatemala PTT is still pending. All the activities will be done jointly with the Club de Radioaficionados de Guatemala (CRAG). QSL via EA4URE.

TI9, COCOS ISLAND. Andy, YS1AG/G5AYU, informs OPDX that there is an active station on Cocos Island, and the operator is Hugo, TI2HFM/TI9. He is a gamekeeper/forester there working for the Costa Rica Parks administration. He is usually heard on weekends, around 0300z somewhere near 7070 kHz ragchewing with TI5ECC (YL) and TI3GBP, who is due to join him by the end of this month. They will also take a radio along so there will be two TI9 stations on the air. They are not DXers, but like to ragchew in Spanish on 40 meters (it is better than no activity at all).

VP8, SOUTH GEORGIA ISLAND (possibly South Orkney Island also!).....
OPDX received an E-mail this week from Mike Gloistein, GM0HCQ, who was active from South Georgia Island as VP8SGK for a few days during the end of March and the beginning of April. To start, Mike informed OPDX that the address we had listed in OPDX.505 was wrong (Sorry!). The correct address is: Mike Gloistein, 27 Stormont Way, Scone, PH2 6SP, Scotland. He also reported to OPDX that he will be going back to South Georgia sometime in late November or early December. He will be active onboard the Royal Research Ship Ernest Shackleton beginning about October 10th. He will be changing his callsign to VP8CMH/MM once in the Falkland Islands and the Antarctic waters. There is a slim chance that he may even be able to operate from Signy Island this time around, but he won't know for sure until he gets there. Mike hopes to post the ships itinerary on his Web site at: http://www.qsl.net/gm0hcq
Once he is away, updates will be posted at: http://www.hfdx.co.uk

WORLD LIGHTHOUSE ACTIVITY......
WLH-NEW
WLH-0074. Mario, DL5ME, states that he will be active as LA/DL5ME from the lighthouse on the Island of Runde (Soroyane -IOTA EU-079, WLH-0074), July 14-16th. He will also be active from a new lighthouse on the Island of Vigre (Nordoyane - IOTA EU-056), July 19-21st. He will use a log-periodic and 500 watts. During the IARU Contest, look for him on 17 meters (during the NA window). QSL via homecall direct (the fast way, 2-3 months) or the bureau (the slow way, 1-2 to 5 years).

LH-0978. Masafumi, JA6GXK, will activate the Japanese lighthouse on Me Shima Island (AS-056) over the next few months. Look for him on the following dates: July 13-24th, August 14-24th and October 5-16th. Activity will be on 40 meters, 14260 and 21260 kHz.

WRTC 2002 UPDATE. The 13 U.S. contest clubs have nominated the following contesters to eventually lead the ten U.S. teams to Finland in July 2002.
USA West: USA East:
N6MJ Daniel Craig NT1N David (Dave) Patton
N6RT Douglas Brandon K1AR John Dorr
N5RZ Ralph Bowen W4AN Bill Fisher
N2IC Steven London KQ2M Robert (Bob) Shohet
N5KO Robert (Trey) Garlough. K5ZD Randall (Randy) Thompson

Congrats to Team Croatia for being the first one to select a national team! The following contesters will represent Croatia in the WRTC2002: Zdravko (Emil) Balen/9A9A and Robert Orehoci/9A3GW.

WRTC 2000 AWARDS. Robert, S57AW, reports that the distribution of awards, T-shirts and gifts is less than a month away. They are almost finished processing everything, and they are sorry for the delay.

Jim:

Think you are right about the 14 Mhz beacon at W6WX must be having some trouble. I can hear it here but it is very weak.. All other freqs. that beacon is heard very easily as we are south of it (in San Diego County).

According to :http://www.ng3k.com/Misc/adxo_exp.html

the address should be:

Frank Turek,DL7FT
Box DL7FT
14004 Berlin, Germany

BUT QRZ.com shows a box number. The QRZ CD does not however so who knows - He is active enough so maybe you can ask him next time he shows up from somewhere.

> VK2CJC / MM0AXL

Jack:

Cushcraft has been publishing one for several years, usually have them at hamfests but not sure if they show up down your way, HI. It is 17 x 11 and folded to make four 8 1/2 x 11 pages. Not only the multi-band DXCC countries but also a multi-band WAS section and also an ARRL-Canadian section part. You might check their web site since they not have their antenna manuals online as pdf files. They may have this or you migh send them an e-mail asking for a bunch for your local club.

Cheers - Leo - W3LEO & MM0LEO

John:

I would agree with Mark re the elevation of a half wave type like the
R-8. I've used an R-7 here on the East coast in Maryland since they came
out & have done well with it. It is about 25' up. Also had a DX-88,
ground monuted with its set of 'tuned radials' and found the DX was
usually an S unit better on the R-7. The DX-88 did seem better for U.S.
contacts [angle of radiation and all that]. All of this has been on SSB
with 100 watts.

In the contests, I can regularly work the Pacific on 40 SSB with the
R-7.

As many, limited yard space here so the Cushcraft R series have been it.
Started with the R-4, then the R-5 and now the R-7. [My old R-5 is with
my gear in Scotland].

Cheers

Hello,

DX Atlas 1.0 has been released.
Here is a brief description of the program:

Electronic World atlas for radio amateurs. DXCC and province prefixes,
CQ and ITU Zones in the rectangular and azimuthal projections,
continuous zoom and scrolling, Gray Line, city and island index,
hierarchical prefix database. COM/OLE Automation for easy
integration with 3-rd party programs.

Download DX Atlas from http://www.dxatlas.com

Your comments are welcome.

Yeah, but it gave you a chance practice your hobby of whining and
bitching Walt. Heck, it's been days since you and your German friend
tried to police this group. Now go share a sausage with your buddy and
find something new to whine and cry about.

Can you believe USENET still won't conform to Walt's way! Go figure!

Yes, goddamit! I haven't had anything to bitch and whine about for *day*s.
Are you guys becoming *bored* or what? It sucks. I want you to start posting
useless stuff, HTML and all the other crap; I wanna see ads, porn,
FCC-harrassment, slaughtered pigs and lusers bitching about the P5 they
didn't work.

There, that feels better, thank you.

So am I Glenn, you forgot to mention that. Top posters are about as pleasant
as a tuner on a DX-station's frequency, the ``vat is de DX''-lid, the ``my
nag is glec''-keyers and the list-lizard combined.

The parallels are quite obvious, aren't they?

When the half wave verticals first appeared, there were some interesting tests conducted and reported here on the net that basically found that the height above ground made virtually no difference at all. Therefore, spending much money to elevate it didn't make a good investment - but getting it off the ground so the radials didn't poke you in the eye when you walked by made a lot of sense. Nothing to buy a tower for was the bottom line.

1774. Setting The Record Straight

Newsgroup: rec.radio.amateur.dx
Date: 2001-07-12 20:29:54 UTC
From: Important Information <eu132@dkvns.net>
Message-ID: <OKn37.408$hv4.5046@eagle.america.net>
Source record: 16579

SUBJECT: False and Libelous News Release Targeting N4CND,
WB2OTK, W2ZB, KK9G, N9PGE, K9BSD, and
Other Amateur Radio Operators.

The subject news release was authored by James V.
O'Brien III, W4AMP, and is being published by him in various
amateur radio forums. O'Brien is currently using a Cotse account
(failure-no-spam@cotse.com). His true address is
w4amp@bellsouth.net

W4AMP is a convicted drug felon, who served prison
time for multiple felony violations of the Georgia Controlled
Substance Act. W4AMP has particularly singled out law
enforcement officers and a former employee of the FCC and his
family for harassment, stalking, and threats of violence.
Additionally, W4AMP has threatened dozens of CB and ham radio
operators, both on and off the air, with threats of violence ranging
from death, assault, stalking their families, to property damage.

W4AMP's harassment tactics include fraudulent magazine
subscriptions, fraudulent COD orders, anonymous defamatory letters
to employers and neighbors, fraudulent sales ads, anonymous
harassing telephone calls, and a variety of other forms of stalking
and harassment. In the late 90s, W4AMP maintained a particularly
vicious, sick, and sordid series of web pages which he used to attack
various ham radio operators. Legal action by his victims resulted in
the removal of his web pages from the internet. W4AMP has posted
thousands of spiteful and vindictive postings on Usenet.

A repeated ploy of W4AMP is to assume the role of an
innocent victim when subjects of his attacks respond to W4AMP's
malicious mischief.

Although much of W4AMP's illegal behavior has been
documented and investigated by various law enforcement and
regulatory agencies, including dozens of tape recordings sent to the
FCC, law enforcement has been slow to act. An exception was
when the FCC cited W4AMP for intentional malicious repeated
interference and repeated use of obscenity on-the-air.

W4AMP continues to use 3901, 14275, 14313, and other
frequencies to air his perceived personal disputes with various ham
radio operators, a practice which W4AMP refers to as radio fun.
W4AMP's extreme racist views include inflammatory racial remarks
and other extreme racist views against African-Americans, Jews,
and Orientals.

The FCC's Riley Hollingsworth has sent very sternly worded letters to several amateur radio operators, warning them that airing of personal disputes and racially offensive remarks could result in the loss of their amateur radio licenses. However, W4AMP apparently continues airing his personal disputes with impunity, as well as obscenity and racially provocative remarks.

Observations of on-the-air illegal behavior by W4AMP should be forwarded with supporting tape recordings to FCC Special Enforcement Officer Riley Hollingsworth at the FCC's Gettysburg office. Hollingsworth's e-mail address is: rholling@fcc.gov

> Scope FAQ

I'd be curious to read those reports. Doesn't really make sense to me. Elevating the 1/2 wl type antennas will reduce ground losses the same as any other length vertical. If you have one ground mounted, the ground losses can add up, depending on the earth you are over. Note that most all BC stations that run half waves use a 1/2 wave radial system. If you use 120 radials on the ground for a certain level of performance, if you elevate , the amount of radials needed for this same performance will decrease. At 1/2 wl up, only 4 radials are needed to equal the performance of the 120 on the ground. You can have excess ground losses with a low horizontal dipole. And it, like the 1/2 wl vertical are "complete" antennas , and require no radial system to complete the antenna. Also when elevating, you are clearing nearby objects and generally increasing the "ground wave " performance to a great degree. This will show up on the high bands more than the low. On 10m, it's VERY benefical to elevate. On 80m, it's not that much difference as the height in wl is still low unless you mount way high at 1/4 to 1/2 wl up. So if you elevate a 80-10 1/2 wl type antenna, on 80m you would need to elevate to 120 ft "1/2 wave" to be able to use 4 radials and equal the performance of the 120 on the ground. Just elevating to 10-20 ft is not going to cut it unless you use many radials. Sure, it will probably work ok, but not to it's full potential. I use homebrew gamma loop fed 1/2 waves on the higher bands all the time. I have one for 10m and 6m, at the moment. Also I have done many tests comparing all the common verticals, 1/4wl,1/2wl,

5/8wl, etc , and all have benefited from elevating. Not once have I seen a vertical that worked the best ground mounted. Also they benefit from a good decoupling section. On my "optimum" 1/2 waves, I used a decoupling section of 1/4 wl radials mounted 1/4 wl down from the feedpoint. These would be grounded to the shield at that point. There was a noticable increase in performance when using the extra decoupling. This section becomes more important as you elevate, and the decoupling sections on the common multiband 1/2 waves are compromises at best. They are not near as good as they could be. This radiation from the feedline can skew the pattern upwards and make it appear that elevating is not helping, when it fact the feed radiation problems are the culprit in this appearance. I have my 10m halfwave at 20 ft right now. It was quite a bit better when I had it on a different mast at 36 ft.
It's fairly lousy on the ground. MK

1788. Re: Using a Yaesu FT-100 with a Linear Amp

I keep 3 months worth of QST's, and then give the oldest issue away to someone
who doesn't subscribe. The instructions for the IARU contest are in April's QST,
which I gave away already. What is the exchange--is it signal report & year
born, or number of years licensed ????

Source record: 16595

Hi OM,

Thanks for reading this message ...
I just finished a major update of my website (including now a step-by-step manual for using digital hammodes with your soundcard).
Also the video & pics page got a complete new lay-out.
I would appreciate it if you could test the site and report me all errors on links etc. If you know i have 427 files in 31 directories with a total of 30 megs, you will understand that an error is quickly made somewhere ...
Also i would PLEASE ask to sign the guestbook. Geocities has suspended my old website and deleted the guestbook. Fortunaltely i had a copy which i have put on the main page of my site, but, ... i had to begin a new guestbook in which i hope to find a lot of hams in the near future ...

Thanks and 73s de ON4CAY - Ronny

You can find my website at : www.on4cay.com

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, WC1X, K2JXW, W3UR & The Daily DX, K4VUD, KJ4UY, WD4NGB, AC6V, NI6T, K8YSE, WB8YJF, 9A5K, 9A6AA, 9V1YC, E21EIC, DJ4ZB, DL1EK & DX News Letter, F5NQL, F5TYY, F6AJA & Les Nouvelles DX, HK3CW, I1JQJ & IK1ADH and 425 DX News, ON5FP, PA5ET, RA3SL, SM3CVM, VA3PL, VK3DYL, XE1KK, YO4ATW and YV5EED for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 8/July, through Sunday, 15/July there were 215 countries active. Countries available: 3A, 3B8, 3B9, 3C, 3D2, 3V, 3W, 4J, 4L, 4S, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9X, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H40, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J3, J7, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T32, T7, T8, T9, TA, TF, TG, TI, TK, TL, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V4, V5, V7, V8, VE, VK, VK9X, VP2V, VP8, VP9, VQ9, VR, VU, XE, XU, XW, XZ, YB, YI, YK, YL, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity".

3D2, FIJI (Still Going Strong!). The "425 DX News" reports that well known DXer Ron, ZL1AMO, should be active again as 3D2RW from the Fiji Islands as of July 12th. OPDX still has not seen QSN reports as of July 15th. They also state that he will operate from Nadi Island (OC-016) for a few days, around July 16th. He will then move to the Lau Group

(OC-095) for a couple of weeks. QSL via ZL1AMO.

3V, TUNISIA. Yannick, F6FYD, has left from Alegria, and he is now in Tunisia. He is expected to operate from 3V8BB.

4Z8, ISRAEL (Attention Prefix Hunters!). Marc, WC1X, is a U.S. ham operating in Israel with a rare prefix. He will be there until June of 2002, using the callsign 4Z8BB. There is only one other licensed operator that shares the "4Z8" prefix. Although Marc states, "I know Israel is certainly not a rare country but the prefix '4Z8' is." Marc has worked many stations on 20/15 meters SSB (mostly North Americans). He informs OPDX that he would like the readers to know he can also be found on RTTY on 20 meters. His schedule is: 0330-0430z on 14082 +/- QRM, 7 days a week. QSL manager is WC1X.

9A, CROATIAN ISLAND HOPPING TOUR 2001 (Also Lighthouse Activity).... Marc/ON5FP and Jose/ON4CJK will be island hopping in Croatia from July 16-31st. Their base QTH will be the lighthouse of "Veli Rat" (CRO-183) on the island of Dugi Otok (EU-170 and CI-018). They will have a motorboat at their disposal and plan to visit 3 more nearby small Croatian islands (not specified yet) in the same IOTA group. Their planned schedule of activities include:
Rab Island (EU-136 and CI-096) - July 20th
Brac Island (EU-016 and CI-010) - July 21st
Pasman Island (EU-170 and CI-085) - July 22nd
Pag Island (EU-170 and CI-082) - July 27th
Vir Island (EU-170 and CI-141) - July 27th
Porer Island (EU-110 and CI-090) - July 31st
Their aim is to transmit from as many lighthouses as possible. ON4CJK will be an entry in the IOTA contest from their "Veli Rat" lighthouse QTH. QSL all QSOs to ON4ADN via the UBA bureau or direct to:
Geert Decru, St. Laurentiusstraat 18, B- 8710 Wielsbeke, Belgium.

9A, CROATIAN ISLANDS.....
Operators 9A2GK/Miljenko, 9A3LD/Branko, 9A6JWF/Zeljko, 9A2BD/Zlatko, 9A4LT/Vlado, 9A7DAQ/Branko and 9A3PG/Laci who were active this past week as 9A1C/p from IOTA EU-170, will be visiting more Croatian islands in the coming weeks: Katina (CI-037), Sestrice (CI-103), Silo (CI-121), Mana (CI-064), Levrnaka (CI-054) and Rasip (CI-098). Operations will be on 40-20 meters (IOTA freq). QSL via 9A4BL.

Members of the Radio Club 9A1HBC (Operators: Zlatko/9A2EU, Dino/9A2NO, Mario/9A5MR and Josip/9A7JLJ) will be active as 9A7T/p from EU-170 (The Island of Zut, CI-154) on July 27-29th, especially during the IOTA contest. They will be use 9A/homecall before and after IOTA contest. Operations will be on 80/40/20/15/10 meters. QSL 9A7T/p via 9A2EU.
An additional list of Islands for the IOCA Award is at:
http://www.hamradio.hr

CARIBBEAN TOUR 2001 (Updated). In addition to previous announcements, the Low Land DX-pedition Team (LLDXT) have received 2 special callsigns J3PA and J8PA which will be used on Topband to avoid dupes and for several

Contests. No individual callsigns will be used on 160 meter. All licenses and import permissions for the equipment are pre-arranged. The LLDXT's 6th Caribbean tour will take them to the island of Carriacou (Grenada) IOTA NA-147 (2nd - 15th August) and the island Bequia (St. Vincent) IOTA NA-025 (16th - 27th August). The team members will be Bouke/PA0ZH, Ronald/PA3EWP, Rob/PA5ET and Dennis/PA7FM. The callsigns will be J3/homecall, J8/homecall, J3PA and J8PA. The last 2 callsigns will be used on Topband and during contests. They will use 2 x FT1000MP's with amplifiers and will be active around the clock on 160-10 meters on the modes CW, SSB, RTTY and PSK31. Titanex sponsored a V160E vertical to give them a good low-band signal. As in other years, they have a Tour Web-Site which will be updated daily with the latest information, on-line logs, tour diary, digital photo's, propagation forecasts and digital pile-up recordings. The Guestbook can already be signed. The LLDXT home-page is ready for the tour and can be found at:
http://www.qsl.net/lldxt
All QSLs will be managed again by PA5ET, Rob Snieder, Van Leeuwenstraat 137, 2273 VS Voorburg, The Netherlands.

IOTA NEWS.....
EU-064. Yves, F5TYY, will be active on Noirmoutier's Island during the IOTA Contest from July 27-29th. He plans to operate on 80/40/20/15/10 meters SSB using the callsign F5TYY/p. His QSL qsl is assured via the Bureau.

NA-067. Jon, WB8YJF, will be active from Ocracoke Island, NC, from July 22-29th. His activity will include an entry in the RSGB IOTA Contest as WB8YJF/NA67. He will be active on CW, RTTY, and SSB. Jon will be taking a TA33-Mini and will have it mounted at 25-30 ft. next to a saltwater pond. He might try antennas for 30 and 40 meters and possible 80 (He has a shortened 80m rotatable dipole). QSL (direct is MUCH faster) via his home QTH: Jon Severt/WB8YJF, 5586 Babbitt Rd., New Albany, OH 43054.

NA-090. Masa/XE1ZOI and Ramon/XE1KK will be active from Cozumel Island, Grid EL60, from July 27-29th, including the IOTA Contest. They expect to be using the callsigns 4A3ZOI on mostly CW, and 6H3KK on mostly SSB. Outside of the contest, they will be active on HF including the WARC bands, 50 MHz and FM satellites. QSL via their home callsigns.

NA-083
NA-139. Andy, VA3PL, is planning a little IOTA expedition to Assateague Island (Worcester County, Maryland, MD001S and NA-139).. If he can't get a camping site there, he will then go to his alternate site on the Virginia side of the same island called Chincoteague (Accomack County, VA002S and NA-083). Andy will be active from July 26-30th, and will be operating on, or near the usual IOTA frequencies (SSB/CW). He will be using a TS-450 (100 watts) and a G5RV antenna. Andy will also be operating

during the IOTA contest from his campsite location. QSL via
home call - SASE/SAE + GS/IRC appreciated.

SA-NEW. Ramon, YV5EED, Events Coordinator for the Grupo DX Caracas,
informs OPDX that the Association of Radioamateurs of Venezuela
(ARV) and the Grupo DX Caracas are pleased to announce the
Venezuelan Navy Day 2001 celebration with an IOTA DXpedition
to Falcon State Islands on July 20 to 24, 2001. Since it is a
new IOTA island group, a number will be assigned after their
operation according to the new IOTA Directory. The callsign
YW1F will be used on the regular DX HF frequencies and 6 meters.
A plaque will be given to the DX station that works them on
most bands and modes. QSL via W4SO (mail drop) and via bureau
ONLY via YV ARV QSL Bureau, P.O. Box 3636, Caracas 1010-A,
Venezuela.

ISLAND NEWS. Marc/F6HQP and Pierre/F5NGB will operate from some islands
in Brittany for the DIFM and IOTA award between July 29th to August 12th.
No other details were provided.

LIGHTHOUSE ACTIVITY CONTINUES TO GROW! Over the last few years, more and
more DXers have been taking an interest in lighthouses/lightships activity.
This week we received a message from Jim Weidner, K2JWX, President of
the "Amateur Radio Lighthouse Society" ARLHS. He states the following:
"The ARLHS is the world's largest amateur radio society devoted
exclusively to ham radio and lighthouses. Less than a year old, our
membership already totals several hundred worldwide, with an average
of 2 new members being added every day. In addition to sponsoring
expeditions to lighthouses and lightships around the world on a weekly
basis, we also sponsor four operating events throughout the year. The
next events are the immensely popular NLLW and ILLW annual operating
events. (The latter event is in co-sponsorship with GM4SUC.) We offer
an extensive lighthouse awards program and maintain perhaps the
internet's largest and most complete list of the lighthouses and
lightships of the world..... Full details can be found on
our main web pages at: http://arlhs.com
Our main web site contains our stated purposes in sponsoring expeditions
to remote lighthouses as well as details about our worldwide organization,
the largest ham radio society devoted to lighthouse/lightship operations.
Membership details and FAQs are also accessible from this main page."

(1) National Lighthouse/Lightship Weekend (NLLW) - August 4-5th.
Guidelines are on the web page at:
http://www.waterw.com/~weidner/arlhs/page2a.html
For the first time awards and prizes are offered for this event.
The prize drawing is an exquisitely detailed miniature collectible
lighthouse, signed limited edition, donated by one of their sponsors,
Harbour Lights.

(2) International Lighthouse/Lightship Weekend (ILLW) - August 18-19th.
Guidelines are on the web page at:
http://www.waterw.com/~weidner/arlhs/page2b.html

MORE LIGHTHOUSE ACTIVITY. Just a reminder that a new lighthouse will be activated for the "World Lighthouse Award" next weekend for one day, July 22nd. Look for 9A5KV/P, 9A3VM/P, 9A3DU/P and 9A5V/P to be active from the Croatian lighthouse "Otocic Lirica" (LH 0381). QSL via 9A5KV: PO Box 286, 20000 Dubrovnik, Croatia.

NEW DX PUBLICATION. OPDX was informed that a new DX publication is available for DXers, "The Amateur Radio DX Reference Guide - DX101X By AC6V". This guide includes information on DX Equipment, Propagation, Operating Aids, Working DX, QSLing, DX Secrets,14 Appendices... etc. This 226 page book took a year to write and features the DXing advice of several noted DXers and technical gurus. For an outline and samples of this guide, vist the Web page: http://ac6v.com/

QSL INFO AND NEWS.....
9A0HQ active this past weekend during the IARU HF Championship, should be QSLed via the bureau or directly to 9A5K via the following adresses:
Kresimir Kovarik, Zagorska 14, HR-49210 Zabok, CROATIA
Kresimir Kovarik, M.Sufflaya 15, HR-43000 Bjelovar, CROATIA

Victor/9V1BH and James/9V1YC operated as 9V9HQ, representing the IARU HQ station of The Singapore Amateur Radio Transmitting Society (SARTS), in the IARU Contest this past weekend. QSL via AA5BT.

C21TA QSLs. Peter's QSL Manager, Gwen VK3DYL, apologizes for the unavoidable delay in answering direct QSL cards. Since C21 stamps are greatly sought after by philatelists, Peter intends posting the cards from Nauru on his next trip.

Jose, EA5KB, is now the the QSL Manager of Claus, CP4BT. He can check QSL requests dating back to January 1st, 1998. His address:
Jose Ardid Arlandis, Appartado 5013 , E-46080 Valencia, SPAIN .

The HS0AC club station of Radio Amateur Soceity of Thailand (RAST HQ) was active in the IARU 2001 Contest this past weekend. Ops were: HS1CKC, HS0GBI, HS6NDK and E21EIC. QSL via G3NOM.

FK8GM was active in last weekend's IARU Contest as a Single Op/ Multi-band/SSB only entry. The QSL Manager is WB2RAJ.

Tom, N4XP (K4TSJ), reports that 85% of QSL requests for K5K, the Kingman Reef DXpedition, have been answered. Cards are generally answered in the sequence in which they were received. Tom is on a major push to complete this task---over 30,000 cards have been received.

NOT THE QSL MANAGER. Leonid, UA6CW, informs that he is not or has never been the QSL Manager for UJ8H, active during September 2000.

YR0HQ was active in the 2001 IARU HF World Campionship from the Romanian HQ, should be QSLed via YO3FRI.

QSL.NET BLOCKS THE OPDX BULLETIN. OPDX InterNet Subscribers using QSL.NET as their InterNet Mail Address will no longer receive the OPDX Bulletin. This will affect some 42 subscribers. OPDX has been having trouble sending

the bulletin over the last few weeks to these subscribers of QSL.NET. Apparently, (as we are told) it has something to do with a SPASM control on QSL.NET. We recommend that these subscribers PLEASE unsubscribe from the OPDX mailing List to prevent continued message bounces and resubscribe from another address. We are sorry for this inconvenience.

S2, BANGLADESH. Look for John, KX7YT, to be active as S21YV from Dhaka now through August 5th. He will operate on 20/15 meters SSB/PSK31 between the hours of 1400-1800z.

SPECIAL EVENT. A special event station will be on the air from now through the end of August to conmemorate the "Copa America 2001" soccer football tournament that will be held in Colombia. The Copa America is the most important football tournament in South America. All South American national teams will compete for this prestigious cup. The special callsign to be used is 5K3CA which will be on the air 80-10 meters, CW, RTTY, PSK31 and SSB. Operators are: HK3DDD, HK3WGQ, HK1APN/3, HK3PDX, HK3LGO, HK3CW, HJ3ISB, and HJ3JSF. QSL via HK3DDD, Beto. QSL direct or via the bureau. The QSL will be a beautiful color photo depicting the highlights of the tournament.

SPECIAL EVENT. In connection with the celebration of "The King Chulalongkorn Days" in Utanede, Sweden, special event station SI9AM will have "open house" between 0800-1800z, Thursday, July 19th through Sunday, July 22nd. They will allow a 2 hour slot for each operator during the operating hours of 0800-1800z daily. Whoever happens to be in the area/vicinity and would like to operate with this unusual callsign SI9AM, please contact them via E-mail at " si9am@qsl.net " for booking of time slots. The suggested frequencies are: CW - 3517, 7017, 14017, 21017 and 28017
SSB - 3760, 7060, 14210, 21310 and 28510 kHz
QSL via SM3CVM via the SM bureau or CBA. For more information about SI9AM, check the Web site: http://www.qsl.net/si9am

T5 OPERATION CANCELLED. Bruce, WD4NGB, informed OPDX that: "Due to the recent DXpedition to T5 reducing the need, and the increase in hostilities in the country, the planned trip to Somalia this fall is cancelled. Any other group that may wish to go, I would be glad to change what I have done for a web page so far for their use. Sorry to those that were expecting us to be there... 73/DX, Bruce"

TK, CORSICA (Lighthouse Activity). From July 20th to August 10th, Claude, F5MCC, has planned a South Corsica ham radio tour (IOTA EU-014 and DIFM TK-001). Claude will be active from the land lighthouses, valid for the French Phares et Balises du littoral (DPLF Award) and numbered: PB-169, 170, 171, 172, 173, 188 and 288. He will go to the IIe du Toro (IOTA EU-164 and DIFM TK-031), with TK5XN on a weekend (dates unknown at the moment, and this depends on the weather and the boat possibilities). The stay there is planned for at least one day. Claude will enter the IOTA Contest with TK/F5MCC/EU014 for some hours. Claude will also be active from several Castles and Genovese Towers numbered from TK/2A002 to TK/2A013 which are valid for the French Forts and Castles award (DFCF). All activity will be on 40/20/15/10 meters SSB, CW on request, except for the IOTA contest

and Ile du Toro activity where it will be CW only. The QSL for any of these activities go to F5MCC's direct CBA or via the French bureau to F3GJ.

V4, St, KITTS AND NEVIS. Larry, KJ4UY, will be traveling back here on July 19th. He will be operating from V44NK's QTH on Nevis as V47UY from July 20th through July 31st and will also operate during the IOTA contest. Activity will be 160-6 meters with the primary bands being 10 meters through 20 meters, operating CW/SSB/RTTY/PSK31. He should be joined by RB, WB4FNH, on July 25th and his proposed/requested callsign should be V47FNH. Please QSL V47UY via KJ4UY and V47FNH via WB4FNH with SASE for USA stations and SAE plus IRC or USD for return postage. They will be returning to the USA on August the 1st.

VU3, INDIA. Charly, K4VUD (also HS0ZCW, 9N7UD, V26V and A52UD), is now here and has just received recently his India callsign VU3CHE for HF operation. However, no QSNs were spotted by Charly on the cluster networks. A "BIG" disappointed Charly announced this week: "I am now sitting in Port Blair, Andaman Islands, India... that's VU4 land, guys... and I hold a new VU callsign... VU3CHE...but it is good only for operations in one location in New Delhi, India. !!!! close and yet so far!!!, I will file a full report on the test trip to VU4 land later. Very pretty place... trying snorkling today. Sked not not possible for VU3CHE. Back to HS-land soon."

XW, LAOS. Charly, K4VUD, also mentioned this past week that the Laos Frequencies Manager is still working on his XW operating permit application.

ZC4, U.K. SOV. BASE AREAS ON CYPRUS. Steve, ZC4BS, informs/updates OPDX that Steve/ZC4BS and Dez/ZC4DW, and the club station ZC4ESB are fully active "on-the-air" on all bands from 160-6 meters, including the WARC bands, and on all modes. Steve/ZC4BS is also operating SSTV (possibly the only ZC4 ever on this mode!). Their antennas range from coaxial dipoles to a 200ft doublet (basic but impressive ... worked 204 countries in 5 months on a dipole !!!). Steve mentions that once it cools down a little they will be building a few quad antennas for 15/10 meters. They are both active in most contests; usually one active on all bands, the other on a single band or even different modes to allow a better chance of catching a ZC4. Steve states that over 25,000 QSOs between them so far suggest their signals are getting out "OK", so check the cluster because they will be listening for you (ZC4BS is also an avid county hunter !!). Check out these interesting home pages about Steve:

Only found you once... 20m @ 0052, at a point when I was still more or less awake... (getting off work 0450z Saturday morning & then driving 50km to get home is not conducive to being fully aware in this contest!)

It's interesting what exchanges people came up with. Amazingly, I only got a CQ zone from one station. However, I got at least two serial numbers. ("001" from a European station - either that or he forgot to sign "KL7/"...) Then there was the poor WA4 station on 40 meters who worked me *SIX TIMES* (in 90 minutes...) and kept sending "5NN 08 ?". After seven hours sleep I finally realized he wanted to know what "08" meant. If he'd *asked me*...

I seem to remember finding you several times, Doug.
Thanks for the Qs. Overall conditions didn't seem
too bad. Unfortunately, I was unable to operate
much Saturday evening this year. For me, the most
frustrating part of the contest was finding VR2BG
on 20 CW right at the end and having him CQ in my
face. At first, there was practically no one calling
him, but after a few minutes he began to answer JAs
and UA0s. That's what you get with 20 watts and a half
length G5RV on ECNA, I guess.

Worked W1AW/6 on only 4 bands this year. Heard them
on 80 M on Sunday morning, but they were very weak
at best and faded fast. Other 6s seemed stronger.
Didn't even look at 160 M this year. Worked NU1AW
on 5 bands.

I got CQ zones a couple of times, but generally folks
did pretty well, I thought.

Source record: 16712

Hi Gary,

The only one I can tell you about is K5K, those cards are just starting to come out so hold on a bit longer. BYW are you aware of the email QSL reflector "DXQSL"? Lots of activity and guys and YL I suppose! post when they get certain cards. Also, when someone asks a question like you have here, someone often knows one of the operators of the DXpedition, the DX operator or the QSL status from another reliable source and so you will often know whether its time to reQSL or just hang on for a while longer - Hi.

Go to http://www.qsl.net/ and on the left side of the page click on "EMail Reflectors" scroll the list and subscribe to DX QSL (and any other lists that you'd like). It has proven valuable to me many times.

If the calls you are asking about are any indication, you might also be an island chaser in the IOTA program. There is another email reflector devoted to IOTA. Postings include QSL info, general IOTA questions, notices of operations, etc. That's at: islands@forum.radio-amador.net

73,
Tony, WF1N

Gary,
I'm also waiting on 3D2CI and K5K. I've read that somewhat over 85% of the K5K cards are out and they're working quickly to get the remainder out. I'd wait a couple more weeks before resubmitting.
With respect to 3D2CI, many people report receiving their cards, but clearly some are still waiting. It's not clear if Hrane is still working on them or if they may have been lost in the Yugoslav mail system. I'll probably wait several more weeks and then send another one, unless I read that he's still processing them.
I have indeed received a card from VK9ML. They were sent out very quickly. Perhaps an e-mail to the manager (Peter, VK4APG) at pjgarden@gil.com.au might yield some information on whether he's processed your card.

Regards,

Rich Eckman

Hi !

In a few hours our DX-club starts the traditional annual IOTA-DXpedition.
IOTA # SA-xxx

4M1X will be QRV from Cayo Sombrero from July 20 to 24.

We will get a NEW IOTA number during or shortly after the DXpedition.
Cayo Sombrero belongs to the NEWLY created Falcon-group (now independent from
the Zulia-group)
Due to IOTA rules the new IOTA-numbers are published ONLY after a certain number
of QSO's and worked continents :-(

Hopefully the IOTA people call us soon, so we can announce the number, hi.

We will be on all bands in CW and SSB

QSL via maildrop W4SO or ARV-Bureau

73

Ray

dl2gg/yv5

Soon the whole story you will see as usual at http://www.kilohertz.de

I still have not received a QSL from 4W6GH (CT1EGH). I sent him a request last summer and then again 2 months before the DXCC Honor roll March 31st deadline. So far nothing! Should I wait or send along another request?????

K5K cards are coming. A group has been meeting near Atlanta to get them out. Please have patience.

Craig,
Go to www.qth.net. On the left side of the screen, select "dx-qsl" from the list of mailing lists. You can subscribe so that each message is received as posted or elect to receive a digest of posts when the volume reaches a certain level. You can also search through the monthly archives and see if anyone has posted a question/response on a callsign of interest to you. I've found this list to be a lot of help.

Regards,

Rich Eckman

Download DXMonitor or log onto www.hamdx.com or www.qrz.com and go to their DX cluster. Also, the CLX cluster (do a web search) is pretty good. My favorite is DX Monitor since it is highly configurable, and it is also freeware.

Hope this helps.

On The DX Page of the site listed below are live internet DX Cluster links you can access ..this enables one to " try out " several clusters to see which ones suit them best and possibly serve their part of the globe best. There are two lists one DX clusters within for North America and another list for the rest of the planet....enjoy

IMHO one is best served by a logging program that will detect , graphically highlight on the screen, and audibly announce when an unworked country spot comes through. Many of the up-to-date logging programs can do this such as DXBase 2002 http://www.dxbase.com BTW DXBase can run internet DX cluster - and - 2M VHF DX clusters at the same time so one could say with 2M keep up on spots from his local region and also at the same time keep abreast of what countries are being spotted world wide.....

There is no such thing as a signature in your postings. A signature looks
like that "-- ", yours is "--". But since you decide to use a piece of junk
software that can't do any better, you are excused, at least to such an
extent that ignorance can be excused at all.

I believe if he contacts the Radio Amateur Callbook, they will research the
call for a nominal price, and provide certification acceptable to the FCC.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 15/July, through Sunday, 22/July there were 218 countries active. Countries available: 3A, 3B8, 3B9, 3C, 3D2, 3V, 3W, 4J, 4L, 4S, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5X, 6W, 6Y, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9U, 9V, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, JA, JD/o, JW, JY, K, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T32, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V8, VE, VK, VK9N, VP2E, VP8, VP9, VQ9, VR, VU, XE, XT, XU, XW, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity".

3D2, FIJI. Ron, ZL1AMO, signing as 3D2RW, seems to be active mainly on 40/20/15 meters. Check around 7008, 21028, 21260, 14023 and 14260 between 0430 and 1100z. He is now on IOTA OC-095. QSL via CBA.

3W, VIETNAM. Hans, WA1LWS, is once again active as 3W2LWS until about August 2nd. He was very active on CW over the past weekend on 20/15 meters with few QSNs on 10 meters. Most of his activity starts around 1700z and can go as late as 2330z. QSL via WA1LWS.

4Z, ISRAEL (Lighthouse Activity). Look for Dov/4Z4DX and his son Mat/4Z5DX to be active during the Lighthouse Weekend August 18-19th, as 4Z4DX/LH and 4Z5DX/LH. No details on bands/modes, name or number on the lighthouse were provided.

8Q, MALDIVES. Look for Pierre, HB9QQ, to be back here again during the last week of October and the first week of November, signing 8Q7QQ. Most of his activity will be on 6 meters, however, if 6 meters is closed, look for him on 10, 12, 17 and 30 meters CW.

9A, CROATIA (Special Event). Lenio Marobin, PY3DF (ILERA-Secretary), and a team of Europeans members of the International League of Esperantists Radioamateurs (ILERA) will activate 9A0E from the 86th Esperanto World Congress in Zagreb now through July 28th. Suggested frequencies are: 7066, 14266, 21266 and 28766 kHz. QSL via DL1CC.

A5, BHUTAN. Tony, IK7WUL, is expected to be active as A52UL from August 15-28th. His activity will be on all bands, mostly SSB, from the A51AA club station. QSL via I7JFQ.

CDXC OFFICERS. At the annual general membership meeting of the Chiltern DX Club (CDXC) - The UK DX Foundation held on July 14, 2001, the following were elected to the 2001/2002 committee:
President - Neville Cheadle, G3NUG Committee Members:
Chairman - John Butcher, G3LAS Mike Devereux, G3SED

Treasurer - Nigel Peacock, G4KIU Paul Brice-Stevens, G0WAT
Digest Editor - Don Field, G3XTT

CO0, CUBA (Special Event). Beginning at 0000z July 27th and ending 0000z on July 29th, look for special event station CO0SC to be active. This callsign was issued for celebrating 486th anniversary of he foundation of the city of SANTIAGO DE CUBA. Activity will be on 10/15/20/40/80 meters CW and SSB. The operators will be: CO8DD, CO8TW, CO8WE, CM8ESE CM8EFP and CM8VDC. The station will also be in the IOTA Contest for NA-015. The QSL card is via IN3ZNR callbook address:
Fabrizio Vedovelli, via Gramsci, 27, 38100 TRENTO, ITALY.

CP, BOLIVIA. Steve, G4ASL, is active from Cochabamba, Bolivia, as CP5/G4ASL until October. His activity is on 80-10 meters, mostly on RTTY, PSK31, CW and some SSTV and HELL. QSL via the bureau to home callsign G4ASL.

D6, COMOROS. John, WB4MBU, was heard signing D6/WB4MBU from a rare island called Nzwani (aka Anjouan) in the Comoros Island group. Activity has been on 15/20 meters. Check around 14203 kHz after 0300z and 21229 kHz after 1630z. He is expected to be there for another month.

FP, ST. PIERRE AND MIQUELON (Update). Paul/K9OT, Peter/NN9K and Peg/KB9LIE will operate from Miquelon Island (NA-032), from July 26-31st, signing

FP/homecall. They will have 80-6 meters CW, SSB, and PSK-31 capability, with a "breakable beacon" on 50.102 during non-contest time. For the RSGB IOTA contest they will sign FP/K9WM. QSL to homecall, except FP/K9WM goes to NN9K. Their web site is now available at: http://www.mhtc.net/~k9ot

FR/T, TROMELIN. It looks like Jacques, FR5ZU, is heading back here again during the month of September (September 6th through October 5th). Expected activity is to be on all bands SSB. "The Daily DX" states to QSL via direct or his current QSL Manager JA8FCG.

FS, ST. MARTIN. Gregg, W6IZT, will be active as FS/W6IZT from August 5-12th. Activity will be on 40-6 meters. QSL to his CBA.

IOTA NEWS..... (IOTA CONTEST THIS COMING WEEKEND, JULY 28-29th)
AS-049. Takeshi, JI3DST, will be active as JI3DST/6 from Tokara Archipelago (Kuchinoshima, Toshima-mura, Kagoshima-gun, Kagashima-ken), July 28th through August 5th. Activity will be on 40/17/15/12/10/6/2 meters SSB. QSL via JI3DST.

AS-103. Doji/JH3JWW, Takeshi/JI3DST and Lee/BV2NT were active from P'enghu (Pescadores) Island, Taiwan, over the past weekend as BV9AYA (Ops JH3JWW and JI3DST) and BV9A/BV2NT. QSL BV9AYA (ONLY for this Op) to JH3JWW via the Bureau and BV9A/BV2NT via BV2NT.

AS-105. The Korea DX Club Team will be operating as DS0DX/2 from Yongjong Island on July 28-29th, IOTA Contest included. Activity will be on 80-10 meters CW and SSB. QSL via HL1XP either direct or through the bureau.

EU-016. Look for Rodger, ON4TX, to be active as 9A/ON4TX from the Island of Prezba (IOCA CI-092) now through July 29th. No other details were provided.

EU-067. Jon, WB8YJF, will be active from Ocaracoke Island, NC, (USI NC-001S), now through July 29th. He will be active on RTTY, CW, and SSB, mostly 20-10 meters. QSL direct if possible, it is a LOT faster and Jon usually replies direct card requests within a day or so. His address is: Jon Severt/WB8YJF, 5586 Babbitt Rd., New Albany, OH 43054, USA.

EU-092. Jim, MM0BQI, will be active from the Island of Tanera Mor in the Summer Isles from July 27th through August 3rd. The various reference numbers are: Islands of Scotland Award SC10, WAB NB90 and QRA IO78. Activity will be on all bands 80-6 meters SSB, CW, RTTY and PSK31. Jim will be using the special callsign GB5SI (Summer Isles). QSL is 100% direct or via the RSGB Jim Martin, MM0BQI, 3 Lismore Avenue, Edinburgh, EH8 7DWSC SCOTLAND.

EU-110. Operators 9A2RD, 9A2CW, 9A5AEI and 9A6XX are planning to be active as 9A1P from the Island of Sv. Nikola (CI-118) during the IOTA Contest. Their Recievers/Transmitters are: TS930 x3,

IC775x1 + 2x amp. Their Antennas are: 3 el.Y 10m, 3. el.Y 15m,
3 el.Y 20m, wires 40 and 80m. There will be QSL information
soon!

EU-132. Zbig/SP6CZ and Andy/SP6ECA are to be active from Wolin Island
as homecall/1, now through July 29th, including the IOTA
Contest. During the contest they will work in Single Op/
Island station/100 W/SSB category. Outside of the contest
they will operate mostly on the WARC bands. QSL via their
home callsigns.

EU-146. Jim, ON5UM, is pleased to announce a joint Dutch and Belgian
expedition to the Island of Tiengemeten. Operators will be
PA7BT, ON5UM, ON6NL, ON6ZX, and ON4AKL. The group will be
active during the IOTA Contest as a Multi/Single Islands
Expedition/Mixed mode operation with the callsign PI4HQ (from
VERON). Before the contest they will be active under the
CEPT license PA/ON***. QSL via VERON in the Netherlands,
either the bureau or direct.

EU-170. Operators OK1DJG/Milan, OK1DUO/Jarda, OK1FUA/Martin, OK1HSK/
Jan, OK1KA/Pepa, OK1QM/Jan, OK1TC/Jarda and 9A9AA/Nikola will
be active as 9A0A from Vir Island (IOCA CI-141) during the
IOTA Contest. QSL 9A0A via OK1FLM. They will operate as
9A/homecall before the contest starting July 23rd. QSL via
their home callsign.

EU-173. 1996 IOTA Contest winners OH1MDR, OH1NOA and OH1MM will again
activate Sandstrom Reef for the IOTA Contest July 28-29th.
Their callsign will be OH9A, which belongs to the Market Reef
DX Association. QSL via OH1NOA. The route is OK via the OH1
bureau. If you want to send your QSL via direct the address
is: Timo Klimoff, Yrjonkatu 4 A 15, 28100 PORI, FINLAND,
EUROPE. For more info, check the following Web page at:
http://www.saunalahti.fi/oh1mdr/iota.html

SA-089. NEW IOTA (Refer to OPDX.520). The IOTA DXpedition to Falcon
Islands has changed their callsign from YW1F to 4M1X. It will
be on the air through July 24th to celebrate the "Venezuelan
Navy Day 2001".

SA-NEW. John, YV5JBI, with a group, will activate the Anzoategui State
Group as YV5JBI/P, from "Isla Piritu" (New IOTA), located north
of Piritu. The operation will take place from July 25-29th,
with an entry in the IOTA Contest. At least 2 stations will
be active around the clock on 80-6 meters, plus the WARC bands,
on all modes including PSK31 and RTTY. The locator grid is
FK70md and the island includes a lighthouse. QSL via CBA to
YV5JBI.

J4, GREECE. Wolff, DJ5JH, informs OPDX that he will again be active in
the WAEDC-CW Contest, August 11-12th, as J43J from the Peloponnese in

southern Greece. QSL via his CBA.

KH4, MIDWAY ISLAND. Ted, NH6YK, is expected to operate again as NH4/NH6YK from August 2-4th. Activity will be on the HF bands and 6 meters SSB only.

ILLW UPDATE. Mike, GM4SUC, reminds everyone that the International Lighthouse/Lightship Weekend (ILLW), August 18-19th, is just under 5 weeks away, and they have received notification of the 200th site to be active for this event. The sites are in 36 countries world-wide. A full list of the stations can be found at: http://www.vk2ce.com/ILLW/2001.htm

LIGHTHOUSE ACTIVITY. For the first time a VK8 Lighthouse will be active during the World Lighthouse Weekend, August 18-19th. They will be operating three stations at Emery Point Lighthouse (Lighthouse number - AUS071) IOTA OC-001 in the Darwin Northern Territory, Australia, where they had to obtain permission to operate at this very RARE location. Operators will be VK8NSB/Stuie, VK8MS/Mark, VK8ZAB/Alan, VK8KGP/Geoff and possibly up to 6 other VK8's. The day of operation will be a "Fun Field Day for Amateurs and Non-Amateurs" with a BBQ for lunch. Stations will be set up by 0000z (9:30am-Local) on the 18th and will operate late into the night and possibly into the morning of the 19th. They will be active on all the main HF bands, and at the present they have applied for the special callsign AX8LH. The lighthouse team is looking for a QSL Manager for this operation. If interested in being the QSL Manager, please E-mail Stuie/VK8NSB ASAP at: vk8nsb@octa4.net.au -or- vk8nsb@vkham.com

LIGHTHOUSE TOUR 2001 (Update). Kresimir, 9A7K, will be active from several Croatian lighthouses and islands between July 29th and August 3rd. The following lighthouses and islands will be activated:
Island of Veli Brijun and Lighthouse Peneda - Reference numbers:
JN64VV, EU-110, CLH-101, CI-139, WLH-1651 and ARLH CRO-010.
Island of Sveti Jerolim and Lighthouse - Reference numbers:
JN64VV, EU-110, CLH-150, CI-114 and ARLH CRO-160.
Island of Sveti Ivan na Pucini and Lighthouse - Reference numbers:
JN65TA, EU-110, CLH-145, CI-113, WLH-36 and ARLH CRO-017.
Island of Porer and Lighthouse - Reference numbers:
JN64WS, EU-110, CLH-111, CI-090, WLH-240 and ARLH CRO-014.
Island of Krasnica - Reference numbers: JN64UV, EU-110 and CI-045.
QSL via 9A7K: Kresimir Juratovic, P.O. Box 88, HR-48001 Koprivnica, CROATIA. Hams interested in this DXpeditions and the Croatian Light House Award can get all the details on the following Web page at:
http://www.qsl.net/9a7k

PJ2, CURACAO. The Bristol Contest Group will be active as PJ2Y for the IOTA Contest from SA-006 in the Multi-Op Permanent category. Operators will be G3RFX, G3TKF, G3XSV, G4FKA, G0HFX, G0WKW, M0AXF, EI3JE, G7ORR and M0WLF. They will also be active before the contest on all bands, including 6m, SSB/CW, signing PJ2/homecall.

QSL INFO AND NEWS.....
3B6RF QSL STATUS. Steve, N3SL, informs OPDX that Fred, HB9AAQ, has notified him that the QSLs are printed. Fred has express shipped the

cards to Steve, and he should be receiving them shorty. Steve has asked OPDX to inform the ham community as an update, and a "notice" to STOP sending duplicate requests, which are coming in at a pretty good clip! All QSL requests received have been processed, all labels printed, and they are simply awaiting the 3B6 QSLs. Those who did not include any or insufficient postage will be receiving their cards via the bureau via Switzerland. Steve states, "With everything ready on this end, I feel comfortable in saying that we will have all cards into the U.S. mail within 7 days of receiving the 3B6 QSLs. We want to be sure everyone has theirs for this year's DXCC submission. The number of 'Thanks for the all time new one' is pushing about 40% of those received. One gentleman even wrote that the 3B6 would have been his last country had they not added P5! Wow...."

Hank, K2HJB, was expected to be operating from Jamacia as 6Y5/K2HJB on 6 and 2 meters July 22-23rd. QSL direct or via the Bureau.

NOT THE QSL MANAGER. Larry, K5MK, reports that he is NOT the QSL Manager for 8P6GD or any other station.

Nikolay, UX0FF, was active in the IARU Contest as UR6F (RARE WPX). QSL via UX0FF: Nikolay Lavreka, P.O. Box 3, IZMAIL, 68600, UKRAINE.

THIS WAS SENT LATE. ZL2AS from New Zealand was expected to be active on 160m in the PACIFIC 160 METERS CONTEST 2001 on July 21st, 0700-2300z, LSB and CW. They state that "QSL cards will be sent for contacts made."

Glyn, GW0ANA, QSL Manager for the ZD7K-ZD8K DXpeditions, informs OPDX that the full color QSL cards for ZD7K and ZD8K have arrived from the printer. He states that the printer has done a great job on them and cards started going out July 16th. He hopes the guys like them, and they thank everyone for all for their support.

The QSL information for ZS6SRL for the IARU HF Contest (July 14-15th, 2001) is via Dennis, ZS4BS, either via the bureau or direct via the callbook address (Box 12104, Brandhof, 9324, Rep of South Africa).

S2, BANGLADESH. YL Shin, S21YH, has kept the CW ops happy on 17/15/12 meters. There has also been some SSB. Check around 18080 (or 18150) kHz after 1700z. Check around 21210 kHz after 0800z and 24895 kHz after 1030z. QSL via 7M4PTE.

SPECIAL PREFIXES. Special Event Prefixes have been authorized to be used by all Canadian Radio Amateurs to commemorate the 25th anniversary of 1976 Montreal Olympics Games. The special event prefixes are sponsored by the West Island Amateur Radio Club based in Pointe-Claire, Montreal, Quebec (Mr. Frederick Archibald VE2SEI). The special event prefixes assigned to this special event will be: XM for VE's, XL for VA's, XN for VO's and XO for VY's. They are only authorized to use these prefixes between July 15, 2001 to August 15, 2001.

TL, CENTRAL AFRICA. Charles, TL8CK, seems to like 15 meters SSB. Look for him between 1130 and 1430z. QSL via F6EWM.

TR, GABON. Jean, TR8JCV, was active on 17 meters this past weekend. Watch 18132 kHz around 2030z. QSL via CBA. Also active was Jean, TR8IG, on 15/20 meters. Watch 14192 kHz at 2230z and 21245 kHz at 1400z. QSL via F5IG.

TT, CHAD. Eric, F5JJK, signing TT8JE, was heard on 12 meters with very few takers. Watch 24945 kHz between 0730 and 0830z. QSL via F6FNU. Also active was TT8DX on 18152 kHz after 0800z and on 28495 kHz at 1230z. QSL via F5OGL.

XW, LAOS. Hiroo, JA2EZD, is active again as XW0X, and his licence has been renewed through August 16th. He was active this past weekend on 20/15/10 meters SSB at various times.

Hello all,
I am searching for the schedule from the Icom IC-451E.
I have here that radio and the modulations is very soft.
So i have to get it up more.
Can anyone help me with this schedule,or just tell me how i can get it louder??

Try a different microphone..
Icom made a few similar ones..
Not all had the same gain from the internal preamp..

As the 2001 RSGB IOTA Contest approaches, I offer a brief reminder that the NG3K list of announced operations for this contest is available at:

http://www.ng3k.com/Misc/iota2001.html

The data are sorted by callsign, but alternate views arranged DXCC entity and IOTA number respectively are available at:

http://www.ng3k.com/Misc/iotad2001.html
http://www.ng3k.com/Misc/iotai2001.html

The alternate views are also accessible from the main page. You have only to click on the appropriate column header (DXCC or IOTA).

As always, additions, updates, and corrections to the list are most welcome to Bill@ng3k.com

Enjoy,

Bill/NG3K

1844. WANTED: updated net directory sorted by time of day

Newsgroup: rec.radio.amateur.dx
Date: 2001-07-24 15:56:51 UTC
From: jason_hsu@my-deja.com
Message-ID: <f7d9a152.0107240756.9cd7648@posting.google.com>
Source record: 16749

Does anyone here know where I can find a net directory sorted by time of day? The ARRL list isn't completely up-to-date and only sorts by place and band.

I'd like to be able to simply turn on the transceiver, see what nets are scheduled to start soon, and try to get in (assuming the net isn't a 440 FM net 3000 miles away).

1845. Where to call CQ

Newsgroup: rec.radio.amateur.dx
Date: 2001-07-24 16:19:50 UTC
From: jason_hsu@my-deja.com
Message-ID: <f7d9a152.0107240819.2bf594b1@posting.google.com>
Source record: 16750

How do you decide where to call CQ on SSB? When I hope for a casual QSO (as opposed to checking into a net), I call CQ, but I rarely hear a response EVEN when the band seems to be open. I have two friends with more efficient antennas who are rather new to HF as well, and they tell me that they often have difficulty getting responses to CQ calls.

Are any particular frequencies a better bet? Would a frequency used by a popular net (albeit at a different time) be good? How about a frequency near the edge of a band allocated for a license class, SSB, or a band plan? A frequency that is a nice round number?

Any other suggestions? (Yes, I know about CW and PSK-31. I need to practice my CW, and I don't have the equipment for PSK-31 yet. I also know that ragchewing on SSB took place before there was PSK-31 or the Internet.)

Source record: 16451

Good question...
I'm fairly new on HF, and I noticed too that calling CQ is not always effective (except when in a contest OR having an exotic call)...

As for SSB: just look for a QRG that is not in use and is not "allocated" to something else (I called CQ on 14.260 once, people kept asking what the IOTA reference was, and on 21.340 or something if I was ever to transmit any pictures *hi*). With my limited setup (100W + dipole), I only worked Europe and some US stations by calling CQ myself.

But I gave up this mode, and started doing CW only. This is much more effective, and MUCH MUCH more fun. Also the response on my CQ's are more sucessful; CW-ops seem to answer CQ from an everyday call like mine much faster! Sometimes I nest myself pretty close to a rare DX station, hoping to be noticed by the stations in the pile-up. But does not work like I had hoped...

As for digital modes: can't tell because never tried 'em (yet).
About nets: absolutely nothing against it, but I think sometimes the practices are a bit "smelly". Not for me, thanks!

My P.E.R.S.O.N.A.L. advice: don't believe our precious hobby is dying. There's always someone out there. Look for a clear spot and call CQ, and be patient.
Some days plenty of DX, other days only "locals" - but always someone! Just take that key or paddle and get into CW - I know I did and only regret the fact I didn't do CW earlier!

Good luck and hope to copy you one day!

From: Berkin AYDOGMUS <ta3j@yahoo.com>
Subject: TA2BK (SILENT KEY)

BAHRI KACAN, TA2BK (SILENT KEY)

Turkish radio amateurs lost one of their most important member (Bahri KACAN,
TA2BK) tonight. He passed away because of heart attack. He had given the biggest support for the development of HAM RADIO in TURKEY.

We will miss him.

Nilay Mine AYDOGMUS (TA3YJ) & Berkin AYDOGMUS (TA3J)

P.S. Very sad news indeed! I had previously gotten a post from David VK3EW
but wanted confirmation before posting, so I contacted TA3D, TA3DD and TA3J
directly. Unfortunately it is true, and we all lost a good friend. I've
known Bahri for >20 years, worked him for my first TA on Topband and met him
in Friedrichshafen in 1997. May God bless Bahri's soul and his family at this
sad time. de W4ZV

Jason,

It's simple really, like the fellow from Belgium said:

A. Find a clear frequency. (Be sure to ask first!)

b. Call CQ, ensuring that the mode used is OK
for the frequency/license class.

c. Have fun.

Now, having said that, there are some frequencies
on some bands that are sort of reserved. Some
are reserved for special modes like SSTV, others
are set aside for nets. The best resource for
finding these special frequencies are the various
publications like the "ARRL Operating Manual"
or the "Considerate operators guide", also published
periodically in QST.

HTH...

It is relatively easy to do. Simply get an audio mixer hybrid device
(pair of coupled transformers). Feed the scrambled audio into one port,
and a 1700 MHz carrier into the other. Amplify recovered, descrambled
audio at the output port. Many years ago, when these were the cheapest
and simplest scrambling means available, we discovered how easy they
were to defeat, and moved on to more complex analog "rolling-code" type
scramblers. Of course nowdays, most voice encryption is digital, and
difficult to decrypt without a very sophistocated computer. But for
police work, only privacy, not true security is needed, so DES mode
encryption works just fine for 99% of applications.

Please understand that in the US, while some frequencies are generally
USED by nets, those frequencies are NOT "reserved," or "set aside" for
nets. A net has no more right to a given frequency than does an
individual calling CQ. Whoever is using the frequency first is the
only one who can claim any sort of "right" to a frequency. Net
operators for a very long time have felt that they have a "right" to a
frequency and therefore have the "right" to demand that an operator
vacate "their" frequency. This is wrong and illegal. Net control
operators have the right (as does any operator) to REQUEST the use of
a frequency, but they do not have the right to DEMAND that a frequency
be made available to them. This position has been stated very clearly
by the FCC.

Raymond is right, but please don't get into frequency fights. If a net has used a frequency regularly for a long period of time, let them have it. Doing otherwise may be legal, but it's not in the best interest of Amateur Radio.

I have always understood that LSB is used on 30-160 Meters and USB on 10-20 Meters. If one were to do an analysis most likely USB will win out.

Hi
I have been away from amateur radio for over 45 years. I recently came
across a QSL card that did not have a postage stamp and address to go thru
the postal system but had a stamp that said "QSL Bureau Tokyo Japan".
Can soneone give me a short explanation of how the system works.
Thanks in advance Art ex-K2GNO technician class back in the eary 1950s

Since this is on the ham newsgroups, I guess I will ask this here. Would it be illegal to use a speech inverter on the ham bands? Does it fall under encrypted transmissions or those that are not allowed under FCC rules? Just a thought.....

thanks!

Message-ID: <3b60433d.1093313551@news.jax.bellsouth.net>
Source record: 16473

The bureau system was intended to be a network thru which cards
are collected and distributed from the hams in the country/bureau area
and then are mailed bulk from one country to another.

The JA hams all send their outgoing cards to the JA bureau, in Japan.

The JA bureau sorts them by destination country, and sends them bulk
mail to various other bureaus all over the world, i.e., all the W3
cards go to the W3 bureau, W6 cards the W6 bureau, ON cards to the
ON bureau, etc.

Various other bureaus sort them out and distribute them to the hams
they are for.

Supposed to save money.

Has a few problems:

Very slow, some bureau cards take years (literally) to get delivered.

Not all countries have incoming and outgoing bureaus.

Some countries require 'membership' in the national society or bureau
for sending/receipt of QSL cards. Not all hams are members so some
cards can not be delivered.

But we've been doing it forever, and like all good hams, we resist
change, so we'll probably be doing it forever........

You can read all about the U.S. bureau system, and find out how
much it will cost you to have your cards lost at:

http://www.arrl.org/qsl/

And maybe Nope!

It depends what mode of transmission.

On SSB, if you used a speech inverter, you would simply transmit on the
'wrong' sideband (not illegal in the UK), and could easily be resolved.
You would also appear to be about 3kHz off frequency.

On FM, you would, of course, sound inverted.

On AM, you would also sound inverted, but could be resolved by taking
the signal as SSB, and tuning to one of the sidebands.

Ian.

9-MHz crystal filter with the standard 5-MHz VFO..
Lower ssb on 80, upper on 20 meters.

Pete

Speach inversion is *not* LSB. What it is inverting is the audio frequency range. It's an attempt to encrypt or obscure the meaning of the transmission therefore it would be illegal on the ham bands in the U.S.

In the United States, it is a violation to transmit:

...messages in codes or ciphers intended to obscure the
meaning thereof, except as otherwise provided herein;

[FCC Rules, Sect. 97.113(a)(4)]

This includes the use of speech inversion when intended for
"privacy".

For 6m, normally USB. As far as I know, all bands 20m and above use
USB. In fact, except for CB, most all station including commercials
use USB on all frequencies. So in the general HF spectrum only the
hams on 160/80/40 meters use LSB as normal. Almost everyone else is
USB. The CBer's are about 50/50 with maybe more on LSB. I think they
like to be different. MK

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, NC1L, KF2TI, W2EJG, AJ3M, N3SL, NG3K, W3UR & The Daily DX, K4EP, KO4JY, N4AA & QRZ DX, AI5P, NH6YK, K8YSE, 5B4MF, BA4TB, DJ5JH, DL1EK & DX News Letter, DL2VFR, DL2RUM, EA4ST, F5NQL, F6AJA & Les Nouvelles DX, IK7JWX, JI3DST, LZ1NG, MM0BQI, ON4ALW/PA6TEX, OZ4PAX, PS7ZZ, RZ1OA, SP8UFO, UA6CW, VK2UW and YB5QZ for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 21/July, through Friday, 27/July there were 214 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 3X, 4J, 4L, 4S, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5X, 5Z, 6W, 6Y, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9V, 9X, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE0A, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J3, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T32, T7, T8, T9, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V7, V8, VE, VK, VK9N, VP2V, VP9, VQ9, VR, VU, XE, XT, XU, XW, YB, YI, YK, YL, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZD7, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity".

DXCC NEWS......
Bill Moore, NC1L, DXCC Manager, reports: "T5AR (Somalia) has been approved for DXCC credit. It was on the bad list for lack of documentation. The documentation has been reviewed and it is OK. People can now receive DXCC credit. Anyone who has submitted it and had it

rejected can contact us and we'll be able to update their record without having to submit the card again. If not, it can be sent in the next submission."

Bill Moore, NC1L, DXCC Manager, also reports: "The operations shown below have been approved for DXCC credit. They were on the bad list for lack of documentation. The documentation has been reviewed and they are now OK. People can now receive DXCC credit. Anyone who has submitted these and had it rejected can contact us and we'll be able to update their record without having to submit the card again. If not, it can be sent in the next submission." Stations are: 3XY1B0, 3XY7A and 3XY03A.

Bill Moore, NC1L, DXCC Manager, informed Steve, N3SL, that they have reviewed the 3B6RF doc's and the operation is approved for DXCC credit.

DX NET. Chris, VK2UW, would like to offer all DX Stations the opportunity to use the Pacific DX Net on 14240 khz from 1100z until 1300z, to build up their contacts and also help others make contact with the DX.

FY, FRENCH GUIANA. Look for F1HAR, F5HRY, F5MZN, F5OIH, F6HLC, FY5FU, and FY5FY to be active as FY5KE for the next CQWW SSB as a Multi/Single entry.

IOTA NEWS..... (IOTA Contest July 28-29th)
AS-120. Team members of the Nicosia Contest Group and friends (Loris/ 5B4FN, George/5B4KH, Marios/5B4WN, Paris/5B4XF and George/ 5B4AGC), will activate the Cyprus Coastal Islands during the IOTA contest. Operation will take place from Agios Georgios (aka Kakoskaliou) island off the north-western tip of Cyprus. The team hopes to have a running and a multiplier station active at the same time using mostly vertical antennas and a 400W linear on the running station. QSL Manager for this expedition will be George, 5B4KH. Callsign will be announced later on, but will most probably begin with the C4 prefix.

AS-135. Members of JSDXC (Jin/BA4TA, Michael/BD5RV and Win/BD4RS) will be signing BI4U from Qingshan Island during the IOTA contest. QSL via BA4RD.

EU-038. The UBA/NOK members will travel to Texel Island to take part in this year's IOTA Contest with the call PA6TEX. They will also activate Texel Island Lighthouse NET 024 (ARLHS) during their stay. Look for them before and during the contest. QSLs go via ON4ALW or UBA Buro, please DO NOT send QSLs via the Dutch QSL bureau.

EU-091. Look for IK7FPX/P as a Multi-Op operation during the IOTA Contest from Grande Island (I.I.A. LE-002). QSL via H.C., bureau or direct (qrz.com). There will be other operators signing homecall/P, and they will be active on 50 Mhz (loc. JN80WG) and on the WARC bands.

EU-092. Jim Martin, MM0BQI, will be active from the Island of Tanera Mor in the Summer Isles from July 27th through August 3rd. The various reference numbers are: Islands of Scotland Award SC10, WAB NB90 and QRA IO78. Activity will be on all bands 80-6m SSB, CW, RTTY and PSK31 and a mixed mode entry in the IOTA contest. Jim states, "Hopefully this year conditions will be better and I am looking forward to working lots of stations who require the Summer Isles for IOTA or IOSA. I will be using special callsign GB5SI (Summer Isles)." QSL is 100% via RSGB or direct: Jim Martin, 3 Lismore Avenue, Edinburgh, EH8 7DW, SCOTLAND - UK. Full details on the web page: http://www.qsl.net/mm0bqi

EU-095. Dominique, F5RYC, will be active as F5RYC/P from Pomegues Island for the IOTA contest. QSL via HC, preferably via the bureau.

EU-113. The team of IK6CAC/Carlo (CW op.), IK0QDB/Luca, IZ7ATN/Simon and IZ0CKJ/Alessio (QSL manager) will be active from Kithira Island in order to participate in the IOTA Contest as J48K. QSL Manager's address is: Alessio Roma - via Sterparo, 43 - 03023 CECCANO (FR) - ITALY.

EU-057
EU-129. The contest team DL0KWH had to change plans. They will now be active from Usedom Island in the IOTA Contest. They will use a 3 elemment Yagi for 10/15/20 meters and a TITANEX V8030 for 80/40 meters. Activity/entry will be for 24 hours - Multi Op CW/SSB. They will be active outside of contest under individual callsigns DL2RTK, DL2SWW, DL2VFR, DH7NO and DH1LA. After the contest on Monday, July 30th, they will visit the following rare islands Greifswalder Oie (EU-057 - GIA Nr. O-12) and Ruden (EU-057 - GIA Nr. O-11). On Greifswalder Oie, they will activate a lighthouse, and it counts for the WLH LH-0114 and for the German Lighthouse Award as well (Nr. 23).

EU-150. An international group of hams will take part at the IOTA Contest from Insua Island. The callsign will be CQ2I and the following operators will be on the following modes:
SSB OP: EA2TV, EA4ATI, EA4ST, CT1EEB
CW OP: EA1CA, EA4AHD, CT1CJJ
QSL CARDS via EA4URJ (via Bureau or direct). For more info, check the web site: http://www.ea4ahd.com/insua/

EU-153. Vlad/RZ1OA, Dima/UA1OLM, Oleg/RU1OG are be active as RZ1OA/A, UA1OLM/A and RU1OG/A from Lyasomin Island now through August 2nd. This DXpedition is dedicated to the 10th anniversary of the first DXpedition to Lyasomin Island. QSL via RZ1OA: (Vlad Sadakov, P.O. Box 48, Arkhangelsk, 163040, Russia.

EU-171. Ove, OZ4PAX, will be active from Vendsyssel Island. The city name is Hirtshals. QSL is ok via the bureau or direct as seen on QRZ.COM.

EU-181. Nick, LZ1NG, reports he will try to be active from Sveta
Anastasya Island between August 11-18th. Activity will be
on 80-6 meters SSB/CW. QSL card will be answered by the
same way that they are received. QSL to LZ1NG: Nikolay Babarev,
P.O.Box 356, Plovdiv - 4000, BULGARIA.

EU-185. The team of UA6A and RA3AUM/6 plans to take part in IOTA
contest from Dzendzik Island (RR2404). After the contest, they
will be operating from islands: Krupenina (EU-185,RR2403),
Golen'kij (EU-185, RR-possible new-one), Lisij (no IOTA,
RR-possible new-one). They will be on each island for one
day. Callsign RI6AAA will be used during the contest. After
the contest they MAY sign homecall/p. QSL for RI6AAA via UA6CW
direct or bureau.

NA-112. Philip/K4EP and Craig/KF4NLM, will activate Bogue Banks for
the IOTA contest. They will operate from Jeff's, KF4WHY, QTH
using the callsign W4LVS/P.

NA-076. During the IOTA Contest, KF9YL will be active (Single Op/24hr/
SSB/100w/DXpedition) from Cedar Key. QSL via bureau or direct
to: Fred Levinson, PO Box 291891, Davie, FL, 33329-1891 USA.

OC-245. John, YB5NOF, will be active from Rupat Island to participate
in the IOTA Contest, SSB only. QSL via John E.Daluas,
P.O.Box 194/CPA, CIPUTAT, 15401, INDONESIA.

KH4, MIDWAY ISLAND. Tom, DL2RUM, informs OPDX to look for Rudi, KH4/DL7VFR,
and Tom, KH4/DL2RUM, to be active from Midway from September 20-29th.
Activity will be on 160-6 meters, CW,SSB and RTTY. QSL via their homecall.
For further info, please see: http://www.qsl.net/dl2rum/

NH4, MIDWAY ISLAND. Ted, NH6YK, informs OPDX that he will sign NH4/NH6YK
from Midway. He will be there for a short 3 day visit - he will be on the
radio as time permits between 0700z August 2nd and 0400z August 5th. He
will be working one of those days and "doing some pre-work-work on the
other". As this is a short trip, SSB only, HF and 6m (10W, 5el yagi).
QSL direct or Bureau to NH6YK. Ted states the following: "I hope to catch
South Dakota :-) more of Africa, Europe, and Antarctica :-) and everyone
else if the propagation is willing. Please be patient, Please listen
carefully, please avoid calling when I'm asking for someone else. I can
go 2-3+ per minute if you cooperate, though I enjoy talking to former
island residents. BTW: I apologize for the delay in getting past cards
out. Most QSOs are now on a computer logbook, and labels are underway.
I hope to get my backlog done in the next month or so."

LIGHTHOUSE ACTIVITY.....
Look for W4P to be active from Ponce Inlet Lighthouse next weekend,
August 4-5th. QSL route will be as announced by operators. Ponce Inlet
is located in the vicinity of Daytona Beach, FL.

Look for ZX7ZZ to be active on 80-10 meters, CW/SSB/PSK31/RTTY, from
the Galinhos Lighthouse (DFB RN 09) in Galinhos City, RN, Brasil.
The team of operators will include PS7JS, PS7KC, PS7PIO, PS7ZZ and

possibly others. QSL via the bureau or PS7ZZ: Francisco de Freitas,
Av. Sao Miguel dos Caribes 31, Conj. Jiqui, 59086-500, Natal/RN/Brasil.
For a picture, check the web page: http://www.qsl.net/ps7zz/galinhos.gif

PJ, SABA ISLAND. Kevin, KO4JY, informs OPDX that he will be active on Saba
from August 13-18th on both CW and SSB 20, 15 and 10 meters. He may be on
40 meters if he has room for a dipole. He has applied for a local call
but doesn't have much confidence he will get it in time. If not, he
will sign PJ/KO4JY. His trip is mainly a dive trip, but he will try to
get an hour or two in each day in the morning and evening. Kevin will
be operating a FT-100D with either a R5, R8 or wire. He is undecided which
antenna to take. When on CW, he will spend most of his time in the Extra
band. Although he will give everyone a chance at least one day. For SSB,
he will find a frequencies somewhere where everyone can work him.

QSL INFO AND NEWS.................
Masa Miura, AJ3M, states that he operated as 4L/AJ3M from Tbilisi,
Georgia, and made about 750 QSOs. QSL via AJ3M.

BV9AYA QSL INFO. Please QSL to JH3JWW via the Bureau for QSOs only
between July 20-22nd.

Wolff, DJ5JH, informs OPDX that in OPDX.521 we stated QSL for J43J
should go via his CBA. That's not necessary. He tells OPDX his J43J
QSLs, as well as his regular callsign in Greece SV3/DJ5JH, can go via
the bureau to DJ5JH (he states,"No need to use the CBA and the
expensive mail). Wolff says. "QSL via bureau is one of the strict
principles of the SDXG -South German DX Group (see http://www.sdxg.net).

OX/SP8UFO QSLs for this June/July 2001 short operation from OX land
will be printed in few days. QSL card shipping will start in August.
Please do not send direct QSLs via Marek/SP8UFO's home callsign. The
address is incorrect in any callbook. The best and fastest way for
a QSL is direct via SP8TK: Jerzy Miskiewicz, ul.Walecznych 17,
20-135 LUBLIN - POLAND.

VP9/AI5P QSLS. All QSLs sent direct are now in the mail. No bureau cards
yet, but they will be answered and returned via bureau in a timely manner.
Rick, AI5P, states, "Thanks for the many contacts especially on the
WARC bands."

TK, CORSICA. Paul, F2YT, will be going to Corsica (EU-014, DIFM TK001)
and Sanguinaire Islands (EU-104) between August 18th and September 2nd.
He expects to use the special callsign TK8T. Suggested frequencies are:
7099 and 14256 SSB, and the IOTA frequencies on CW both 40 and 20 meters
+/- QRM. QSL via F2YT direct or REF bureau.

1890. NEW Kenwood TS870 eGroup .. Please come and join

Newsgroup: rec.radio.amateur.dx
Date: 2001-07-27 23:58:18 UTC
From: m0cke@btinternet.com
Message-ID: <ed60baec.0107271558.28324dab@posting.google.com>
Source record: 16495

Hi All.

I've created a eGroup for the Kenwood TS870.
Join up and you can upload and files / programs related to the TS870
to the Files Area.
Got a problem? .. Maybe other TS870S owners have the same, try
asking through the messages.
Got an experience to share (Good or Bad) again share it via the
messages!

Please join, Let make the group helpful for the new user of a TS870S!

Why not make Sked with another TS870 User .. do it via the group
messages!

I hope to hear you on the air and see you posting on the group!

http://www.egroups.co.uk/join/TS870

Regards,

Jim M0CKE

Back in the mid-sixties, CQ magazine ran a couple of articles on "speech inverters". That was a time when you'd often see DSB transmitters or converters (DSB of course being specifically double sideband with a suppressed carrier). Since virtually no one was using a synchronous detector, the common means of receiving DSB was to use an SSB receiver and use it's filter to hack off the unwanted sideband. But older receivers were still common, and their IF filters left a lot to be desired when receiving SSB.

So CQ ran an article (and then a followup showing a way of doing the same thing with a different circuit) that was nothing more than a balanced modulator and an audio oscillator. It inverted the audio, and then you fed that into the DSB transmitter. The result put the lowest audio frequencies at the far points from the suppressed carrier, rather than right at that point. So you didn't need such a sharp IF filter to get rid of the unneeeded sideband.

Normal DSBsc

highest LSB USB highest
audio----------|-----------audio
|
Suppressed
carrier

inverted audio DSBsc:

lowest LSB USB lowest
audio----------|-----------audio
|
suppressed
carrier

In the first case, the resinserted carrier has to be exactly where the suppressed carrier is or else the two sidebands will translate to audio at different frequencies. Filtering out the unneeded sideband in the receiver allows for some variation of the beat frequency (the same way one can mistune an SSB signal with the only result being an odd sounding voice).

But if your filter isn't really great, as was the case in those old receivers, you couldn't knock out the unneeded sideband right at the carrier point.

With the inverted audio, you'd place the bfo at the "lowest audio" point, and the flaky filter would just let some other signal through (which could be annoying, but could be mentally tuned out unlike the sidebands beating together). Any of the unwanted sideband that did pass through the filter would translate to audio at a higher frequency, where it would be well away from the frequencies of the wanted sideband.

An interesting concept, and one that never got much coverage because the assumption was that you'd use a good SSB receiver to knock out the unwanted sideband.

I have a HyGain 10/15/20m 5 element beam and Mosley 40m 2 element
beam that I would like to trade for manpower. Here's my situation.
This system is still up at my old QTH. I need to get it down, as we have

moved to a new QTH. The system is located in Orlando, Fl. I want
to install the tower at my new QTH for 160m vertical use. But I'm not
interested in the beams or rotator system to go with them. I'm willing
to
give the beam's and rotator system to anyone who has the equipment
and time to take the tower down. It's 85ft of Rohn 25g tower.

Anyone in the area that's interested can contact me at:
gwt@mpinet.net

Source record: 16518

Log Windows 3.07.34.01 released!

Update adds support for voice packet spots and parallel port devices under Windows NT, Windows 2000 and Windows XP, MARS and 11 Meter Support!

Muscle Shoals, Alabama. July 30, 2001: Creative Services Software announced that version 3.07.34.01 of the popular logging program Log Windows has been released. The release includes fixes for the M2 Rotor, 1.2 GHZ support for Kenwood's new TS-2000, 32 bit calls to allow voice packet spots and parallel port devices access under Windows NT, Windows 2000 and Windows XP, and frequency support for both MARS and 11 meters.

"Putting MARS and 11 meter support in will allow those users to log nets and log contacts with their friends", said Rick Ruhl, W4PC, "This is the first version that we have released that will only install under Windows 95 or greater. We'll still have 3.07.34 available for those running Windows 3.1, but that is our last release under 16 bit Windows"

The product retails for $69.95 and upgrades from release 3.06.15 or earlier is $40.00. Those who have purchased version 3.06.50 or greater will get this upgrade free. It also appears on the Digital Trio CD. It is available from dealers around the world, as well as direct from CSS.

Log Windows is owned by SCO, Inc and is maintained by Creative Services Software.

Creative Services Software is at http://www.cssincorp.com

The Log Windows homepage is at http://www.logwindows.com

Windows, Windows 95, Windows 98, Windows Me, Windows NT and Windows 2000 are Registered Trademarks of Microsoft Corporation.

I worked 5A1A a couple of times and still need 5A confirmed.
My outgoing card has been standing here in front of me for quite a while
now...
But REGISTERED &#65533;nd 2$? If I were 100% sure of fast return, then perhaps -
but most DX'ers worldwide tell me that << it's a gamble >>...

What is wrong with "the buro"???

It might be slow, granted, but it's cheap and reliable (for most countries).

Stations in countries without "buro" and with "dubious postal services" can
always look for a qsl manager, I think there are some people in the hobby
that want to do this job for free (via buro, of course!).

I like getting real hardcopy cards, not only for DXCC or other awards, but
because ... well, everyone knows, except of eQSL protagonists I guess...
hi

Hope not to cause a riot here over eQSL and cards in general...

Abubaker, 5A1A, is conducting an amateur radio class in Tripoli and hopes to increase the number of those qualified to hold and amateur radio license in Libya.

His QSL is a sure thing if the mail actually gets into his hands. The problem is in the postal system on his end. The registered mail isn't cheap - that's for sure, but the only way to have a reasonable probability of reaching him. Don't put any call letters on the envelope - make it as 'generic' in appearance as possible. I've sent him seven QSL's, and he received (and promptly responded to) five of them.

He's a very nice fellow and a good friend.

The problem with the buro is that there is no buro to Libya. There is one station in the whole country. Suck it up, send the card like the rest of us. If you want it bad enough, you'll do what you have to do. As for me, three registered packets, remailings from Spain--nothing received. Mine came via Austria.

You must be kidding. Only 2 months? It is a DXCC requirement that rare
DXpeditions wait at least 6 months before QSLing, and preferably till
just after the submission deadline for this year's listings :.)

Some of you folks should try being a QSl manager! "Back in May" is less than 3 months ago - the ops have to get back from the operation, sort out the logs, get QSL cards printed and then attack the huge pile of requests for said cards. And most of these people have Real Lives as well.

Don't re-send requests after as little as 3 months, either - it slows down the process and generates even more of these "where the heck is my card?" requests.

I agree. I got a 5A1A card using his registered mail instructions,
and then, later, received from him cards for his 5A29 and 5A30
operations, where I had not even sent him a card first. Apparently he
is able to get cards out of the country with ham radio visitors, who
then forward them on his behalf.

QSLing requires a lot of patience and understanding. I worked in
Turkey for a few months in 1999, and mail both in and out was very
unreliable.

Yes, I did -- several months ago. I also received a card from the May CW WPX
operation in French Polynesia. (He was there just before he went to Pitcairn).

Make sure you have the currect NZ address for Jackie. I am not sure if the

CBA has been updated, but Buckmaster does have the current address:

Jacques Calvo, ZL3CW
P.O. Box 593
PUKEKOHE, Auckland 1800
New Zealand

The other option is to e-mail Jackie. It does take some time. I had major

problems getting his Eritrea operation confirmed, but he does answer.
Try: zl3cw@xtra.co.nz

Thanks Mark for the info. I checked and that is the address I used. I guess I'll wait a little while longer before resubmitting., as is usually the case after one does it will show up in the mailbox! Just a little anxious as Kermadec would be a "new one" for me. Thanks and 73 de Dale.

This is my experience and I have sent him direct and registered mail and have not received a card from him. I also hear a lot of other hams who sent him money and received NOTHING!!!!!! I think he is just in it for the money!!!!!!!!!!!!!!!! He should have his license revoked for fraud!! So I think you should find another 9A station to QSL with as 9A1A doesn't!!!!

I've never had a problem getting a card from 9A1A. Always qsl's on the
1st try. Have never had a problem getting a card from 5A1A either.
Takes a tad longer and is a tad more expensive due to the Intern'l
registered mail, but eventually it comes through. Must be those great
Bill Plum envelopes.

First of all you should try to get your log straight: Abubaker is 5A1A and not in Croatia. And second you should try to put yourself into the situation of living in an internationally isolated country, the citzens of which have massive problems in arranging themselves with a less than optimal regime. Plus the fact that ham radio is hardly a generally accepted way of spending your spare time in this country. Neither is receiving mail and money via regular mail, a fact that is easily forgotten.

Abubaker does not make any money from sending you the QSLs and if you receive yours back via the buro it probably means that it is the only way for him to send any cards *out*. Have you ever been to Libya and tried to send mail? How reliable was the service?

If you don't get the notion that other people in other countries may lead a different life and face problems that you don't even dare dream ybout, you should seriously consider quitting the hobby and take up bass fishing.

I have had the pleasure of picking up Abubaker from the airport and drive hin to a German ham fair a couple of years and the trip certainly was an eye opener in terms of learning the country and its problems. To call someone a fraudulent persons, because circumstances don't allow him to operate in the one and only American fashion, is simply ignorant, stupid and moronic.

1940. Tune for SWR or Reactance?

Newsgroup: rec.radio.amateur.dx
Date: 2001-08-03 16:01:50 UTC
From: John <j@warburton.nospam.prestel.nospam.co.uk>
Message-ID: <9kehu2$aj7$1@phys-ma.sol.co.uk>
Source record: 16544

I've just purchased an MFJ-259B antenna analyser and come up with some interesting facts about my home constructed antennas!

My three dipoles in parallel (single coax feed through a balun) were all tuned for lowest SWR when erected. However having examined them with my new meter, I find the frequency with the lowest reactance is some distance off. My understanding is that the frequency with minimum reactance is the true resonant point. At that point the resistance is around 25 Ohms on two of the dipoles and 43 Ohms on the other.

Similarly, my 33ft vertical for 40mtrs has its lowest reactance at 5.826MHz wheras the lowest SWR is around 7MHz.

My question - the dipoles in parallel are always going to be a compromise. However, the vertical - should I tune for minimum reactance and use an impedance matching circuit or just go for the lowest SWR with a direct coax feed (nice and easy)??

1941. DUCIE ISLAND - NUMBER 335??

Newsgroup: rec.radio.amateur.dx
Date: 2001-08-03 18:10:43 UTC
From: Murray Green <mgreen@erols.com>
Message-ID: <3B6AF733.5BF34263@erols.com>
Source record: 16545

The following article is taken from the August issue of Auto Call magazine, The Official Journal of The Foundation for Amateur Radio. It is interesting and well written and I thought it would be of interest to DX community:

"DX DX DX
by John Kanode
N4MM

Ducie Island very well may be the next new DXCC entity to be added to the DXCC List. It is part of the Pitcarin Island Group. The Pitcarin Island Amateur Radio Association has applied to the IARU for membership. Region 3, IARU has received the application and found it to be in order and has approved it and has forwarded it to the International Secretariat of the IARU for voting on by the other Amateur Radio Societies.

The process takes 5 months and the closing date for voting is November 15, 2001. If 50% or more of the other member societies approve the admission of the Pitcarin ARA, it will become a member of the IARU. Once an application reaches the final voting state as it is now, it is almost assured to be voted in as a member society.

How is this related to DXCC? When the Pitcarin ARA becomes a member society of the IARU, it becomes a Political Entity as per DXCC rules. This will not change Pitcairn's status as a DXCC entity, it is already on the DXCC List but due to the fact it moves from one criteria area to another changes the distance that is required for other islands to be considered. In this case it is Ducie Island which is over 350 KM from Pitcairn itself. There appears to be no other land in-between Pitcairn and Ducie, however the DXAC will be asked to review all maps to be sure that this is so.

If there is no intervening land and the distance is confirmed to be over 350 KM and the IARU vote is yes, Ducie Island will become a new DXCC Entity on November 16, 2001 at 0000 UTC.

Needless to say that plans are in the works for a DXpedition to Ducie island in November 2001. The Pitcairn ARA is organizing a DXpedition to Ducie Island (OC-182) and operations are expected to start 0000 UTC on November 16. Plans call for three stations operating 24 hours a day. The operating team includes Tom Christian, VP6TC, VP6DB, JA1BK/VP6BK, JA1SLS/VP6BB, JF1IST and three other operators. QSL is via VE3HO. More info on this DXpedition in due course".

(Note: The author is a Vice President of the ARRL and a long time renowned DXer. Thanks for the update and heads-up John.)

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 28/July, through Saturday, 4/August there were 211 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4S, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5V, 5Z, 6W, 6Y, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9V, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, E4, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J3, J6, J8, JA, JT, JW, JX, JY, K, KG4, KH0, KH2, KH4, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, SU, SV, SV5, SV9, T32, T7, T9, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2V, VP5, VP8, VQ9, VR, VU, XE, XT, XU, XW, XX9, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZB, ZC4, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity".

3V, TUNISIA. Now through September 15th, all Tunisian stations will use the special callsign 3V8MED. MED stands for the "MEDiterranean Games 2001" in Tunis. See the following Web page for details:
http://www.tunis2001.tn/en/indexen.html

5B, CYPRUS. Laci, HA0HW, informs OPDX that he and his family will spend their holidays on Cyprus between August 7-21st. He will use his radio as 5B4/HA0HW/p on the basis of CEPT license. His activity will be limited to the early mornings and later evenings mainly on CW. QSL cards will be OK via the HA bureau or direct.

CARIBBEAN TOUR 2001 (Update). Rob, PA5ET, reports that the callsign J3PA, which was previously announced, can't be used and has been changed by the Government of Grenade into J38PA. The 8 in the callsign is for visitors and MUST unfortunately be used. Remember, the Low Land DXpedition Team (LLDXT) will be active from the Island of Carriacou, Grenada, (IOTA NA-147) August 2-15th and the Island Bequia, St.Vincent, (IOTA NA-025) August 16-27th. The team members will be Bouke/PA0ZH, Ronald/PA3EWP, Rob/PA5ET and Dennis/PA7FM. The callsigns will be J3/homecall, J8/homecall and J38PA. The J38PA callsign will be used on Topband and during contests. Their activity will be around the clock on 160-10 meters on the modes CW, SSB, RTTY and PSK31. The Tour Web site, which will be updated daily with the latest information, on-line logs, tour diary, digital photo's, propagation forecasts and digital pile-up recordings, can be found at:
http://www.qsl.net/lldxt
All QSLs will be managed again by PA5ET: Rob Snieder, Van Leeuwenstraat 137, 2273 VS Voorburg, The Netherlands.

H40. TEMOTU PROVINCE. Roberto, EA4DX, will operate for two weeks beginning August 15, from Lata on Santa Cruz Island (OC-100). The H4 callsigns will be issued upon arrival. Before and after his Temotu operation, he will be signing H44** from Honiara (OC-047). The operation, as usual, will be a one man effort only SSB, usually operating +18 hours a day. His equipment includes Yagis for 10/12/15/17/20 meters and a Vertical for 40/80 meters using a 1 Kw. His suggested frequencies, as circumstances permit, will be as follows: 3795-3799, 7042-7045, 14195, 18135, 21295, 24945 and 28395 kHz. QSL via EA4DX: Doce de Octubre #4, 28009 Madrid SPAIN. A log search will be updated "only" after his return at: http://www.qsl.net/ea4dx/

IOTA NEWS.....
AS-NEW. Alan, BA1DU, informs OPDX that the Beijing DX Club will team up with Jiangsu DX Club to work out the last unnumbered IOTA group in China. The activity will be at Furong Island (37 20'E,119 48'N) which belongs to Shandong Province Northwest Group of the IOTA program. The island is entirely a desolate and uninhabited island and is used as a bomb-dropping range by the Chinese Air Force. They plan to set up four stations at the island including two Yagi antennas and two linear amplifiers and expect to be active at about 1200z on August 10th. Their operations will be continued until the local morning of August 13th. Activity will be on SSB, CW, RTTY and SSTV, using the normal IOTA frequencies from 40 meters to 6 meters. Their callsign sign will be BI4F. The team members consist of BA1AJ, BA1DU, BA1FB, BA1KA, BA1MK, BA1MT, BA1RB, BA1TU, BD1CC, BD1CL, BD1CU, BA4KR, BA4RD, BA4TA, BD4RS, BD5RV and others. Since this Island is a military area the activity schedule may be changed at last minute. QSL via Jin, BA4TA, directly or

to the Chinese QSL bureau.

AS-148. Lee, DS5RNM, informs OPDX that he and other members of Taegu DX Club (TDXC - 6N0YO) in Korea will be active as 6N0YO/4 from Wi Island, August 17-19th. Activity will be on all bands, CW, SSB, RTTY and PSK31. A special emphasis will be given to the North America. QSL via 6N0YO: Taegu DX Club, POB 4, TAEGU, 700-600, KOREA (or the KARL bureau). For more info check the Web page at: http://myhome2.karl.or.kr/6n0yo/

EU-133. Dennis RZ1AK, Vlad UA1CIO and Tim UA3DPB will be active from Vysotskiy Island (RR-01-14) and a few other islands in the Baltic Sea on August 5-12th. Most of the islands would qualify for IOTA EU-133. Look for RK1A/p, RZ1CXF/p, RZ1CXO/p and possibly some other callsigns. All QSLs are via RZ1AK, either through the bureau or direct to: Dennis Eremin, PO Box 202, St.Petersburg 196070, Russia.

EU-136. Paul, 9A/DK8SP/p is active from the Island of Rab (CI-096) until August 10th, mainly on 20m SSB.

EU-136. Jozo, 9A5RJ, will activate the Island of Pag in the Kvarner Group (CI-082), now through August 8th. He will be active on 20/15/17/12 and 10 meters.

EU-136. Emir, 9A6AA will try a short trip to two islands on August 9-10th (weather permitting). On August 9th, look for him to be on the Island of Galiola (EU-136, LH-0315, CI-020, not inhabited) beginning at 1000z on 14240 kHz (plans to also work on 40, 20, 15 and 10m, too). On August 10th, look for him to be on the Island of Unije (EU-136, CI-135), between 1000-1300z on 40 and 20 meters. QSL only direct to 9A6AA, Emir Mahmutovic per the following addresses:
Up to September 1st (The island of Losinj):
Zad Bone 8, 51551 Veli Losinj, CROATIA
After September 1st (home): Slovenska 15, 10000 Zagreb, CROATIA

NA-053. Richard, KL7AK, and others will be active from the Trinity Islands, Alaska, from about 2130z August 9th, to about 1800z August 14th. They will be operating from the island called Sitkinak. Activity will mainly be on SSB on or near the 20 meter IOTA frequency of 14260, but they also plan to operate on 15 and 10 meters CW/SSB, propagation permitting, and possibly on 40 meters. They will be operating on the Amateur Satellites, mainly AO-27 during the daylight passes only, and UO-14 on all daily passes. For IOTA, this is a very very rare island. There will be 4 operators and the main station will consist of a Kenwood TS-570D transceiver, an Ameritron AL-80A amp, and a Mosley 3 element Yagi up about 30 feet. A backup station and antennas will also be taken. QSL Manager is Fred, N6AWD.

SA-055. L80AA/D will be active on August 11-12th from Martin Garcia Island. Activity will be from Martin Garcia Lighthouse (ARG-045) on HF-VHF-SSB-CW. QSL via LU4AA.

LIGHTHOUSE ACTIVITY .....
PRIZES AND AWARDS FOR THE NATIONAL LIGHTHOUSE - LIGHTSHIP WEEKEND, AUGUST 3-5, 2001. In honor of the USA national Lighthouse Weekend, "EVERY" participant who submits an NLLW log showing valid contacts with at least one USA lighthouse OR one ARLHS member will receive a "FREE" Harbour Lights collectible lighthouse miniature prize. (See the Harbour Lights web site at: http://www.harbourlights.com) The Harbour Lights company, makers of miniature lighthouse collectibles and a sponsor of the ARLHS, has donated one lighthouse miniature for every NLLW participant. These exquisitely detailed models are among the most valued by collectors. All you have to do is participate in the NLLW event and submit 1 USD along with your valid log to the ARLHS secretary, Lee Graves, WA7OBH, 4341 SE Satinleaf Place, Stuart, FL 34997. All logs must be postmarked by August 31, 2001, and must show the ARLHS lighthouse number (see page 10 of the web site: http://www.arlhs.com) or the member number for at least one contact. Be sure to include your name and address. Logs submitted that do not meet all the requirements and guidelines are not eligible for this prize.

The Amateur Radio Lighthouse Society makes the following Public announcement: "Through a lot of hard work and dedication by some ham radio operators, Thomas Point Light in the Chesapeake Bay (ARLHS USA-845) will be activated by two ham groups under two call signs for the ARLHS, NLLW and ILLW events, August 4-5th and August 18-19th. More important, this is the FIRST time the Coast Guard has granted permission for hams (or members of the general public for that matter) to board this automated and rather isolated lighthouse. We owe a debt of gratitude to the US Coast Guard for their interest in and support of this project. It is a tribute to the professionalism and expertise of the ham operators that the Coast Guard has placed enough trust to allow our boarding of this previously "off-limits" beacon. So significant is this event that Baltimore news-papers and TV are planning coverage, and there will be a live broadcast from the light over radio station WBCQ, 7415 MHz, at 7 PM eastern time on Saturday night, Aug 4th. The stations will operate from both the light and Thomas Point Park. Look for special event station W3T, which, through the efforts of Reg, W3REG, and his crew, will concentrate on CW and some SSB. Reg will also be giving out ARLHS member #329, as well as the ARLHS Thomas Point number. Then, if you are an old fan of AM radio, look for K3L set up at the light. This may be your only chance to work Thomas Point on AM fone, and the event takes on further significance in that it celebrates the first 'voice' transmission made from Cobb Island in MD by Reginald Fesseden. Ops N2INR and WA3VJB, among others in their group, deserve a lot of credit for taking initiative in activating AM phone operation and in choosing Thomas Point for their celebration." Further information can be gotten from the Amateur Radio Lighthouse Society (ARLHS) web page at http://arlhs.com or by sending an E-mail to Jim Weidner, K2JXW, President and Founder of ARLHS, at: mailto:k2jxw@arrl.net

The North Fulton Amateur Radio League (Atlanta, GA, USA) will operate special event station K4T from Tybee Island Lighthouse on the Georgia coast during the Amateur Radio Lighthouse Society's National Lighthouse Weekend, August 4 and 5th. Stations will be operating on (+/-): 28270, 21270, 14270, 7270 and 3970 kHz. QSL via K4PCF.

Members of the Metro Amateur Radio Club (MAC) will activate K9Y from Grosse Point Lighthouse (USA 359) in Evanston, Illinois. They will participate in the National Lighthouse Weekend sponsored by the Amateur Lighthouse Society. This is the first time that Grosse Point Lighthouse will be on the air for an amateur radio event. Grosse Point Lighthouse is one of eight lighthouses in the United States designated as a National historic landmark, and the only one located on the Great Lakes. Look for K9Y on August 5th, on CW and SSB (1800 to 2300 Zulu) on or around these frequencies: CW - 7030, 14030, 21030 and 28030; SSB - 7270, 14270, 21370 and 28370. A special event QSL card is available by sending a SASE to N9BOR via the callbook address. They will not reply to e-QSLs. Visit the Metro Amateur Radio Club (MAC) web site at: http://www.qsl.net/mac

Christian, DL6KAC, reports to look for activity from Helios Lighthouse in Cologne/Ehrenfeld (FED-107) during the International Lighthouse weekend. Callsign will be DN1KAV (QSL via DH4KAV / bureau) or DN2EI (QSL via DH7KAT / bureau). Activity will be on 40-10 meters, maybe on 80 meters on SSB.

During the International Lighthouses weekend (August 18-19th), look for Francis/F6HKS and Jean Claude/F6HDH, operating from Cordouan Lighthouse (located in the middle of the Gironde at sea). They will sign homecall/p and be active on 40/20 meters SSB/CW. QSL via their home calls. Cordouan reference numbers are: WLH - 0271; French "Phares et Balises du littoral (PBLF)" award - PB 018; ARLHS - FRA 007; IOTA - EU-159 and DIFM - AT-032.

Mike, GM4SUC, reports that with just about two weeks to go for the Internationl Lighthouse/Lightship Weekend (0001z Saturday, August 18th through 2359z on Sunday, August 19th), they have 257 lighthouse/lightship stations in 37 countries confirmed. Here is the list of countries and their number of stations: Argentina 4, Australia 17, Austria 2, Belgium 4, Brazil 5, Canada 6, Canary Islands 1, Croatia 1, Denmark 17, England 22, Finland 8, France 2, Germany 20, Gibraltar 1, Greece 2, Iceland 3, Ireland 3, Isle of Man 1, Israel 1, Italy 2, Japan 1, Lithuania 2, Malta 1, Netherlands 9, New Zealand 8, Northern Ireland 5, Norway 3, Poland 2, Portugal 1, Puerto Rico 3, Scotland 11, Slovenia 1, South Africa 8, Sweden 10, Turkey 1, USA 65 and Wales 4.
Countries represented = 37, Lighthouses/Lightships = 257
A full list, including callsigns QTH and QSL information can be found at: http://www.vk2ce.com/ILLW/2001.htm

PRESS RELEASE: OPDX InterNet Subscribers will receive an additional bulletin containing a special press release from the ARRL by Wayne Mills, N7NG, about the details of the new "Logbook of the World".

PY0T, TRINDADE ISLAND. Operators PY1LVF and PY1VOY are sailing to Trindade for a short operation to take place from August 7-10th. Currently it is unclear whether or not there has been confirmation from the Brazilian Navy that the two have received the requested callsigns ZX0T and PT0T. If not, they will be active as homecall/PY0T. Look for them on CW/SBB on 40-10 meters, including the WARC bands. QSL via PY1LVF, Jose Luiz Vieira Fernandes, P.O. Box 18009, 20722-970 Rio de Janeiro, RJ, Brazil. Those reading Portuguese can find more details at: http://br.geocities.com/py1lvf/destaques/destaques.htm.

QSL INFO AND NEWS.....
Ron, AC7DX, would like to let everyone know that after sorting everything out and being promised the logs by Gabby, he will again be the QSL Manager for the following stations: XE2Z, XE2GV, 6D0Z and 6D8Z.

You can request Bureau cards via E-mail for the operation by WF1N and W1DIG from Thacher Island (IOTA NA-148, ARLH USA105 and USI MA001S) from: Tony, WF1N, <megahertz260@mindspring.com>
Lou, W1DIG, <megawatt@snet.net)

Hillar N6HR/VE7 and Elsie N7YX/VE7 operated from NA-075 Gabriola Island (BC-013) during the IOTA contest. Please QSL via N6HR.

TEX, 9M2TO, has a new QTH and address. As of August 1st, please QSL via: Tex Izumo, 2C-10-03, Ferringhi Mutiara Apt., JLN. Sungai Emas 11100, Batu Ferringhi, Penang Is., MALAYSIA.

QSL CQ2I via EA4URJ: URE Jarama, P.O.Box 123, 28700 San Sebastian de los Reyes, Madrid, Spain.

OH0/OH2K/M was active from a sailing boat fastened to an island from Aland Islands (OH0) in July 2001. QSL via the bureau via OH2LRE or direct to: Simonito, PO BOX 73, 02710 ESPOO, FINLAND.

Gerben, PA5NT, reports that the you can find the story about the JW0PK operation to Prins Karls Forland on the following web site: http://dx.to (select Dxpeditions and then Prins Karls Forland)

Lenio Marobin, PY3DF, International League of Esperantists RAdioamateurs Secretary (ILERA), reports that special event station, 9A0E, has the QSL Manager of DJ4PG: Hans Welling, zum Ortenbrink 42, 49205 Hasbergen, GERMANY (also via bureau). The early manager DL1CC is still valid if someone already sent a card. 9A0E was located within the Congress complex at the Faculty of Electronics and Computing in Zagreb and was operated by DJ4PG and PY3DF.

Dave, VA3RJ, reports that the logs for Helmut's operation from Costa Rica, TI2/DJ4VW (March 13-26, 2001) are now on-line at his web site:
http://www.qsl.net/va3rj/search_ti2-dj4vw.html
http://webhome.idirect.com/~va3rj/search_ti2-dj4vw.html (Mirror)

S2, BANGLADESH. Junji, JA7KXD, will operate S21YT again from now through 1759z August 8th. Bands and modes of activity were not mentioned, however,

he was active last time on 20 meters CW. QSL via JA7KXD: Mr. Junji Ogawa, 2-3-51, Kimachidori, Aoba-Ku, Sendai 980-0801, JAPAN.

VU (India) NEWS. Jose Jacob, VU2JOS, informed the DX community last week that permission to use the following frequencies by Indian Amateurs has been extended up to January 31, 2002. (It was to expire at July 31st, 2001). VU operators can use: 3790 to 3800 kHz, 10100 to 10150 kHz; and 50.35 and 50.55 MHz.

XW, LAOS. Charly, K4VUD, reports that he had to abandon his efforts to obtain a XW license this summer. He states that the process is rather difficult, but the personel at the Lao PDR are very friendly and responded to his E-mails in a timely manner. The big draw back seems to be the visa. The usual Laos visa is for only 15 days, and the license application process takes longer than that. Charly states, "One must depart Loas (or somehow get a longer term visa), wait for the license approval, and then return for ham operations." He recommands to work Hiroo, XW0X, who is now there and will be active in Laos for a limited period.

XX9, MACAU. Gary Jones, W5FI, informed OPDX that he will be active from here and will be arriving in Macau on August 5th and hopes to be operational on the 5th of August. He will operate until the 8th or 9th depending on when transportation has to depart back to Hong Kong. This is part of a business and pleasure trip to Asia and includes travel to Hong Kong, Korea, and Japan, however, he intends to operate only in Macau. Gary will be staying at a hotel and using a roof mounted Butternut vertical. He will be operational on all major modes: CW, RTTY, SSB, and PSK-31. His suggested frequencies will be the standard DX frequencies, QSX up as announced. Gary will operate on all bands 80 through 10 meters including the WARC bands. He will emphasize RTTY and will show on RTTY early in the operation since Macau is most rare on digital modes. RTTY frequency will be 14083 kHz and PSK31 14070 kHz. Gary states he will be running only 100 watts (maybe less on digital) to the Butternut vertical and dipoles. He is sorry the signal will be weak, but he will try to make up for it with persistence. His previous DXpeditions have been single operator solo operations at: HS0AC (1993), JD1/7J1AYK (Ogasawara - ChiChiJima, 1996), and ZB2/W5FI (Gibraltar, 1999), and some other smaller operations.

ZK1, SOUTH COOK ISLANDS (Update/Reminder). Mark, KM6HB, will again be operating from the South Cook Islands next week, August 7-17th. Look for him to be active as ZK1AHB, from August 7-8th on Rarotonga (OC-013), August 9-11th on Mangaia Island (OC-159), August 11-16th on Autituki Atoll (OC-083) and then back to Rarotonga, August 13-17th. Activity will be on all modes including RTTY and PSK31, on 40-6 meters. QSL via KM6HB or the W6 bureau.

That is the address I have. Send him an SAE (of course) and $2 US dollars. He has asked for a donation of $1 to help local Libyan hams also. That might help.

NO call signs on the envelope to him. And make the envelope as generic looking as possible, a metered stamp also would help. Send it registered mail. There is a big posting on this newsgroup under 5A1A, one is from Abubaker himself.

1948. XP1AB is back!!!

Newsgroup: rec.radio.amateur.dx
Date: 2001-08-04 16:46:38 UTC
From: J�rgen R�mming <jr@danamps.com>
Message-ID: <zHVa7.84$o75.2269989906@news.euroconnect.net>
Source record: 16354

Dear all

It is now possible to work XP1AB again. XP1AB will be used from Sondrestrom on the West cost of Greenland Iceland during the CQWW SSB Contest on 27. and 28. October 2001.

XP1AB was last used in 1960's and it will now be possible to work this special call again.
Sondrestrom is in CQ zone 40, ITU Zone 5 and IOTA reference NA-018.

During the OX2K DXpedition in May June 2000 (see http://www.qsl.net/ox2k) we have put up an operating room to be use radio amateurs all over the world.

We have also made a local club up there and the call sign will be XP1AB.

XP1AB will be used on air during the CQWW SSB Contest and we will be QRV on all 6 contest bands during the whole contest.

We expect to arrive on 24. October 2001 where we will use the first days to put all the equipment together. If we have the time we will work on all HF bands and 6 meter with our own calls/OX. We will perhaps be QRV on CW before and/or after the contest. We expect to leave on 31. October 2001.

QSL Manager is OZ1ACB and QSL is only possible direct to OZ1ACB.

You can find any details regarding the DXpedition on our website http://www.qsl.net/xp1ab Please visit it often. We will update it often with new details.

Do you have any questions please do not hesitate to contact me at jr@danamps.com or XP1AB on xp1ab@qsl.net.

Vy 73 de OZ0J/OZ1JSH Jorgen

I host two email reflectors that might be of interest to you. They are "VHF All Mode" for the discussion of VHF radio in general and "FM DX VHF+" for the discussion of FM DXing on VHF+. You can find out about these lists by visiting:

http://egroups.com/group/vhfallmode
http://egroups.com/group/fmdxvhf

or send a blank email to:

vhfallmode-subscribe@egroups.com
fmdxvhf-subscribe@egroups.com

I suggest visiting the websites, though. It's more informative. On the websites, I even have databases and calendars of VHF events...

1960. Quick QSLing!

Newsgroup: rec.radio.amateur.dx
Date: 2001-08-06 17:53:40 UTC
From: w2Xup@mindspring.com
Message-ID: <3b6ed8f1.2006133@news.mindspring.com>
Source record: 16365

After some of the recent discussion about slow QSLing, here's one that
was a very pleasant surprise:
Sent QSL direct to BA4DW in Shanghai on July 20. Received my reply
today!
Way to go David!

FT: Computer gear for HF Rig / equipment

I have the following computer gear available for trade or sale on a "newer" HF rig and equipment. Specifically interested in the below units but open for other suggestions. I am workable, will put money into it if your gear is worth more.

* Kenwood TS-50, TS-840, TS-847, TS-900
* Yaesu FT-100, FT-840, FT-900, FT-847
* Icom IC-706 / 706 MKII / 706 MKII-G
* Alinco DX-70 / DX-77
* or ??

What I've got.

// Compaq Deskpro Server
400 MHZ, 128 MB Ram, CD-ROM, 8GB HD, 10/100 NIC, AGP Video, Mouse + Keyboard,
Windows 2000 Professional. Tower case.More ram is available.

// Compaq Deskpro Desktop
350MHZ, 128 MB Ram, CD-ROM, 5 GB SCSI-2 HD, 10/100 NIC, Adaptec Ultra Wide SCSI Card, AGP Video, Mouse + Keyboard, Windows 2000 Professional. More ram is available. Desktop case

// Compaq Deskpro Desktop
350MHZ, 128 MB Ram, CD-ROM, 6 GB HD, 10/100 NIC, AGP Video, Mouse + Keyboard,
Windows 2000 Professional. More ram is available. Desktop case.

// Compaq Deskpro Desktop - Small Form Factor
466MHZ, 128 MB Ram, 8 GB HD, 10/100 NIC, AGP Video, Mouse + Keyboard, Windows 2000 Professional. More ram is available. Small form factor case, very small footprint.

// Sun SparcSERVER 10 - Unix
50-MHZ RISC processor, 96 MB Ram, 4 GB Hard SCSI Drive, CG 6 Color frame buffer, On-board fast SCSI controller, On-board 10-100 base T Ethernet, On-board sound, additional fast SCSI controller, additional 10-100 base T Ethernet controller, Mouse + Keyboard. Excellent webserver, file server and strong Unix operating system. Machine is running Sun Solaris (preferred) or any flavor of Linux ported for the Sparc platform. Aurora case.

// Sun SparcSTATION 5 - Unix
70-MHZ RISC processor, 64 MB Ram, 2 GB Hard SCSI Drive, CG 6 Color frame buffer, On-board fast SCSI controller, On-board 10-100 base T

Ethernet, On-board Sound, additional fast SCSI controller, additional 10-100 base T Ethernet controller, Mouse + Keyboard. Excellent webserver, file server and strong Unix operating system. Machine is running Sun Solaris (preferred) or any flavor of Linux ported for the Sparc platform. Aurora case.

// Hewlett Packard Rack Mount Network Hubs
4 available, 2 14 port and 2 15 port hubs. All are in excellent condition and recently removed from service. These are rack mount servers.

// Proxima LightBook LB20 DeskTop Projector
SVGA and RCA inputs, 200 ANSI lumens, Serial jack, Computer in jack, Monitor out jack, Video in jack, Audio in & out, TV output, Twin Lamp, True SVGA compatibility (800 x 600), International power supply, LightBoard drawing tool, Remote control, Lightweight (11 pounds - 13.5 x 9.25 x 5 inches), Custom padded case. This unit is in excellent condition and includes all the original equipment (cables + books).

If you see something you like, please let me know. I am open to trades or sales on any of the machines. Willing to trade multiple machines for the right gear. Response via Email is preferred.

Sales always welcome ...

Thank you!

Likewise, a quick QSL with no problem.

I would avoid mentioning callsigns on the envelope going to Namibia, while
I'm not aware of a mail theft problem in that country it's certainly
possible.

I've QSL'd via I2MQP. I had to do quite a lot of hunting around on the web for the info and I'm still not certain that this is the correct QSL manager. I've dropped both P40B and I2MQP an email but no response.. I guess it's worth a try though. If I get a response to the direct card I've sent, I'll let you know.

Well, I wouldn't jump to conclusions too quickly about his "greenstamp collecting." When I talked to him last, he was having trouble with his mail "disappearing." He was going to have a chat with the local postal authorities.

Remember, it's never a good idea to put callsigns on envelopes, especially those destined for so-called third world countries. It's essentially an advertisment for theft. If you need Namibia, try him again. It's probably worth it.

Source record: 16377

I still need it...
Only been active for 5 months in CW on a simple dipole antenna with a tuner.
Pacific and beyond is very hard to work for me! Nothing QSO'ed there yet
(except VK9CXF)!

I still think 17m is my best DX-band, because it's quieter than 20m, but
will listen to 14033. Problem is: when it's spotted on the cluster, it's
usually too late for me with the big guns coming in...

Anyway, this gives even more satisfaction when I manage to work the DX.
So hope to work you from /KH2 as a new one...

> G4IRN.

I'd just leave them as they are. Retuning them to "utter perfection"
is not going to make a bit of difference in performance for those two
types of antennas. The more important thing is keeping your rig happy
with a low SWR to ensure full power out. I've never used a matching
device on a 1/4 wl vertical. Have never needed one. What you are
seeing is normal. I wouldn't worry about it at all, as you have to
consider the whole system. Those antenna analysers are nice little
tools, but I think they tend to complicate things for many people when
setting up simple antennas. I see this with setting up mobile antennas
a lot. People test them with the analysers and take what they see as
gospel, and it ends up making a simple job hard as the numbers just
get them confused in many cases. "IE: we have the numbers, but what do
we do with them to get this thing tuned?" I've seen this many times. I
can set the coil on a bugcatcher in about 2 minutes just from sense of
smell and peaking the noise in the rcvr first while dragging the clip
across the coil..g I've never used an analyser myself. Not that I'm
against them, I've just never needed one. Can't see spending all that
money on something I don't really need...:/ Anyway, what you have is
good enough for gov work. MK

Me too. 100 watts into dipoles in parallel for 20/17/15. As Franki says, I manage to get most things that I hear before the cluster info is published but the Pacifc regions are the difficult ones. Still, with my simple set up I've worked 113 countries since March this year so can't be that bad and it gives me loads of fun.. I'll listen 14033 and hope for the best!

No SSB should not be allowed in such a narrow allocation.

And the sooner we have mandatory bandplans the better.

Regards Brian GM4XQJ

>>No SSB should not be allowed in such a narrow allocation.

Or anywhere really - it's inefficient and the Coast Guard stopped
using a long time ago on HF. So there.

Derek aa5bt

No, it doesn't. The recent dxpedition using PT0T was from Trinidade Island,
a separate DXCC entity. See
http://br.geocities.com/py1lvf/destaques/destaques.htm for more details. I
have read nothing that indicates that this will not be valid for DXCC
credit. The ultimate decision is with the DXCC desk, pending receipt of
documentation.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 524
BID: $OPDX.524
August 13, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, KZ1Z, N1OLO, NC1L, N2OO, WB2YQH, N3SL, W3HNK, W3UR & The Daily DX, WA3VJB, K4VUD, N4AA & QRZ DX, AH6HY, KD6WW, KG6AR, W6DXO, WB6TMY, AC7DX, K8YSE, 9A6AA, 9A5K, 9A9R, BA1DU, BD7NQ, DL5EBE, E21EIC, F8BBL, F5NQL, G3NKC, G3NYY, G3SWH, IK8VRH, JA1ELY, LU6EF, OZ0J, PS7ZZ, PY2ZX, PY3DX, S53R, SP2BIK, UA0MF, UE4NNN, VA3RJ and XE2Z for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 5/August, through Sunday, 12/August there were 228 countries active. Countries available: 3A, 3B8, 3C, 3D2, 3V, 3W, 4J, 4L, 4S, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5X, 5Z, 6W, 6Y, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9V, 9X, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C5, C9, CE, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D6, DL, DU, E4, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH4, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PY0T, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T30, T32, T7, T8, T9, TA, TF, TG, TI, TI9, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V6, V7, V8, VE, VK, VK9N, VP2E, VP2V, VP5, VP6, VP9, VQ9, VR, VU, XE, XT, XW, XX9, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).
OPDX InterNet Subscribers will receive an additional bulletin (due to its size) with a complete breakdown and "DXCC/Entities Chart of Activity".

3V8, TUNISIA. Tony, IK8VRH, will be active from August 15-30th, from the Scout Club Station in Monastir using the callsign 3V8SQ. QSL via IK8VRH: Antonio Bosse, POB 173, 80016 Marano NA, Italy.

5R, MADAGASCAR (IOTA activity). Phil, G3SWH, will be active from Ile Ste Marie (IOTA AF-090) from September 14-20th and has been issued the callsign 5R8HA. This will be a CW only, holiday type operation on all bands 40-10 meters using his IC-706 and wire antennas. QSL via his CBA or via the bureau.

9N, NEPAL. Yuu, JA3IG, (member of the A52A operations) is going to Nepal for vacation in September. Look for Yuu to operate 20m and 15m SSB/CW from September 7-9th, as 9N7IG. QSL via homecall.

A2, BOTSWANA. Harry, W6DXO, will be active from 2 Safari camps in Botswana from September 19-29th. He has been assigned the callsign A25/KG6GPA. His operating conditions mandate battery powered QRP Ops. His equipment will consist of a Yaesu FT 817, multiple hi-capacity gel cells and a portable 20M dipole. Operations will be concentrated on 20 meters SSB. QRP stations are encouraged to listen for A25/KG6GPA as an effort will be made to work as many other QRP stations as possible. QSL direct only to: W6DXO.

A5, BHUTAN (Also AP, Pakistan). Robert, S53R, will be going back to AP on the 16th of August and proceed quickly to A5. He will stay at ham center, and time permitting (this is official/work trip), operate as A52RK or A52KR. This should happen just after August 20th for about 7 days, and then he goes back to AP. Activity will mostly be on CW. QSLs via S53R.

C6, BAHAMAS (IOTA activity). Al, K3TKJ, plans to operate from Andros Island (NA-001) August 13th through Septembe 27th. He has requested the callsign C6TKJ. There was no mention of bands and modes of activity.

C9, MOZAMBIQUE (IOTA activity). Fredy, DE0MST, reports that Reinhard (Rei), DL6DQW, will be active as C91RF/7 (call not 100% sure), September 19-23rd, from Quirimba island (AF-061). His equipment will be an IC706 and a quad antenna. Activity will be on CW and SSB. QSL to DL6DQW via DARC bureau.

DXCC NEWS. Bill Moore, NC1L, DXCC Manager, reminds everyone, "Once again, the cutoff to be shown in the 2001 yearbook is rapidly approaching. In order to be shown you must have a submission in between October 1, 2000 and September 30, 2001. If you have not submitted and you are not current on the DXCC Honor Roll, you will need to make a submission on or by September 30, 2001. Note, the submission must be in our hands by this date, not postmarked. In 2001, September 30 is a Sunday, so applications received in October 1, only, can be credited for September 30. In order to receive the free copy you must: 1)Be an ARRL member. 2) Be current on the DXCC Honor Roll (325 current entities) or, if not on the Honor Roll you must submit an application by September 30, 2001. The yearbook will be out in the spring of 2002. If you do not qualify for the free copy, it can be purchased for 5 USD each. Previous editions are available starting from 1993 for 5 USD each (includes shipping)."

FO0, AUSTRAL ISLANDS. Dave, AH6HY, will be going to Rurutu Island from September 9-14th. He will be active from the Rurutu Village Hotel using the callsign FO0FLA. He will concentrate on 15/20 meters SSB. QSL via his home callsign AH6HY.

HS, THAILAND. Charly, K4VUD, tells OPDX that he will be "on the air one last time from HS for this trip" as HS0ZCW. He states, "Please look for me after Bangkok sunset. Note, I have had very good propagation to the West coast late in Calif. time morning, so please keep listening. I will try General freqs this time. Date is August 13th, Thailand time. Tnx for all the contacts and the 'stand by-s' when requested!!!!".....
CU from K4VUD by Aug. 18th (taking the long way home).

HS, THAILAND. RAST HQ station HS0AC will be active in the WAE DX CW Contest. It will be operated by Champ, E21EIC, as a Single Op/All Band entry. Look for him between 3524-3526 kHz around 1930-2330z. QSL via G3NOM: Ray Gerrard, P.O.BOX 1300, Nana, Bangkok 10112, THAILAND. Also, look for Yong, HS4BPQ, to be active in the WAE DX CW Contest. QSL via E21EIC.

HS, THAILAND. A member of the Florida West Coast DX Ring, Bruce, AA4XR, will be on the air again as HS0ZCY, from August 14 through September 6th, Activity will be mostly on 20-15-10 meters with some 40 meters, 99% CW of the time and perhaps a little SSB. QSL via WB4FNH.

IOTA NEWS.....
AN-016. Mark, VK4KMT, is active in his free time as VK0KMT from the Australian Antarctic Base Davis. He is usually active between 0400-1000z, and often can be found on 14180 and 18120 kHz. QSL to home callsign.

AS-NEW. Alan, BA1DU, BI4F team leader, reports that the BI4F team has decided to postpone the IOTA DXpedition at Furong Island (Shandong Province Northwest Group) until earlier September; the exact activity date will be announced later.

AS-131. A group of hams from the Guangdong Province will do a short IOTA operation on Do-Ao Island as BI7D. Expect them to be on the air from 0700z August 17th through 0200z August 19th. They will have 3 HF stations and 1 VHF/UHF station. Activity will be on 80 meters through 70cm on the normal IOTA frequency, CW/SSB/RTTY/PSK31/SATELLITE. QSL via BD7NI: P.O.Box 306, Guangzhou, 510030, P.R.CHINA.

EU-016. Chris, 9A5K, will be active for the next two weeks (minimum 10 days, starting August 12th through August 22nd or 26th) from the Island of Brac, Croatian Islands (IOCA) reference number CI-010. Also, there will be activity possibly from the Island of Solta (CI-126). Activity will be mainly on 40 and 20 meters, but also on 30,17,15,12,10 and 6 meters. Equipment is TS690S (100 w) + verticals. Callsigns to be used are 9A5K/p and 9A/K5CRO. QSL card is OK via bureau or direct to Chris's address listed on: http://www.qrz.com

EU-016. Frano (9A5V/p), Matko (9A3VM/p), Fredi (9A5KV/p) and Zoran (9A4NC/p) will activate two islands in the EU-016 group next weekend with lighthouses on them:
1. Isand of Grebeni (CI-173, WLH-0483) on August 18th.
2. Island of Daksa (CI-165, WLH-0111) on August 19th.

Activity will start on 14260 kHz at 0800z, and for local QSOs
on 7060 kHz at 1400z.

EU-048. Didier, F5BJW, will be active September 15-24th from Groix
Island (French Brittany - DIFM AT012) as TM2A. Activity will
be on the IOTA frequencies on 80-10 meters, mainly SSB. QSL
via Didier F5BJW.

EU-125. The Belgian Team of Kurt/ON4CJV, Eddy/ON4AFU, Steven/ON4CLC,
and Yves/ON1DHJ, will be active from Romo Island now through
August 18th. The operation will be on all HF bands, WARC bands
and 6 meters on CW, SSB, RTTY and PSK31. The callsign used
will be OZ/OR0MO (a special one). QSL via ON4AFU (bureau) or
direct via ON4AFU: PO Box 41, 9400 Ninove, Belgium.

EU-153. Two operators will be active as RA1OZ/P and UE4NMM/1 from
August 21-26th, from Kii island. Activity will be on the
IOTA frequencies on all modes (incl. digital) and all bands.
QSL via their home calls.

NA-136. Skip/N1IBM, Bob/N2OO and Beth/KF2BQ will be operating from
Sheffield Island (USI CT008S, ARLHS Lighthouse USA-753),
Connecticut, on August 25-26th, as N1IBM/p, between 1500-2100z
each day (later if able). Suggested frequencies: SSB - 7165,
14265 and 21265 kHz; CW - 7030, 14030 and 21030 kHz. QSL via
N1IBM: Skip Maze, 847 Dolan Street, Lanoka Harbor, NJ 08734
USA. Direct or via the bureau is OK.

KH2, GUAM. Warren, WB6TMY, announced that he will be active has WB6TMY/KH2
now through August 18th. He states that he will try to hang out at 14033
KHz and would be happy to have a QSO with anyone who might want to talk.

KH3, JOHNSTON ISLAND. Dan, KH6UW, will lead a group of four operators
including Mike/AL7KC, Bill/W7TSQ and Tom/K7ZZ on a trip to here from
September 11-18th. The group will be active on 160-6 meters including
the WARC bands using CW and SSB, using the callsign K3J. Two 24-hour
stations will be used with a third activated as needed. European contacts
will be emphasized when band openings permit. QSL via AH6HN.

KL6, ALASKA (IOTA activity). Bruce, KD6WW, will be active from Popof
Island (NA-087) as KL6/KD6WW from August 18-20th. Bands and modes of
activity were not mentioned. However, Bruce states that you may QSL
direct, via the bureau or request a bureau card via E-mail at:
kd6ww@inreach.com
If you request a bureau card via E-mail, Bruce requests to "please do not
send him a card."

LIGHTHOUSE ACTIVITY..... (2001 ILLW next weekend!)
Look for Esmond, 8R1AK, to be active during the International Lighthouse
Weekend on August 18-19th from the Georgetown Lighthouse in Guyana (to
be assigned GUY-001). QSL via CBA.

Look for DA0BHV to be activated during the International lighthouse and Lightship Weekend from the August 17-19th. Operators will be Katrin/DL1AXL, Dominik/DL5EBE, Frank/DL7UFP, Torsten/DL7UTM, Fritz/DL7VRO and Gerda/DL7VYL. They will also be active as DA0BHV/LS from the old lightship "ELBE 3" and as DA0BHV/LGT from the "Bremerhaven Upper Light" lighthouse. QSL via DL5EBE.

Following their successful operation last year, a group from the Wicklow Wireless Society will again activate the Lighthouse at the Old Head of Kinsale during the International Lighthouse Weekend August 18-19th. The Lighthouse reference number is IRE 055 and membership No. is 013. No callsign was mentioned. QSL direct or via the bureau to EI9HQ.

The Western New York DX Association will once again activate K2L from the Buffalo, New York harbor lighthouse during the International Lighthouse Weekend on August 18-19th. The lighthouse is located at the U.S. Coast Guard Station. Activity will be on 80-10 meters CW and SSB with 2 stations using KW power to assorted antennas. This is the third year of this group's activity. A photo QSL is available for SASE or SAE+IRC via WB2YQH: Bob Nadolny, P.O. Box 73, Spring Brook, NY 14140. Each year's QSL is unique.

The Greater Norwalk Amateur Radio CLub (N1EV) will sponosr a DXpedition to Sheffield Island Lighthouse on September 29-30th, with operations beginning at 1300z Saturday and ending 2000z Sunday. Sheffield Island is IOTA NA-136, USI CT-008s and ARLHS USA-753. Operations will be on 80, 40, 20, 15, 10 meters with SSB, CW, RTTY, and PSK31. Specific modes and frequencies will be posted via packet DX cluster. A QSL card featuring Sheffield Lighthouse will be available. Please send a SASE (US) or IRC/greenstamp and envelope (DX). Please no foreign currency. QSL to: GNARC CONTEST CLUB, N1EV [Club], 324 MAIN AVE BOX 115, NORWALK, CT 06851. For further info, please check the web site: http://www.gnarc.org

Look for SN2KM to operate from the Krynica Morska Lighthouse (there was no reference number provided) during August 17-19th. QSL via SP2BIK.

The team consisting of RU0LM/Lex, RW0LL/Oleg and UA0MF/Mike will be active from the Island of Skryplyov (AS-066) from the Skryplyov Lighthouse (LH-1309) using the callsign UE0LLH. They plan to be on the air from August 17th for three days with a FT-900, dipoles and GPs. QSL direct to UA0MF: Mike Filippov, P.O.Box 20, Vladivostok, 690021, Russia. (No IRCs please! They are hard to change to stamps for postage return in Russia. USD is preferable)

An operation from Galinhos Lighthouse is planned from now through August 19th. Look for Ed, PS7ZZ, to be active as ZX7ZZ on all bands using SSB, RTTY, PSK and CW. QSL via PS7ZZ.

NEW CONTEST FOR 2002. Raul, LU6EF, GACW Coordinator, informs OPDX that the first "GACW CW DX Contest" will take place next year, 2002, together with the conmemoration of the GACW's 25th anniversary. The rules can be found on the Web site: http://www.geocities.com/gacwar

QSL INFO AND NEWS.....
Steve, N3SL, reports that the 3B6RF QSL cards have arrived on August 7th, and they should be all out in the mail as of Saturday, August 11th.

Dave, G3NKC, has just returned from a 2 week vacation in 5B4 (Cyprus). He took no equipment, not expecting to be active, but in the eventuality, made 500 QSOs from the QTH of his good friend, 5B4AGC. Bureau QSLs are fine for the needy; if you really need one direct, please only use the address below which should be good in all 2001 callbooks:
Dave Sharred, Chestnut House, 510 Crewe Rd, Wistaston, Crewe. CW2 6PS, U.K.

Activity in the 2001 IOTA Contest by 9A9R/P from the Island of KRK (EU-136) should be QSLed via DJ2MX ONLY for these contest dates.

Vlatko, 9A9R, reports that all QSL cards received directly to 9A9R have already been confirmed and mailed.

Robert, S53R, informs OPDX that, "Please inform people, that by now all direct requests for AP2ARS, EY8/S53R (Feb/March 2000) and UK8AXA (March 2000) have been answered, causing logistical nightmare at the local post office, hi! Have spent my holidays in Corsica, working on the pile of envelopes and no radio this year. Please note that for most SSB contacts, QSL goes via ON5NT, since operator was ON6TT and all CW and some SSB via S53R. Please listen for operator's instuctions regarding QSL route."

Here is the QSL information for K3L, The AM Expedition to Thomas Point Shoal Lighthouse activated for National Lighthouse Weekend, August 2-5th, 2001. Please send an E-mail inquiry requesting QSL information to: K3L@amfone.net
More details and photos on this first-ever activation of #845, TPL, Chesapeake Bay, Maryland are available at the website:
http://www.amfone.net/K3L/

(UPDATE) Ron, AC7DX, who announced last week that he would be the QSL Manager again for Gaby, XE2Z, for the following stations XE2Z, XE2GV, 6D0Z and 6D8Z, has now added XE2XA, XE0DX, 6G0V and 6D2X to the list.

Walt, G3NYY, reports that the D68C QSL cards are starting to come out from manager G3SWH. It's a magnificent 4-page, full color card. You can see a picture of one at: http://www.qsl.net/k4hb/d68c.jpg

On-line logs are available for the following callsigns: CF3RJ (QSL via VA3RJ), VA3RJ, VE3JDR, VX3RJ (QSL via VA3RJ), XL3RJ (QSL via VA3RJ), and XM3JDR (QSL via VE3JDR). There is also an E-mail bureau QSL request link on the same page for those who wish one of cards via the bureau.
Check the Web page at: http://www.qsl.net/va3rj/search.html

Laurent, F8BBL, reports that he answered all SV9/F8BBL QSLs received by direct, and he will also answer 100% all those received by the bureau.

Joe, W3HNK, reports that he now has all the logs for 1994 and 1997 operations for anyone needing a TI9CF QSL card from Cocos Island.

SPECIAL EVENT STATION. Look for special event station with the callsign EO10J to be active from August 20-28th to celebrate 10 years of independence for the Ukraine. QSL via KG6AR, "DIRECT TO CALL BOOK ADDRESS PLEASE".

SPECIAL EVENT STATION. Look for VI30RC to be active now through August 31st to celebrate the 30 years of the Redcliffe and Districts Radio Club and the opening of the Club's new clubhouse. QSL via VK4RC.

T30, WESTERN KIRIBATI. A long press release was sent out by Pete, KZ1Z, about an operation to Butaritari Island by Eric, N1JSY. OPDX InterNet Subscribers will receive the complete press release as an additional bulletin. Excerpts from the release state that Eric works for the Peace Corp and will be active as T30ES during non-work hours. His activity will begin very soon (possibly this week). However, Eric is kept busy during the day with a variety of local projects, developing the country's infrastructure and providing assistance to the people in a number of areas, such as rain water collection, women's medical issues and being an advisor to the school's gardening club. Thanks to the help of the Candlewood Amateur Radio Association (CARA) in Connecticut, Eric will use a TS-430 and two G5RV antennas, positioned separately, on 80-10 meters, with a maximum of 100 watts. He will operate a few hours a day due to limited power resources. Power is limited, with the primary source being solar collectors. Eric has a car battery in his hut that he can charge during the day. Being new to HF and DXing, CARA members will help by providing Net Control assistance in the beginning and act as a QSL manager for this operation. QSL to W1QI: C.A.R.A., Post Office Box 3441, Danbury, CT 06813 U.S.A. Please check the following Web page for operation information and the latest updates: http://people.mags.net/boem/kiribati1.htm

TI, COSTA RICA. Bill, AK0A, will be operating from the QTH of Henry, TI2HMG, from September 25th through October 9th. Activity will be on all bands on the modes RTTY, PSK, MFSK, CW and SSB in that order. His operations included an entry in the CQWWRTTY Contest and the TARA PSK Rumble. QSL via his home callsign with a SASE for USA or/and DX via the W0 Bureau. His callsign will most likely be TI2/AK0A. He will try for special contest callsign.

UA9, ASIATIC RUSSIA. Oleg, UA9ZZ, is expected to sign as UA9ZZ/p from the high-mountainous plateau, also known as the "Zone of Silence", now through August 17th. Activity will be on 20, 17, 15 and 10 meters using CW and SSB. QSL to home callsign.

V6, MICRONESIA. Katsu, JH8BKL (V63KA) and his XYL Michiko, JF8IYR (V63MC) and Susumu, JH8MYB (V63YB) are going to Pohnpei Island (OC-010). They will arrive on August 31st and depart on September 6th. They will be operating on all bands from 80-6 meters, SSB,CW and 10m FM. They expect V63KA to paticipate in the All Asian Phone Contest. QSL V63KA and V63MC via JH8BKL Katsuhide Kawase, 284-30 Kawaguchikisen, Teshio, 098-3312, Japan. QSL V63YB via JH8MYB: Susumu Harada, 3-8 Taga, Mikasa, 068-2152 JAPAN.

V6, MICRONESIA. Sho/JA7HMZ and Hisa/7L4IOU are going to Pohnpei Island (OC-010) for Digital mode DXpediton from September 28th through October 4th. They will activate the mode: RTTY, SSTV and PSK31. Their callsign will be V63DX (Sho) and V63XC (Hisa). QSL via their home callsign:
JA7HMZ - Shoji Igawa, 17 Shirogane, Yokobori, Ogachi, 019-0204 JAPAN
7L4IOU - Hisami Dejima, 2-11-13 Minamikoiwa, Tokyo, 133-0056 JAPAN
They will participate in the CQWW RTTY CONTEST as V63XA and this QSL is via JA7AO: Tokuro Matsumoto, 3-62 Okachimachi, Yuzawa, 012-0856 JAPAN.

V7, MARSHALL ISLAND. Jeff, KA1GJ, has informed OPDX that he will be on Kwajalein Island, RMI (V73) for a three year assignment. He will be active as V73GJ very soon. QSL direct via PO Box 1050, APO AP 96555.

XP, GREENLAND. The callsign XP1AB will once again be heard. XP1AB will be used from Sondrestrom on the west coast of Greenland during the CQWW SSB Contest on October 27-28th. XP1AB was last used in the 1960's and it will now be possible to work this special callsign again. Sondrestrom is in CQ zone 40, ITU Zone 5 and IOTA reference NA-018. A large group of OZ hams expect to arrive on October 24th. They will use the first days to put all the equipment together. If we have the time they will work on all HF bands and 6 meters with their own calls/OX. They may be active on CW before and/or after the contest. They expect to leave on October 31st. QSL Manager is OZ1ACB, and QSL is only possible direct to OZ1ACB. You can find many details/updates regarding the DXpedition on their Web site at:
http://www.qsl.net/xp1ab

ZX, BRAZIL (Special Activity). Look for ZX3B, a special callsign that belongs to the Brazilian Army in order to celebrate the independence birthday of this country. This operation will take place from now through September 9th. Activity is planned to be on all HF bands (including the WARC bands) and on the major modes as well (SSB and CW). The operators will consist of PY3YY (Sgt. Andy), PY3KK (Lt.Ten. Koetz), PY3FOX (Sold. Xris), PY3KN (Sold. Nae), PY3BM (Sgt. Peter), PY3CTA (Col. Gurgel) and PY3DX (Lt.Ten. Toledo). This callsign is already placed on QRZ.com and also at BUCK.com with info concerning the operation itself and the QSL address. Also, you can find more info on this operation on:
http://www.qsl.net/zx3b

According to the latest edition of the ARRL DXCC List, in the section dealing with prefix cross-references both TO and XZ are counted as PY. The IOTA entity SA010 is also associated with Brazil according to the latest IOTA directory. The callsign series PPA-PYZ and ZVA-ZZZ are also assigned to Brazil according to IARU/ITU. It is doubtful that this entity will be counted as anything other than Brazil.

The island is basically uninhabited, it is administered by the Brazilian navy. Other than an (in)famous UFO sighting in the late 50's, most of the activity on this island has been either scientific (Ornithology, geopaleontology, geology, ecology, etc.) or DXPeditions. Hardly a candidate as a new DXCC entity.

I'm confused by your comments. There have been several dxpeditions to Trinidade over the last decade. The recent DXpedition there was not a fiction; they were transported there by the Brazilian navy. PY0T has often been the accepted prefix for operations from this island. The callsign series referenced is indeed allocated to Brazil, but it's common practice for certain prefixes to be assigned (formally or informally) to various islands. I worked PY0TSN operating from Trinidade in 1992. Take a look at the ARRL DXCC Countries List under PP0-PY0T in the DXCC Countries Table, not the prefix allocation list. It is hardly a new DXCC entity!

What the hell are you talking about? TO is France and XZ is Burma/Myanmar.
Besides, what do these two have to do with PT0T and ZX0T? Are you dyslexic?

Check your DXCC list before making asinine statements. IOTA and ITU have nothing
to do with DXCC.

Hardly, since it already is. You seem to know a lot about the island, except for
the fact that it counts as a separate DXCC. Read the DXCC rules carefully and
you may learn that the criteria for inclusion on the list is not limited
exclusively to political entities.

Here's a clue: either look up PY0T (Papa Yankee Zero Tango) in that DXCC list of
yours or update it if it contains such entries as Soviet Union, Trieste,
Atlantis and Neverland.

I'm fully aware of the number of dxpeditions to that part of the world, and that PY0T has been the de-facto standard (though it could be anything in the PP0-PY0T range) for that entity.

The comments are in regard to the callsigns TO0T and ZX0T, which fall only under the category of Brazil. Had they used the PY0T call, there should have been no problem. Using the callsigns they are... I have serious doubt that they'll qualify.

My comment about a new DXCC entity was in error... my apologies.

Still TO anything is France or external departments. ZX has also been used for St P&P Rocks without a problem. It isn't too important about the callsign used as long as they can document that they were at the location at the time they operated.

I'm still not sure that I see the problem. I assume that the TO is a typo on your part; that's assigned to France and generally used in its overseas territories. But, I see nothing wrong with their use of ZX0T or PT0T. These both should be fine for Trinidade.

QTC from KH6UW:

---------- Forwarded message ----------
Aloha!

Some of you may have already heard the news about our expedition to Johnston Atoll 11 - 18 Sept.

We are forecasting 20,000 contacts during the trip, QSL budget is going to be about $3,000, and so without sufficient financial backing and no independently wealthy team members, we are trying to keep our expenses to a minimum in order to maximize the quality of the QSL card. If you are able to assist it would really help the trip out.

Please drop me a line if interested, at KH6UW@hotmail.com. Thanks in advance...

73, and Mahalo

here HL, there is no two letters suffix , starting DS1-5 except DS0
here is some examples
HL0A - HL5ZZZ , HL8KSJ is Antartic stn , HL9 is not native Korean.
HL 6,7,8,9 are reserved . for unification N.and S Korea
DS0A - DS0ZZZ
DS1AAA - DS5ZZZ

SO ur Q is aboout DS5USH ,op Nam , i think. he's very active HF'er
both via buro and direct , P.O.BOX 4, Taegu, 700-600 . S.,Korea OK !!

Message-ID: <s8ugntc34bg305p4d7nmlo9c5nfdalra02@4ax.com>
Source record: 16415

Here are the DX spots in question:

JL1UXH 14027.0 PT0T UP LP. Booming! Last Chance! 1027 10 Aug
JA0DBQ 14027.0 PT0T up10 1030 10 Aug
F8BBL 14027.0 PT0T ONLY JA 1035 10 Aug
EI7BA 14027.0 PT0T QSX 14034.3 VIA PY1LVF PY0T1041 10 Aug
W2ZR 14027.0 PT0T worked .035 1101 10 Aug
WH0V 14027.0 PT0T WORKED .036 PY0T1105 10 Aug
AF4Y 14027.0 PT0T .035 1107 10 Aug
KO3Q 28000.0 PT0T have they QRT'ed yet? 1504 10 Aug
IV3HAX 21295.0 PT0T is a MARITIM MOBIL...It's more1536 10 Aug
DL7AC 21295.5 PT0T $$$$$$$$$$$$$$$$$$$$ 1542 10 Aug
EA7ACD 21295.0 PT0T es uno cruseiro ahhhhhh 1545 10 Aug
WA4CDR 14195.0 PT0T NO GOOD FOR DXCC PROGRAM 1602 10 Aug
OK2PHC 21000.0 PT0T IS QRT ?????????? 1631 10 Aug

I can only surmise from the spots that they went QRT around 1107z and were on the boat by 1536z. Sure sounds shorter than they were expected to be there. So in context, I have to assume that the were land up until they shut down at 1107z, and thus should be valid for DXCC credit.

No time to enjoy this fine communications hand held receiver:
Alinco DJ-X10T .1MHz - 2GHz AM/FM/WFM/SSB/CW HT cell blocked (AES
$309.99)
includes stock 4.8v 700ma NiCd EBP-37N battery, stock duck antenna, box,
charging stand, belt clip, wrist lanyard, manual
Extra EPB 37N 4.8v 700ma NiCd battery
(AES 34.99)
EPB 34N 4.8v 1200ma NiCd battery
(AES 84.99)
EDH-16 AA battery case (NiMH AA's work great in this!)
(AES 12.99)
W&W 4.8v 2500ma NiMH EPB-34 battery
50.00
ESC 30 Case for 34N battery
(AES 13.99)
ESC 29 Case for 37N battery and EDH-16
(AES 13.99)
Telescopic BNC antenna
12.00
Total I have into this:
$532.94
This rig is in mint shape and is computer programmable with 1200 memories.
There is a free program to use on your computer available at the Alinco
site.
The cable from the Yaesu ADMS software works fine with a Radio Shack adapter
plug.
I will sell all for $350.00 plus shipping US post office or UPS, your
choice. US post office money order only.
Please email direct.

This is a warning notice to all in radio land about a test equipment company located in Auburn, KY. They are Auburn Metrological Labs at 12345 Bowling Green Road, Auburn KY. 42206. Their number is 270 542-6000.

Based on information given to me by their General Manager, Ken Knowles, they would be able to repair my Cushman CE-50 that was having a receive problem. It generated fine and all pll were locking fine. They gave me an estimate of under $300.00 with a turnaround of about one week. I sent it to them for repair on February 24, 2001 based on this information. After a couple of months went by without even an acknowledgment of receiving it, I tried to contact them by telephone and email. Still I received no information on it and after numerous emails and a couple of letters, one being a legal demand letter, the unit showed up at my door with a 110.00 COD charge. After contacting the company I was advised that Ken Knowles was on vacation and the service manager was arrogant, rude and even hung up on me. If you value your equipment and it is in need of repairs or calibration, PLEASE do Not send it to them. You will regret it.

My options, against them, are not exhausted but I would rather have never had the problem to begin with. It has the tendency to taint all repair facilities. This outfit was recommended by a person from one of the amateur news groups. I hope I have prevented any grief for others by this post. Thanks for listening to my ranting. 73's Don Smith KB6GQA

Sorry Donald, I really do not understand your need to express your views here. As I read your post you paid $110 when they estimated "under $300". We have your side of the story and I do believe you version, but I think it is fair to have the other side. I am involved in servicing and while perhaps 95% of all repairs are straightforward, some do go wrong. I'm not really trying to give excuses, but some of the problems I have encountered include.
Leaving a message at the contact phone number regarding repair and they do not pass it on (they will never admit this later).
Wrong phone number supplied.

No response to phone calls (or message left). Please understand I may have 50 repairs at any one time and I can not call each client 5 times daily (work it out).
Email can be impossible. I often receive over 300 messages per day. How can I read or replay to them all and still have time to repair your radio?

I have also hung up on callers. Some can never see reason.
No doubt others have had bad servicing experiences, but many will have good ones. We will always hear the complaints.

Best Regards
Neville

Dear Neville,

If you are as busy as you say, you owe it to your customers - and yourself - to hire help... if only office help, to keep open the lines of communications between you and your customers.

The key word here is *service*! To do this, you must be able to take a true interest in your customer's concerns, then make every effort to satisfy them. After all, you are in the business of offering a service - not a bad experience.

Methinks the service folks who have attitudes similar to yours_are_part of the problem; it's always the *other guy's* fault - never yours. Have you ever considered the possibility that_you_may be the one who is lacking reason? In any event, hanging up on a customer is as un-professional as you can get!

In the final analysis - when your service business fails - you will have no one to blame but yourself! I hope you come to your senses before that happens...

Hi Chaos

Yes, I will happily do as you suggested, as long as you will accept twice my normal charges. No, I never suggested "other guy's* fault - never yours"
No I do not accept "In any event, hanging up on a customer is as un-professional as you can get!"
Would you like to work in my workshop for a week?
PS I have been is "business" for more than 30 years Have You?

Hello Neville,

Unfortunately, I cannot accept your justifications... obviously you either reside in a well populated area - else you would have run out of customers by now - or you exaggerate the time you've been in business... without any office help!

In no way would I work in someone's shop again... I moved past that 30 years ago when I went back to school for my degree. At that time I was the national service manager for a well known international corporation.

As far as my business background, it is extensive...

It's obvious you see nothing wrong with your business attitude, therefore I see no reason to continue this thread. Good Luck!

Hi,
We just arrived in Rio after a short stop in Vitoria where we decided
to get off the ship and take a plane.
The ship is still schedule to arrive in Rio with entire crew next
saturday. Equipments and antennas remain in the ship.
I realize that some information should be spread out to avoid any
misunderstanding and/or confusion as follows:

The ship arrived in the island on schedule aug 7th at 1900Z but we
were not allowed to disembark not even the militaries because of the
strong winds and heavy rainings. We overnight in the ship to start in
the next day, aug 8th. We finally took out helicopter at 1000Z and the
trip did not last than 5 mins to step into the island. Equipments
arrived after us trip by trip.

The first day was tough, windy, cold and raining most of the day. We
felt some weather improvements on the next day but not in terms of
wind intensity. At least there was no more rainings and temperature
was few higher than the previous day.
Unfortunatelly we had to close out the station 5 hours before
departure. All equipments were schedule to go back to the ship in the
morning, break for the Island command change cerimony and cocktail,
and depart during the afternoon. We actually had to use the boat in
the way back to the ship. It was a very dangerous experienc but we got
safe in the ship.

Actual dates of operation :
Aug 8th, 2001 ...first QSO at 1401Z
Aug 10th, 2001 ... Last Qso at 1130Z

PTï¿½T and ZXï¿½Z call was authorized by ANATEL when we were already in
the island despite of already using call /PYï¿½T.
We did not want to loose time while waiting for the special callsign
authorization.

4.000 Qsos were made with 80 countries from 40 to 10m. Unfortunatelly
antenna tuner did not work well on 12m and just this band was left
blank.

QSL's - PY1LVF (Vieira) will be handling this task. It will take about 2 to 3 weeks to have all cards printed out. He expects to start mailing out cards on mid of september. Cards via the buro will be accepted but since PY1 Buro is running very slow on sending and receiving cards we recommend to use direct if u need the country for yr dxcc. Cards via Buro are taking more than a year to receive. There are few PY1 hams already sending cards direct to destination buros to avoid loosing and/or taking that delay.

We may have some more information to provide to whoever is interested to know about the trip, the operation and the island.
I understand that many hams were not able to make it since the operation just took 2 days. We hope we can keep this door open with the Brasilian Navy so that not only us but other groups can make many 2 days and give the opportunity to those hams that need the country for the first time.

Try rec.radio.cb, they're more likely to keep track of the
CB market than an amateur radio group.

While backups truly beat stacks, the investigators often interface
in front of the actual plotters. If you'll eliminate Jonnie's
cafe with telephones, it'll angrily save the zipdisk. Lots of
untouched UDPs are sticky and other specialized MPEGs are ugly, but will
Kathy infect that? As slowly as Beryl interfaces, you can save the
memory much more locally. Oris wants to buy grudgingly, unless
Bernadette kills modems on Cristof's proxy. Nowadays, Frank never
distributes until Henry filters the loud backdoor freely. When
Jessica's old mouse outwits, Chester posts without ignorant,
vulnerable signals. The opaque untamed operator rebuilds postmasters
in front of Lloyd's nuclear webmaster. Just defileing to a Pascal
within the field is too important for Walter to close it. We
finally recycle against rogue weak nodes. I start lazy programmers
with the haphazard lost backup, whilst Mel eventually corrupts them too.

Don't be depressed !

With respect Richard 105 visitors hardly makes for a accurate poll !

I wonder how many of the 105 actually use Ham Radio regularly or are among
the hoards who complain yet do nothing about it ?

Nice website Richard, I will bookmark and do some reading soon.

GL to any SARTG contestants this weekend.

Tell Roberta it's virulent rebooting at a postmaster. Go examine a computer! Otherwise the MPEG in Liz's user might open some moronic CDROMs. Many stuck emails are robust and other strange scanners are root, but will Chris defile that? Lately, Vance never manages until Winifred contradicts the opaque TCP/IP fully. He will twist sadly if Mike's quarter isn't usable. Occasionally, texts keep in back of secret modules, unless they're useless. Try slumping the Win Gate's dry advertisement and Felix will wash you! The stack rigidly dreams the weak article. Terrance corrupts, then Eve amazingly infects a sticky network alongside Dilbert's data bus. James, have a hard interrupt. You won't type it. Well Thomas will contribute the connector, and if Angela eerily digs it too, the admin will save throughout the sly quiche. If the huge PERLs can outwit actually, the pathetic firewall may give more data centers. Ayn will finally substantiate in front of Robbie when the minor librarians disappear around the odd chameleon. It trains, you stop, yet Susan never badly posts with the mail server. Many veggie untamed Javas will lovingly close the llamas. Why will you crawl the slow soft fax machines before Raoul does? One more secure basement or web server, and she'll truly confront everybody. I filter lazy artichokes in back of the actual ugly interface, whilst Kenneth frantically proliferates them too. If you'll burst Morris's market with data havens, it'll simply compile the keypad. Maify will fetch the inner chatroom and get it in its inferno.

Josef wants to engulf weekly, unless Martha manages functions
in front of Joie's opinion. Some abysmal minor dictionarys will
easily pump the operators. I'd rather meet rigidly than contribute with
Timothy's foolish computer. If you will open Greg's bit bucket
for emails, it will virtually start the librarian. Many bizarre
governments are untouched and other erect LANs are unclassified, but will
Vincent confront that? Bruce will infect the disgusting memory and
authenticate it around its email. As gently as Jeremy transports, you can
distribute the blackbird much more biweekly. What will you defeat the
sticky dumb errors before Ricky does? Let's create within the
virulent quiches, but don't slump the unlimited advertisements.
Do not vend generally while you're obscureing against a fake
scanner. The tape familiarly preserves the robust cellar.

2039. Re: Beware of Auburn Metrology Labs Inc.

Neville,

I think you miss the point. If the person doing the service quotes that the work will be done in a week or whatever, then misses it by a factor of 10, then the person did not live up to the agreement. The man's point is correct, you are in a service business. Deliver the service that you commit. If you tell people if will take months at half the price, then so be it if that is what they accept. No one appreciates a commitment that cannot or is not, delivered. And yes, in some cases, I would pay more to receive good service. Poor service at half the price is no deal in my book.

JMHO

SB DX @ WW < KB8NW $OPDX.525
Ohio/Penn DX Bulletin No. 525

The Ohio/Penn DX PacketCluster
DX Bulletin No. 525
BID: $OPDX.525
August 20, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K2MFY, KF2TI, W3UR & The Daily DX, AF4MI, N4AA & QRZ DX, KW4DA, W5FI, W6OM, K8MR, K8PT, K8YSE, DL6KAC, E21EIC, F5SLD, G3XTT, JA7KXD, LY1FW, OA4AHW, PA1AW, PY1LVF, RZ1AK, UR7GG, UT5RP, VA3RJ, VK2CE, VK4DX and YT1HA for the following DX information.

* EDITOR'S SPECIAL NOTE (by KB8NW): There will "NOT" be an OPDX bulletin for August 27th. I know, you heard this before, but it is true this time. My wife Linda (chief proof-reader) and I will be going to Windsor, ONT., for a short vacation. I can really use the break! However, PLEASE continue to send your DX info to me.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 11/August, through Saturday, 18/August there were 228 countries active. Countries available: 3A, 3B6, 3B8, 3D2, 3DA, 3W, 4J, 4L, 4S, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9V, 9X, 9Y, A4, A5, A6, A9, AP, BV, BY, C2, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, E4, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J7, J8, JA, JD/m, JT, JW, JX, JY, K, KH0, KH2, KH4, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PY0T, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T2, T32, T7, T9, TA, TF, TG, TI, TK, TL, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V6, V7, V8, VE, VK, VK9N, VP2E, VP5, VP8, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YB, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

2001 OHIO QSO PARTY. The Mad River Radio Club is pleased to announce that the Ohio QSO Party (OQP) will be next weekend from 1600z Saturday, August 25th, through 0400z Sunday, August 26th. Activity will be on 80/40/20/15/10 meters CW/SSB. Categories are: SINGLE OPERATOR, MULTI OPERATOR and MOBILE. Object for Amateurs outside the state of Ohio is to make contact with as many Ohio stations as possible. Non-Ohio stations may work only Ohio stations, while Ohio stations may contact anyone. Certificates will be awarded to the top five single operator entries in the high power, low power, and QRP categories, with separate awards for both Ohio and non-Ohio stations. Certificates will be awarded to the five highest mobile scoring stations within Ohio. Plaques are also available and will be awarded based upon sponsorship. This year's Plaque Sponsers:
Ohio Single Op High Power - Findlay Amateur Radio Club
Ohio Single Op Low Power - Cincinnati Buckeye Netters
Ohio Single Op QRP - Kanga USA
Ohio Multioperator - Wayne Amateur Radio Club
Ohio Mobile - W8AV
Ohio Club - Mad River Radio Club
Out of State First Place USA - Cuyahoga Falls Amateur Radio Club
First Place DX - Northern Ohio DX Association
For more information on the OQP and complete rules, please visit the MRRC Web Page at: http://www.qsl.net/mrrc/oqp.html

A5, BHUTAN. Tony, IK7WUL, is now active as A52UL from Thimbu until August 28th. He was heard on/around 14195 kHz between 1530 and 1830z. QSL via I7JFQ.

CONTEST CALENDER AVAILBLE. Mike, VK4DX, informs OPDX that he has redesigned and updated his Web site at: http://www.vk4dx.net
His site now includes an "International HF Radio Contest Calendar" with contest rules and a new software links page with pricing information.

EA6, BALEARIC ISLANDS. Christian, DL6KAC, will be going to Mallorca Island (IOTA EU-004, DIE E-021) from September 5-27th. Activity will be on 40-10 meters, maybe 80m, SSB and maybe CW. His antennas: Dipoles on the high bands, Inverted L for 40/80 meters using 350 watts. This will be a holiday style operation. QSL to homecall via DARC bureau or direct (qrz.com).

HS, THAILAND (SEANET Activity). Thai operators will be active during the SEANET Contest, August 18-19th (1200z-1200z) 24hr. HS0AC, HQ of the RAST, will be active on all band CW/SSB. Also look for them on 80 meters (3524 kHz), 160 meters (1834 kHz) around 1930-2230z. QSL via G3NOM: Ray Gerrard, P.O.BOX 1300, Nana Post office, Bangkok 10112, THAILAND. Also, scheduled to be active as Single Ops are the following:
Yong, HS4BPQ (CW) QSL via E21EIC
Choon, E20HHK QSL via E21EIC
Din/YL, HS9EQY (SSB) QSL via E21EIC
Finn, HS0/OZ1HET (CW) QSL via OZ1ACB
Winit, HS1CKC QSL via CBA
Yod, HS0XNO QSL via CBA
Nut, E20RRW QSL via E21EIC
Son, HS6NDK QSL via HS1CKC

Sarn ,HS6PAU (SSB) QSL via HS1CKC

IOTA NEWS.....
IOTA TOUR. By the time you read this IZ7ATN/Simon, IZ0CKJ/Alessio, IZ0EGB/Massimo, IW0FT/Paolo and IW0FTB/Diego should be QRT from EU-181 (Sveta Anastasya Island) signing LZ/homecall and should be active from AS-123 (Bogsak Island) signing TA0/homecall until August 20th. They will move onto AS-115 (Uc Island) signing TA0/home for one day, August 21st, and then onto AS-098 (Sedir Island) signing TA0/homecall on August 22nd. They will then end their tour from EU-049 (Samos Island) signing SV8/homecall on August 24th. They will be operating on 4-60 meters, mainly SSB. QSL all operations to IZ0CKJ: Alessio Roma, via Sterparo, 43 - 03023 CECCANO (FR) - ITALY.

OC-196. A team of 3 Australian hams are going to Gabo Island from September 26-30th. This is a rare IOTA location and lighthouse location. Full details are at: http://vk2ce.com/vk3dk

SA-052. It has been announced that last week the Peruvian Navy has granted an operation/authorization to activate the San Lorenzo Island. The DXpedition team states that this was the only obstacle left, so the group is very happy and enthusiastic, and are now finishing all the final details for this operation. The possible callsign would be 4T0I, subject to availability. The scheduled dates are as follow: From Friday, September 14th to Sunday, September 16th, they will be active on 80-10 meters on SSB and CW preferably, but they will also work RTTY and PSK31 during some periods on 15 and 20 meters. The QSL Route will be via OA4DJW. The list of the operation frequencies and other further details can be seen on their Web page at: http://www.qsl.net/4t0i

JD1, MINAMI TORISHIMA. JF8HIQ/JD1 was heard on 18133 kHz at 0945z and JD1BCK was heard on 15 meters between 0730-0930z (check 21230).

LIGHTHOUSE ACTIVITY.....
Just a reminder that the "INTERNATIONAL LIGHTHOUSE/LIGHTSHIP WEEKEND" is August 18-19th. There are now over 300 lighthouses/lightships in 43 countries that are entered during this weekend. A list of entries can be found at: http://vk2ce.com/illw/2001.htm

The Peconic ARC, W2AMC, ARLHS #333, will activate Horton Point Lighthouse, Southold, NY, on August 18-19th. Operations will be restricted to 1200-2000z each day. This lighthouse is located on the bluffs overlooking Long Island Sound. This will be their fourth activation of this lighthouse for ILLW. The lighthouse is an actively maintained aid to navgation. It is open to the public and features tours and a museum. W2AMC will be active on 40 meters (7.270 MHz), 20 meters (14.270) and possibly 10 meters (28.380) in addition to 6 meters (50.125 MHz) SSB. QSL to W2AMC, PO Box 113, Peconic, NY 11958.

They will have an illustrated 8-1/2x11 certificate QSL. Please send a SASE with sufficient postage along with your QSL card.

The Hiawatha Amateur Radio Association will again operate "W8L" for the International Lighthouse weekend. They will activate the Marquette Harbor Lighthouse/Coast Guard Station on Lake Superior. Look for them to be active on all bands and the following modes (SSB/CW/RTTY/PSK31). QSL via K8PT, direct.

During the International Lighthouse Weekend, DL0RUG will operate from Dornbusch Lighthouse (Hiddensee EU-057, ARLHS# FED 026) from August 17-19th. Activities will be on CW/SSB on 40/20/17/15 meters.

Look for the Tybee Island Lighthouse, on Tybee Island, GA, to be on the air for the International Lighthouse Weekend. The IOTA is NA-058. The callsign will be K4T. QSL to AF4MI. Suggested frequencies are around 14265, 21365, 7265 and 50165 kHz.

Giedrius, LY1FW, reports to look for LY1FW/p to be active from Sventoji Lighthouse (ARLHS LIT-006), August 16-19th. His activity will be mostly on 20 meters. QSL via LY1FW CBA address or via bureau.

Dennis/RZ1AK and Vlad/UA1CIO will be active as homecall/p from the Shepelevsky Lighthouse (ERU 007) on August 18-19th. QSL via home calls.

Look for club station ZS1ESC/L to be active from Robben Island during the ILLW weekend, August 18-19th. Activity will be on 20/15/10 meters.

PSK31 DX NOTES. Dima, UT5RP, informs OPDX that the "PSK31 DX Reflector" will be closing down on August 20th; reason unknown. However, "PSK31 DX Notes", are available on the Packet Radio Network or on the InterNet at the following URLs:
http://www.krs.poltava.ua/psk31dx.htm
http://www.qsl.net/xe1m/ut5rpdx.htm

THE PY0T STORY. Vieira, PY1LVF, provided OPDX with the following story and information on his recent Trindade operation. This press release has been edited for publication. He writes: "We (operators Vieira/PY1LVF and Ricardo/PY1VOY) arrived in Rio after a short stop in Vitoria where we decided to get off the ship and take a plane. The ship is still scheduled to arrive in Rio with the entire crew next Saturday. Equipment and antennas remain in the ship. I realize that some information should be spread out to avoid any misunderstanding and/or confusion as follows:
The ship arrived at the island on schedule August 7th at 1900z, but we were not allowed to disembark (not even the militaries) because of the strong winds and heavy rains. We stayed overnight on the ship to start on the next day, August 8th. We finally took a helicopter at 1000z, and the trip did not last more than 5 minutes to step onto the island.

Equipment arrived after us, trip by trip.
The first day was tough, windy, cold and raining most of the day. We felt some weather improvements on the next day but not in terms of wind intensity. At least there were no more raining, and the temperature was higher than the previous day. Unfortunatelly, we had to close down the station's operation 5 hours before departure. All the equipment was scheduled to go back to the ship in the morning. A break from the Island was celebrated with cocktails, and we departed during the afternoon. We actually had to use the boat to get back to the ship, which was a very dangerous experience but we got back safely to the ship. The actual dates of the operation were: August 8th, 2001 (first QSO at 1401z) through August 10th, 2001 (Last QSO at 1130z). The PT0T and ZX0Z call were authorized by the ANATEL while we were already on the island despite our use of the callsign homecall/PY0T. We did not want to loose time while waiting for the special callsign authorization. 4000 QSOs were made with 80 countries on 40-10 meters. Unfortunately, our antenna tuner did not work well on 12m and this the only band left blank. For QSLs, PY1LVF (Vieira) will be handling this task. It will take about 2 to 3 weeks to have all cards printed out. He expects to start mailing out cards in mid September. Cards via the bureau will be accepted, but since PY1 Bureau is running very slow on sending and receiving cards, we recommend to use direct if you need the country for your DXCC. Cards via Bureau usually take more than a year to receive. There are a few PY1 hams who have already sent cards direct to the destination bureau to avoid loosing and/or taking that delay.
We may have some more information to provide to whoever is interested to know about the trip, the operation and the island. I understand that many hams were not able to make a QSO since the operation just took 2 days. We hope we can keep this door open with the Brazilian Navy so that, not only us, but other groups can make many 2 days operations and give the opportunity to those hams that need the country for the first time."
QSL Manager PY1LVF: Jose Luiz Vieira Fernandes, P.O.Box 18009,
Rio de Janeiro - RJ - Brazil - South America 20722-970
73's ... Vieira PY1LVF/PY0T & ZX0T

QSL INFO AND NEWS.....
Alex, PA1AW, reports as of August 13th, that all direct 5A24PA QSL requests have been answered and are in the mail. The 5A24PA logs are available at: http://dx.qsl.net
Also linked at: http://www.qsl.net/pa1aw (QSL section)

Don Field, G3XTT, D68C Publicity Officer, reports that Phil, G3SWH, states the D68C QSLing situation is as follows: "Cards are being processed in the order in which they are received. Direct requests are being dealt with first; after that bureau and E-mail requests will be answered. So far I have confirmed 10,000 QSOs. We are making good progress but please do remember that the D68C team made 168,000 QSOs with over 45,000 unique calls. Please do not send duplicate requests or E-mail chasers to G3SWH. This just slows down the whole process."
You can check if your contacts are in the log by accessing the D68C log server at: http://www.dxbands.com/comoros

Reports indicate that Jairo, HK5MQZ, states that Malpelo Island QSL card (HK5MQZ/0M) will be printed next week, and they will start replying within the next 30 days (in the order the QSLs were received). Please be patient.

Dave, VA3RJ, reports that an on-line log search for TY0CDX (Benin) is now working at: http://perso.wanadoo.fr/f5cwu/htm/logty.htm

Gary, W5FI (aka XX9TFI), informs OPDX that he has set up a Web page for his recent XX9TFI operation and is available at the following address: http://www.mdxa.org/w5fi-xx9.html
He states that currently it is a basic page with some pictures of Macau, the station, and Gary. There will be more details and many more pictures up later. The page will provide some interesting information, and eventually it will be a resource to others who want to get licensed in Macau.

Zik, YT1HA, member of the YU1AAV radio group, informs OPDX that QSLs for YZ1V go to YU1AAV. YZ1V is active in almoust every contest. QSL via the bureau or "Radio Sekcija Kozara", Jurija Gagarina 210, YU-11 070 Novi Beograd, Yugoslavia. Also QSLs for YU70K (1994-95), YU50AAV (1995) and 4N140T (1996) can be sent to the same address. QSLs for 4N140T can also be sent direct via YU1SB: Slavko Bozic, J.Gagarina 196/50, 11070 Novi Beograd, Yugoslavia. Zik also mentioned that about 5000 QSL cards were sent out via the bureau.

RA3, EUROPEAN RUSSIA. Ron, W6OM, is on a business trip again to Moscow and St. Petersburg, Russia. He will be active on 80/40 meters CW with his usual RA3/W6OM callsign each night. QSL to W6OM.

S2, BANGLADESH. Mr. SHIN will operate as S21YH again from 1800z of August 21st, to 1759z of August 28th. He will mainly use 7-24 MHz bands with CW (QRS) and SSB. QSL via 7M4PTE with a SASE to the following mailing address: Mr. SHIN, Makoto, 2-3-18, Naritanishi, Suginami-Ku, Tokyo 166-0016, JAPAN.

SPECIAL EVENT STATIONS CELEBRATING THEIR INDEPENDENCE.....
Look for special event station EO10G to be active August 20-28th to celebrate 10 years of Independence for the Ukraine. QSL via UR7GG: Victor Tkachenko, P.O.Box 73, Kherson 73000, UKRAINE.

Look for special event station UM9AA to be active August 27th through September 5th to celebrate 10 years of independence. The 1st of September is the Independence Day of the Republic of Uzbekistan. Activity will be on all bands. QSL via UK9AA: P.O. Box 58, Tashkent 700000, Uzbekistan.

TY, BENIN. A French team of operators are now active until August 29th. Look for TY22DX, TY0CDX and TY68F. Activity seems to be on 40-10 meters (including the WARC bands) CW/SSB at various times through the day.

Excerpts and distribution of The OPDX Bulletin are granted as long as
KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS
online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with
the Sysop or send via InterNet Mail to:
kb8nw@barf80.nshore.org - OR - kb8nw@arrl.net
Use the VOICE or FAX answering machine at 440-237-8208 which shares the
same phone line as BARF-80 BBS using a data/fax/phone switch. To access:
1) Dial Number. 2) Wait for first ring (the second ring should be a false
ring from the fax/data switch box) and then dial four quick ones ("1111").
(NOTE: Some FAX machines that send single "BEEPS" every second will not
have to do this step.) 3) The phone will pick up and after the "BEEP"
leave your voice message or FAX.

Hi !

Finally we got the YW5FC (Farallon Centinela) QSL-Cards from the Printshop and the 1st lot has been sent out.

I'ts a beautiful card ..... :-)

We apologize the delay...

Hopefully you receive it soon.

A sample size of 105 gives an error margin of +/- 9%. I have no way of
telling who responded to the poll.

I did subscribe to that and didnt see one message during the recent meteor shower. I have never seen any e-mail from that list. I winder if something is wrong with my subscription.
The DX-QSL one works fine though.

> Any one have QSL info for JY8TE please??

John,

QSL info for JY8TE to be found on different sites:

http://www.buck.com/cgi-bin/do_hamcallexe
http://oh2w.kolumbus.com/dxs/qin.html

I have it listed as via JH7FQK, address to be found:
http://www.qrz.com/database?callsign=JH7FQK

JH7FQK is also the manager for JY9NX. I sent him QSL direct + SAE + 1$ and I
got it qsl'ed after a good 3 months. Patience, but he's no rip off!
Buro might be good too but I did not check...

Hope to be of service!

The wife and I are going to Grenada in October which made me
think...hmmmm....J3/G4IRN...sounds good.
I'll need a compact radio to pack in hand luggage, something in the price
range of the Alinco DX70TH or the Kenwood TS50. I intend opertaing mainly CW
with some SSB. Any suggestions which might be best?

Looking at the product reviews on eHam.net suggests that the Alinco CW
filtering is not so good but I'd be interested in hearing from anyone with
experience of a similar profile of /P operating.

Also...

Does either radio have a built in keyer?

Thanks,

John
G4IRN.

I have been operating /M , usually with 50 w, for five
years, and a top-loaded mag-mount
antenna 150 cm long with the original Alinco DX 70 and matching antenna
tuner. From the area of Vancouver, B.C. , I work all over the Pacific Rim
when propagation is on, mostly from a parking lot and on CW. I have no
hesitation in endorsing the DX 70. I use a straight hand key
. For any further info, e-mail direct. Miki VE7AFN/M.

Or...

Forget the SSB and pack a QRP rig like the Elecraft K1. Runs off batteries for hours (even internal ones if you buy that option), two bands installed at a time (40 + 20 by default), nominal 5 watts out. I have one of these radios and speak from personal experience when I say it is one of the best choices for portable operation - very light, low power consumption, excellent performance.

If, however, you want a nice compact 100w HF radio, I would agree with Walt - the 706 (particularly the MkIIG, but even the original version) is an excellent choice. I got on with mine very well indeed...

I used the Alinco for ages - it is a very very nice set. Smaller than the
TS50 and it had six metres (I think!).

Why not try an FT817 - don't need mains except to charge the batteries.
They are justifiably popular...mine is great and so easily portable. You
won't regret an 817.

Hi there.
I used a TS50 in 5B4. it does run warm a bit..
Regarding psu...look at the SEC 1223 from Waters and Stanton.
Its switch mode but no rf problems.
Size 57 high 177x190 and is 13.8v 23 amp continuous.
Its only 1.58Kg. Is really is the job for your visit.
It can also be set up for 115v 60hz.
Page 182 of there 2001 cat. Price £95.95.

Hello All:

What are the hot frequencies for 6 meters DX. I believe they use USB?

Just put up a Interceptor 10K 5/8 Wavelength Ground Plane Antenna, and don't know where to listen. The ARRL Handbook doesn't have a lot frequencies, but did menition 50.125 MHz as a DX calling frequency.

Jay in the Great Mojave Desert, ...just down the road ah ways from the fillin station.

Or even a K2. The K2 will run 10 Watts output on 80 to 10 in it's basic form. Power supply requirement is a very modest 3 Amps. I had great fun taking mine to Portugal in July and had many good contacts on 20m CW with a simple dipole slung between trees (including ZL). It's easy to carry in hand luggage, although if fitted with the lead acid gel cell internal battery can feel a touch heavy. You won't find a better receiver...

Yes.

Other U.S./Canadian signals will be 50.125-50.205 USB (phone) and
50.090-50.100 CW. Stations outside the U.S./Canada will be on 50.100-50.120
USB and CW.

The Alinco CW filter is around 500Hz and would have been better with
a 250Hz filter. However, by careful use of the filter, IF shift and reverse
CW
you can usually get rid of interfering signals quite effectively. the DX70
does
not have a built in keyer.

While I admit to being biased, the ARRL aren't. To quote Ed Hare, W1RFI, the
ARRL lab manager:

"Speaking of dynamic range, the best dynamic range ever measured in the ARRL
Lab at 5 KHz spacing belongs to the K2 on 20 metres".

Dave

105 visitors can make for an accurate poll, but if those visitors follow an appropriate distribution. In this case I'd say you might have a problem with bias on your poll. First of all you're polling only people with internet access, second you're polling only people who have certain interests relating to the material on your page, and most importantly, you're polling only certain countries (for example if your page is english, you're leaving much of the spanish speaking world out of the poll).

Finally, if you asked "is ham radio dying out" directly, you might also have a problem with people giving you a prefabricated answer rather than their true judgement.

A more widely distributed poll might reveal completely different results. So, no reason to get depressed!

Not nearly so much as on 40 which was where this article touched. As a very serious suggestion for this antenna, especially if it is low in height. It would be very interesting to see the comparison path results for reasonably long paths if this antenna were fed in VERTICAL polarity.

From using three element low quads on 40 meters, and full sized ones at that, I can tell you that the performance is far better for longer paths if you will feed them in vertical polarization mode.

The effect is even more pronounced on 80 meters, to my actual experience. In this case I was on the receiving end on 80. I've never had a quad up on 80, but honestly wanted to try a three element Swiss version on 80 in vertical mode.

There is a huge difference, in practice, between low height installations in the mode switch. And further, beyond about three elements, in vertical mode, close to the ground, it appears to be useless to go any more loops, if my computer models are correct ...

>does
>not have a built in keyer.

I have a question for you boys with the CW qualification.....
Why do you need a Keyer ??
you had to take the test using a straight key so why the keyer ??
If you want to send faster, try a REAL "BUG" KEY the telegraph
operators used them to great effect and you will then be showing off
your skill.

This is NOT an attack on CW, CW OPERATION or folks who enjoy
code operation.
Just pointing out that you do not need an electronic GIZMO to send
fast CW.

Have fun
Martin

DF5JT, well said! I'm also waiting for a 5A1A card and will try the registered route today. That makes number 3, but I guess that it depends on how much you really want a Libya card.

Try and understand what people elsewhere are experiencing. That's a key part of Ham Radio. We have this great hobby in common, but part of communicating is seeing how the chap at the other end is living, not just "59, thanks". I suspect that this is also the situation with my zone 18 (UA9ORQ)and 23 (JT1CO) cards, but I'm guessing that they don't have a Post Office on every corner and may just have a"few limitations" that their government and even culture imposes.

I'll be patient.

Tried using direct mail with no success. I then heard about going the "registered mail" route. I did that and received a reply in what I thought was a reasonable amount of time, about 6 or 7 weeks. I can only say that when done right (ensuring that your card gets to him, that is the hard part) he will reply. Remember, if the folks in the postal system over there think there is a QSL card in there with a buck or two it is probably not going to reach him. Take the time to do it right and get the card.

John

I just got home from four days portable operating at my girlfriends QTH. It was the first time I used my portable rig (bought it second hand for 620? *hi* - get used to it!).
I used a DX-70, an AT-230 manual antenna tuner and a random-sized ground plane antenna (7m wire running vertically and 2 radials).
Conditions seemed not to be too good, but this antenna is right for the rig. Do not put heavy beams or monobanders on this rig, as it will overload - but a dipole or a vertical will work. I like the DX-70, as it is compact, light weight and still rigid.

I once tested an IC-706MkII, but I don't like it, because it is more expensive than the TS-50 and DX-70, and has a more complicated menu-structure.

In a nutshell, the pro's and con's of the DX-70...

PRO:
* lightweight but still rigid
* filters on board, dual VFO, XIT/RIT
* not too much buttons, but no complicated menus-structure either (better than the IC-706)
* good audio
* good rig for the price

CON:
* no internal electronic keyer (ideal solution = K9 at http://www.k1el.com)
* no headphones terminal; you have to use the ext. speaker out with attenuation and stereo-mono conversion)
* power only 10W or 100W - nothing in between
* selectivity is not too good (I'm spoiled with a TS-850 + CW filters here at home)

BTW: the DX-70 is said to be designed by the engineer who designed the TS-570.

For what it's worth...

Having been a commercial (marine) wireless operator and owning a Vibroplex
mechanical bug key, external iambic squeeze keyer, two sets of paddles (for
internal keyers) and a couple of pump handle keys... the keying method of
choice on every occasion is to use a set of paddles with an internal keyer.
It's easy to send, no "glass elbow" from pumping a hand key and no dirty
contacts giving partial dots on the Vibroplex.

Overload? Must be something wrong with your rig Franki, had my
DX70 on beams and verticals, no overloading on the higher bands,
just a touch of intermodulation on 40m (pre-amp on).

Ohio/Penn DX Bulletin No. 526

The Ohio/Penn DX PacketCluster
DX Bulletin No. 526
BID: $OPDX.526
August 27, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, KF2TI, N3SL, W3UR & The Daily DX, N4AA & QRZ DX, W4WX, WA4FFW, KH6BZF, W6DXO, AL7KC, K7ZZ, NH7A, K8YSE, DH5JG, DL1EK & DX News Letter, DL2VFR, F5NQL,, GW0ANA, IV3TAN, JH8KYU, RW3RN, UA6MF, VA3RJ, VE1JS, VK6CQ and YS1RR for the following DX information.

* EDITOR'S SPECIAL NOTE (by KB8NW): I know I said that "There will 'NOT' be an OPDX bulletin for August 27th", but due to some significant and important announcements I decided to send one out anyway before going on vacation (Call me "dedicated to my readers" or "crazy" as my wife would say!)

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Thursday, 16/August, through Thursday, 23/August there were 228 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE0A, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, E4, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, SU, SV, SV5, SV9, T2, T32, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VP2E, VP5, VP8, VP9, VQ9, VR, VU, XE, XT, XU, XX9, YB, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3D2, CONWAY REEF. Raymundo, YS1RR, reports that he received a phone call from Hrane, YT1AD, and was told he couldn't get landing authorization for KH1 this time (see KH1 below), so he will go again to Conway Reef in October. Team members will be YT1AD, YU7AV, YZ7AA, YU1AU, YU1DX, Z32ZM, YT6A (possibly), RZ3AA and K1LZ. One member of their team is also a journalist. The team will leave from Fiji on September 30th, on the ship "MV Princess 2" and arrive on Conway Reef on October 1st. They should be active on the same day and then for the next 10 days (October 10th). The callsigns will be announced the first day of the operation (one call for CW and one call for SSB/RTTY). Their license is valid until December 31, 2002, and they estimate the cost of the operation is approx. 45000 USD. All donations are welcomed via YS1RR. Two stations will be active on 160-6 meters, including the WARC bands, around the DX windows. Pilots stations for this DXpedition will be YU1AA and VEJEXY. QSL CW QSOs via YT1AD: Dr. Hrane Milosevic, 36206 Vitanovac, YUGOSLAVIA.QSL SSB/RTTY QSOs via Z32AU: Dragan Kostevski, P.O. Box 35, 6000 OHRID, MACEDONIA, Europe. A Web site will be available after September 10th, for "Conway Reef 2" operation at: http://www.kragujevac.co.yu/3d2

4W, EAST TIMOR. Jose, CT1EEB (aka VK8CS, 4W6EB, CU3/CT1EEB), informed the DX community that Amateur Radio won't be forgotten in East Timor now that the only active DXers in the Territory have left or are about to leave. Carlos Poinho, CU3FT, active DXer from the Azores Archipelago and a Telecom Tech. for the Portuguese Air-Force, is in Tour-of-Duty for UNTAET in Dili, Capital of East-Timor, and will try to be as active as possible with the callsign 4W/CU3FT. The license has just been received from the United Nations in New York, and the creditation procedures is in process by DXCC. Special attention will be given to the WARC bands and 6 meters, especially the upcoming F2 openings in October/November. Also, he will work with ETARA (East-Timor Amateur Radio Association) and the local authorities to set up a future licensing authority after East Timor receives its full independence. Jose will also help in introducing Amateur radio to the East-Timor nationals. QSL via Manager CT1EEB: Jose Emanuel Ribeiro de Sa, P. O. Box 79, P-3860 Estarreja, Portugal.

9E, ETHIOPIA. Silvio, IV3TRK, will be active as 9E1S Friday, August 24th through September 4th. Activity will be mainly CW. He will also be active on the low bands. The only problem is that his antenna for the Top Band is a simple T antenna because he doesn't have enough space to install a better antenna for reception. The RX conditions on the low bands in Ethiopia are very poor during this season (rainy season). E-mail sked can be made via: et3vsc@telecom.net.et
QSL via IV3TRK.

C6, BAHAMAS. Several MDXA members are planning to operate in the CQWW SSB Contest (October 27 - 28th) from C6A. They will be active the week before the contest (October 20th) with individual callsigns operating SSB, CW and perhaps some RTTY. They have rented the villa offered by Ken Helton, KC4SZE / C6AHN on Treasure Cay, Abaco Island (NA-080). This is the same QTH used by the C6AJX group for the 1999 CQWW CW Contest. Confirmed operators as of now are: Ernie - W5OXA/C6AKO, Randy - W5UE/C6ARB, Alan - N5PA, Stan - K5NY and Bernie - KK5EW. Details are still being

worked out, so watch their web site for up to the minute information
at: http://mdxa.org/c6a-2001.html

CN, MOROCCO. Al, NH7A, will be active in the CQWW SSB Contest as a
Single Op/All Band entry as CN2AC. QSL via F6BEE. Also, F6BEE will be
active in CQWW CW Contest as a Single Op/All Band entry as CN2JS. QSL
via F6BEE.

IOTA NEWS.............
AF-004. Frank, DH5JG, will be on holiday and active from Lanzarote
Island from August 29th until September 10th, signing
EA8/DH5JG. He will work mostly on CW on 40-10 meters, with
a focus on the WARC bands. However, he will also participate
in the WAEDXC SSB Contest. He will use an IC-706, 100w, with
a dipole. QSL via home callsign, bureau or direct CBA (on
www.qrz.com).

EU-048. Didier, F5BJW, will be active from Ile de Groix, September
15-24th. Activity will be on 80-10 meters on SSB (100 watts)
with dipole and GP antennas. Callsign will be TM2A. QSL via
F5BJW. Look for info and photos after the expedition on the
Web page: http://castres.dx.gang.free.fr/

OC-142. Look for VK4HF to be active from Fraser Island, August
27-31st. Activity will be on 80-10 meters SSB. QSL via VK4HF.

KG4, GUANTANAMO BAY. Bill, W4WX, member of the Florida DXPedition Group
(FDXPG), will be operating from Guantanamo Bay, Cuba, September 7-14th
as KG4DX (ex-KG4GC). He will be active on RTTY and some SSB along with
activity on the WARC bands and 6 meters. QSL direct or via bureau to his
home call.

KH1, BAKER AND HOWLAND ISLANDS. Hrane, YT1AD, states that they have
"received provisional permit for disembarkation of our expedition" from
the United States Fish and Wild Services, " and this is a main step for
our activity."

KH3, JOHNSTON ATOLL. Just a reminder that Dan, KH6UW, will lead a group
of four operators including AL7KC, W7TSQ and K7ZZ on a trip to Johnston
Island (OC-023) from September 11-18th. The group will be active on 160-
6 meters including the WARC bands using CW and SSB, using the callsign K3J.
Two 24-hour stations will be used, with a third activated as needed.
European contacts will be emphasized when band openings permit. In response
to many requests, a six-meter station (with beacon) has been added to
the group's capabilities. A web site, which will contain log checking,
may be found at: http://www.qsl.net/k3j/>www.qsl.net/k3j/
Many people have contributed to the success of the trip, but special
thanks goes to Force 12 for antenna support. QSL via AH6HN.

QSL INFO AND NEWS.............
3B6RF QSL STATUS. Steve, N3SL, informs OPDX that they ran out of 3B6RF
cards the weekend of August 11-12th. Rene and Christina (2 members of
the 3B6RF team) drove to Germany and picked up more QSL cards (where

Funk Amateur provided the printing). Steve received an E-mail Friday, August 17th, stating that 500 more QSL cards were mailed directly to him this past Wednesday, August 15th. The last batch of QSL cards took 12 days to arrive from Germany. Right now Steve has just over 200 cards waiting to be answered. He is presuming a significant number of people will wait until they know cards are coming out, then send for theirs, as these 200+ cards have arrived in the past 10 days or so. The day the new batch of blank QSLs arrive, they should be able to knock out the current pile in one evening. This includes those who QSLed via WF5E.

3Y0C QSL STATUS. Mac, WA4FFW, reports that 5000 3Y0C DX station QSL cards were mailed out August 17th. This did not include any stateside cards or bureau cards. They processed the DX cards first so as to give them some extra travel time in hope that they could be used for this year's submission. "It has been our goal to get the cards out in time to allow everyone to get them turned in before the September deadline." Stateside cards will be processed and mailed within the next two weeks. There are a lot of "NOT IN LOG", but they will check every one of these against the paper log before rejecting any request. The rework "NIL" verifications and bureau cards will be processed immediately following the stateside mailing. Joe/N4OL and Gene/WJ4T are assisting Mac with the QSL duty and things are going well and quick. They see no reason all stateside cards will not be mailed in two weeks. Please do not send E-mail inquiring or asking for special favors. They are processing as fast as they are capable of doing. They received the cards from the printer the first week of August and they have mailed over 5000 out to date. They can't respond to requests and process at the same time. Thank you for your help in this area. This first mailing does not include bureau cards, they will be processed after stateside cards. For those that did not send an SAE or envelope, these will get answered but after all the rest of the cards are mailed. Mac could not see delaying everyone's cards just to stop and fill in addresses. They will get answered along with the bureau cards. In regard to turning in the cards for this year's submission, they have not received any word from The ARRL as to the operation's approval. All documentation has been submitted.

CORRECTION. John, VE1JS, active from Brier Island (NA-127) should be QSLed via VE1JS, direct or via Bureau (not VE2JS as reported). His address is good in any callbook since 1999. All cards will be answered in the method that they are received!

VK0LD E-QSL (Good News!). Alan, VK6CQ (aka VK0LD), informs OPDX (in a long press release) that after having received several requests over the past few months for "valid" or "real" VK0LD QSL cards as well as suggestions as to how the existing VK0LD eQSL cards could be authenticated sufficiently for DXCC purposes, he has found an acceptable way to have the VK0LD eQSL valid for DXCC. It is IMPORTANT to read the following instructions from Alan to have your eQSL count for DXCC:
1) Anyone who had a valid QSO with VK0LD and downloaded a VK0LD eQSL card from the eQSL website who wishes to submit such a

card to DXCC can forward the eQSL card to Alan for personal authentication.
2) Aaln will check the card against the original log and sign the reverse of the card, stamp it with a special VK0LD rubber stamp and return the card to sender. He would then suggest that the card be laminated by the sender.
The ARRL has advised Alan that this will be sufficient to make the VK0LD eQSL card valid for Macquarie Island according to the ARRL rules for DXCC accreditation. Cards should be sent to the following address and it is IMPORTANT that the envelope is clearly marked PRIVATE & CONFIDENTIAL: Alan Cheshire, c/o Station Engineer, West Coast Radio, PO Box 688, Mandurah, Western Australia 6210, AUSTRALIA. Please include a correct sized SAE and funds to cover return postage (ONE Greenback is sufficient to cover the A$1.50 for international mail from Australia).
Alan requests to Please:
1) DO NOT Send Australian Stamps (Australia Post now uses special international only stamps - other Australian stamps are no longer valid for international post out of Australia)
2) DO NOT Send IRC's. Half of the ones Alan has received in the past are not accepted for exchange by the Australia Post, either due to being incorrectly stamped at originating office or being more than one year old). All in all, IRCs are a general pain to redeem. He will therefore not reply to cards sent with IRCs.
3) He is not a member of the Wireless Institute of Australia and does not use the QSL Bureau.
4) DO NOT put VK0LD or any other callsign on the envelope.
5) There is no need to make a donation to Camp Qualityor the Children's Cander Hospital in Sao Paolo as these were a VK0MM/AX0LD thing.
Lastly, Alan's "complete" press release will be sent out to all OPDX InterNet Subscribers as an addtional bulletin.

Glyn, GW0ANA, QSL Manager for the ZD7K and ZD8K operations, informs OPDX that all direct QSL cards for their DXpedition have gone out as of August 18th. He is now working on the Bureau cards as they come in.

RI6, EUROPEAN RUSSIA. Ivan, UA6MF, informs OPDX that a group will be planning an island DXpedition to the Azov Sea. Activity will be from the RR 17-04 island group for the "Russian Robinson Award (RRA)". The callsign will be RI6LAP as well as their home callsigns: UA6LGR/p, UA6LAM/p and UA6MF/p. Operations will be on August 24-26th. Activity will be on 40-10 meters CW/SSB. QSLs for RI6LAP is OK via UA6MF, the bureau or direct to: Ivan. A. Gudima, P. Box 47, Rostov-on-Don, 344007, Russia.

SILENT KEY. Mac, WA4FFW, reports with deep sorrow of the passing of Joe Curlott, W4CTG. Many knew him as K5CTG before he changed his call to represent the 4th district as W4CTG. Joe lost a very quick 6 week fight with cancer and the swiftness was a shock to all. He was at Dayton this year and started having problems shortly after returning home. He became a Silent Key July 30. Many knew Joe as the Anchor and Beacon Station for 80 METER DXING. He gathered both Stateside and DX stations on 3772 kHz

nightly for the past 16 years. Although he had worked and confirmed around 320 on that band, he was always there stirring up contacts for others to work. He was a gentleman and always willing to help someone work a new one on 80. He will be greatly missed.

SPECIAL EVENT. Look for special event station UM8LA to be active on all bands between August 27th and September 5th to celebrate the 10th anniversary of the independence for Uzbekistan. QSL via RW3RN:
Alex Kuznetsov.Box 57,Tambov-23,392023 Russia.

T2, TUVALU. Hiro, JA0SC, will be active as T22SC from Funafuti, August 23-30th. Activity will be on SSTV and RTTY. QSL via JA0SC, direct or via the bureau.

TI, COSTA RICA. Hide, JH8KYU (ex-3W2KYU/9M6HTT), will visit TI5KD's shack in Costa Rica from September 27th through October 2nd. The main purpose of his trip is to participate in the CQ/RJ RTTY Contest as a Single Op/All Band entry. The callsign used will be TI5U in the contest. Hide won the Oceanian low power record in that contest from KH0 last year. He wants to make many more contacts than last year's contest, so he will use some great antennas and a high power amplifier. Hide will also operate as TI5/JH8KYU on SSB/CW outside the contest. QSLs for both TI5U and TI5/JH8KYU go to Hide's CBA.

Z2, ZIMBABWE (QRP Safari Op). Harry, W6DXO, informs OPDX that he is pleased to announce, thanks through the courtesy of the Zimbabwe Amateur Radio Society, that he will be operating as Z2/W6DXO, September 27th through October 5th, from the Linkwasha Wilderness Camp, and the Victoria Falls Hotel both in Zimbabwe. Working conditions mandate QRP Ops. He will concentrate on 20 meters. QSL via W6DXO direct only.

Well, I must admit that the DX-70 does a better job on this one than the other HF+6m(+2m) rigs, but still - you cannot compare its dynamic range to that of a TS-850 or a FT-1000...

----- Original Message -----
From: "DrBoris" <c.inowski.nospam@ntlworld.com>

Overload? Must be something wrong with your rig Franki, had my DX70 on beams and verticals, no overloading on the higher bands, just a touch of intermodulation on 40m (pre-amp on).

A search on www.google.com came up with the following:

Arnie Coro (CO2KK)
http://www.radiohc.org/dxers (Radio Havana Cuba)

e-mail address: arnie@radiohc.org

Hope this helps.

2102. Why couldn't I check into the Buckeye Net?

Newsgroup: rec.radio.amateur.dx
Date: 2001-08-24 16:01:03 UTC
From: jason_hsu@my-deja.com
Message-ID: <f7d9a152.0108240801.5def525d@posting.google.com>
Source record: 16207

WARNING: This is a clueless newbie question.

Just a few minutes ago (11:30 AM this morning, 1530 UT), I was on 14.262 MHz to check into the Buckeye Net. I could only copy one station (who was S2 to S3) and couldn't even any of the other stations, including net control (although a slight garbled sound reminded me that someone was transmitting).

Some facts:
1. I am located in Reston, VA (northern Virginia), about 300 to 500 miles from Ohio.
2. My antenna is a DK3 Screwdriver with a 64-inch by 72-inch ground plane made of aluminum foil attic insulation. It's not a big gun, but efficiency on 20m should be fairly respectable even in comparison to a full-size antenna.
3. My QTH is bad - ground floor apartment at a low elevation. However, I don't think this was at fault. My apartment faces southwest, and I once communicated with a ham in Illinois on 20m in which we were S9 to each other even though I was using a 20m Hamstick I had borrowed (and with a lesser ground plane - just a few short radials).
4. I don't think D or E layer absorption could be at fault. According to the Near-Real-Time MUF Map, the X-rays shouldn't have been a factor above 7 MHz. And absorption shouldn't be an issue on the higher HF bands.
5. Noise shouldn't have been an issue either, and it wasn't. (I know what high noise is - I've heard it on 80m.)
6. The MUF was around 19 MHz according to the Near-Real-Time MUF Map. I don't think my signal was escaping to space. On the other hand, Ohio isn't that far away, and I may need a high angular height to communicate with Ohio. The MUF would have been lower at a higher angle. Is this the reason I had difficulty with the Buckeye Net?
7. When I see the Near-Real Time MUF Map (http://solar.spacew.com/www/realtime.html) shows the MUF contours, what angular height is assumed for the signals? The MUF will be highest at low angles and lowest for vertically incident signals.

Any ideas on what the weakest link was for me?

MUF by definition is the highest frequency you can use over a given path.
As that web page states they calculate based on a 3000km path. for much
shorter paths the reflection angle is much higher which would reduce your
MUF. note, as the angle increases (your signal gets reflected closer to
straight over head) the MUF decreases. so for shorter paths you need lower
frequencies. so the 19mhz for a 3000km path probably was reduced to
something less than 14mhz over your 300-500mi path.

if you listened around the band some more at that time you probably would
have had better signals from w0, w7, and maybe w5, and w6 than you would
have from w8,w3,w4.

(It is currently 10:00 PM here in the Washington DC area. I'm trying to develop the finesse I need to operate HF from a bad QTH with a small antenna.)

I am looking at the near-real-time MUF map at:
http://solar.spacew.com/www/realtime.html

It shows the MUF contours assuming a 3000-mile path length (which would be a whopping 4-degree angular height assuming that refractive point is 100 miles up and 1500 miles away).

I notice that here in the northern hemisphere, the MUF right now is at or above the 10m band only at the lower latitudes for a 3000-mile path length. The only time the MUF here would be above the 10m band is a brief period in the late afternoon. For shorter path lengths that use higher angles, the MUF would actually be less.

So why do so many people rave about how wonderful 10m is near the top of the solar cycle (like now)? It seems to me that unless you are located in the lower latitudes, 10m is open only very sporadically even in a good part of the solar cycle. Since the MUF is lower for higher angle signals, this means that if you live in a bad QTH (like my ground floor apartment at a low elevation) where your signals are blocked at the low angles needed for 10m skip, you are out of luck.

Am I correct?

When would I be able to work 10m? My patio (where I have my antenna) faces southwest, and my signals would suffer less attenuation to the south and southwest. The west would be questionable (although things would be better at somewhat higher angles). The north and northeast would be my worst directions, as the building and some earth lie in the way. I would be able to work 10m in the late afternoon/early evening (with the higher MUFs to the south and southwest). 3000 miles away would mean I could work Mexico, Central America, or northern South America/southern Caribbean on one hop. 4 hops would allow me to work Australia (assuming the ionosphere cooperates at the right places).

Am I making sense? Or am I all wet?

Also, when does sporadic E come into play?

I notice that much of South America right now has MUFs of 28 MHz or higher despite the fact that it is now night for them as well. Is this sporadic E at work?

_____

The problem right now is that it's summer. During the summer, the ionosphere heats up and expands. This causes a thinning out of the ionization, and the MUF drops in spite of the high solar radiation. From now until winter, you will see 10 meters get better and better.

This is why the ARRL has wisely scheduled the 10 meter contest in December of each year.

WARNING: another clueless newbie question

I am looking at the near-real-time MUF map at:
http://solar.spacew.com/www/realtime.html

and the minimum MUF map at:
http://solar.spacew.com/www/fof2.html

I notice that the MUF for 3000-mile paths is at least 5 to 6 MHz everywhere. The MUF for vertically incident paths is above 4 MHz everywhere except for the areas experiencing the pre-dawn hours in winter (currently the southern 40% of Africa, the southern tip of South America, the southern Atlantic Ocean, the southwest corner of the Indian Ocean, and neighboring parts of the Antarctic Ocean and Antarctica). This means that 160m is always well below the MUF, and even 80m signals rarely escape to space. Even most 40m signals are refracted.

Does this mean that if there are no crippling local noises and no crippling geomagnetic disturbances in progress, then 160m and 80m are always open at night and 40m is more likely to be open than closed at night?

This means that if no local noise sources or geomagnetic disturbances intervene, I can work nearly anyone else operating in the United States at night from the Washington DC area on 160m and 80m. Right?

Jason, what you are trying to do is make a science out of operating with a crappy antenna. No amount of MUF/LUF analysis and no software in the world is going to substitute for a decent antenna system, and this is something you're just going to accept. So you have two solutions: either accept the fact that your dxing is going to be severely limited and frustrating as hell, or buy a house with a decent yard and no CC&R's. That's just the way it is - you can't win a drag race with a scooter.

Pretty much so, except I've seen times in low solar cycle years,in the
winter, when the MUF dropped below 4 mhz. 75 would go pretty dead
except for real long haul stuff. 160 is a lot like AM broadcast band.
The skip zone is so short at night that you can work nearly anyone no
matter the location, if you have the station. But like AM-BC, you get
fading etc, so it will vary. But even 80 m is pretty reliable at night
even at close distances out to ??????. Sometimes stations within
50-100 miles or so will drop out as far as skywave, sometimes they
won't. 40 meters usually stretches out pretty good at night. It's like
75m sorta in the daytime, and good for local out to 500 miles or more.
At night the close stuff usually drops out, and you hear from about
500-800 miles out to ??????. But it all depends.. I've seen 40 wide
open at night.. It's like fishing. You never know what will happen.
30-20-17m up almost all long haul at night. But you have your
exceptions there also. 20m PSK31 has been good at night. But it's all
dx nearly.
>
> This means that if no local noise sources or geomagnetic disturbances
> intervene, I can work nearly anyone else operating in the United
> States at night from the Washington DC area on 160m and 80m. Right?

Yep. Station permitting. You might need a little horsepower when you
get on the fringe. If you work 3000 miles away on 75m in the summer
with 100w, expect to make lots of repeats. Heck, that can happen even
working close in at times in the summer... In the winter , usually no
problems even with 100w or even less. Depends on the noise. I can hear
ADF beacons on longwave in the winter, that don't exist here in the
summer. Just too much noise. But I don't have the greatest receive
antennas either. I hear Tom, W8JI on 160m all the time, working almost
all dx, and I rarely hear the dx he works here. I just hear noise on
them. He'll be 20-30 over 9 though. I just don't have the receive
antennas for it, like he does. It makes a big difference on that band
on long haul stuff. So just because you might not hear anything on a
small antenna, doesn't mean there is nothing there.
But for casual yik yak on 160m out to a few hundred miles , I can do

ok. I could easily WAS on 160m with 100w if I really wanted to. I've worked hawaii 3 times with 100w and a mediocre antenna, so I know I could make it to the rest. MK

Dear Newsgroup members,

I've just returned from Guam KH2

Today I got the log posted on URL:

http://www.neteze.com/radions/guam.htm

It's about 4 pages in my log book, anyone who has worked me can find themselves there..

Click on the "logs" link

Vy 73,

TR WB6TMY@arrl.net

You don't have to bite my head off. I was just trying to understand 10m.

I agree that I need to operate more. However, I find the normal band noise tiresome to listen to for a long period of time. And the frustration of trying to work people I cannot work without having some idea whom I could work doesn't help either.

I also agree with those who say I need a better QTH. I may end up moving soon for a nonham reason (read: an antenna/RF engineering position). Hopefully, I will have more apartments to choose from than last time. Then I will be able to factor ham reasons and choose an upper-floor apartment with a balcony and at a relatively high elevation.

However, I also realize that when using an inefficient antenna in a poor QTH, I am heavily dependent on band conditions and that I should be an expert on propagation (which I am not). I'm also trying to understand the specifics of my limitations so I know what I can and cannot work. Although I am only using a short DK3 Screwdriver antenna, its efficiency should be high on 10m through 20m, as it doesn't take much loading to achieve resonance. I have seen the RF propagation programs, and band conditions can make an even bigger difference than antenna efficiency.

As for 10m, I'll try it in the late afternoon/early evening sometime and try to work Mexico, central America, or northern South America. I realize now that anyplace closer would be inside the skip zone. I also can see that my RF signals in other directions (like the north and northeast) are blocked, and I shouldn't expect to work anyone (low angle signals are blocked by the building and earth while high angle signals escape to space) outside ground wave range.

The best way to lean is to build things, use things, and change things
and study theory at the same time. This helps a person tie what he
learns into how the the real world actually works.

The best way to picture what is happening is to make as many first
hand observations as you can, and ask questions or explain what you
see to others.

There is nothing wrong with asking questions, as long as we keep out
chippish* attitudes at bay.

73 Tom

Note:
*Chippish is newsgroup slang for someone who is ignorant about almost
everything but claims and thinks himself to be above almost everyone
else.

A really good way to find out conditions on the 10m band is to listen to
the beacons in the lower end of the band. There is a full set of them
and they will give you worldwide conditions in a matter of minutes.
Also, the set of beacons on 14.100 and up will give worldwide conditions
in a matter of minutes. It would be nice if the 14.100 beacon set also
did the lower bands, but such is life.

Walt..that just isn't true.....once it is printed out it is indistinguishable for a 'regular' qsl card and can be used in the same manner 'regular' cards can including DXCC submissions. Also many DX awards organizations are already accepting eQSL cards and ARRL has already announced they are going to soon accept electronic qsls...for more info on this just check out the FAQ at ....

Tom:

Heh, heh... "chippish", I love it.

Our friend Jason is just the opposite of chippish.

I for one welcome Jason to the NG, his questions are a breath of fresh air.

But... his questions, and some responses, might lead one to think that maybe the "younger" generation will get more out of the Internet than from the Ionosphere.

When I started in "radio", back in the "19-umptyumps", there was practically nothing else to do with scientific pursuits at home but "listen"

"Listening on the air" was one of the most exciting things to do. "Guess what I heard last night!" "The ZL's were booming in on xx.yyy Mcps after midnight!" etc...

Today, we have the Internet instead of the Ionosphere which, as Jason states, is probably "less tiresome" for younger folks.

Thoughts, comments?

Yep - but that was then -- and this is now. There is a whole raft of new tools
available to today's DXer -- use em for sure, but as Peter stated nothing beats
LISTENING.

Once I worked an S79 (very weak) and put it on the Packet Cluster. A local gun
came back irately stating miniprop sed that was impossible. I replied -- never
worked miniprop, but perhaps I should send back the QSL card when it arrives!!

Hello Wes,
Since when do qsl cards need to be signed? Of the several thousand I have received of ' regular ' qsl cards of years gone by I would say fewer than 10% are signed. But it can still be done electronically by simply scanning one's signature and applying it to the cards graphic image....

Electronic qsl'ing is the way of the future..even the " fuddy duddys " at ARRL have recently announced they are going to implement a 100% electronic qsl method valid for awards such as DXCC...

Even now any of the electronically acquired cards can be printed out and submitted for any award including DXCC since once printed 'electronic' card then becomes just another 'normal' printed card...

There really is no downside to this qsl'ing revolution......

When I first got into this great hobby (1956), I was running a
"BC459?, 40 Meter command set. It was supposedly 75 watts. My
antenna was a folded dipole into a 4:1 balun with a knife switch
antenna changeover. The receiver was a Hallicrafters S-85. Worked
GREAT. That is until I got some metering and discovered my power was
35W Tops!. I borrowed an SWR bridge and read my SWR as at least 3:1.

I had a hellofa time making QSO's after that.

A little knowledge can be a dangerous thing. A lot of knowledge can
ruin you!

Dunno, I don't think there would be much difference between the two.
More important would be having a ready ham in Alaska to work. I bet
they are kinda few and far between on 160m.I hear a few though. Hawaii
isn't exactly running over with them on that band. At that time, with
that antenna, I could work about anyone as long as I could hear them.
Hearing them was the hardest part. I remember when I worked Hawaii,
the copy was real rough with my antenna. At that time on 160m, I was
feeding the center conductor of an 80m turnstile. Basically amounted
to a flat top T vertical with about a 45 ft vertical section. The flat
top being 120 ft across as a "hat". It worked fairly well. In those
days, "mid 80's" I was using my drake twins. So I had a good solid
120w out actually. MK

2134. FS: Ameritron Amp to Xcvr Interface for Icoms...

Newsgroup: rec.radio.amateur.dx
Date: 2001-08-25 23:30:46 UTC
From: wa8mea@hotmail.com
Message-ID: <8a260fb2.0108251530.798e72c@posting.google.com>
Source record: 16239
Cross-posted to: rec.radio.swap,rec.radio.amateur.equipment,rec.radio.amateur.dx

I bought this for an old Dentron amp someone gave me. I think I used it a whole day when the amp decided to die. So I really don't need the interface anymore. It's got the cables, original box, instructions. $20 takes it off my hands and I'll even pay the postage to get it to you. First e-mail gets it.

73, Bill - WA8MEA

Looking for a neat portable multiband dipole? Check out: http://qth.com/dwm and click: "Yo-Yo-Tenna Deluxe"!

Well, if you start from that point, then you don't know any better, I guess, so every QSO is a success. If, however, you go from having a 2 element quad and a TH7DX and 1 kW to a condo wire, that can be pretty disappointing (speaking from experience, unfortunately). Either way, Jason seems to be limited by condo rules and regs that can be pretty rigid in the US, *and* he's on the ground floor.

If I were living on the main floor, I would try to erect some sort of a vertical with plenty of radials, maybe disguise it as a flagpole. Tell the condo association I feel like flying the Old Betsy Ross and say "do you have something against the American flag"? Too bad McCarthy's gone...

AB7SL sez:
>>Confirmation data for two-way communications must include the call signs
>>of both stations, the Entity name as shown in the DXCC List, mode, and date,
>>time and band.

The entity name is not needed except for those cases where the prefix is ambiguous - e.g. VP8, 4U, HK0.... (regardless of what the above quote says -- I checked this with the DXCC guys once, since I had cards that didn't have the country name on - I know one of them was from KH3, can't remember all the others).

They are also likely made out by hand with all of the info in the same
ink, handwriting, etc.

Try submitting one with everything but your call in blue ink and your
call in black and see how that flies.

Wes,
99% of all 'normal' (old-fashioned) qsl card's artwork and type set too gets (in this modern age) " electronically transmitted " as some point in their creation...your quote of the rules means electronically transmitted to ARRL. It does not mean electronically transmitted ever in it's life cycle. Graphic designers and type-setters often work outside of the office and email their work into the print shop....thus your definition no longer makes sense.

I challenge you to print out an "electronically transmitted " qsl (eQSL) and then submit it for DXCC..... no one at the DXCC desk would ever know or be able to sort out the electronically transmitted cards (that had been printed out) from the commercial printed card they hold in their hands as your QSO confirmation.

In one of my band-specific WAS submissions I had a card from Arkansas that was literally hand drawn on brown bag paper with ball-point pen....it got accepted and counted towards my award as much as the full-color commercially printed cards that were also in the bunch.

Change comes so hard for some people.....

> When would I be able to work 10m?

Jason, as many have said, 10 is still in the summer doldrums. However it is about to come to life and September will bring much better conditons. The MUF maps you are looking at are very poor at giving a newcomer a feel for the band. Go to http://www.qsl.net/w6elprop/ and download this very friendly propagation forecasting program. Try entering a few different dates for the same target area and you will see what a difference the season makes.

Your antenna and power will work the world on 10 meters this winter. I worked one station running 500 milliwatts last February and I recall him being S8 on my meter at the time (although he was using a big tribander at 60').

Want to see a BIG antenna for 10 meters? Look at my 3-stack of Yagi's at:
http://users.vnet.net/btippett/images/W4ZV.htm

73 and have fun on 10...it will amaze you very soon!

Hello Vic,

Here is - all - of what the rule states...

----
2. Written proof (I.e., QSL cards) of two-way communication (contacts) may be submitted directly to ARRL Headquarters for all DXCC credits claimed. Photocopies and electronically transmitted confirmations (including, but not limited to fax, telex and telegram) are not currently acceptable for DXCC purposes
----

Notice the context of what is accepted and what is not has been clearly established as proof that is " directly submitted to ARRL Headquarters ..." Thus I can email my qsl card around the world 50 times and then print it out and submit it as " written proof ". And before someone says " written proof " means handwritten I submit then that 99% of all qsl cards purchased and sent today are certainly not " hand-written " but type set and then offset printed ...by the millions. They most certainly are not " hand-written ".....

X-FLARE! Sunspot group AR9591 unleashed a powerful X5-class solar flare at 1645 UT (1245 EDT) on August 25th. The explosion also hurled a brilliant coronal mass ejection (CME) into space. The site of the explosion was near the Sun's southeastern limb, so the CME is not heading directly toward our planet. However, we might experience a glancing blow from the expanding cloud late Sunday or Monday. Above: This false-color movie captured by an extreme ultraviolet telescope aboard the Solar and Heliospheric Observatory shows today's explosion above sunspot 9591. Stay tuned for additional information.

So let's say that instead of living in Prescott, you live in
P'yongyang and you're signing P5DX. I work you and you send me one of
your funny eQSLs.

My local DX buddies weren't as good an operator as I was and they
didn't work you. But they promise me a prime rib dinner and an
excellent bottle of Merlot (Hawley 1997 will be fine) if I will just
"massage" your card and email them a copy. They print it out and
every cheater is happy.

Note that we could do the same with a paper QSL, which is precisely
why ARRL doesn't accept copies.

As well it should. This again is precisely my point. There is no
question of authenticity when it is done by hand, only when it is
electronic can shenanigens be perpetrated.

BTW, one of the nicest cards I have received is from XT2AW; it was
beautifully hand-painted in oil!
>

>Change comes so hard for some people.......

Look, I'm all for change if it makes sense. I just received and mailed most of 500 cards from the printer ($100). I burned through $80 in (foreign) air mail stamps. I bought $50 worth of IRCs from KU8C and they're gone, along with about another $50 in green stamps. Plus envelopes, return address and QSL labels, outgoing bureau fees, etc. etc.....

In one case, (5R8EE) I'm sending the card the third time. If I could get eQSls for all of this I would have enough $$ for a new rig. But... I don't want some jerk(s) "finessing" the system and getting credit for QSOs he didn't make. There is enough of that already with one guy working the DX for his buddies. Imagine when _nobody_ has to work 'em. They just download the DX card from QRZ.COM and add their data.

Wes N7WS

WARNING: This is another clueless newbie question about HF propagation. Flamers need not respond and should return to the rec.radio.amateur.policy newsgroup where they belong.

It is 10:45 PM here in the Washington DC area, and I am having difficulty getting into the Midwest Country Cousins Net on 3972.5 MHz.

I was only able to copy one person (S3 with only S1 noise, which is a surprisingly low noise level for 80m in summer, as the noise was S6 just a bit earlier this evening), and everyone else is buried in the low noise floor.

How can this be? According to the near-real-time E critical frequency map (http://solar.spacew.com/www/foe.html), the E layer cannot be to blame. According to the near-real-time F2 critical frequency map (http://solar.spacew.com/www/fof2.html), the critical frequency here and in the Midwest is 6-7 MHz. So even a vertically incident signal on 80m should refract back to earth.

If the F2 layer is cooperating, the noise level isn't stopping me, and there is no E layer or D layer to blame, what's going on? Is there a disturbance in progress that I am unaware of? Are my assumptions wrong? Am I missing something?

Let me just conclude by remarking about this one part of your last response....

As well it should. This again is precisely my point. There is no question of authenticity when it is done by hand, only when it is electronic can shenanigens be perpetrated.

(you misspelled shenanigans)

You gotta be kidding me Wes.....any mother's son can create a hand written card...from anywhere in the world. If anything hand written cards are 1000 fold easier to fraudulently create than computer printed cards. Far more people have blank paper and pen than those with computers,internet connection,and photo editing software....

Your example is "weak as water" as my Elmer would often say about my signal!

Thanks for the conversation Wes but you have not refuted the security and advantages and legality of the up and coming inevitable wave of electronic qsl's....which by simply printing out a validated card is as good as any other for awards programs....in fact most awards programs already accept pure electronic submissions......guess they didn't consult you first...eh?

It is only the ARRL that has been dragging their feet on electronic submissions which as I have pointed out is
not the same as an electronically created and transferred card that has then been physically printed out and then submitted. In fact as you may know the ARRL recently announced that by years end they will be accepting electronic submissions. Boy when that day comes I bet it will really boil your water!

There is a lot of good text on this in the FAQ at http://www.qslcard.com which is one of the routes to the eQSL website.

This tells me you have a fairly dead antenna. My noise on a normal 80m dipole right now is around S9 with peaks well over that. You are not getting out because your antenna is very inefficient. You can't have this and do well in the summer on 75m. With that received noise level, I bet even with a KW you would have trouble. I can't remember your antenna...Attic vertical or something along these lines?...No bueno for good 75m coverage. Judging by that noise received, my mobile would outdo it I bet. I know it's not quite that bad, even though it shows much less than my dipole. You have a lot of loss somewhere. MK

Oh yes you can win a drag race with a scooter. Its amazing what you can do with an indoor inverted vee dipole and 10W PEP on SSB. Much more fun than high powers and large aerials. Furthest distance so far is FY on 10W 15m band. Only been on for 1 1/2 months. Loads of E Euros, and contacted N1IBM/P last night (Sheffield Island).

Yes, try 14.100, 18.110, 21.150, 24.930 and 28.200MHz. These are
frequencies where a set of beacons take turns to transmit their ID then 4
tones (think its 100W tone, 10W tone, 1W tone, 100mW tone or something like
that). Very useful.

I experienced a similar behaviour yesterday afternoon (08/25).
We are running a small network with other stations here in Germany and the surrounding countries every Saturday at 15:00 UTC, at 3.675 MHz.
Conditions beeing normal i receive the stations with 55 - 59, the stations close to me (abt. 10 miles) with 59+ .
However yesterday there was heavy QSB, even the stations nearby fell back to 53. On normal days there are abt. 10 -15 stations on the network, yesterday only three stations i could hear, the other two got the same results. Noise floor was very low (S 2-3) with normal conditions its 7-9.
So we closed down the net early and i QSY'd to 40m, same behaviour, noise floor down to S 2 (normaly S7-9) only a few stations i heard, signals very weak.
About 17:30 UTC everything returned back to normal.

Because your antenna is obviously grossly inefficient. Your noise
level is too low for typical summer noise, and signals are weak also.
No one can hear you.

That almost certainly sounds like a very poor antenna.

The noise level earlier in the evening had actually been much higher
(like S6). In the past, I have experienced 80m noise as high as S8.
Yes, the antenna was connected (or I wouldn't have even heard that S3
signal from one person), and the attenuator was not in use.

My antenna is inefficient - a DK3 Screwdriver on a 64-inch by 72-inch
ground plane made of aluminum foil attic insulation and sitting on the
small patio outside my apartment. Of course, your mobile antenna for
80m isn't very efficient either. My bad QTH leaves something to be
desired, but I don't think even that explains it, as I have talked to
Midwestern hams (from here in northern Virginia) from this QTH before
on other bands.

If my antenna has an efficiency of just 1.5% on 80m, it is 18 dB (3 S
units) down from a 66-foot tall vertical with an infinite RF ground
plane (100% efficient). If I would have been S9+20 with the full-size
vertical, I would be S9 with my DK3 Screwdriver. If I would have been
S8 with the full-size vertical, I would be S5 with the DK3.

Other bands don't count. Have you talked to people in that area on 80
meters?

Your antenna is certainly very inefficient on 80 meters Jason. You
have a tiny tiny groundplane and a mobile antenna on it.

>If my antenna has an efficiency of just 1.5% on 80m, it is 18 dB (3 S
>units) down from a 66-foot tall vertical with an infinite RF ground

>S8 with the full-size vertical, I would be S5 with the DK3.

S units are not 6dB, that is just an old tale from the British or
someone. All that aside, you may not be making even 1% efficiency.

Where the 15 to 30dB down really comes in is when conditions get a
little poor.

While there was a flare, I was working piles of Europeans on 80 meters
all the way from Russia west to England. I worked a few Caribean
stations that were well over S-9, and even a couple east coast
stations on 80. Conditions were not that bad, although it did seem to
be a little worse than usual.

Marginal antennas like the B&W dipole, Sommer's loaded verticals, GAP
antennas, and your mobile antenna certainly can make contacts when the
band is goo and signals are strong, but they are the first to die when
anything goes wrong.

18dB is a heck of a lot, even 3dB is, when conditions are marginal.
And I can easily see a ground-mounted DK3 on a tiny groundplane might
be much worse than 1.5% eff.

You can make lots of conrtacts with poor antennas when it is quiet and
when progation is strong, but not when conditions are is less than

good.

Thanks for the responses.

To the people who mentioned the solar flare: The flare and the resulting fadeouts would certainly explain what I observed. Thanks for the information.

To the people who explained that people using inefficient antennas like my DK3 are impacted the most by band conditions: This is precisely WHY QRPers and those using inefficient antennas need to be experts on propagation conditions. I want to be an expert on propagation, and I know perfectly well that passing the propagation questions on the license exams does not make me a propagation expert.

To the people who wish I would go away: Is there a discussion forum or mailing list dedicated to propagation? Be glad I didn't write "Fractal Morse Code tests SUCK/RULE!"

That's really unfair. I have been reading your threads and no one here on this NG has suggested that you go away. Hang around, we like you!

Everyone learns when someone asks "dumb" questions. Because most are too frightened to admit that they have to ask "dumb" questions, they are secretly pleased when someone else asks the "dumb" questions. And... the learned answers help everyone reading the thread...

Jason, how long have you been a ham?

Hello Bob,
What part of

> Notice the context of what is accepted and what is not has been clearly
>established as proof that is " directly submitted to ARRL Headquarters
..."

don't you understand? The ARRL is not accepting direct submissions in
certain categories..in other words a purely electronic submission is not -
directly accepted - at headquarters. Now..if you print the " electronic "
card out it is just as acceptable and indistinguishable from any other....
and then would be accepted.

ARRL does not accept electronic submissions , faxes, telex, etc directly at
headquarters. In this discussion we are not sending them any of that
directly. What we are doing is printing out a card no different than any
other printed card and sending it to them. No cheating....

Charles,
What will it take for you to understand that eqsl as it currently stands does not work? On Monday, submit an email to the dxcc desk and ask them. We all know about the snafu with the VK0LD stuff. Do I need to post an eqsl confirming contact with me? I've never worked your station. It only takes a few minutes to generate a fake ab7sl eqsl.

The problem is that a vertical is not usually a good antenna for 80m regional work. Even full size with radials. Good for dx, but not good for general coverage . So even if you had a full size vertical up, a good dipole would probably beat it in 85% of the cases out to 1000-1500 miles. You have to take into account that even people using "decent" verticals usually get fairly weak reports in general compared to dipoles. Also you have to take into consideration the radial/ground system. What is usable with a full size antenna, may be very poor with a small vertical like a mobile antenna mounted on a patio. The smaller the vertical, the more critical the ground system. So this can lopside the end results also if the radial system is the same for both, and not very extensive. For your short antenna to sit up and bark like a dog on the low bands,you need a BIG radial system. Like 60 radials worth or more. My car ant very likely has a better ground system than your patio on 80m unless you have quite a few radials. I know I've spent many a time out in the boonies running that antenna and 100w, and don't have trouble talking. But my car will never confuse you and make you think you are on a dipole. Two different worlds for medium distance 75m work..You want an efficient cloud warmer antenna for what you are doing if you want decent reports with 100w. MK

Hi Jason,

Take a look at my page:
http://members.home.net/kb7qhc/propagation/index.htm

This is an animated MUF map centered on Seattle showing the MUF to
nearly any point on the globe for every hour of the day for a full
day. That is to say it is an animation of 24 MUF forecasts in a loop.
The number shown in the lower right corner is GMT.

Gary that is just not true,
For you to be able to generate an authenticated AB7SL eQSL you would have to submit a photocopy of your AB7SL license. Last I noticed I was the only Ham with one of those...

Why not check the FAQ on the eQSL site? I have a link to that specific page on my site....

From www.qslcard.com

As of March, 2001: The ARRL has announced their plans to implement some sort of electronic QSL acceptance system. We are presently in contact with them to find out the format they want to use. Once they publish the format specification and put their system into production (sometime in late 2001), we will be able to transmit your eQSLs to them so they can be used for ARRL awards and contests.

So folks as you can see if there are currently any gray areas about electronic qsl's that are submitted totally electronically there soon will be none as the ARRL is going to adopt a method of accepting them....

Then all Hams that object to electronic qsl's will have to find something else to moan,whine and bellyache over.....

to the people who wish you would go away, too bad for them. I for one
want you to stay, and ask all your nubie q's you want. Maybe we all will
get lucky someday and the others will go away. Please stay and continue
the propagation discussion any time, it is one of the most interesting,
ongoing, and changing subjects available to amateur radio.

I'll have you know that Zoran is a perfectly common American name which, roughly translated, means "maximum legal power into a 6 element beam". My family came on the Mayflower.

Pity that wasn't one of AB7SL's magical eQSLs. Then all you'd have to do
is change that second 'N' to a 'Y' on your computer, print it out, and
everything would be just fine and dandy (or would it? ;-) .

> band. Only been on for 1 1/2 months. Loads of E Euros, and contacted
> N1IBM/P last night (Sheffield Island).

Here are my thoughts on dxing, and not everyone must necessarily agree:

In order to be successful as a dxer (let's define success as working as many countries on as many bands as possible, for the sake of the argument), one must have the following three components (not necessarily in that order):

Antennas
Skills
Time

If one of them is lacking, success can usually be achieved by boosting the other two. Thus, if one has crappy antenna systems, one better be a damn good operator with nothing else to do but sit on the radio 24 hours a day each day. Even so, no amount of time and skills will help you work that elusive P5 when they show up for their two hours of operating every ten years or so.

However, I concede that you can have fun doing what you're doing. Finally, to quote Dirty Harry again: "man's got to know his limitations". Meaning if you're gonna stick with handicapped antennas, don't expect miracles.

Gee Michael...
Couldn't he just email the DX and get a corrected duplicate card sent in a matter of minutes? Oh the beauty of electronic qsl cards....
BTW there is nothing "magical" about electronic qsl cards....most award organizations already accept them and the ARRL has announced already (in Mar 2001) they will also accept them in the later part of 2001..... doesn't that just irk you?

The mentality shown of those that oppose this welcomed change in qsl'ing is quite similar to the old fuddy duddys that bitched and moaned when their precious CW requirement got all but eliminated.....and that day is coming too!

Change is so hard for some people....

Buy unwanted CB set for $10. Modify for 10FM. Put up Silver Rod
(halfwave vertical, endfed at base, no radials required). Work half the
world on 4W. Add 40W Zetagi PA (illegal CB PA), and work the other half.
Do nearly as well /M from car with same equipment using retuned base
loaded CB.

It's surprising what will work when you don't know that it won't.
Ian.

I don't believe that ARRL is preparing to accept eQSLs as you envision them.
What I read indicates that if my log is in their database and the DX log is in
the database and there is a match, then I can get credit for the QSO.

This is much different that printing out a file received by email. (I'm really
looking forward to hanging printouts of these databases on my wall so I can show
my non-ham friends all of the exotic places I talk to.)

Ah Ha! Charles welcomes the change and anyone who disagrees is an old fuddy
duddy. What a well-reasoned and persuasive argument! Slap me on the pee pee
for not accepting this "welcomed" change.

Soon too I can forget CW. (That would be the mode that allows me to use simple
equipment to communicate with DX operators with whom I don't share a common
language.) But what the hell, if they don't speak English, have a computer and
an Internet connection, who wants to talk to them anyway.

Wes,
If you had spent anytime at the eQSL site you would see they are working hand-in-glove with the ARRL's recently approved electronic qsl verification program they have titled "Log Book of the World".

So let me speak for myself as to what " I envision " ...

I agree with your synopsis of the concurring logbooks would then result in an ARRL confirmed qso credit for awards....then at the same time a printable qsl card is transmitted into your online logbook with eQSL....it is more electronic verification not less..and now you are agreeable to it....WOW!

Looks to me as though since I posted that snippet from ARRL you have shifted your opinion .... time to get in line is it Wes? Happy eQSL'ing !!!

Here are the rules you must accept in any service industry:

Never make excuses. The truth is the only answer that is ever acceptable.

The customer may not always be right, but you must treat him as if he is.

Respect and courtesy for your customers, workers, and suppliers are
absolutely essential.

Never over-promise. If it's going to take a year, say so.

Never under-estimate. If it's going to take a grand to fix it, say so.

If you're so busy that you can't attend to the details of customer service,
then you can't afford not to hire somebody who will take on that task.

If you point your finger at a customer and say 'He's the problem!' then
note that while one finger's pointing at him, the rest are pointing back
at you.

An argument occurs at the intersection of two jerks. You can avoid
the argument by behaving in a non-jerk-like manner.

Deliver the unit as promised. If you can't get to it in the quoted time,
contact the customer and explain. If he asks for it back, return it
without hesitation, with an apology, and postage paid. It's worth it
for good customer relations.

Your standard of service must be the same for all customers.
Do EVERY job to the highest standards and EVERY customer
will be pleased and will deal with you again.

Last but not least, NEVER jump customer's equipment in line.
They come in first, they get serviced first. No customer's equipment
should ever be set aside to do an expedited repair on another unit
for a more important customer. No customer is any more or less
important than any other because they're all paying you.

wrote:

|Wes,
| If you had spent anytime at the eQSL site you would see they are working
|hand-in-glove with the ARRL's recently approved electronic qsl verification
|program they have titled "Log Book of the World".

I spent about five minutes there. Just for the hell of it I tried to view the
first "card" on my list, 4U1VIC. I opened it and saw a nice picture of some
tall buildings and a lake. Sure enough it confirmed our QSO. Then I tried to
enter the brave new world and print this thing. All I got was "DATA MISSING.
This document resulted from a POST operation......."

So I saved the jpg and printed it. Wow a 1" x 1 3/4" QSL.

|
| So let me speak for myself as to what " I envision " ...
|
| I agree with your synopsis of the concurring logbooks would then result in
|an ARRL confirmed qso credit for awards....then at the same time a printable
|qsl card is transmitted into your online logbook with eQSL....it is more
|electronic verification not less..and now you are agreeable to it....WOW!
|
| Looks to me as though since I posted that snippet from ARRL you have
|shifted your opinion .... time to get in line is it Wes? Happy eQSL'ing
|!!!

Clearly, using tongue-in-cheek and satire go right over your head. Let me
rephrase. I DO NOT agree with your position and I think your assertion that
anyone who disagrees with you is an old fuddy duddy is ridiculous.

>generate a fake ab7sl eqsl.

Actually it's probably easier to create a fake AB7SL paper QSL, and unless
the ARRL has a certified copy of his signature on file I could sign his name
to it and probably never get caught. The chances of a fake QSL succeeding
would however decline considerably with very rare countries where there are
few valid stations and it might be practical to file all valid signatures.

That said, the DXCC rules as they stand do not allow for eQSLs. They're
really quite clear on that. They've also made it clear they intend to allow
some kind of electronic QSLing in the future, but we're not there yet.

Kinda. Look at propagation like a pool shot. You're banking a signal off the F layer. Signal isn't going to bounce "nearly anywhere" It's going to depend on the angle of incidnce, how high the layer is efffective at that moment, and even how "smooth" the layer is. It's like a pool shot on a old, raggedy, worn out table that's not quite level. The rails are worn and highly variable -- get a hell of a good bounce in one spot, but a quarter of an inch either way, it's soft and doesn't give a good bank.

It's an analogy, I know, and all reasoning by analogy breaks down eventually, but it is a good tool to visualize why sometimes ya hear 'em and sometimes ya don't.

Help ! I'm looking for a logging program and there are so many
available that I just don't have time to try each one. I hope I can
get some opinions here and take it from there.

I'm mainly interesting in maintaining electronic record of my QSO's
and tracking for awards. At the moment I'm not active in contesting
but it's a possibility someday. It would be nice to read the settings
from my rig.

I don't plan to have acces to the web from the PC I'll run it on.

Does that narrow it down at all ?

Thanks, 73 Don KB3DMA

OZ6OM - OZ50MHz DX Bulletin editor, QRV in Nordic Activity Contest 50 MHz section Tuesday August 28 th. 17:00 - 21:00 UT.

I will be QRV round 50.173 MHz ± QRM, from JO55CE which is on the South/West side of the Island of Fyn.

Here I'm situated at one of our highest points at 128 Asl. with a formidable takeoff 360 deg. round the clock.

The rig used is an Icom IC-706 with 100 watt wich gives my 2*5 element Yagi's more than 1 Kw. erp. This should be sufficient to reach stations within a range of, at least 600 Km even on flat ConDX.

If You want to file a log showing Your efforts in the NAC there is an open class section. Point 1 point/km, bonus 500 point each WWL.

Log goes to Verner Topsoe, Lundumskovvej 13, DK-8700 Horsens, Denmark.

Hope to see You down the log vy 73 de OZ6OM "Matt"

MMTTY only supports RTTY, not AMTOR and Pactor. There are apparently no Windows sound card programs that will support AMTOR and Pactor (other than FEC and/or listen-only ARQ). This is because the timing requirements for TX/RX switching in ARQ cannot be met within Windows. You still need a TNC for ARQ modes (unless you can find DOS sound-card software capable of supporting ARQ).

Logger works with Zakanaka for PSK, Zakanaka works with MMTTY for RTTY. All this works with rig control, for a rig capable of that, for automatic frequency entry into Logger and Zakanaka.

Logger does DXCC for mixed, phone, cw, and digital modes (separately). It also does IOTA, county, and zone tracking.

Logger cures colds twice as fast as the next leading logging program. This program is so good, it is priceless.

True enough. After having tried logger, I would not want to work with
another logbook program.

I just wish the author would be a little more appreciative when it comes to
having it ported for Unix/Linux. Right now I have to work with an emulator
just for this program, since I don't use Windows anymore.

Good grief. Another guy that can't catch on to satire and tongue-in-cheek
comments.

The QSL inspectors *CAN NOT TELL THE DIFFERENCE* and that is the point!

All we need is one guy on the planet to work P5AA and get an email QSL and he
can pass it along to everybody with Paintshop and a color printer and poof, P5
isn't the most wanted anymore.

The most wanted will be some guy in a "terrible T" country in Africa who only
works CW with a hand key and doesn't have a computer or real-time satellite
uplinking. It won't be good enough to drop in your call and then go to packet
to figure out who you "worked" and then go to the online log to make sure you're
there. You will actually have to mail a QSL and wait a year or two to get back
a beautiful hand-painted QSL.

Horrible thought isn't it. You'll have to know CW and there is no instant gratification. What the hell is ham radio coming to anyway.

Regards (I think)

|
|For once, I was not being sarcastic, Zoran! I really do believe the
|USA's record is better than ours when it comes to personal freedom and
|freedom of speech.
|
|Of course, the way to enjoy preferential treatment and special
|privileges in our country is to be an illegal immigrant!
|
|And to enjoy exemption from the laws of the land, be a policeman.

You think it's any different here?

By the way, in the USA, it's not "illegal immigrant" or "illegal alien" anymore. They are now "undocumented migrant workers."

It was 42 deg C in Tucson today and even hotter near the Mexican border. I'll bet that several dozens of these "migrants" tried to cross the desert on foot today. Some didn't make it.

The bleeding hearts are putting out water stations for them, trying to keep them from dying of thirst and our Federal Border Patrol is promising not to stake out these sites trying to apprehend the crooks. Is this nuts or what?

What is even more nuts is this: If I chained up my dog (if I had a dog) out in the sun without shade or water, I would be cited by law enforcement and hauled before the bench. (I am not making this up)

However, a Mexican illegal alien... sorry... migrant worker, can drag her infant children through the desert without food or water, putting them at grave risk of a horrible death (it's happened) and when she is apprehended, she gets nothing but kind words.

It must be a great country, they're dying to get in.

Yes, where did I say anything different?

> All we need is one guy on the planet to work P5AA and get an email QSL and he
> can pass it along to everybody with Paintshop and a color printer and poof, P5
> isn't the most wanted anymore.

No different than one guy on the planet that works P5AA and get a
regular QSL through the mail, scan it and pass it along to everybody

with Paintshop and a color printer and poof, without a eQSL in the
picture at all, P5 isn't the most wanted anymore, except for those
that actually haven't worked a P5 before. eQSL don't change anything.

> The most wanted will be some guy in a "terrible T" country in Africa who only
> works CW with a hand key and doesn't have a computer or real-time satellite

I would suggest you at least look at XMLOG available at
http://www.xmlog.com
I've been using it for several years now and am very satisfied
with it as a general logging program. Does all the rig control
and DXCC/WAS etc tracking as well as IOTA.

And it's free.. doesn't get better than that.

Message-ID: <20010829064857.21549.00004057@mb-mk.aol.com>
Source record: 16176

It helps to get on 80 and 160 meters everynight and "get used to the band".
Once you get a feel for the band you will be able to quickly know if tonight is
better than usual. Though at 6 PM it can sound terrible and then by
midnight(local) it has opened up. You start to hear the same groups and or nets
each night and who you couldnt even hear last night in WY is very loud tonight.
And of course your local weather makes a big difference even in winter.
A receiving antenna such as a loop is very helpful on 160 meters. From
Washington DC, I would imagine you could work some pretty good DX, much better
than say Colorado. Even with a 1/4 inverted L and 100 watts.
There are 2 very good 160m contest, once in Jan (CW) and one in Feb (ssb),
you might be able to work all states in those weekends. From DC Alaksa and
Hawaii could be very tough though.
Best thing to do is to get on the band and check it out each night and get
used to the band so you can know how it is tonight.

This has got to be the best dam radio WAREZ SITE on the NET. For direct FTP downloads and links. Go to the URL below. I was surprised @ how easy it was to download these files. There are no advertising banners or other profit making gimmicks. No silly re directs and misleading info. One thing though when you visit the site be sure to sign the guest book. And also vote for the SITE by clicking the ADD FREE STATS ICON @ the bottom of the page. By voting on the site, you are supporting it. No votes = SITE removal. As a lot of hard work goes into this SITE. Any files or Serials ETC not available from the SITE please submit to the email address on the page. Have fun and enjoy the DIGITAL RADIO MODES. It's about time that these software developers realise that when they charge ridiculous prices for software. They are going to force PIRACY on there selves and products. Reasonably priced software can be obtained but programmes are few and far between. If you like these products purchase them.

When Christ gets back, that won't seem so big.

The image of God extends from infinity to infinity. And when Jesus told us the kingdom of heaven is within you, He really was not joking. But, as usual, we tend not to look at the obvious. Consider the seven days of creation. A lot of speculation on what a day really means. Here is part of the fractal. Lets go this way, kinda bas ackwards from how I put it together in my head. The way I understand it, the flood happened about 150 years before the Tower of Babel. Now if we take the ages 20-25 years old as being an ideal age for childbearing, then 6-7 generations would have been born when God confounded the language and speech of the people. If we then take one generation and have it equal one day, we are to day 6-7 of the major generation in progress. After day 6 and into day 7 the people underwent a change that made them all think and talk in different ways. They could no longer understand any but a few others. These congregated together and formed and became the different races we have today.

Now, please consider the growth of a baby in the womb.

Complete without being completed - In the beginning God - zero-dimensional

One cell - Day one - Light separated from darkness - one-dimensional

Two cells - Day two - Firmament separates waters from waters - two-dimensional

Four cells - Day three - Land appears, Man formed from dust, plants - three-dimensional

Eight cells - Day four - Sun, Moon, and stars - four-dimensional

Sixteen cells - Day five - Fish and fowl - five-dimensional

Thirty-two cells - Day six - Land animals, Man now Adam and Eve - six-dimensional

The fertilized egg divides rapidly into two cells, then four, then eight, and so on.

These early cells, when the fertilized egg (morula) is fewer than 32 cells, have the ability to form any part of the human body and are known as "totipotential" cells. (Stem cells)

This last is from page 47 of "Pregnancy and Birth" by Dr. Karina Reynolds, Dr. Christoph Lees, and Grainne McCartan.

Does any one see any connection here besides me? Don't the cells become specialized at this point?

Is not that what happened at Babel?

We are the body, the Spirit. God is alive and growing. And the pattern is wherever we look. And another thing to consider. The egg implants on the sixth day, and because it has exhausted it's energy, can't survive longer on it's own. It must implant to the mother or die.

So, tell me, where DOES Life begin? And where are we in Life? Where is God?

And SHOULD we be doing stem cell research? How about abortions? Genetics?

All things are lawful unto me, but all things are not expedient. Who said that?!

Let Life live. Let death die. LET there be Light, One once said. And it was so.

Be seeing you

#13 Duane M. (I can beat #3 Dale E.;-)

Very true,

Got HS1NGR this evening with (yes I know its a bit higher than normal) 100W into my usual ant. You definately do not need 1kW. Hello also to K0TT (10W contact).

I haven't got lots of time, or good antennas and I can't really say I'm a skilful operator either (only been on since 4th July but I am an experienced SWL). Successful contact is dependant on propogation and how good the station is at the other end.

If you want to chuck out 1kW into a gigantic heap of metal that's fine but it *is* possible to make contacts with small aerials and low power.

John R Wells (M5AML and BDXC-UK1419)

PS Walt: Heard you at the weekend talking to the S&C Railway (I think) GB station on 40m!

Hi All,

I'm looking for a simple logging program that will keep track of my DXCC progress, and tell me if I need a country when I input its prefix. Right now, I have to dig out the ARRL printout and scroll down 10 feet of paper to see if I have a particular country worked or not---It's a pain. Does a program like this exist ??? I've heard of a shareware program called logger. Is this what I'm looking for, and if it is, where can I find it ???

Thanks
****

2231. Kam HostMaster problem`

Newsgroup: rec.radio.amateur.dx
Date: 2001-08-29 23:38:27 UTC
From: Henry Knoll <knoll003@tc.umn.edu>
Message-ID: <3B8D7CF3.4DAA@tc.umn.edu>
Source record: 16185

I have been running the DOS version of Hostmaster on a 486/33 computer under Win95 with my Kam TNC. All was well.

Just picked up a Pentium/200 computer and it won't run under Win98. If I go to a real DOS prompt, it runs just fine, so the software is OK. There must be something about the speed or Win98 that HostMaster doesn't like.

Anyone have any suggestions (other than get a new program ;-( )?

Thanks and 73,

Henry WA0GOZ

Henry,

Yes it will. Pacterm '98 is a host mode program for the Kantronics TNCs, so you can run MultiStream Packet in up to 26 separate windows and the HF modes in a separate window at the same time. With the click of the mouse, you can change from mode to mode.

FYI, Pacterm '98 is a 32 bit Windows program that will work with the KAM, KAM+ and KAM XL with firmware 7.0 or above.

Woohoo, just got home after 5 days of staying with the YL (to KH2D: yes, again!), and what do I see? A nice animated discussion about... eQSL. I've put on helmet and knee-pads to jump in, so here we go...

eQSL is about the most useless service the internet provides (very close competition with spam-mail and X-rated pop-up windows)!
I once, just out of pure curiosity (and I know that it killed the cat), printed an eQSL...
Let me tell you: I'm new to HF (back then I had been licensed for 3 months), so I need everything I can get...

OK, there it came out of the high resolution laserprinter, a nice beautiful very interesting... pristine white A4 paper with some black blurrs on it...
A genuine eQSL!
Man, I looked at it, it did not give me the thrill of finding buro QSL's in my box at the club... I smelled of toner, it was smooth, it had no history...
So I took a stroll to the nearest paper shredder at the office and there you go! eQSL this!

I don't need a card for DXCC, nor for any award, I need it because it's part of the hobby, just like mandatory CW tests **yeah right, this "old fuddy duddy" (sic AB7SL) was proud to pass the last test at 13WPM before they dropped speed**.

Well all you eQSL protagonist, start giving arguments NOW!
Surely it's faster... Cheaper in some cases... But the magic has gone... it's like eToilet Paper...
It's the future, right? Next year, no more newspaper at the breakfast table: just your laptop with the eWall eStreet eJournal...
Hardcore DX'ers that say that after 20 years in the game, they throw away 1 shoebox full every month: let the newbees like me (and a lot of others) send and collect cards and fill boxes too for the next 20 years!

Send me a card, send me nothing, tell me you don't need another ON on 20m CW... but pse no eQSL tnx!

If in all of your lifetime, you ever actually buy (yes: I do mean "pay for")
one single piece of software, let it be:

DX4WIN

Free 100% working demo (except saving files to disk) to be found at:
http://www.dx4win.com

You won't regret it...

It just does everything you W.A.N.T. it to do, and the free users
emailreflector works flawlessly!
And it never crashes when running under Win98SE...

My opinion de ON5ZO

That was good for a chuckle or two Frankie....however the truth is eQSL is growing both in magnitude and acceptance almost daily. I have yet to print out any eQSL cards. I registered with them as a service to the DX stations that want a card and may not have the wherewithal to provide me with a " hand-painted / perfumed " card.

eQSL is catching on like wildfire....

Hi there Peter

I really mean this: my Win98SE (in auto-update mode) is really stable: no famous blue screen crashes anymore... Win95 "back in the days" was a whole other story...

What's a good logging program for Unix/Linux? One with all the feutures of the Windows loggers? And equivalents for contest loggers running good 'ol MS-DOS?

Please note: this is a REAL question, not an ironical rethorical one!

73 de ON5ZO

Ron

See also the posting with the title: "Married White Male Ham Seeks Logging Program" started Mon 27 Aug 2001...

My answer was:

If in all of your lifetime, you ever actually buy (yes: I do mean "pay for") one single piece of software, let it be:

DX4WIN

Free 100% working demo (except saving files to disk) to be found at: http://www.dx4win.com

You won't regret it...

Tracks DXCC, WAZ, WAS a.s.o. and also supports custom award files...
Lots of additional resources available, and great "users helping users" email reflector...

Keep in mind: you'll have to digitize (i.e. typing) your paper-logs into DX4WIN (or any other PC-logger for that matter); this can be a painfull job too!

Only my opinion de ON5ZO - Franki

You are right. So far there is no decent logging program for a standalone Linux/Unix system. Currently I am using Logger by emulating a Windows environment with 'Wine', which, alas, is not really a perfect solution.

I have contacted the author and proposed having the program ported to Linux, but he refused to discuss this issue any further by simply stating that a Linux-port is currently of no interest to him.

Linux plays an important role in ham radio, but it seems that the number of Linux-enthusiasts and DXers are virtually incompatible. Plus the fact that practically none of the Windows programs comes under the GPL and with the source code, which makes porting a program nearly impossible.

Logger does just that. By inputting the callsign into logger field you can
have the program check, whether you worked a particular station country and
even differentiate new ones by mode and band.

For a freebie you won't do any better than logger and I doubt that
commercial programs can do any better than logger as a whole.

First, my CW (copy speed, not sending) has eroded and it bugs me when I'm helping someone else learn CW:(My own interest in CW is on the upswing again, though:) I know many are thinking, "Well, start some QSO's & get back into it" but I'm kinda thinking about more than just myself.
I and others I've been helping could've worked the "Slow FISTS" nets, working other hams at their own speed and spinning off from there, but, the slow fist nets appear defunct (maybe I just can't hear them from the Carribean or maybe they've "graduated";). So what's a guy to do?
I know some fellow hams don't like nets or want to do away with code requirements. But, "to each his own" because those aren't the issues here.
Are there any known Slow speed CW nets where folks can get regular, practical CW experience (I don't want to repaint the wheel:) or should I just sit on a freq calling for hours every night 'til the slow fists come out of the shadows to feed?

I haven't used DX4WIN, but LogWindows seems to have most of the same
features (except a CW keyboard) and is $20.00 less expensive.

Check it out at: http://www.logwindows.com/Default.htm

There are probably some differences in features, so check it carefully
to match your needs. A demo version is available.

I've been a user for about five years and am very satisfied with it.

Hello Charles

Sorry, but a printer generated QSL excites me as much as a bad
case of crabs.

If I go through the bother and time of working a dx station, then I
want the card direct from the manager, not something spit out
on my local printer. Next you will be able to print out your own
DXCC and Honor Roll certificates on your printer after your
e-qsls are verified at HQ. No thanks, I'll pass.

I would have to also cast my vote for DW4WIN, with the understanding that it is much more than a "logging program". There are so many whistles and bells in many programs today that you will need to decide what is important to you before making your ultimate selection.

Key DX4WIN differentiators for me:

- DX packet spot interface with automatic priority classification as new country, new band, new mode

- Interfaces for: Rotor direction, CW sending, PSK31, and RTTY (when used with MMTTY)

- Lightweight contest features(serial number counting, duplicate QSO, etc)

- Keyboard macros to make sending CW, PSK31 and RTTY easy: automatically inserts my call, his/her call, his name, RST report, carriage returns, contest serial numbers, brag sheets, other stuff...

- Automatic call spotting upon QSO entry to include: compass azimuth from my QTH, distance in miles, world map drawing of short and long path, DXCC and WAS charts (do I need this QSO? on this band? in this mode?)

- Previous QSO window: have I worked this guy before? date, time, band, mode, QSL info)

- QSL sending/receiving tracking with fancy label printing capability

- A great user group that is very active and supportive.

Finally, DX4WIN is very expensive, so it keeps out the kind of people who are too cheap to pay programmers for their effort. ;-)

Hello Pete,
Tell me...realistically what difference does it make if an authenticated qsl card is printed on your printer, on the DX's printer, or at some print shop in Zamboanga, Philippines or Los Angeles, California?

You still get a valid printed card ..... some habits die so hard....

Hello Pete,
If you receive an eQSL from the DX station what in the world is the difference? You would still be getting the "real thing". You know many DX stations have sponsored qsl cards meaning that stateside Hams volunteer to foot the qsl card bill 100%. So it is very possible (especially with African DX stations) that the " real card" you get from Zaire was printed in Detroit , Mich .... but since you don't know that you are pleased to receive your "genuine African qsl card"

Anyway Pete..have a great Labor Day weekend ...

All the features you mentioned are being offered by Logger. Now, the fact that Logger is *free* (as in 'free' beer) makes it a cheap program and automatically implies that all its users are obviously too cheap to support the programmer, right.

Even if your comment was uttered with tongue in cheek, it still leaves a bad taste in my mouth for its implications.

In today's world of free software, a programmer who contributes to an interesting project for no $$$ at all in most cases is a widely respected and very well paid guy in his regular job.

Maybe people don't pay the programmer in $$, but they sure spread the word about his efforts, contribute by distributing the software, paying for downloads, contribute in supporting the users and generally are helpful in making a good product better than it already is.

Would you consider Linux, BSD, Solaris, Hurd, Apache, Sendmail and <put your favorite free software here>-users cheap, because they decided to use software for free?

I use dx4win for all the qsl managing that I do....and while I don't use all the bells and whistles, I now have a log with well over 200K q's in it, and it finds the calls quickly and prints the labels EXACTLY as I need them.

I handle......well......I guess I"ve answered about 50,000 QSOs in the last 8 months or so.....makes me wonder how I ever started in QSL managing when I just had paper logs.

I think there are many logging programs that will serve basic needs....DX4WIN has made a LARGE task quite manageable for me. And what's most important for me, is that when I have a question, or a request (for example, I needed FM mode to deal with FM QSO's made from Pratas Island)....I called Steve/Paul, and it was in the next version. Try that with most of the software vendors you use nowadays.

Great software.....but most importantly, SUPER hams backing it up.

Glenn

It has nothing to do with the "quality" of my printer.

Maybe we should require all logs to be filed electronically
with DXCC, and do away with all of the paperwork--
including the issuing of awards... If you want your "award",
just go to the appropriate website, get verified and print
it out. Gee, just think, the guy with the BEST printer
gets the best looking card and award!

Enjoy!! Not my cup of tea...

I also used to enjoy CW but over the years have let it go downhill. To get back into practice again I like to go to the novice bands, especially 40 meters in the evening and just call CQ and have several nice contacts. Or answer a few CQs. That should get the speed up again.
Actually between code tapes and many nighly QSOs on 40 meters is how I got up past 25 wpm years ago.

But there's the rub. You DON'T get a valid card. You get a wallhanger which is totally useless for DXCC award purposes.

And why do you lie on your web site, clearly making the statement that such eQSL's are acceptable for award purposes,
when the FAQ you point to just one line below clearly admits that this is not the case. One wonders what your REAL
agenda is?

Drink ...

I felt my speed going too ... but I was off the air for about 5 years! :-)
But to get it back, I've put a little portable HF rig in my car. Each day to
and from work, I'm tuning in to cw and just sitting back copying in my head.
If I run into somebody cool, I'll pull over and try to hit them up for a qsl
card, but that has only happened twice in the last 6 months. I'm amazed at
my "cw reading" speed coming back. And the having to listen instead of write
it down is what is really helping me ... I'm starting to hear the "words"
again instead of the individual letters.

I'm convinced that the key to cw is not sending, but reading it. If you
practice that side, the sending side is automatic. You're talking with a
guy who has his 30 wpm certificate.

You can get some fairly cheap hf rigs for a car. Also it make s the time go
by faster during the drive.

The station worked sends the info to eQSL, it matches his log and NOBODY can tell if the QSL was printed on Kiribati or Coney Island.

Pretty funny how the stick up the wazoo crowd feels everyone has to do it their way (like cw) or it's wrong, bad or is the end of ham radio.

A eQSL is a valid QSL. You worked the station, the station sent verification and you received it. It may not satisfy rules for some silly certificate or award but it is a valid QSL. You worked the station, the other operator sent you the verification. Valid.

What's bogus and not valid are most of the awards including DXCC. They don't verify or require a signature, they aren't checking log books or postmarks so they can't verify the validity of the QSL's. A crap shoot at best with most of the reliance on the Ham being honest.

(Replying to the thread, not any specific post)
I love you guys. You kill me sometimes. I can see both sides of this.
I'd like a card from the worked station. It's a courtesy to me. A nice
touch ("touch", just think of how it would be to have a "long distance
relationship" with the XYL. Not the same thing:) But, if the other guy
says, "I just can't do it 'cause we don't have a bureau and it's just too
expensive and problematic" well, I'd settle for some other less personal
method:(
And, why shouldn't they accept another method for award purposes? It's
basically US recognizing US for OUR accomplishments. I think we should
continue with QSL cards as a Ham tradition/custom/etitquette/culture but be
progressive enough to take advantage of evolving technology at some level as
we should.
Think of it, a database system using something like Oracle and software
plug-ins that the user could Zap his Callsign and a manageable list of QSO'd
callsigns to a bureau/manager in his area. It could be a boon. But,
relax, it simply won't replace the QSL card. Because if you've been to many
third world countries, as I have, you really understand that many in the
world use windows for thermostats and radios for telephones and don't have
the money to pay an ISP, cable or cell phones:)
I love you guys...
Drink, WP3JQ

Thanks for advice. I emailed a gent re: the code buddies program. I
think I'm gonna have to work on my antenna installations to make 'em better
and get involved again. I was also trying to take the pulse of fellow
slow-ears like myself & possibly generate some interest as well.
On a seperate note, I saw that at midnight last night Straight Key Week
started. I might put away the paddle and try some straight key action. I
heard two gents doin' straight key morse and it was very intriguing, very
personal; like voices or Jimi Hendrix guitar playing style:)
73's and you might have slow down a bit for me on 40m's
Tks,

Many DXpeditions rely on donations--which usually
accompany the QSL request-- to help defray the cost
of the operation. I always add some greenstamps, even
for domestic managers of expeditions. I doubt many
will deny themselves that revenue source. Hey, give me
an e-QSL, and I will fax you a facsimile dollar bill image.
Fair is fair!!

Pete

We finally did think of it. Called Logbook Of The World.... Think
about it like this:

You pay the ARRL a yearly fee for the privledge of 'participating' and
uploading your logs. Then they electronically generate your 'awards'
based on cross checks to other logs and bang your credit card and
send them to you..... Computers, internet time, online storage
for large databases are just like stamps and envelopes. They cost
MONEY so somebody is gonna have to PAY for them.

As was mentioned, the DXpedition pro's are not going to play - they
generate too much $$$$ by answering requests for real QSL cards.
And they damn sure don't want to start paying for their own vacations.
So don't hold your breath for any electronic Pee Five clicks.....

The dilema we are faced with is cost. Any active DX'er or DX station
can easily spend more money over a period of time on QSLing than
they do on equipment. eQSL, it seems to me, is primarily embraced by
those who do not want to spend money sending/receiving QSL cards
(and are not paying much attention to how much lazer printer
cartridges are....)

The ARRL has already said they will not accept computer generated
cards from the eQSL website as downloaded from same. BUT.... as
is the case with VK0MM, who used three different calls and for
whatever reason decided to use only eQSL for one of them .... the
ARRL has said that if you A) Print the VK0 QSL from the website,
B) mail it to VK0MM and have him sign/stamp/whatever it and C) mail
it back to you that they will then accept it for a click. Wow, that's
cost effective, huh ?

The problem, as I see it, is not that we need eQSL's. In my opinion,
we need NO QSL's. Once upon a time, when there was still some
magic let in radio communciations, it was a magical accomplishment
to contact and collect proof of contacts with far away places. An
off the shelf HF radio and a chunk of wire today easily defeat the
magic theory.......

I was in Guam for sixteen years. Nobody really wanted to talk to me
on the radio, the majority of contacts I logged were because the other

guy wanted a QSL card. Since I felt some strange 'obligation' to deliver the postcards, I always made the effort and met the expenses of providing a means for the other guy to get the card HE wanted. I don't participate in awards programs, and I don't collect cards so my participation in the QSL process was strictly for the benefit of those who did. Any cards I received wound up decorating the landscape at the local landfill.......

And many times I wondered - does this guy REALLY want a QSL from our memorable 2.8 second 'QSO' where I said N4BHJ 599 TU QRZ or is he only spending his time and his money sending for my card because the ARRL requires him to have QSL cards for an award he wants ?

I know some guys really treasure cards. But I think the majority of them want them only for awards, then they go in a box in the attic or the basement and are quickly forgotten.

We need to go to the honor system - NO QSL's required for ANY award, based on the fact that there is NO HONOR in the system we are using now....... For example:

One of the K5K was pretty embarrased when somebody put the wrong logs online and somebody else figured out that the guy had worked himself on six bands while he was DXpeditioning....

The system for 'checking' cards is basically flawed in the fact that the ARRL SELECTIVELY checks cards. If you send them a Pee Five card (which is worth ONE click) they are gonna need verified paperwork that the guy you worked was REALLY in Pee Five, had government permission to operate, bla bla bla....

But if you send them a JA card, or a KH2 card, or a W6 card, (all of which are worth ONE click) you can rest assured you will get your click with no checks, hassle, or verification involved.......

Groups of people have already been caught 'cheating' on DXCC credits with phony paper cards..........

If you are going to require validation checks for ONE QSL card in the DXCC system, you need to require validation checks for EVERY click that anybody gets, and that's never gonna happen. If ONE bad card gets thru, be it W6, JA, KH2, or whatever, it invalidates the entire system.

So I think we need to realize that A) our hobby is communications, not running back and forth to the post office, and B) we are wasting enourmous amounts of money, spent for QSL cards that people don't REALLY want, just so we can participate in a flawed system by which we childishly compare our 'accomplishments'.

Everybody seems to be tired of the rising cost of paper QSL's. But is the new true blue electronic system gonna be cheaper ? If you think so, you've probably been sitting too close to the amplifier for

too long.

I registed at eQSL the other nite, and looked at a dozen or so of the 200 'cards' that were waiting for me. Ten of them had the same picture, one of the 'stock' photos, I guess, of a row of satellite dishes.

Maybe we can get the ARRL to generate a NEW DXCC catagory.
100 countries with identical cards.....

I did keep one QSL card I received, it was a 40 meter CW QSO, my first one on the ham bands, with a lady I will never forget. That card still seems 'special' to me, but the thousands after that just didn't catch the magic........

Is somebody doing you a favor with Logbook of the World, or are they just creating a new way to justify their existance and keep you on a new hi tech leash ?

And is 5A1A gonna play or are you still gonna have to spend 10 bucks to get his card via registered mail ?

73, Jim KH2D

Hello Jim,
That's one of the most thoughtful posts I have read so far on this whole qsl topic.....I may have to form a new opinion about you..no wait..the feeling passed..never mind!

BTW I do the eQSL thing for " the other guy " and not for me.....I don't collect cards any longer either but I think eQSL is a good way to get a free qsl card to a guy that wants one....

Tell the truth Jim, you didn't write that. Right? Too well thought out
and quite good. Wow. Is that really you Jim?

I don't collect QSLs, they just go in a box. I don't collect awards
and the only paper on my wall are from ARRL contests that I placed in
and received a certificate. I know what I have worked and don't care
to collect awards to verify what I already know.

To each his own, ehh?

Nice piece Jim. Really!

Glenn

> qsl card to a guy that wants one....

I say we free up even more resources (and spectrum is a resource) and switch to eQSO's as well. We form Internet sub-bands corresponding to the existing 160m - 10m assignments, set up dxing by incorporating the latest and greatest propagation forecasts and pseudo-random sequencing, configure our virtual antenna systems by the amount of money spent on the latest Pentium MCXXXIV system and go for it. In 10-20 years most of the world is going to be on the fiber optics anyway, so our virtual hamming will not impede the porn download at all.
Then we set up the eDXCC, punish the eDX-PED cheaters by sending them a trojan or a worm, and we even establish the eWWDX contest to see who's got the badest virtual antenna system and was thus able to work the most multipliers and most eQSO's.

eQSO-ing is the way of the future. The only license required for that will be the 5 FSPM (finger strokes per minute) test and a technical test consisting of the ability to find a reset button after consuming ten beers.

Right. How many in the 320+ confirmed DXCC group have gotten there by running 100W into a G5RV? When was the last time anyone with less than a kW and a monobander won any WW contest? How many minutes would take the (true Scotsman fallacy argument, by the way) *really* skillful operator with 10W and a wire to break the P5 pile-up?

Political correctness aside, that is exactly what they are. You may not believe it, but overwhelming majority of (il)legal immigrants come to the US not to mooch off welfare, but to do hard work. The work that most Americans wouldn't touch with a ten foot pole, im most cases. Go to Yakima, WA and ask the farmers what they think of Pat Robertson's great wall of China?

> It was 42 deg C in Tucson today and even hotter near the Mexican border. I'll

What exactly is nuts? That someone is trying to prevent death from dehydration or that the Police are turning a blind eye as a result of implicit pleadings from businesses from Texas to Washington *not* to deprive this country of cheap labor? Try to imagine the state of our economy *without* the illegal immigration. What do you think you would be paying for your glass of OJ in the morning had it not been for $4/hr laborers?

> What is even more nuts is this: If I chained up my dog (if I had a dog) out in
> the sun without shade or water, I would be cited by law enforcement and hauled

What is nuts in this case now? That you cannot exercise cruelty to animals without punishment?

> However, a Mexican illegal alien... sorry... migrant worker, can drag her infant
> children through the desert without food or water, putting them at grave risk of

> but kind words.

What is she supposed to get? Imprisonment? First of all, she does not get "kind words" - this is obviously nonsense that's not even worth commenting on. She gets deported, along with her child(ren) since she is a citizen of another country. That is all.

> It must be a great country, they're dying to get in.

Obviously. Now, what makes a Cuban illegal immigrant so special that he/she gets preferential red-carpet treatment, automatic asylum and a celebrity status when endangering a child? Why this double standard?

I reached 250+ with 100 watts or less, and am now in the low-300s with an
amplifier incapable of more than 500 watts.

IMHO the real key is to be retired (or unemployed) so that you can operate
during the day...

Not even 10 dB beats perserverance, skill and cunning. The spotting networks
REALLY take the work out of it.

I'm not so sure about that.

Once a DX station gets spotted, he's immediately inundated by all the "DXers" who have no skill - who believe in continuously calling until the DX comes back to them. No matter how skilled you are, you're likely to find it nearly impossible to hear the DX for the lids.

The cunning comes in finding the DX before it gets spotted, when you still stand a chance of hearing it.

(a bit of good luck helps, like happening to call CQ on the frequency T5/KF6BL is listening to<g>...)

That seems to be it. Several years ago there was an article in QST entitled "The Importance of Being There", about the DXCC Top Dog, #1 on the list. I believe he had every country availabie since WW2. Turns out he was an ordinary OT ham in the Western Massachussets Berkshires, IIRC with a very modest station, a Kenwood TS 530 or 830, and a simple tribander on the roof of his two story New England style home. I think his kids eventually bought him an amplifier to use. I forget the details but he was always on the bands, and when a new one showed up, so he'd snag him. If you can search the QST CD database for that article title you can read it, was interesting reading.

That's a fair way short of 100% I would say.

Try VQLog (http://www.vqlog.com/). Nice and simple and quite
reasonably priced ($15 US). The demo version expires, from memory,
but is otherwise unlimited.

Yes but Logger has some little annoyances too.. like a single field
for comments without a separate field for name, QTH etc. Maybe this has
been fixed by now but a while ago the author said he had no intention
of changing it. I like the price but not the program.

Same with Ernst, DL1PM, who has never owned an amplifier and runs a very modest antenna setup. Since his retirement he is known as one of Germany's top DXers - and he still breaks every single pile up. So, make that "retirement plus good operating skills".

I agree and I do not understand the author at all. Instead of just giving it
away for free, he should place the software under the GPL, publish the
source code and those little annoyances would be a thing of the past.

The opinion of Steve Robeson K4YZ seems to be......

> Now that ARRL has thier own electronic QSL system in place or about to be
>launched, I can't help but wonder how much longer it will be until the art and
>tradition of QSLing will be lost.

Actually I think the "art of QSL'ing" can be enhanced by electronic
means.

First, electronic QSLing is a great deal more convenient, since most of
us already keep electronic logs, to simply click the "QSL = YES" control
on your screen than to fill out a paper card. The recipient still has
the option of turning that electronic QSL into a paper card for his
shoebox
if he wishes.

Second, electronic QSL's can be much more creative than cardboard ones,
both in the graphics, and the content. If I eMail you an "electronic
QSL" I could attach a .wav file of your received signal to let you hear
how good (or bad) your signal sounded at my end. Or I can attach a
photo of my new RV if you also have an interest in such, etc., etc.,
etc. In other words, I can customize *every* QSL to reflect what was
special about that contact. Talk about increasing the "personal
contact" of the QSL process!

Third, for those of us (probably 95% of hams) who already have access
to a computer and eMail, electronic QSLing would be much cheaper than
paper QSLing. Today even an "easy" award like 5BWAS can be a
significant
expense. With a typical 50% return rate, you can expect to need to send
500 cards to get that award. Presuming you include an SASE with each
card, the postage cost alone is over $300.00. For a more difficult
award like 5BDXCC (where you need to enclose IRC's or greenstamps)
the cost of QSLing can easily exceed $1,000.00.

In some cases, electronic QSLing may be the only way a person can
afford to send cards. In fact we've already seen a real-life example
of this situation. Last year an Australian fellow (don't recall his
home call sign) was dispatched to MacQuarie Island by his employer.
VK0M is *very* high on the most-wanted list by DXers, so he obtained
the call VK0MM and operated during his off-duty hours. Since he was
not a wealthy ham, nor part of a sponsored DXpedition, he simply
could not afford to send paper QSLs to the tens-of-thousands of
people who wanted to work him for a "new one". Electronic QSLing
is the perfect solution to this need.

Finally, I do not subscribe to your assertion that it will be *mandatory* for anyone to engage in electronic QSLing if they don't desire to. My guess is that ARRL (or others) will be very happy to provide paper-card output from LoTW (perhaps via the current bureau system) as a service to members who are not on the internet, probably at a cost less or equal to todays "exchange SASE's via snail-mail" convention.

With all kind wishes,

de Hans, K0HB

I have never run over 1000 watts input (DC). My first 200 were worked
with 120 watts or less and a dipole. I now have 351 overall. All but
about 10 before cluster assistance.

If I remember correctly, there was a time, possibly just before or around 1960, when contacts in certain contests counted for DXCC without QSL card submission. There were fewer entries then, and I believe that if you worked a big-time DX station whose log had been submitted, that was all that was needed to claim that country. Anyway, that sounds like a precedent.

Of course, that was when there was a SPECIAL listing, called DXCC squared, for the absolutely insane few who had worked 200 COUNTRIES. The guy on the top of the heap had a tribander and a telephone, and his homebound buddies would call him at work to let him know when a new one showed up. US-US QSLs cost three full cents to exchange (not counting the card itself).

I would guess that it's the vast majority. I know several people
on DXCC Honor Roll and none of them have run more than 1.5 kW.
In fact, some of them don't have the capability of running 1.5 kW.

Seems like Mr. WA7AA had two solutions as well: either put up stacked monobanders with some kW power, or operate on Prozac and Valium...
Man, I use 80W to 100W (even doubt if that comes out of my TRX after tuning), 10m of simple speaker-wire, homemade balun and the most important thing: CW (in SSB: forget it... with all those QRO'ers)...
In less than 6 months (newbee on the bands), I worked 130 entities so far, worked my antipodes (VK/ZL) and busted some severe pile-ups (e.g. 3B6RF on 4 bands). And then I think to myself: my 10US$ antenna achieved the same thing as that 1k$ tribander + 1kW...

My point being: you can spend thousands of Dollars (or Euros for that matter) on power and antennas, but the list of DXCC's stays the same. You can work 'm all with limited power and very simple antennas, and I think satisfaction is much greater. It's like the ham driving the scooter knows a shortcut to win the dragrace...

Another perspective:

I have dealt with Mr. Knowles and his companies for the last 16 years on a fairly regular basis. I have always found them to be responsive, competent, and responsible. Hopefully, whatever went wrong was the exception rather than the rule.

Just my opinion.....

John Strand W6IBL

George:

Heh, heh... and I have always wondered how aircraft radios work without a "good ground".

And... radio wouldn't work at all if all of the continents were not interconnected by the ITU's International Ground.

The US International Ground connection comes ashore just below Key Biscayne near South Miami. I noticed, when I lived in South Florida a few years ago, that all DX signals were louder than when I lived up North.

Says a lot for "good grounds".

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1VV, WF1N, AI2Q, K2MFY, KA2BZS, KF2TI, K3SX, N3SL, W3KT, W3UR & The Daily DX, K4NR, KW4DA, N4AA & QRZ DX, W5KFT, NI6T, K8YSE, 9A6AA, DF3CB, DJ2MX, DL1EK & DX News Letter, ER1BF, F6AJA & Les Nouvelles DX, FW5ZL, G3SXW, G4IUF, G0PSE, HA0HW, I4UFH, IK7JWX, JA1ELY, JA1EOD, JA3AAW, JA7KXD, JF2SKV, OH1EH, PA3BIZ, PA3GIO, PA5ET, PS7ZZ, UA9KM, VA3RJ, VK4FW and VU2WAP for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 26/August, through Sunday, 2/September there were 226 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4U1I, 4W, 4X, 5A, 5B, 5N, 5R, 5U, 5V, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, CE, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J6, J8, JA, JD/o, JT, JW, JX, JY, K, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, SU, SV, SV5, SV9, T2, T32, T7, T8, T9, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VP2V, VP5, VP6, VP8, VP9, VQ9, VR, VU, XE, XT, XX9, YB, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3DA, SWAZILAND. Siegfried/DL7DF and crew will target Swaziland for this year's DXpedition. Their licenses have already been issued and the callsigns will be 3DA0DF and 3DA0FR. The DXpedition will take place between September 30th and October 13th. Activity will be on all HF bands (plus 6m) on CW, SSB, RTTY and PSK31. Four operators will participate:

Frank/DL7UFR, DL7KL, DL4WK and DL7DF. Their equipment consists of three transceivers, two linears, beam antennas, a Titanex V80 low band vertical plus other vertical antennas. The team will be on the usual frequencies +/- QRM, always using split. QSL via DL7DF. An online log and updated information on the DXpedition will be available at: http://www.qsl.net/dl7df

8P, BARBADOS. Mario, K2ZD, is now active as 8P9JM through September 9th. His activity will be on 40-6 meters with wire antennas and 100 watts. However, since this is a business trip he will be active only in the evenings when time permits.

9A, CROATIA (Island Operations). Mario, DJ2MX, informs OPDX that he will be active as 9A/N0MX from Brac Island (EU-016, CI-10) on 80-10 meters CW/SSB between September 2-15th. He has plans to be active (only for a few hours) from some of the other Croatian islands (Hvar Island EU-016, CI-28; Vis Island EU-016 CI-142; Solta Island EU-016 CI-126 and Ciovo Island CI-13 NOT IOTA). QSL cards are OK only via his German callsign DJ2MX, through the DARC Bureau or direct to him: Mario Lovric, Am Oelberg 11, D-61231 Bad Nauheim, Germany. Bureau QSL request is also available on his Web page at: http://www.dj2mx.com
PLEASE NOTE: QSL cards for 9A9R/p (EU-136 in IOTA contest 2001), 9A/OE1EMS and 9A/OE8KDK will be printed in September and he will get them out in October. Please be patient. They will be full colored QSL cards.

9H, MALTA. A group of Dutch radio amateurs from the V.R.Z.A. (Dutch Amateur Radio Society) will once again be active from Malta Island. They will be active from September 14th through October 6th. Operations will be on 40-2 meters including the WARC bands. Malta has an IOTA number EU-023 and a Grid Locator number of JM75FV. They have obtained the very exclusive callsign 9H0VRZ to be used by the members of their group. For only the callsign 9H0VRZ, the QSL Manager is PA7DX: Anton Kerkhof, Blaublomke 2, 8401 MG GORREDIJK, The Netherlands. Each member of the group will also have their own callsign. The operators/member are:
Sietse/9H3AAG QSL via PA1XA Louis/9H3LRK QSL via PA0LRK
Ton/9H3? QSL via PA1SL Frits/9H3IE QSL via PA0BEA
Rob/9H3Q QSL via PA0RDY Allart/9H3AAK QSL via PE1RVQ
Andre/9H3S QSL via PA3HGP Peter/9H3YT QSL via PA3GUU
Jaap/9H3X QSL via PE1NGF Bill/9H3ON QSL via PA3BIZ
Berry/9H3QF QSL via PA3FEO Bert/9H3QC QSL via PA3CLF
Peter/9H3TE QSL via PE1NZA Sjirk/9H3YM QSL via PE1OFJ
They are planning/trying to use the following Web site to provide further information and a possible database at: http://www.vrza.org

AP, PAKISTAN. Reports indicate that Peter, ON6TT, is once again traveling to Pakistan. He is reportedly carrying some additional equipment for the club station AP2ARS in his luggage. Look for him to be active on the low bands this week. QSL CW QSOs via S53R and SSB QSOs via ON5NT.

CARIBBEAN TOUR 2001 - SUMMARY/RESULTS. Rob, PA5ET, sent the following press release to all OPDX readers: "We hope you enjoyed 4 weeks of radio activity from J3 and J8 like we did. We logged 25,825 QSOs from Carriacou

(J3) and 24,323 QSOs from Bequia (J8) on CW, SSB, RTTY and PSK31 from 160-10 meters. Our goal was to make 50,000 QSOs which has just been met. The 2 stations have been active around the clock, which has been a touch job for only 4 operators. The PacketClusters worldwide have been making overtime. The Tour web site is still alive (http://www.qsl.net/lldxt) and contains pictures, real audio files, statistics, on-line logs and many more. We would appreciate if you sign the guestbook and let us know how you experienced this year tour, we can always learn from your comments. We experienced that we need to improve our reception on the Topband, it has been better than previous years but it's still not good enough, this will be high on the Agenda for next year. Just to let you know, the Dutch postal rates are increased since July 1st, if you are sending multiple QSLs 2 USDs are required to cover the costs. See you next year from ..... Bouke J3/J8/PA0ZH, Ronald J3/J8/PA3EWP, Rob J3/J8/PA5ET, Dennis J3/J8/PA7FM, and by the whole team J38PA and J8PA."

D4, CAPE VERDE. Members of the Marconi Contest Club (MCC) (Alberto/IV3TAN, Fabio/I4UFH, Gabriele/IK4UPB, Luca/IK2NCJ, Stefano/IK2JUB, Matt/IK2SGC), Antonio/CT1DVV and Tony/CT1ESV, announce that they will be active during the CQWW SSB Contest as a Multi/Single entry with the D44TC callsign. Activity will be from SAL Island (AF-086). The station is ready with 3 towers 60 feet high, Force 12 antennas, Titanex verticals and beverages for the low bands. QSL direct to IV3TAN. Fabio, I4UFH, from the group informs OPDX that plans are being made to be active in all major contests during the next years, as SO / MS / MM category. Future plans include the following: 2001 CQWW SSB M/S, 2001 CQWW CW SO/AB, 2001 ARRL10, 2002 ARRL DX SO/SB and 2002 WPX SSB M/S.

DX BASH. The West Texas DX Association will host its 11th Annual DX BASH, October 5-6th, at the W5KFT contest station located on Lake Buchanan in Central Texas. This is a great weekend of fun with contesters and DXers from all over the world. For more details, E-mail Bryan, W5KFT, at: w5kft@nts-online.net
Also, check the following Web site: http://www.dxbash.com

FR/T, TROMELIN. Remember to look for Jack, FR5ZU, to be active this week from here. He will be at the weather station on the island and is expected to be here between September 6th and October 5th. Activity will be on SSB using 100 watts and with verticals. Suggested frequencies are: 3773, 3795, 14256, 14274, 18145, 21205, 24945 and 28470 kHz. QSL via JA8FCG.

FW, FUTUNA ISLAND. Guy, FW5ZL, reports that he will be on IOTA OC-118 from September 6-21st. He did not mention what bands or modes he will use, but he will be using a 100 watts and a dipole.

IOTA NEWS.....
AS-109. A team of Nadym DX Club members will be active from Narechi Island (RR-06-24), September 5-12th. Operators are Nikolai/UA9KM (Team Leader), Serge/UA9KL, Mike/UA9KO, Valery/UA9KJ, Andy/RA9KM, Mike/UA9KGH and Boris/UA9LAC. They will be active as RI9K on 80-10 meters (including the WARC bands) CW and SSB. They will have 3 stations active with 2 Log Yagis and dipoles with a

linear amplifier for this expedition. This expedition is
dedicated to the 30th anniversary of the NADYMGAZPROM - general
sponsor of Nadym DX Club and organizer of this trip. QSLs for
this operation is via UA4RC. His address is as follows:
P.O.Box 252, Almetyevsk, Tatarstan Republic, 423452, Russia.

EU-011. Three members of the Western DX Cluster Group, G3WNI/Bill,
G0PSE/Tom and G0WMW/Doug, will be activating St. Mary's Island
in the Isles of Scilly with the callsign GB0SM from October
6-13th. Activity will be 160-10 meters, mainly CW and SSB but
also some RTTY and PSK31. QSL via the Bureau or direct to G3WNI.
E-mail QSL Bureau requests go to:
tom@tctaylor.demon.co.uk -or- g0pse@qsl.net
The log for GB0SM for the years 1998, 1999 and 2000 are already
at: http://www.qsl.net/g0pse
It will be updated with the 2001 activity shortly after the
group returns home.

EU-039. Jean Yves/F5LHW, Pascal/F5RZJ, Herve/F8BFB, Eric/F0DIT will
be on Chausey Island from Sepetmebre 10-14th. They will be
active on 80-10 meters SSB/CW; also on 6m, 2m, 70cm and ATV.
QSL preferably via the bureau.

EU-136. Peter, 9A/DL4AMK, will be active between September 1-14th
from the Island of Losinj (EU-136, CI-058). Peter will use
an IC-735 (w/amp 650 watts) and a Gap Eagle antenna.

OC-034. Andy, P29AM (QSL via NU5O), and Harry, P29WS (QSL via W4HUT),
will be active from Lae Island, mainly on 1830, 3520, 3780,
7023, 14023, 14200 and 14226.5 kHz starting on September 7th.
Their stay is planned until September 16th.

KH4, MIDWAY ISLAND. Members of JNN-DX Group will be active from here
September 23-29th. Operators Nao/JE7RJZ (WH2M/WH4) and Koln/JP1JFG
(N2IU/KH4) will be active on 80-6 meters, possibly 160 meters as well.
They will have a beacon on 50.125 MHz during that time. QSL via JA1EOD:
Akira Iizuka, P.O.Box 8, Okegawa, Saitama 363-8691 Japan.

LIGHTHOUSE ACTIVITY/NEWS.......
Ted Sarah, W8TTS, has announced plans for a lighthouse expedition to
the Lake Erie Islands in September. The schedule includes Marblehead
(USA-472), S. Bass Island (USA-769), Green Island (USA-353), Sandusky
Harbor (USA-739) and Vermilion (USA-868). He will be operating on the
usual ARLHS frequencies at approximately 1530z and 2300z on September
10th, 11th and 12th.

Look for possibly a new island and a new lighthouse to be activated
for the many deserving when the Sheffield Island, CT, expedition takes
place from 1300z September 29th through 2000z September 30th. Operations
will be on 80/40/20/15/10 meters, including SSB, CW, RTTY and PSK31.
QSL go to the GNARC Contest Club, N1EV, 324 Main Avenue, Box 115,
Norwalk, CT 06851. Stateside operators are asked to include a SASE,

while DX should include an IRC or green stamp.

ARLHS To Hold First Convention! Members of the Amateur Radio Lighthouse Society (ARLHS) will gather in Georgia this November for their first ever convention. The event is set for Friday and Saturday, November 9 and 11 at the Holiday Inn- I95 in Brunswick. The burgeoning organization is less than a year old and already has almost 400 members worldwide. Jim Weidner, K2JXW, (ARLHS #001) founder and president of ARLHS, urged all members to mark the dates on their calendars and plan to attend. Lee Graves, WA7OBH, (ARLHS #155), who with Jim Buffington, K5JIM, (ARLHS #150), came up with the idea for the convention, noted that activities are expected to include a banquet, an informal poolside gathering and an opportunity to operate portable or mobile from the historic lighthouse at nearby St. Simons Island. Jeff Cole, N4XGI, (ARLHS #376), who is keeper at St. Simons, will give tours of the lighthouse and museum. A special convention room rate of 59.95 (USD) plus tax is available to those attending by contacting the Holiday Inn I-95 in Brunswick direct at 912-264-4033. "Be sure to mention ARLHS in order to get the special rate," said Graves. Members are encouraged to make their reservations soon, since the block of rooms set aside for the convention is limited and are expected to be taken quickly. Graves and Buffington emphasized that dress will be casual the entire weekend.

NH0, NORTHERN MARIANA ISLAND. Operators JQ1UKK, JF2SKV, JK2VOC, JG3VEI and JE6MYI will participate in the CQWW DX CW Contest signing NH0S as a Multi-Single/High Power entry from the Saipan, Northern Marianas (OC-086). QSL via JF2SKV either direct (Hisashi Matsushita, 14-1 Ugasemae Iwakura, Toyota, 444-2225 Japan) or through the JARL Bureau. Before and after the contest, between November 22-27th, they will operate on all bands (160-6 meters) and modes (SSB, CW, RTTY, PSK31 and FM) as NH0S (QSL via JF2SKV), NH0V (QSL via JG3VEI), KH0/JE6MYI (QSL via JW6MYI), KH0/AD6VH (QSL via JQ1UKK) and KH0/JK2VOC (QSL via JK2VOC). Visit to their WEB site at: http://homepage2.nifty.com/jg3vei/

PIRATE ACTIVITY. Mike, G4IUF, reports that a station signing 3A0FC is saying that he is Mike, and is giving his callsign as QSL Manager. This a pirate. Mike has never been to 3A, and does not know who this nut is or why he is doing this.

QSL INFO AND NEWS.....
3B6RF QSLs. Steve, N3SL, reports that, "As of Thursday, August 30th, North American cards are completely caught up, and new arrivals are being turned around in 1 day. I put a batch of 280 more cards in the mail Wednesday, representing all those that had built up while I awaited more blanks, so people should see those within a week (because of the holiday). These are the direct cards only, sent to my address, and do not include any bureau cards which are being handled 100% by HB9AGH. Those sent via WF5E's service are also now complete."

Bert, PA3GIO, reports that as of August 29th, all QSL for operations 5R8GY , FH/PA3GIO/p and /m and FR/PA3GIO/m are in the mail and in the Bureau.

BQ9P QSL Status. Steve, KU9C, reports: "All QSL cards that matched the logs are in the mail. However, there appears to have been a fair amount of SLIM BQ9P operators on the bands, which means that some cards do not match the logs. These requests are in the 'hospital' at the moment, requiring a more thorough check. I'm working through those as fast as I can, but it's a slow process."

MORE FROM STEVE, KU9C:
"PW0S: I'm current on these, and this week the hospital was completely cleared.
PJ/FS-W3HNK: These are current, save a few in the hospital.
IF YOU ARE ANXIOUS FOR one of these cards, but ONLY FOR A DXCC SUBMISSION DEADLINE, please email me at: ku9c@arrl.net .....I'll find your envelope and see if i can get it back to you. PLEASE NOTE: Many of you requested 5, 6, or even more calls in your envelope with one of the above cards. These will be completed when I get to each of the calls. My assumption based on the number of cards you requested is that you were not in a hurry....and not worrying about any submission deadlines. If you are awaiting one of the calls above and fall into this category, please E-mail me with EVERY CALL you requested, and I'll take a shot at finding your envelope." Steve's E-mail address is: ku9cqslmanager@ku9c.com

The Kingman Reef Palmyra DX Association announces that all QSLs received DIRECT with SASE for K5K, KH6ND/KH5 and T32R have been answered. All QSLs now being received are answered the same day. Any station having a QSL problem with any of the above, send an E-mail inquiry to < N4XP@juno.com >, who will research the problem. DO NOT RESEND, ask first. Bureau QSLs will be answered in the near future but QSOs already marked as receiving a QSL will not be answered again through the bureau.

The Amateur Radio Society of MOLDOVA - ARM, was active this past week as ER10MD to celebrate the 10th anniversary of declaration of independence of Republic Moldova on August, 27, 1991. QSL via ER1BF. A special "MOLDOVA-10th Anniversary of Independence Award" is available. For additional information, visit the official ARM Web page at: http://www.arm.moldtelecom.md

QSL Manager Jean Michel, F6AJA, informs OPDX and its readers that Camillo, HP1AC, contacted him by E-mail because he has collected some QSL cards for HP1XBI (Gerard, F2JD) from the HP QSL bureau. After an arrangment was made with Camillo, cards were sent to Jean. He received more than 300 cards (mostly from USA). Some 37 QSL cards clearly did not indicate/mark "VIA F6AJA" and unfortunately they arrived via the Panama bureau. Jean has processed the cards for the next batch to go out via the French QSL Bureau. He also states and reminds everyone, "Make sure you indicate clearly the QSL route when you send cards via the bureau it's NOT the work of the bureau to find the right route for your card."

OPDX has been informed that Pierre, HB9QQ, is saying that a single USD is no longer enough to pay for an airmail stamp from Europe. He said it costs almost 2 USDs to send airmail to the States.

QSLs for Otto, HC2/UA4WAE, go via Michel, PY3ZM. Otto is waiting for
a new HC2 callsign. BTW, PY3ZM lives in France! His address is:
PO Box 4, 22770 Lancieux, FRANCE.

Yosi, JA3AAW, announced that both of HK5MQZ/0M (SSB) and HK5QGX/0M (CW)
logs are available on the Web and QSOs can be searched at:
http://www.big.or.jp/~ham/HK0M/
The HK0/M June 2001 Web page is available (in Japanese) at:
http://www.page.sannet.ne.jp/ja3aaw/hk0m.html
QSL HK5MQZ/0M via HK5MQZ: Jairo Vargas, P.O. Box 10862, Cali, Colombia.
QSL HK5QGX/0M via JA0MGR: Ryoichi Tsuda, 20-2 Sekiya Kanabachiyama-cho,
Niigata 951-8165, Japan.

Laci, HA0HW, informs OPDX that those who worked the Hungarian group
which operated from Chrissi Island (EU-187) and Crete (EU-015) at the end
of May and first weekend of June, the full color QSL cards have arrived
from the printers. All direct QSLs for J49HW, J49HW/p, J49NG, J49NG/p
and J49DX were or will be answered within a week.

Ed, PS7ZZ, that all QSL cards for the following operations are now
requested to be sent DIRECT ONLY. Ed states, " Because of administrative
problems between Bureau Labre Central and Bureau Labre RN (my state),
I am not receiving QSL cards through bureau, : SINCE DECEMBER 2000,
for that reason, I cannot guarantee the return of your QSL referring
to expeditions:
PY1PL/PP8 - Amazon states 1995
ZY6WL - Abrolhos Archipelago - Santa B&#65533;rbara Island - JUL 1997
ZW7ZZ - Lighthouse Natal (m&#65533;e luiza) - AUG 1999
PX7ZZ - Lighthouse Santo Alberto - OCT 1999
PV7ZZ - Lighthouse Ponta do Mel - DEC 1999
PQ500BA - 500th anniversary of the discovery of Brazil - APR 2000
ZW500T - 500th anniversary of the discovery of Brazil - APR 2000
PQ7ZZ - Comunications Week of Brasil - MAY 2000
ZV7ZZ - Lighthouse Cabo de S&#65533;o Rqoue - JUN/2001
ZX7ZZ - Lighthouse Galinhos - AUG 2001
His address is: Francisco Edvaldo Pereira de Freitas,
Av. S&#65533;o Miguel dos Caribes 31
Neopolis II
59086-500 - Natal - RN Brasil

QSL Manager Bill Horner, VK4FW, has a new address. Effective September
1st, his new post box is as follows: Bill Horner, P.O. Box 1343,
Maroochydore, 4558, Australia. This is now the only valid address for
him. Meantime, the old 929 box will continue to be cleared once per
month at best.

W1AA is NOT and never has been the QSL Manager for TI9AA. There are
indications that they assume TI9AA is a pirate.

Tony, WF1N, reports that E-mail requests for Bureau Cards for any of
his IOTA operations should be sent to his new E-mail address at:
a.spino@snet.net
The old address (megahertz260@...) will become inactive shortly. If

you request a card via the Bureau, you do not have to send Tony your QSL card.

QSL ZA/IZ7DOO via IZ7DOO, via the bureau or direct to: P.O. Box 94, 70038 Terlizzi BA, Italy.

S2, BANGLADESH. Mr. Shin, will operate again as S21YH now through 1759z September 8th. He will mainly use 7-24 MHz bands with CW (QRS) and SSB. Unfortunately, Mr. Shin will head back to Japan in the middle of September, so this operation is the last chance to contact him as S21YH. QSL via 7M4PTE. Send a SASE to the following mailing address as follows: Mr. SHIN, Makoto, 2-3-18, Naritanishi, Suginami-Ku, Tokyo 166-0016, JAPAN.

SAD NOTE: Al Harbach, WA4DRU, recently became a SK in Houston, Wednesday, August 15th. He was known by many as Mr. Heathkit after Heath shut their doors. Al was also quite a prominent DXer, and many know him for his many travels to the various islands, lately at VP5 and other places. He was a long standing member of the North Florida DX Association. Also, Al had a small business which provided many with Heathkit parts that kept our old rigs going. Our deepest sympathy goes out to his wife Pat. Type in Al Harbach in your search engine (google.com) and you will find all kinds of things about Al. Below is a website Al did for his company, Harbach Electronics. It is his bio sheet.
http://www.harbach.com/reference/web-bio.htm

TG, GUATEMALA. Ramon, XE1KK, will be active as TG/XE1KK, September 6-9th, from Guatemala City, Grid Locator EK35. Look for him mainly on satellite UO-14 and AO-27. He will also try to be active on HF and 50 MHz as schedule permits.

V63, MICRONESIA. Sho/JA7HMZ and Hisa/7L4IOU are planning a digital DXpedition to Phonpei Island from September 28th to October 4th. Their activity will be during the CQWW RTTY DX Contest, and they will enter as a Multi-Op signing V63A instead of V63KA.

VK/VK9C/VK9L/VK9X, AUSTRALIA/COCOS-KEELING/LORD HOWE/CHRISTMAS ISLANDS (The PA3GIO DXpedtions - Reminder/Update!). Bert, PA3GIO, plans to be very active on the next two months. Most of his activity will be on SSB only on 80/40/20/17/15/12/10 meters with 100W and doublet with open feeder line. His planned schedule is as follows:
VK9X Christmas Island - Bert will be signing VK9XV from IOTA OC-002, September 6-13th.
VK9C Cocos-Keeling Island - Bert will be signing VK9CQ from IOTA OC-003, September 14-20th.
VK, Australia - Bert, will be signing VK6GIO between September 22nd and October 8th (On route) but VERY LIMITED ACTIVITY.
VK/5, Kangaroo Island - Bert will sign VK6GIO/5 from IOTA OC-139, September 30th through October 3rd. His equipment
will be a Kenwood TS-50S 100W, doublet with open
feeder line or Outbacker Perth.
VK9L, Lord Howe - Bert will be signing VK9LO from IOTA OC-004,

October 9-15th.
QSLs are (preferable by the Bureau) to PA3GIO. Also, check out the
following Web sites available for his operations:
http://www.pa3gio.nl/VK9XV/
http://www.pa3gio.nl/VK9CQ/
http://www.pa3gio.nl/VK9LO/
Main Web site (Netherlands): http://www.pa3gio.nl/
Mirror Web site (USA) : http://www.qsl.net/pa3gio/

VP5, TURKS & CAICOS ISLANDS. Ed, WA3WSJ, will operate as VP5ED from
November 20-27th. He will be using his K2 transceiver (S/N 321). If you
need VP5 QRP QSO, this will be the time to grab it. Please QSL directly
to WA3WSJ CBA with SASE. Ed hopes to work a couple of K1s and K2s while
he is VP5ED!

VU, INDIA. Miku, VU2WAP, has found a new interest in RTTY lately. He has
been heard on 15/20 meters (around 14087 and 21087 kHz). Look for him
around 1545z on 15 meters or on 20 meters, around 0030z and 1900z. Also,
he is looking for anyone interested to do the CQWW Contests coming up later
this year. Drop him a line at: agarwal@theoffice.net
His Web site is: http://www.qsl.net/vu2wap

WRTC2002 PRESS RELEASE #7 (U.S. teams & Team UK). Ari, OH1EH, reports:
"The ten US team captains have chosen their partners. The WRTC2002
organizing committee is pleased with the enthuasism of the U.S contesting
community and wants to thank the leading U.S contest clubs for their
support in the selection process. We are also glad to be able to state
that the selections of the clubs were honored to the letter. The following
20 world class contesters will represent the U.S. in the WRTC2002 in
Finland. U.S."
Teams are listed in the alphabetic order of their captains:
Ralph Bowen, N5RZ / Rus Healy, K2UA
Doug Brandon, N6RT / Andy Blank, N2NT
Daniel Craig, N6MJ / David Mueller, N2NL
John Dorr, K1AR / Doug Grant, K1DG
Bill Fisher, W4AN / John Laney III, K4BAI
Trey Garlough, N5KO / James Brooks, N1YC
Steven London, N2IC / David Hachadorian, K6LL
Dave Patton, NT1N / Mark Oberman, AG9A
Robert Shohet, KQ2M / Daniel Handa, W7WA
Randy Thompson, K5ZD / Tom Frenaye, K1KI.

The following are two experienced contesters and will represent the
UK Team: Andy Cook, G4PIQ / Fred Handscombe, G4BWP.

XV, VIETNAM, Sam, JA1EUI, is going to Danan, Vietnam, from September
21-28th. He expects to operate on all bands from 80-6 meters on mainly
SSB. Sam hopes his callsign will be XV3Z or XV3ZZ. He will have a regular
schedule on 21230 kHz at 2130z every day with JA1TAA or JA1BQ. QSL via
home callsign: Satoru Matushima: 2469-5 Toda, Atugi, 243-0023 JAPAN.

YM, TURKEY. Look for Mill, LX1CC, to be active September 16th to October 6th, signing YM3CC. His operation will be mailnly on SSB on all bands, including the WARC bands. QSLs are via his home call (LX1CC).

ZC4, U.K. SOV. BASES AREAS ON CYPRUS. Steve, ZC4BS, is expected to be active for the next 13 months. His activity will be on all modes from 160-10 meters, but most of his activity will be mainly on 15/20 meters.

ZL7, CHATHAM ISLANDS. Nigel (ZL7/G3TXF) and Roger (ZL7/G3SXW) are expected to be active from Chatham Islands, on CW only, from September 13-23rd. Their suggested frequencies are: 3503, 7003, 10103, 14023, 18073, 21023, 24893 and 28023 kHz listening up 1-3 kHz. They will use two TS570's and amplifiers with three verticals. QSL via their home callsigns, direct or via the bureau. Bureau replies can be requested from:
G3TXF@compuserve.com -or- G3SXW@compuserve.com
Further details and propagation predictions may be found on the following Web site at: http:// www.G3TXF.com/dxtrip/ZL7_G3TXF/ZL7.htm

I have 321 right now. 322 if the Yemen operation would count. I have a vertical in the back yard and have used an AL811 and AL80A at various times. By definition the 80A won't do much over a K if that. It isn't the power. It's the persistence.

No, it doesn't and it never will. You will soon find out when you try breaking pile ups to the seriously difficult ones, both in terms of propagation and operating skills. Working VK/ZL or breaking 3B6RF is a walk in the park compared to working anything in the central pacific with paths +-30ï¿½ over one of the poles.

If you can't hear it, you can't work it, unless you like nets. Working central pacific from Europe is quite tough, unless your counterpart has a) a competitive station with good antennas and good take-offs and b) excellent operating skills.

Mark my words when your DXCC count reaches the vicinity of 280 or so.

No, you must have read someone else's post. I said: "either accept the fact that your dxing is going to be severely limited and frustrating as hell, or buy a house with a decent yard and no CC&R's". A decent yard does not necessarily mean monobanders. My main point is this: dxing from a CC&R affected condo will lead to more frustration than satisfaction. Whoever claims that he has "plenty of fun" operating from an attic 10 foot wire hidden in a condo, hasn't really experienced the real fun of dxing with a good antenna.

This amounts to testimonials, and testimonials are never accepted as more than folklore. You may have worked all these countries and I don't doubt it, but for the bottom line please refer to Peter's response. That's what awaits you if you stick to your $10 wires. I used to work with a 100W and a ground plane 40 feet up, but I've seen the light since and I don't ever want to go back.

> My point being: you can spend thousands of Dollars (or Euros for that
> matter) on power and antennas, but the list of DXCC's stays the same. You
> can work 'm all with limited power and very simple antennas

No, you can't. All those people who have a massive amounts of DXCC worked - ask them how old they are and how long they've been in ham radio! It is a very different case today than it used to be 30 or 40 years ago. The bands are much more crowded, much more people are running higher power into decent antenna systems, etc.

> , and I think satisfaction is much greater. It's like the ham driving the
> scooter knows a
> shortcut to win the dragrace...

I don't dispute your satisfaction - after all, it is all subjective. I do deny, however, that all 320+ DXCC can be worked nowadays with a simple wire antenna, a 100W and a limited (average) time spent on the air.

Peter and Zoran,

I know that most of the entities worked so far are fairly easy from my QTH, and yes indeed: Pacific is hard to work - my log can testify: I heard KH2/6 and stuff like that a couple of times, but never managed to work it...

And I know, the last 30 DXCC's (imagine BS7, VU7, P5...) will be very hard to bust with a simple wire - but it can be done! And that was my point: you don't NEED big antennas to work DX, nor to enjoy it. I've never been frustrated, but I can tell you: for some entities I had to call more than a couple of times - imagine the relief when you hear your call coming back from the DX...

Anyway, I never said I didn't want a yagi antenna. I love chasing DX and like to contest too - so I definately want a beam. But as I still live with my parents, my "landlord" has very severe restrictions on the amount of wire or aluminium in the garden. Right now, I'm looking for my own QTH, and I can tell you: it'll have to fullfill my dream of putting up a tower + beam! For the time being, all the new ones will have to come in through the wire...

Bottom line: never quit operating when facing antenna-restrictions, put up whatever's possible and get out!

What do you mean: "Stuff like that"? KH2 is nowhere near KH6, unless Europe is Europe, no matter whether we are talking about EA7 or R1FJL. KH2 is and should be rather easy to work even with a smll station. Even KH6 can be heard and worked with a modest station, due to quite some activity over there and a lot of stations on Hawai can compensate for your and my lousy antenna with yagi setups.

>
> And I know, the last 30 DXCC's (imagine BS7, VU7, P5...) will be very hard
> to bust with a simple wire

No. All three mentioned are easy to work pathwise. It's a question of the activity. Neither DXCC has been active in the last three years, so I can't really complain not having orked them (apart from the slim VU4/7 two months ago)

> - but it can be done! And that was my point: you
> don't NEED big antennas to work DX, nor to enjoy it.

You ned a *lot* of time to be active at various times of the day that other people in your region spend at work. Plus, you need to know a *lot* about propoagation in order to know when what band is opening in which direction. Plus a good knowledge of activities to some rare DXCC and quite some experience in knowing how to break through a huge pile up with a modest station.

> I've never been
> frustrated, but I can tell you: for some entities I had to call more than a
> couple of times - imagine the relief when you hear your call coming back
> from the DX...

big grin That's the fun part of it. To outsmart the rest of the herd and work the DX, despite the gazillions of people with better antennas and a lot of power.It can be done, but it takes a lot of experience and good propagation, too. Just wait and see whether you will be able to work any Pacific in three years from now with a modet setup.

Peter Lemken

> anyone has mentioned it is a good station ground. Can have an effect
> beyond comprehension.
>
Are you referring to the RF ground plane (which connects to the coax
shield) or the RF ground connected to the grounding screws on the back
of the tuner and transceiver? It sounds like you mean the latter, and
if this is the case, I challenge you to explain why it is needed, what
happens if you don't have it, and what results you have observed when
you tested your theory out yourself.

My thoughts on RF station grounds are at:
http://www.jasonhsu.com/ham_radio-technical.html (Click on "RF Ground
Planes".)

I can tell you that I have tried operating with and without the 1/4
wavelength counterpoise wires attached to the grounding screws. I
never noticed any difference. I maintain that the need for an RF
station ground is bunk, and so do many others more experienced than
myself. People should take the 1/4 wavelength counterpoise wires they
have been attaching to their grounding screws and instead attach them
to the RF ground planes of their antennas. Anyone with room for these
also has room for a good RF ground plane. These counterpoise wires
would work wonders in reducing ground loss resistance and thus enhance
efficiency.

From what I have read, the purpose of the RF station ground is to
minimize RF feedback/bite. However, all the RF station ground does is
provide another path for stray RF. The RF feedback is caused by an
imbalance in the feedline currents or an RF current flowing on the
outer shield of the coax. In my opinion, it is MUCH easier to address
the real solutions by making sure the coax is good, improving the RF
ground plane, and adding RF chokes to the coax.

(NOTE: The 8-foot buried ground rod may still have other uses.)

Hi Jason,

I went to your page to observe the following statement:
>The Real Scoop
>None of this is needed!
>People think that an RF station ground is needed
>to stop RFI and RF feedback, but nobody can provide a clear explanation
>how the RF station ground remedies the situation. In other words, everyone
>simply accepted a piece of conventional wisdom WITHOUT understanding
>the reasoning behind it.
This last sentnece presumes your readership consists of dolts.

This was not immediately reassuring in that the "Real Scoop" is a
problem of your own invention. In the conventional usage of "Scoop"
you are to provide details, instead you pine away about "nobody" and
at the same time "everybody." You build a strawman argument
(conventional wisdom - how you came by this acclamation is un
reported) littered with vague references and generalities:
>From what I have read, the purpose of the RF station ground is to
>minimize RF feedback/bite.

Where did you read it? What is the quality of your reference
material? Who are these sources? ("them," and "everybody," and
"People," do not qualify) Why do you presume your examples of poor
technical discussion is taken so much on faith by the general
community? You complain that "nobody can provide a clear
explanation"; this seems most unlikely.

I assume the awards ARRL will offer for electronic QSLs will be different
than those for real QSLs. I mean, you do have to consider the differences
that exist between the processes involved in sending and receiving a real
QSL and an electronic QSL, one obviously involves more effort than the
other. Doesn't seem to me like we'll be able to turn in an electronic QSL
log and get all the regular ARRL awards anytime soon...

Sure, but the thing is you normally don't get your 5BWAS/5BDXCC in a day.
Those bigger awards take years to complete, which means that your costs are
distributed over those years, which significantly reduces their impact on
your budget.

Jason-
I went to your web site, and read what you said- With all respect- you show almost no understanding of RF, antennas, or the way experimets are conducted. You have denied that most people in the field are right, and offered only superficial arguments, based on (at best) anecdotal 'evidence'. The statement that you added 1/4 wave 'grounds' to your receiver, and it did nothing, is ludicrous. What made you think that was an RF ground?

Learn some more- make some more (carefully done) tests, then come back. Learn- understand- then explain.

2316. RF station grounds: Exactly why are they needed?

Newsgroup: rec.radio.amateur.dx
Date: 2001-09-03 19:12:58 UTC
From: jason_hsu@my-deja.com
Message-ID: <f7d9a152.0109031112.215a6e98@posting.google.com>
Source record: 16070
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx

My thread on the 10m band drifted into a discussion on RF station grounds. Since deja.com doesn't show all the messages yet (including some I would like to respond to), I'm starting a new thread. I will revise my essay "RF Station Grounds: An Old Husbands' Tale" to include more detail.

One of the first things I was told about HF was that I needed RF grounds. I suspect that this issue is a major sticking point for people new to HF and that many are intimidated and decide not to bother trying to operate on HF. Let's try to put this issue to rest so that prospective HF newbies need not be deterred by this issue. I don't want to hear "I can't operate from my 4th floor apartment because I don't have an RF ground" or "I have to create an RF ground before I can try out my transceiver."

I was confused at first, but I eventually realized that there are two different RF grounds that everyone talks about. There is an RF ground plane for a 1/4 wavelength vertical monopole antenna. This type of antenna is a 1/2 wavelength horizontal dipole with a 1/4 wavelength section replacing one dipole leg and an RF ground plane replacing the other section. The more the RF ground currents are conducted back to the antenna feedpoint, the lower the ground losses. The second RF ground is a ground rod attached to the grounding screws in the back of the transceiver and tuner. Those who aren't well within 1/4 wavelength of the ground rod are to use 1/4 wavelength terminated counterpoise wires instead.

Why exactly do we need the second RF ground, the RF station/tuner ground?

(Please post if you disagree.) I will describe my thoughts on why RF station grounds are supposedly needed and why I disagree:
1. One cited reason for the RF station ground is stopping RF feedback. But why is the RF current making it into the shack? Doesn't the feedline carry the RF energy to the antenna, where it belongs? As I see it, RF feedback occurs when there is either RF current on the outside of the shield of the coax or an imbalance between the RF current on the inner part coax shield and the RF current on the inner coax conductor. If improper grounding of tuner components is at fault, then the issue is a flaw in the tuner rather than the lack of the 8-foot ground rod. If there is an imbalance between the two RF currents in the coax, then either the coax is bad or the RF ground plane is bad. If the problem is a third RF current on the outer part of the coax shield, then the use of RF chokes would

address the problem. If the RF feedback occurs because the antenna is too close to the shack, then one should move the two further away from each other.
2. Another cited reason for the RF station ground is improving performance. I don't believe this. The RF ground plane for the antenna is responsible for minimizing the antenna ground losses and thus boosting efficiency. As I noted before, this RF ground plane must be attached to the antenna feedpoint and NOT at the transceiver/tuner grounding screws. How does the RF station ground improve performance?

This is the stand I take. What else am I missing?

Bill, wait a minute before you become over-critical. I have myself, and no doubt many others, connected 1/4-wave radials to the back of the erquipment in the hope of it doing something useful or other, and found it makes not the slightest diference.

There are other occasions when it does make some difference but in half of these cases it makes things worse.

So in general, whatever problem you are trying to cure, the last thing to try is to connect 1/4-wave radials to the ground connection at the back of the rig. Everything else you can possibly think otakes precedence.

If you have any wire to spare the best place to bury it is in your back garden. If you don't have a back garden sell the wire to a scrap merchant.

In general, the only 1/4-wave radials which are of real use are those used with antennas well above above ground. And you need only two, three or four, at most, 1/4-wave radials in that high siuation.

Reg- you actually proved the point I was trying to make, and missed by being too brief.- What was ludicrous was the apparent belief that the lack of response of the 1/4 wave line proved anything. the comparison, with and without, proves nothing, if the additional variables are not planned and controlled. In this case- what was the intended primary radiator- what did he use to measure the effect- SWR, FS, ?
I may have been harsh, for which I am sorry, but- the dissertation on the non-need of RF grounds based on the tests mentioned is not a good claim.

You incorrectly assume:

1.) All stations have minimal FS induced in the wiring attached to the staion by antennas.

2.) A simple choke at the antenna always cures all common mode currents.

3.) All stations use coaxial feeders, or perfectly balanced open wire lines with prefectly balanced tuners.

4.) What ever you do applies equally to all others and all other systems in the world.

There are a lot of "it depends on...." involved. By ignoring all of the variables you wind up giving what amounts to very bad advice.

While there are cases where a staion RF ground is not needed, EVERY station requires a good AC ground for safety. You'd do well to rethink many of your hubristic comments.

Hunh??? You sure you don't want to reword that?

>The more the RF ground currents are conducted back to
>the antenna feedpoint, the lower the ground losses.

Not so. The ground system shields the lossy earth from the antenna field, and gives the feedline something to "push against" so common mode current can be forced up into the antenna.

The current going up is always equal to the current returning in the ground system, as long as the feedline does not radiate.

>The second RF
>ground is a ground rod attached to the grounding screws in the back of
>the transceiver and tuner. Those who aren't well within 1/4
>wavelength of the ground rod are to use 1/4 wavelength terminated
>counterpoise wires instead.

You don't want to use a 1/4 terminated wire. That would result in a high impedance at the shack. You want to use a 1/4 wl open-ended counterpoise.

>Why exactly do we need the second RF ground, the RF station/tuner
>ground?

Because removing common mode current from the feedline becomes an impedance ratio problem. The choking impedance of the line has to be large compared to the common mode impedance of the station.

If you have a very high common mode impedance looking into the station, it may be impossible to "cool" the station off. If you have a certain sign of reactance, say capacitive, presented at the choking device adding a choking device can INCREASE common mode currents!

That's why we want to establish certain impedances in the system. It is a simple series circuit problem.

>than the lack of the 8-foot ground rod. If there is an imbalance >between the two RF currents in the coax, then either the coax is bad >or the RF ground plane is bad. If the problem is a third RF current >on the outer part of the coax shield, then the use of RF chokes would >address the problem. If the RF feedback occurs because the antenna is >too close to the shack, then one should move the two further away from >each other.

We live in an imperfect world Jason. Sometimes we have to use multiple cures because we can't make the system perfect. Also read my comments above.

>2. Another cited reason for the RF station ground is improving >performance. I don't believe this. The RF ground plane for the >antenna is responsible for minimizing the antenna ground losses and >thus boosting efficiency. As I noted before, this RF ground plane >must be attached to the antenna feedpoint and NOT at the >transceiver/tuner grounding screws. How does the RF station ground >improve performance?

By allowing you to better choke curremnts off the line outside the station, preventing a portion of what could be radiated from heating up your house.

Mostly this is a small effect, unless someone is using an end-fed wire or is stuck with poor feedline routing.

>This is the stand I take. What else am I missing?

Experinece, and considering all the situations in the world that may not be perfect.

I do not need a house ground for RF because I have buried cables, and my antennas are hundreds of feet away. They are all taken care of outside near the antenna.

But I DO need a house RF ground for common mode noise egress into the cable shields from my power lines, where the noise can follow cables out to the area of my antennas. I also need one for lightning protection, since lightning behaves like RF.

It would be just plain stupid to follow poor advice, and dispense with my station ground....and I am in an almost ideal situation for NOT having a station ground according to you!

My antennas are hundreds of feet away, my feedlines are buried two or three feet deep in PVC pipe for hundreds of feet to the towers and antennas. My radial systems are huge, my beams and dipoles have choke baluns. My cables are mostly 1/2 inch and larger heliax.

Yet if I removed my station ground, my lightning protection would be greatly reduced. The likelihood of powerline carried noises following

feedlines and control cables out to my antennas would be increased. The liklihood of EMI ingress into the house would increase. I would have less protection for ground faults.

Why would I want to do anything so silly and unsafe?

You are giving very poor advice Jason, because you have a narrow view of the world.

Following discussions with the ARRL DXCC desk, VKï¿½LD
eQSL cards are now being personally authenticated for
those that require these eQSLs for DXCC purposes.

Check out the updated VKï¿½LD website for more details &
to check whether your card has been received &
processed.

I will update the "processed" page each time I post a
batch of cards (about once a week).

On another note, VKï¿½KMT is at ANARE's DAVIS Station in
the Vestfold Hills on the Antarctic mainland and is
not on Macquarie or Heard & McDonald Islands as many
cluster spots seem to think.

BS. Jason, the ground connections on the back of receivers, transmitters, and transceivers are for a common grounding point for SAFETY. Doesn't have much to do with antennas. 1/4 wavelength wires are pure bs connected there. Consider this: When you have a general coverage receiver what length of ground wire would you use? Ans. The shortest possible to DC ground. Counterpoise is for antenna systems, not transceivers. On antenna systems rf ground is a different matter. If you live in a dry, arid place like I do then the normal earth ground is not very good for RF. On 160 meters I had to put out 5000 feet of wire (40 radials) for my vertical just so it would work correctly. If I lived on the coast or some other area with good conductivity I probably would not have to do this. You might look into the ARRL antenna book. Has some real good discussion on grounds and antenna theory.

Tom, you have to remember that Jason is a 'new guy'. And things like inductive reactance, capactive reactance, impeadance, common mode current, and the Easter Bunny are NOT things you can put on the table for people to touch in Show & Tell hour.....

Tom apparently knows the theory, Jason, but you are approaching this whole ham radio thing from a funny direction.... Lots of hams know the theory. Lots of hams don't. You seem to NOT want to do it until you are as versed as Tom is in the whys and why nots. Add to that the fact that you are hard headed, and we have a mess to clean up.

Wrong approach.

Go do it. Figure it out as you go along. Much more fun. It's a great approach to learn as you go, but it's sad to see you worrying so much about WHY when you could be just Doing It, like the Nike guys....

You are at a turning point in your ham career already, Jason. You have to make a decision. Are you interested in ham radio, or are you interested in DISCUSSING ham radio on Usenet and making web pages about it ?

I think you'd be much happier about this whole Why I Can't Log Into the Fudzuckers net problem if you'd change your approach..... Don't worry so much about why you CAN'T do this or that. Just go enjoy some of the things you CAN do..... Ham radio has something for everybody to do, no matter how restricted their living situation is. In Japan, for example, there are LOTS of hams that operate on HF from their car - they can't put up ANY antennas at home, so they put one on the car and drive up to the top of the hill and do their hamming from the front seat of the Toyota......

RF communciations need a few things to happen. A radio, an antenna, and some propagation. Unfortunatly, you can't buy propagation at AES. And if you do buy lots of radios and antennas at AES, and the Sun Gods don't give you any propagation, you can't talk to anybody anyway....

Unfortunatly, you have entered ham radio at a time that propagation sucks. Had I know you were coming, I'd have advised you to come during the previous sunspot cycle, when you could have easily worked

the whole world on 10 meters, daily, with a little transmitter and a lousy antenna. Like Tom and I did....

Tom knows the theory of how it works. I don't. But I know how to cut up wires, sling them up in trees, and make contacts with my radio. I don't care how much common mode curent is in my coax or which end of the wire is reactive and which end is capactive. I'm here for the fun of talking to people on the radio. Tom enjoys understanding the intangible things like the THEORY of how it works, so he does that too. I don't, cuz I don't care. I didn't come to ham radio to learn to be an RF engineer. I came to have fun. So I learn what I need to learn to accomplish my goal, and don't worry about the rest.

Over the years I've learned that what works in the book doesn't necessarily work in the tree, and vice versa. I've made contacts with lots of antennas that theoretically should not work very well, if at all. I've even made contacts on HF with no antenna at all, using only a can filled with oil and a coax switch in the wrong position. And I've learned, in praticality, that a lousy antenna is better than no antenna at all :-)

During the last cycle (fantastic propagation) I had monobanders on top of an eight story building and a 1.5KW amplifier. So wasn't much I couldn't talk to if I wanted to talk.

Now my 'radio situation' is just like yours. Lousy QTH for ham radio, can't put up a real antenna. QRP - no amp - only 100 watts. But here's where we differ:

I turn on my radio and talk to who ever I can hear (in the rare event that they can also hear me).

You turn on your radio and worry about who you can't hear.

Never mind reactive capactive inductance and common mode currents. You can learn that later, if you decide you need to. Learn simple things, like how the HF bands work - 40 meters is good for short stuff

during the day, long stuff at nite. 80 meters is good for real short stuff during the day, and virtually good for nothing at nite, but that's not because of propagation, that's because of the users.....

The high bands might be hot at certain times during the day, early morning, evenings, whatever. Some bands work all nite. Some go to sleep and don't get back up until morning. Check and see where and when you CAN hear what you can hear, then be there at the right time.

Realize you are handicapped, by your location, and your antenna system, like I am. Be happy with what you can hear, and talk to, instead of trying to find the magical conglomeration of wires on the shack floor and advice from the internet to make your lousy antenna work better. Not gonna happen. If you want to make your own

propagation, your gonna have ditch the condo and go someplace where you can put a whole lot of aluminum up real high in the air.

Realize that just because you can hear XX9XX, he might not necessarily be able to hear you. He might have a million people calling him. He might only hear S9 signals cuz he has high line noise, and you are S2. He might be using a 6 ele monobander and a 1.5KW amp (15KW ERP) when you (and me) are using a dipole a 100 watts (90 watts ERP).

Study the theory. Learn from Tom, he already did the studying. But don't miss out on the fun cuz you are too busy inventing RF grounding systems that nobody is sure your really need....

There's some MAGIC in RF communications that Tom can't explain with theory lessons, and that I can't lay on the table for Show & Tell. You have to go find that yourself to see what it's like. If you are lucky enuff to find it, you'll know exactly what it is, and ham radio is MUCH more fun, no matter what kind of antenna you have, after you have found the magic.......

The real magic is in the fact that even on HF, it is possible to shine your
little two or three watts up into the sky and not only one ham all the way
around the world, but THOUSANDS of them can hear you!

That's no more than a hefty flashlight worth or so. In fact, go out and
try shining a good flashlight up in the sky and think about where the
beam goes some night and contemplate what it's all really about!

No matter that some do not want to talk to you. There will be those
that will and do. They are the ones who count.

Frankly, the entire politics of the whole radio picture pale in
comparison to what's really up there to contemplate, why, and what we
fortunate souls, who know a little or a lot about RF telecommunications,
have to touch.

The real magic is that we, as humans, have learned to touch it and be
touched by it in return.

So is working 300 with 1+ kW and a monobander more satisfying than
working 130 with 100W and a vertical or a dipole? Both are challenging.

Sure, the kW and a monobander are fun but essential for enjoyment?

The kW isn't even legal here in VK anyway. 400W max on SSB, 120W on CW.

So with a quarter-wave vertical antenna, with the feedpoint at
ground level, what should I use for radials? None, 1/4 wave,
some other length or no particular length at all?

The vertical I have is multiband and I have a few 1/4 wave
radial wires for each band. They certainly seem to help
lower the SWR and increase the SWR bandwidth. The soil
below the antenna is not very good.

Working 130 with 100W and a vertical is not a challenge but the loger part
of a contest weekend.

> Sure, the kW and a monobander are fun but essential for enjoyment?

I wouldn't know since I only run 100W and a vertical. And sure do have a lot
of fun with that setup.

The receipient can certainly tell, and would be committing fraud if they then tried to use that electronically transmitted verification in a DXCC award claim.

> A eQSL is a valid QSL. You worked the station, the station sent
> verification and you received it. It may not satisfy rules for some

If it's not valid for DXCC awards, what is it "valid" for? By your logic, why even bother with eQSL? If you work a station, and they QSL over the air, then you have received (electronic) verification, just like eQSL. You can just print up a QSL card for that station on your own, no need to bother them with the hassle. No one would know, so it's "valid," right?

I remember the article very well. The thing I remember best was that he
only operated 20 meters. All DX he worked was on that one band.

His secret: "Be there when they're there".

Amen to that. I've done both and I'll take the 80-foot tower with beam
and legal limit amp every time.

If some guys get satisfaction from low power and low antennas, fine. I
get satisfaction from running big power and big antennas.

Like they say "Life's too short for QRP".

Hi Jason,

I see you cannot break free of poor writing habits. This technique of employing "people" to make your argument is called projection in psychology. That is, the tendency to project your own problems onto others. Or more to the matter, it is poor communication. What the brief snippet above suggests is a simpler observation:

>One of the first things I was told about HF was that I needed RF
>grounds. I am intimidated and have to make a hard choice
>about ground and trying to operate on HF. Why is ground important?

It says the same thing and drops the artificial construct of this anonymous group of "people" who don't necessarily represent your issue (and adds nothing to the discussion).

That's right Mark, the cheater will cheat and those that don't cheat won't. The only difference between a eQSL and postal QSL is how it traveled to you. The steps getting there are the same.

> > A eQSL is a valid QSL. You worked the station, the station sent

> If it's not valid for DXCC awards, what is it "valid" for? By your logic, why even bother with eQSL? If you work a station, and they QSL over the air, then you have
> received (electronic) verification, just like eQSL. You can just print up a QSL card for that station on your own, no need to bother them with the hassle.

The eQSL site is nothing but an electronic QSL manager. It is more than a QSL QSO because both operators have to do something. One station has to send his log to eQSL (as with a QSL manager) and the other has to collect it. The only difference is when the QSL is printed.

> No one
> would know, so it's "valid," right?

Are these valid for DXCC Mark? If not, why not?

My neighbor Bill is a QSL manager for 14 DX stations. They Email him their logs and he prints the QSL with the information as per the DX log and then sends the cards out.

1. When I work any of these station I walk over to Bill's when he gets the logs in Email and he prints out my QSL for me.

2. I have the same type of printer as Bill. Once he Entailed me the data after he received the logs through email and I printed the QSL

card at my house.

3. Bill's printer broke. After receiving the logs through e-mail he remotely printed the cards on my printer and I took mine out of the pile before they were mailed off.

4. Bill was on vacation. With his permission I accessed his server and pulled the data from one of the DX logs that he received through e-mail and printed out my QSL.

5. Bill was on vacation. He paid me to fill in for him and I accessed his server and pulled the data from the DX logs he received through email and printed out all the QSLs. I pulled my QSL out and those of the local club which I delivered that at the evening meeting. The rest were mailed.

If I send my eQSL in for DXCC it is funny you would call it fraud. All I have done is removed the costly error prone human QSL manager and replaced it with a server QSL manager. Ask the DX station if the eQSL card of his I printed is valid in his eyes. Can he verify it in his log? He will say yes, after all he submitted his log to eQSL to make it possible.

It's going to happen. The ARRL has embraced the electronic contest entry and it is only logical the awards will follow. Rules for DXCC along with other awards will be amended that only electronic verifiable contacts will be accepted after 2010. Get over it and get used to or go through the same agonizing upset so many did over the CW change.

Jason,

Perhaps you are missing something...

A λ wl vertical antenna requires λ wl ground plane element(s) to provide the
"other half" of a λ wl dipole. Put simply - and all else aside - this is
necessary to provide a low Z input for a low Z (coax) transmission line.

A station ground has other functions. One is to "bleed" any common mode currents
on the transmission line, to earth - if you get RF burns from your mike, you
know you need one - hi! The so-called artificial ground (an L/C circuit)
accomplishes this by transferring the voltage loop to the L/C circuit thus
placing the transmitter in a voltage node.

Another is somewhat theoretical; It is thought that a low resistance connection
between earth and the transmitter enable the transmitter and earth to share the
same potential, thus utilizing the earth's conductivity, thus its reflectivity,
to its fullest potential towards antenna efficiency.

My personal experiences of the past 40+ years in Ham Radio, support this idea as
well. In any event, I always *perceived* an increase in station performance when
employing a low resistance ground... :-)

Just my 2λ worth...

Jim, excellent! Such a lucid explanation of what its all about.

If you would allow me to add - folk should think a just a little
bit more about quantities and numbers. If you can work out how many
rolls are needed to paper the shack then all you have to do is
apply your sufficent knowledge of arithmetic to radio.

Theory without plugging in numbers is meaningless.

Numbers will add that extra bit of satisfaction to life.

Regards, Reg, G4FGQ

==========
Hello Hamish (Jock),

With a multi-band vertical at ground level with surface or preferably shallow-buried radials, get the lowest frequency sorted out and the higher freqs will look after themselves.

The propagation velocity of radials laid on the ground is crudely 1/2 of the free-space value. So there's not much point in having radials longer than 1/8-wave at the lowest frequency. When buried, in mediocre ground the propagation velocity is even slower and 1/12th or 1/16th wave radials may be OK. In very good moist ground 1/20th wave radials will be fine.

But buried radials don't have resonances so length is very uncritical. You can just lay radials of no particular length. Or of mixed lengths. It doesn't matter. Just get some wire into the ground. There is practically nothing to be gained in having ground radials of any sort longer than antenna height.

The key to radials is to have a lot of them, within reason, and no longer than absolutely necessary. If there's any more wire it is always better to use it to make more radials than to lengthen the existing ones. That is until the ground under the antenna is almost solid copper.

Unless you have dry rock or sand there's little to be gained by increasing the number of ground radials to more than 16 or 32. It is not worth the labour. In very good soil 8 short radials will

suffice. There's a ridiculous magic number of 120 - forget it !

So when constructing an antenna system, start with two radials,
make test transmissions, or preferably test receptions after the
addition of each new radial. When you have two or three radials
more than the last time you noticed an improvement - stop !
You've got enough radials. With salt sea water one thick radial (or
one rod) of 2 or 3 feet is enough. Or just a 1-foot square plate.

Suck it and see !

Look, Bill, it's easy:

A ground wire is just like a sewer pipe. Anything you don't want in your
station just runs down that "station ground wire" into that infinite sewer
tank in the Earth.

Now, that wasn't so hard . . . too bad it is nonsense.

At this point I feel sorry for Jason The Original Poster.
In real-world terms, if you have a bunch of RF feeding back into your
shack, you can pretty much attribute it to antenna matching problems.
In that scenario you can go on juggling wire lengths to cure the
symptom, but something is still amiss at the antenna and its doubtful
that its working efficiently if all your RF ends up on the mike cord.
That being said, its no wonder that proper grounding has become an
'urban legend'. Some antennas are very insistent on grounds and/or
counterpoises, some are not. If you manage to load up a half-wave wire
from the end with a tuner, then hello RF. The cure is not at a
twist-nut on the back of the radio. Thats for something else.
If you want to manage 'lightning options', do it outside the shack. If
you want to tune antennas, do it outside the shack. The thumbnut is
intended to be connected to a safety ground, not as a cure-all for bad
antennas. Well, if its an old Atwater-Kent TRF set maybe so, but we'll
skip that.

When I was the technician at KPH, we were running 5KW on 23
frequencies. I always refered to my Collins 30K-5 as "QRP" - it was
compared to the fire-power of the other transmitters on the main
floor. I believe it's a fact, if you want REAL communications, 100W
is QRP. In fact, I would say 5KW is not enough.

Take out the word "matching" and substitute "imbalance" and I'd agree with you. An impedance mismatch, with proper balance, can not cause RF in the shack under any conditions I am familiar with.

---Bill--- wrote:

> At this point I feel sorry for Jason The Original Poster.--

I do as well, Bill.

Jason is, I fear, at a stage in his education and career where he has been led to believe that everything can be modelled, analyzed or simulated, and that all these processes yield useful and accurate results. Consequently, there is no need to "try something to see if it works" or to experiment to "see what will happen." Just run the computer and truth emerges without one having to listen to band noise or mess with soldering irons and antenna wire.

Nothing could be farther from the truth in the real world, of course, especially in the realm of r-f phenomena.

Most circuits and devices can be modelled/simulated reasonably well and useful results can be obtained to guide design and manufacture, etc. But it is unreasonable to expect the same relative degree of efficacy when it comes to modelling and predicting such phenomena as r-f propagation.

As Jason, and others, mature in their profession they will learn to temper the analyses and simulations with real-world experience and the modest degree of cynicism that any good engineer should bring to his work.

In other words, "Don't believe everything the computer tells you!"

No flaming intended here, just a few comments from an over-the-hill engineer who once also thought that he could solve everything with his K&E Log-log Duplex Vector slide rule! <:}

Why? If we are to believe ON4UN over you, increasing the number of 0.4 wl (!)
radials from 15 to 120 reduces the system resistance from 13.1 Ohms to 0.1 Ohms.
One hundred and thirty times better and a significant reduction in heating the
ground considering your antenna is (close to) 50 Ohms. Besides, I would venture
that most of us live on shitty ground, and very few on a very good soil.

Now, I'm not Einstein, but how exactly would you "notice an improvement" in a few dB unless you had a laboratory full of calibrated RF measuring equipment? Besides, since the goal of radials is lowering the takeoff angle, one can presumably test the radial system only by making test receptions of DX stations. Those would be affected by QSB.

Actually, thats backwards from what should be happening. The bandwidth
should decrease when you add more radials, not increase. In fact,
noting the apparent bandwidth is a pretty good way to gauge the
saturation point when adding radials. When you keep adding radials,
and get to the point adding more does not increase bandwidth, then you
have enough radials. Adding more will make little difference. MK

> Those would be affected by QSB.

Have to take strenuous objection to that one, Zoran. The take off angle is determined by wave interactions taking place in the far field, many wavelengths away from the actual antenna and far beyond the reach of any reasonable radial field.

No, the purpose of the radial field is to reduce ground loss by providing a return current path less lossy than would be provided by the ground in the immediate vicinity of the antenna.

One quick and dirty test of radial field effectiveness is simply to note the SWR bandwidth of the antenna system. With a lossy ground system - inadequate radial field - the SWR bandwidth will be higher than with a proper radial field in place.

Or, one can use an antenna analyzer to measure the driving-point impedance of the antenna. A 1/4-wavelength vertical over a perfect ground field should show about 37 ohms resistive impedance at resonance. This yields an SWR of about 1.35 with 50-ohm coax, provided that no impedance matching is done at the feedpoint of the antenna.

Any lower SWR is due to added ground loss. Specifically, 13 ohms of ground loss resistance would result in a perceived SWR of 1:1 or the famous "perfect match." The problem of course is that the 13 ohms of resistance accounts for r-f power from the transmitter being used to heat the soil and not make radio waves.

These are matters of fact that can be verified in any antenna textbook and/or with a simulator such as EZNEC.

This is the second question that I've seen on this one today. I can't recall seeing any mention of a near-term Chesterfield operation in any of the usual places, including Bernie's "The Daily DX" (www.dailydx.com). PA3GIO is starting an operation from Christmas Island (VK9X) tomorrow. This isn't possibly what you might have seen? A very good resource for upcoming DXpeditions is:

www.ng3k.com.

And, as I so recently figured out (unrelated to the activities on this NG), the blackboard scratchings of a bearded PhD are often no better than a computer simulation. Mathematics, in fact, is exactly equivalent to a computer simulation, except that it is being executed manually (by hand). It is worth keeping this parallel in mind when you are being bamboozled by some chalk wielding lunatic and you don't understand his obtuse vocabulary sufficiently to spot the error. Just yell "GIGO!".

Actually it all depends.

With resonant elevated radials, bandwidth is increased as you add
radials.

At this point I must thump the low band bible. Says ON4UN: "Adding many long radials will significantly reduce the wave angle over poor and average ground (a lowering of the wave angle of up to 10 degrees can be achieved with 120 radials each 0.5 to 0.6 wl long)."

Otherwise, if all that the radials are doing is eliminating ground losses, who cares? The DX will not feel the difference between a kW and 650 W (your example with 35 + 13 Ohms below) due to ground losses.

> No, the purpose of the radial field is to reduce ground loss by providing a

Granted, that is one of the main functions of the radial system, from what I can gather, but not the most important one.

> One quick and dirty test of radial field effectiveness is simply to note

Well, OK, but surely there are other factors involved - the diameter of the vertical, etc. Unless apples are compared to apples, there is no single rule of thumb, is there?

> Or, one can use an antenna analyzer to measure the driving-point impedance

> accounts for r-f power from the transmitter being used to heat the soil and
> not make radio waves.

I'm not disputing any of this, but I simply wanted to point out that radials do lower the takeoff angle. Granted, not the short radials, but the ones longer than 0.25 wl. Therefore, the obvious conclusion is to use as many radials as possible (with 120 being the practical cutoff point) and to make them as long as possible, even 10 wl if one owns a country.

Now, unless ON4UN has revised his statements since the first edition of the good book, my bases are covered.

73 & good dx ... Zoran WA7AA

At first I thought you might have been wrong on that, but I ran it through eznec comparing a gp with 4 radials compared to 2 radials, and the 4 radial version did have a slightly wider bandwidth. But the change seemed to be on the lower end. The antenna was set for appx 2m, and I scanned from 130-150 mhz. The 2:1 SWR point at the high end, stayed about the same for both, but the lower end 2:1 point was slightly lower in freq with the 4 radial version. So I guess you are right. When using 1/2 wave verticals and adding radial decoupling sections, the bandwidth decreases, and I thought the 1/4 gp's would act the same. I guess they don't. Kinda weird..I would have thought the behavior would be the same no matter what height. I've tested a bunch of 2m GP's with varying number of radials, but I never paid any attention to bandwidth. I was only interested in performance. I'll have to look at the bandwidth next time I do that again. MK

Band plan by regions is at:

http://www.arrl.org/FandES/field/regulations/news/part97/d-301.html#303

Basically, HF bands the same except for 40/80 meters,
40 meters in Region 3 stops at 7100.0, with SSB being
from 7075.0 to 7100.0 (for U.S. license, other countries
have different SSB allocations). 80 meters stops at
3900.0 instead of 4000.0

Very long radials do NOT lower the take-off angle. It only seems
that they do. They only reduce the ground loss at the very low
angles such as the ground wave.

> some other length or no particular length at all?

In addition to Reg's comments (which are very practical advice), what I have found works well, and corresponds with the technical and research pubs I have looked at is this:

1. 16 radials, 1/4 wave long at the lowest frequency (they are not resonant in the ground). Length is not critical (see next comment). A simple rule of thumb is all I'm trying to provide..16 @ 1/4 wave lowest operating frequency and you will probably be happy, for most circumstances. You can curve them (but not back on themselves), angle them, have differing lengths...whatever your property will permit.

2. More shorter, rather than fewer, longer radials is better, iow, 16 1/8 wave radials work better than 4 1/4 wave radials.

>
> The vertical I have is multiband and I have a few 1/4 wave
> radial wires for each band. They certainly seem to help
> lower the SWR and increase the SWR bandwidth. The soil
> below the antenna is not very good.

.

If I read you correctly, this is just the OPPOSITE of what you want. If your radials are doing what you want them to, your SWR should INCREASE with increasing numbers of radials, and your SWR bandwidth should DECREASE with increasing numbers of radials. It's a matter of efficiency, here's why:

The Z of a 1/4 vertical at resonance is approximately 37 ohms. That represents a 1.35:1 VSWR for 50 ohm coax. When your ground system is as efficient as it can be, you should see a Z of 37 and therefore a VSWR of 1.35:1 (Notice that you can also have this same vswr if your antenna is 67 ohms ...so it is possible to misinterpret vswr, but that is generally not a

problem with a 1/4 wave vertical)

If your vertical is showing a 1:1 VSWR without radials, or with just a few....what is happening?

You have ground losses that are making up for the difference between 37 ohms and 50 ohms...therefore your ground losses are 13 ohms...meaning your efficiency is terrible. Your bandwidth will "look" good, but your efficiency is terrible...because you have now placed a non-inductive resistor (read as dummy load/ground losses), in series with your antenna. The resistor is frequency insensitive, so it makes your SWR bandwidth look terrific...but it is a false positive.

Adding radials to a 1/4 wave ground mounted vertical should cause narrower bandwidth and higher vswr....BUT, MUCH HIGHER EFFICIENCY. You approach this "ideal" efficiency closely enough (within a couple dB) with 16 radials. You achieve it theoretically with 120 radials.

This is the mistake a lot of people make with verticals...they see a good match and really good bandwidth and are overjoyed. They shouldn't be. All it means is that a significant portion of their antenna is a RESISTOR, destroying the efficiency of the antenna system.

In Summary,

Forget the 1/4 wave for each band...use 1/4 wave for the lowest frequency and let the others take advantage per Reg's advice. Just be sure to use enough in number. No less than 16 for most soil, and 1/4 wave long at the lowest freq. More is better than fewer, More shorter is better than fewer longer. As I recall 32 will get you within 1.5 dB or so, but I don't have the info at my fingertips. What I impressed on my brain was 32 is nice, 16 acceptable...don't go lower if you can avoid it.

Hopes this helps ya, 73

But he specified a ground mounted vertical. If it is ground mounted then, what we all have been saying holds true, vswr goes up, vswr bandwidth goes down, with an improved ground system. (And I know you know it...just clarifying the point.

Quoting Hamish:

"So with a quarter-wave vertical antenna, with the feedpoint at ground level, what should I use for radials? None, 1/4 wave, some other length or no particular length at all?"

How do you elevate radials if the feedpoint is at ground level? <g>

As a general rule that may be true, but actually it still depends.
Bandwidth has a very unpredictable relationship with loss in complex
resonant systems. My small ground systems always seem to make the
system look inductive, so both resistance and reactance are changing.

It would depend on which changes faster as a percentage of system
impedance as the system is modified.

Both opinions are right:

1. The bandwidth decreases as loss decreases, and
2. The bandwidth sometimes increases and sometimes decreases as loss decreases.

It depends on whether and how you match the antenna.

Consider a vertical that's a little shorter than a quarter wavelength, so it has a radiation resistance of 25 ohms. If you put this over a perfect ground plane, you'd have just about zero 2:1 SWR bandwidth, because the antenna just hits 2:1 at resonance. As an exercise, I made a vertical with EZNEC that was 29.68 feet high, 1" diameter, at 7.0 MHz, with 20 segments. The feedpoint impedance over perfect ground was 25 - j67.17 ohms. At the base of the antenna I added a lossless 1.527 uH loading inductor, which has 67.17 ohms reactance at 7 MHz, to resonate the antenna at this frequency. At 7 MHz, the loaded antenna has a feedpoint impedance of very nearly 25 + j0 ohms. A lossless inductor is a reasonable approximation, since one with a realistic Q of 300 would have a series resistance of only 0.22 ohms, and I'll be adding a lot more than that for this example. Bandwidth was defined as the frequency range over which the SWR was 2:1 or less on a 50 ohm line connected to the antenna from a transmitter.

As the frequency moves away from 7 MHz, the resistance changes much less than the reactance, so the SWR is above 2:1 for nearly all frequencies. I say "nearly" because this is an example of an antenna that doesn't have the lowest SWR at resonance. For this antenna, the SWR dips below 2:1 between 7 and 7.1 MHz, for a 2:1 SWR bandwidth of 100 kHz. What you have is the usual cup-shaped SWR curve, but one that just touches or goes just a little below the 2:1 line. If I'd made the antenna just a little shorter for a lower radiation resistance, the 2:1 SWR bandwidth would have been zero, since the SWR curve would have been above the 2:1 line at all frequencies.

Now think for a minute what the 2:1 SWR bandwidth would be if this antenna had 75 ohms of ground resistance. At resonance, the feedpoint impedance would be 100 + j0. Because the total resistance changes less with frequency than it did before, the SWR bandwidth would be less than 100 kHz. In fact, it's very nearly zero -- the SWR curve just touches the 2:1 line at one frequency and is above it for all others. So the SWR bandwidth is small when there's zero loss, and nearly zero when there's 75 ohms of loss. Would the bandwidth be greater for some intermediate amount of ground resistance?

The answer is yes. With 40 ohms of ground resistance (simulated by adding 40 ohms of resistance to the base load), the bandwidth is at a maximum of about 900 kHz. It's 800 kHz with only 20 ohms of ground resistance, and 600 kHz with 10 ohms. With 50 ohms it's 850 kHz. So here's a case where increasing the ground resistance makes the bandwidth increase for a while, then makes it decrease if the resistance gets too big. Even though adding resistance makes the SWR curve wider, it also lowers it down below 2:1 -- until the loss reaches 25 ohms. Above 25 ohms, the curve rises as it widens with increasing loss resistance.

There is a way to make the SWR bandwidth increase as the loss resistance increases, though. What you have to do is transform the feedpoint impedance so that the SWR is 1:1 at resonance. For example, if you have 40 ohms of loss resistance, you need to transform the 65 ohms of feedpoint resistance at resonance to 50 ohms. A different transformation ratio is required for each loss resistance. The procedure would be to put a matching network at the feedpoint and adjust it for 50 + j0 at resonance. If you readjusted it after each change in loss resistance (e.g., adding radials), you'd find that the bandwidth would decrease as radials are added. This assumes that the Q of the matching network is much lower than the antenna, so it doesn't appreciably narrow the bandwidth. This can be simulated in the example with EZNEC by making the Alt SWR Z0 equal to 25 ohms plus the loss resistance, then looking at the SWR with this reference impedance. It shows a 2:1 SWR bandwidth of about 450 kHz with zero loss, monotonically increasing to 1.7 MHz with 75 ohms loss.

So, like so many other things, the answer is, "It depends."

That's right Mark, the cheater will cheat and those that don't cheat won't. The only difference between a eQSL and postal QSL is how it traveled to you. The steps getting there are the same.

> received (electronic) verification, just like eQSL. You can just print up a QSL card for that station on your own, no need to bother them with the hassle.

The eQSL site is nothing but an electronic QSL manager. It is more
than a QSL QSO because both operators have to do something. One
station has to send his log to eQSL (as with a QSL manager) and the
other has to collect it. The only difference is when the QSL is
printed.

> No one
> would know, so it's "valid," right?

Are these valid for DXCC Mark? If not, why not?

My neighbor Bill is a QSL manager for 14 DX stations. They Email him
their logs and he prints the QSL with the information as per the DX
log and then sends the cards out.

1. When I work any of these station I walk over to Bill's when he gets

the logs in Email and he prints out my QSL for me.

2. I have the same type of printer as Bill. Once he Entailed me the
data after he received the logs through email and I printed the QSL
card at my house.

3. Bill's printer broke. After receiving the logs through e-mail he
remotely printed the cards on my printer and I took mine out of the
pile before they were mailed off.

4. Bill was on vacation. With his permission I accessed his server and

pulled the data from one of the DX logs that he received through e-
mail and printed out my QSL.

5. Bill was on vacation. He paid me to fill in for him and I accessed
his server and pulled the data from the DX logs he received through
email and printed out all the QSLs. I pulled my QSL out and those of
the local club which I delivered that at the evening meeting. The rest
were mailed.

If I send my eQSL in for DXCC it is funny you would call it fraud. All
I have done is removed the costly error prone human QSL manager and
replaced it with a server QSL manager. Ask the DX station if the eQSL
card of his I printed is valid in his eyes. Can he verify it in his
log? He will say yes, after all he submitted his log to eQSL to make
it possible.
It's going to happen. The ARRL has embraced the electronic contest

entry and it is only logical the awards will follow. Rules for DXCC along with other awards will be amended that only electronic verifiable contacts will be accepted after 2010. Get over it and get used to or go through the same agonizing upset so many did over the CW change.

==========

Hasan, I'm not nitpicking. I know you don't believe in the
abracadabra magic 120. But you may have inadvertently given the
wrong impression to novices - not forgetting old-wives. Marzipan
the Magician?

"ideal" efficiency is 100 percent. Working efficiency continues to
increase long past the magic 120. But it never achieves 100% - not
even with 314,159.0 radials. In fact, if the radials are short
enough, or the soil has a high enough resistivity, efficiency may
not exceed 50% even with the magic 1,000,237 radials.

But if I have achieved 95% efficiency with 8 radials I don't go for
96% efficiency with 16 radials. How many contests will I win with
the extra 0.045 dedibels. That's less than 2% of an S-unit even on
Roy's S-meter. ;o) It's just not worth the trouble and expense.

Amen.

That large field of 120 radials is worthwhile to broadcasters for several reasons. One is that even a very small percentage increase in effective listening area due to a couple of extra percent efficiency means increased revenue for the life of the station, and the one-time cost of putting in more radials is small in terms of the big picture. Another is that the ground system impedance, therefore the antenna impedance, will stay put when the ground is wet or dry, so constant readjustment of the matching and, if applicable, phasing networks isn't necessary. Not least, of course, is that it's required by the FCC and presumably its counterparts elsewhere in the world -- but for good reasons.

AM broadcasters have different goals and requirements than most amateurs, so what's optimum for them isn't necessarily optimum for us. And this is one of those cases.

Reg,

You are absolutely correct. The problem lies in where one "decides" enough is enough!

Once we start saying 16 will do nicely and 32 is quite good, then 120 becomes a lot more than nearly everyone will require...hence my comments about "theoretical"....I should have chosen a better word, in that anything less than a solid plate or sea water will asymptotically approach the 100% efficiency point. I guess we could start a count-down, and that was your point, and it is well taken:

99=WOW
98=WOW-
97=WOW-,-
96=WOW-,-,-

anywho, you get my drift..90% or above is, to my mind, terrific. 75% is bare minimum to my mental health. 50% makes me nuts!

In my own thinking, for practical apps, if I can get within 1 to 2 dB of 100% ....I'm done digging! I don't think you get to where I'd like to be with 8, for most soil conditions...again, I'm going by foggy memory, because I developed my "rule of thumb" over the years, to be this:

1. No less than 16
2. No more than 32

and "Eight is Not Enough" (A very bad US TV show of many years ago, btw)

When efficiency drops by 3 dB....half my power warming the worms, it just doesn't sit well with me, even though the distant station may not notice. I notice and am neurotic enough to let it pester me <g>

Two things you said caught my attention, and I hope you will comment on them:

>.or the soil has a high enough resistivity, efficiency may
> not exceed 50% even with the magic 1,000,237 radials.

Are there any soil conditions where a solid plate of good conductivity 1/4 wave in radius would yield only 50% efficiency as a result of near field ground return losses? That one mystifies me.

>
> But if I have achieved 95% efficiency with 8 radials I don't go for
> 96% efficiency with 16 radials

From the Brown et al materials, I don't recall that over average soil only 8 radials would produce 95% efficiency. That's why I ended up with 16 in my rule of thumb.

Nice to hear from you, and no....I haven't joined the old wives club...at least not yet. 73

The manner in which ground radials behave with number, length, diameter and depth is approximated in programs EARTHRES, RADIOETH, ENDFEED, etc.

It's a waste of time and brain-power to imagine the word 'precision' has anything to do with ground electrodes. No-one knows the resistivity and permittivity and propagation velocity of the soil in his back yard to anything better than plus or minus 30 percent. And at HF it changes with weather and season and temperature and climate and frequency by that amount anyway.

Any figures outputed by Eznec and other programs which depend on inputted ground data, when applied to your own back yard should be taken with a large pinch of salt. Or Tennessee moonshine-on-rocks.

In this age of hand-held Auteks and 259B's you can learn more in 5 minutes about the behaviour of antenna grounds versus frequency than you can in years of reading the baffle-gab on newsgroups. For example, if you are fortunate enough to have a circular set of N radials and a 259B, why not divide the set into two semicircular sets of N/2 and measure the impedance between them. What have the handbooks led you to believe if anything.

Or bury a long wire 6 or 8 inches deep for starters, tread it firmly in, cut it in the middle and measure impedance vs frequency between the two halves, plot Z or R+jX on graph paper. Very instructive. Did you realise you have been measuring an underground dipole ?

But what's a couple of dB if you're not aware of it anyway ?
Ignorance really is bliss when it comes to RF ground electrodes.

Please don't cross-post. This does not belong on r.r.a.homebrew
or most of the other groups you posted to.

Followup set to: rec.radio.amateur.equipment

Mr. Miles,

I'm very sorry if I have offended you. I did not relies that cross posting
to more than one news group was considered spamming. OR IS IT?

I was simply trying a common sense approach to reach as many people as I
could with a one line question.Which by the way was answered by many,both by
postings and email.

Again thanks for your unkindly comments. I did ask for any and all.

From the ARRL Page at URL:
http://www.arrl.org/awards/dxcc/rules.html

q.Honor Roll: Attaining the DXCC Honor Roll represents the pinnacle of DX achievement:

i.Mixed -- To qualify, you must have a total confirmed entity count that places you among the numerical top ten DXCC entities total on the current DXCC List (example: if there are 334 current DXCC Entities, you must have at least 325 Entities confirmed).
NOTE IT SEZ CURRENT DXCC ENTITIES
i.Mixed -- To qualify, you must have a total confirmed entity count that places you among the numerical top ten DXCC entities total on the current DXCC List (example: if there are 334 current DXCC Entities, you must have at least 325 Entities confirmed).

ii.Phone -- same as Mixed.

iii.CW -- same as Mixed.

iv.RTTY -- same as Mixed.

To establish the number of DXCC entity credits needed to qualify for the Honor Roll, the maximum possible number of current entities available for credit is published monthly on the Members Only Web site. First-time Honor Roll members are recognized monthly on the Members Only Web site. Complete Honor Roll standings are published annually in QST, usually in the July issue. See DXCC notes in QST for specific information on qualifying for this Honor Roll standings list. Once recognized on this list or in a subsequent monthly update of new members, you retain your Honor Roll standing until the next standings list is published. In addition, Honor Roll members who have been listed in the previous Honor Roll listings or have gained Honor Roll status in a subsequent monthly listing are recognized in the DXCC Annual List. Honor Roll

qualifiers receive an Honor Roll endorsement sticker for their DXCC certificate and are

eligible for an Honor Roll lapel pin ($5) and an Honor Roll plaque ($35 plus
shipping).
Write the DXCC Desk for details or check out the Century Club Item Order Form
at
http://www.arrl.org/awards/dxcc/dxccitem.txt or
http://www.arrl.org/awards/dxcc/dxccitem.pdf.

From ARRL Page at URL:
http://www.arrl.org/awards/dxcc/dxcclist.txt

October 1, 2000 Edition -- Updated: 8/30/00
Current Entities Total: 334

Deleted entities are at URL:

Hello All.

I have gotten lots of e mails in the last few years requesting a QSO for Sequatchie County, TN. There are precious few active hams here, and only two (including me) that are even remotely active on HF.

I am moving 15 September 01, and will be QRT from this QTH 13 September....Last call, y'all !

RSVP direct to k4yz@aol.com, please. QRV on 40, 30, 20, 17 and 15 meters...10 is kind of "iffy". Sorry, can't get on 80 right now. CW or SSB ok, but no digital modes at present.

73

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 2/September, through Sunday, 9/September there were 223 countries active. Countries available: 3A, 3B8, 3B9, 3C, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE0A, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, E4, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J3, J6, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, SM, SP, SU, SV, SV5, SV9, T30, T33, T5, T7, T8, T9, TA, TF, TG, TI, TK, TL, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V4, V5, V6, V7, VE, VK, VK9N, VK9X, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XU, XX9, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK1/n, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3W, VIETNAM. Robert, N4CD, expects to be active in 3W6-land, October 2-15th. No callsign was mentioned. Activity will be on 20/15/10 meters and maybe 40 meters (No other bands possible at this time). QSL via N4CD CBA or via overseas bureau.

6Y, JAMAICA. Harry/AC8G, Richard/N6NR, ELSIE/N7YX, Ron/WA8LOW and Ron/W8ILC will activate 6Y6L as a Multi-Multi entry in the CQ WW SSB Contest, October 27-28th, from a site near Montego Bay. The group plans to have four complete stations with amplifiers and a selection of beams, verticals and dipoles. QSLs go to WA8LOW - SASE preferred. Do not send to the 6Y5 bureau. The group expects to begin limited activity under the operators home call/6Y5 by late October 23 using SSB, CW, PSK31 and may include 6 meters. QSL via the appropriate home call. Again, do not send QSLs to the 6Y5 bureau.

AUGUST DX REPORT. "August is usually a slow month DX wise and conditions aren't that great, stated Joe." However, Joe, W1JR, will tell you otherwise. Joe states, "Despite the above, I put on a new Yaesu FT-817 just 4 weeks ago and the latest tally is over 158 different DXCC entities and 35 zones (missed zones 3,4, 19, 30 and 38) worked. No help or nets or going from QRO to QRP! The antenna is a Hygain TH-11 up 20 meters. Contacts are split, very close to 50% for CW and SSB with over 90 worked on each mode! Not bad for 4.0 Watts!. DX is still alive and well."

BACK IN MARTINIQUE (FM5GU/I wrapped up!). Denis, FM5GU, informs OPDX and its readers that after 5 years of transmissions from Italy where he had to stay for his job, FM5GU has now wrapped up his Italian portable station and has returned to Martinique. From Italy he had logged tens of thousands of QSOs, with 227 DXCC countries, most of them barefoot with an incredibly simple station and a "bewitched wire" as antenna. All details on the "bewitched wire", the station in Italy and Martinique, the logs, his contesting and DX schedule, can be found on the Web site:
http://www.qsl.net/fm5gu
FM5GU wishes to thank all those who gave him a report. All QSLs direct via KU9C.

BV7, TAIWAN. NODXA's good friend Holger, DL7IO, informed OPDX that he was in Taiwan for 2 weeks a few weeks go on business. Because of the very short preparation time (received info 3 days before flight) he thought there was no hope to be active from there. Nevertheless, Holger was able to receive a license (TNX to BV5AF). He was able to find some hours of spare time and some BV ops (BV7FO & BV7GA) to operate some radio a little bit as BV7/DL7IO. Holger told your editor that he will go to Taiwan again on September 13th for another 1 or 2 weeks, and there is a good chance he'll be back on the air again for a few hours during his nights. This time Holger was able to prepare some antennas (40-17m) and will be on CW on the bands around 1400-1800z, if he can (because of QRL). His callsign will be BV7/DL7IO, and he will operate from Kaohsiung in southern Taiwan. QSL via DL7VRO.
PLEASE NOTE: Holger states Taiwan's 30 meter band is from 10130-10150 kHz. So one has to check the upper part of that band. Other suggested frequency ranges to look for him are:
17 meters - 18068-18080.5 and 18110-18112.5 kHz
12 meters - 24890-24902.5 and 24930-24942.5 kHz

C9, MOZAMBIQUE (IOTA Op). Babs/DL7AFS, Lot/DJ7ZG, Karl/DL2FAG and Simone/DL8GCS (IV3NVN) will operate between September 28th and October 13th from Inhaca Island (AF-066), Mozambique as C98DC. The group will be on 160-10 meters, including the WARC bands, using SSB, CW, RTTY and PSK31. Two and

possibly three stations will be used and when band openings are permitted, also 6 meters will be activated. QSOs with Babs will be specially signed to validate them for the YL-Awards. An online-log will be available after the DXpedition on their homepage. QSL C98DC via DL7AFS (bureau) or direct to: Babs Linge, Eichwaldstr. 86, 34123 Kassel, Germany Their web page for this operation is at: http://www.qsl.net/dl7afs/index.html

D4, CAPE VERDE. Xara, CT1EKF, has been active on the air with his new callsign D44TD and will be there until September 23rd (or possibly October 1st). Xara mainly likes 6 meters, but he has been active on 17/15/15/10 meters. Most of the activity seems to be between 1900-2300z, but he has been on as early as 1300z. QSL via CT1EKF.

DU, PHILLIPINES. Gerard, F2JD/PY0ZDX/HP1XBI/HK3JBR... etc, has packed his luggage again and has headed to the Phillipines for one year. He hopes to get a permission to operate.

DX MAGAZINE'S MOST WANTED SURVEY 2001. Carl, N4AA, editor of QRZ DX, announced this week the annual DX Magazine's Most Wanted Survey is now available on the DX Publishing Web site at:
http://www.dxpub.com/dx_survey2001.html
Please be careful when filling in the boxes at the top of the form so your reply will be counted in the proper time-zone/continent. The world-wide results of the 2000 Survey are posted on the web site under "DX News" and the continental/mode breakdown was published in The DX Magazine for January/February and March/April 2001. Carl hopes you will all participate in this survey as it is considered to be the most accurate survey of "Most Wanted."

E3, ERITREA. Chris/DL5NAM and Dieter/DF4RD inform OPDX that, "We are going to do it again!" After a very successful trip last year as E30TA they will go again this year as E30NA to Eritrea. Last year the two got many E-mails with questions for the low bands and CW, so they will double their team for this year to include Chris/DL5NAM (SSB,RTTY,6m), Dieter/ DF4RD (SSB/CW), Wolf/OE2VEL (low bands, SSB/CW) and Falk/DK7YY (low band, CW). The team will start on October 17th through November 3rd. The exact QTH has not been determined at the moment, however, they will try to go to the Dahlak Archipelago IOTA island group (AF-038). The problem at the moment is the power situation on the island and the high cost for shipping to the island. The only location on the island is under construction and should (!) be finished by the end of September. There is no ferry service, so they will have to charter a boat and will need a truck for transport from airport to the port (5 hour trip). If they can't go to the island they will stay again in the capital. The group must again pay 500 (USD) for each license. At the moment they have no big sponsors, as they have been told this is not rare enough. The group is asking the DX community for financial support. Anyone who can help support this operation is asked to please contact team leader Chris, DL5NAM, by E-mail to:
dl5nam@qsl.net
The emphasis this year will be for more North America, Asia, and the lowbands. A web site for E30NA will be coming soon to:

http://www.qsl.net/e30na

EA6, BALEARIC ISLANDS. Andree, DL8LAS, will be active from September 24th through October 8th from Menorca as EA6/DL8LAS. Activity will be on CW on 80-10 meters. QSL via Bureau.

EY10, TAJIKISTAN. Nodir, EY8MM, reports to watch for these two stations, EY10S and EY10T, to be active in September celebrating the 10th anniversary of Independence for Tajikistan. According to the cluster networks, most of the activity seems to be on 20/15 meters CW/SSB. QSL via DJ1MM.

FG, GUADELOUPE. Robert, N4CD, expects to be active as FG/N4CD, November 15-30th. His activity will be on all bands, CW and SSB. QSL via N4CD CBA or via overseas bureau.

FO, FRENCH POLYNESIA. Ghis, ON5NT, informed OPDX that he talked to Marcel, ON4QM, on the phone, and he will be on the road again (or we should say on the boat again, hi!). Marcel will be leaving Brussels on September 21st heading for Tahiti, French Polynesia. On this trip he expects to activate some IOTA islands in the Tuamotu Island Group: Nakupa IOTA OC-094, Hao IOTA OC-066, Pukapuka IOTA OC-062 and Hereheretue IOTA OC-052. Some transportation problems still have to be worked out upon his arrival in Tahiti. He expects to be on Napuka on September 26th. If he cannot get to Napuka he will go to Hao. For Hereheretue, confirmation of accomodation and local generator is OK, but he still has a lot of details to work out on how to get to this tiny island. His callsign will be FO0DEH, as usual, and QSL via his homecall ON4QM.

HA, HUNGARY. James, N1BCL, will be operating as HA/N1BCL from September 18th through October 12th. Activity will be on SSB, PSK31 and 80-10 meters. QSL to N1BCL.

HO, PANAMA. Wil. DJ7AA, informs OPDX that their group will be again active from September 22nd through October 8th, which includes the CQ/RJ RTTY Contest. They will be active before and after the contest on all modes and bands, also special modes (PSK31 etc) are possible. All RTTY QSLs from the 2000 Contest were mailed last month to the German QSL-Bureau, so they hope everyone get his/her card. There will also be a second station active outside the contest signing HP1/DL7CM. QSL HO1A via DL6MYL. QSL HP1/DL7CM via DL7CM.

IOTA NEWS.....
AF-066. Didier/F6ELE (CN2LE) and Bertrand/F6HKA (CN2KA) will be active from Mogador Island only if they receive the landing permission before they leave. The activity dates are September 15-16th.

AS-NEW. Alan, BA1DU, and BI4F team leader, reports that the team is making great efforts in order to be active from Furong Island which is located in 37 20'E, 119 48'N and belongs to Shandong Province Northwest Group in the IOTA program. Since the Island is used as a military bomb-dropping range, there are a lot of unexplosive bombs on the Island and it is very dangerous. To

insure team members' safety, an advance party which consists of Alan/BA1DU, Jerry/BA1FB and Chen/BA1HAM will head to the Island on September 5th, and will search the Island to see if it is safe enough for amateur radio activity. If everything is suitable, the rest of BI4F team members will arrive the Island on September 7th. They plan to operate until September 10th, using three stations and work on CW, SSB and RTTY on normal IOTA frequencies from 40-10 meters bands. QSL via operator's instruction. (Editor's Notes: This operation did start and is active with the new IOTA number AS-160.)

AS-123. Erminio/IZ8AJQ and Nando/IT9YRE will be active on SSB and CW from Bogzak Island from September 16-19th, with callsigns TA0/IZ8AJQ/P and TA0/IT9YRE/P. QSL cards via homecall.

EU-158. Operators Tiny/ON4CAT, Gulli/TF8GX, Fred/DL8DXL and Norby/LX1NO will be active from Flatey Island, September 12-19th. There will be two callsigns aired from the same location using the same equipment:
TF4RX (operated by Tiny and Gulli), QSL to K1WY or ON4CAT.
TF4/LX9EG (operated by Fred and Norby), QSL to LX1NO.
Their acitivity is planned to take place between 80-10 meters, using SSB and CW, maybe also some digital modes.

EU-170. Tibor, HA3HP, will activate the Island of Dugi Otok (CI-018) from September 8-15th. He also plans to operate next from the islands of Croatia: Arta Mala (CI-003), Arta Vela (CI-004), Murter (CI-074, No IOTA), Murvenjak (CI-075), Radelj (CI-097), Vrgada (CI-143) and Zminjak (CI-153) on September 16th (weather permitting).

EU-171. Knud, OZ2ZB, will activate the Jylland East and Fyn Group as OZ2ZB/p, September 13-15th. Other reference numbers are: DIA NJ-002, 003, 004, 007; plus ARLHS - LH Nr. DEN-064, 065, 079, 080, 073. QSL via the Bureau.

NA-217. John, K1FWE, will activate the Isles of Shoals (Star Island), September 15-16th. Activity will be on 40-10 meters including the WARC bands and on SSB/CW. Look for him on the IOTA QRG. He will use an IC781 with R7000 antenna. QSL via the Bureau.

J4, CRETE. Operator Salvatore/IK8UND and Luigi/IK8HCG will be active from IOTA EU-015 during the CQWW SSB Contest next October. Their callsign will be J49Z, and they will operate as a Multi/Single/All Bands entry.

JT, MONGOLIA. Karl, K4YT/DL4YT, and Ken, K4ZW, will fly to Beijing on September 16th, and then travel to Ulaan Baatar on September 19th to install a new Titanex vertical for 80/160m for Chak, JT1CO. They plan to operate with their own callsigns during their visit; JT1FZW and JT1FYT. QSL to their home callsigns. They plan to be there until September 28th. Once they install the new vertical for Chak, they are hoping he will give out more Zone 23s this winter on 80 and 160 meters. Karl states that

he worked him (Chak) this past December on 80 meters CW, but it was difficult from Virginia. With the new antenna, many more hams will be able to finish their 5BWAZ this season.

KH3, JOHNSTON ATOLL (OC-023). The final countdown has started for the K3J operation. Remember to look for Dan/KH6UW (leader), Mike/AL7KC, Bob/W7TSQ and Tom/K7ZZ to be active from here September 11-18th. The critical permission letter to visit the island has been received. Some of the equipment has already been shipped to the atoll. The four operators will take three full stations plus a barefoot rig with a six-meter beacon. Operations will be on 160-6 meters including the WARC bands using SSB and CW. There will be two 24-hour stations active with a third as needed. European contacts will be emphasized when band openings permit. Many people contributed to the success of the trip, but special thanks go to Force 12 for antenna support. QSL is via AH6HN. Visit their web site at: http://www.qsl.net/k3j

NP2/WP2, U.S. VIRGIN ISLANDS. Dennis, K7BV, will operate from the St. Croix Windwood's WP2Z QTH, November 21-25th. His activity will include entering the CQWW CW Contest in the Single Band 15 meter category. Look for NP2/K7BV to be used during most of the operation. QSL WP2Z and NP2/K7BV via Steve KU9C. Also, check out the web page: http://www.qth.com/Windwood

PJ2, CURACAO (Netherlands Antilles). Joeke, PA0VDV, will be active again as PJ2/PA0VDV, September 15th through October 12th. Activity will be CW only on the HF bands. QSL direct (Joeke van der Velde, Delleburen 1, 8421 RP Oldeberkoop, Netherlands) or via the Bureau. Please mention R14 on your card. QSL requests can also be made via E-mail, to: pa0vdv@planet.nl
Please do not send earlier than the second half of October. Answers on E-mail requests go out via the bureau.

QSL INFO AND NEWS.....
3Y0C QSL UPDATE. Mac, WA4FFW, states "that with the help of N4OL and WJ4T, all DX and all Stateside cards have been MAILED as of September 6th, except for the bureau cards. There are several hundred cards, some DX and some U.S., in which one or more QSOs did not appear in the computer log. Before returning those requests as "Not In The Log ", Mac wants to check these against the paper log. He did not want to slow the overall process by doing this as they were processing the other cards. This would have delayed all the cards. We are working on all those cards presently and are mailing them daily. So we ask that you give us some time to complete. Bureau cards and any further request will be processed immediately following NIL cards. We appreciate everyone's patience while we were processing the cards. We did them as fast as we were capable of and everyone owes N4OL and WJ4T a big thanks for all the hours and effort they put in to make it happen. Without their assistance the cards would have not been out as soon as they were."

Emir, 9A6AA, is back home in Zagreb from the Island of Losinj (EU-136, CI-058) after 77 days and 3000 QSOs. Last QSO he made was on September

3rd, 2001. From Losinj Island, he visited the Islands of Lunga (EU-110, CI-059), Sv. Juraj (NO IOTA, CI-115) and Galila (EU-136, CI-020, WLHA-0315). Note: Emir, 9A6AA, is member of IPA (International Police Association) and IOCA Manager.

Ghis, ON5NT, reports that he is receiving QSLs for a "9X1A" who was active mostly in September 2000. He doesn't know anything about this station and apparenty he gave a P.O.Box in Kigali. However, Ghis is the only QSL Manager for 9X1A for the CQ WPX Contest in May 1995. This was an operation by Mark, ON4WW (9X4WW).

A61AJ now has a new QSL route. Bernie, W3UR, Editor of "The Daily DX", states: "Due to a lack of time with my family and business I must step down as QSL manager for Ali, A61AJ. Joe Veras, N4QB, will now be handling the QSLing chores. He will have all logs for all QSOs made by A61AJ. Effective today (September 5th), all QSL requests need to go to N4QB. If you have already sent your request to W3UR they will be answered by me. Direct QSLs will go out this month. Bureau cards will go out by the end of the year. Any requests sent to W3UR after today will be forwarded to N4QB. The A61AJ Contest team will be very QRV over the next 3 months. Please help spread the word to your friends, clubs, news letters and magazines of this change." N4QB's address is: Joe Veras, P.O. Box 1041, Birmingham, AL 35201, USA.

Ron, AC7DX, informs OPDX that he is now the QSL Manager for LW9DAH.

Bert, PA1KW, QSL Manager, reports that the logs for LX9SW are now online at: http://www.qsl.net/pi4zut/lx/lx.htm

Alan, VK6CQ (aka VK0LD and VK0MM), reports that following discussions with the ARRL DXCC desk, VK0LD eQSL cards are now being personally authenticated for those that require these eQSLs for DXCC purposes. Check out the updated VK0LD web site for more details and to check whether your card has been received and processed. Alan will update the "processed" page each time he posts a batch of cards (about once a week). Use the following web pages for info:
http://www.geocities.com/vk0ld/1.html
http://www.geocities.com/vk0ld/qslinfoX.html

Lee, VP2VE, informs OPDX that he has a new QSL Manager WA2NHA:
Howard Messing, 90 Nellis Dr. Wayne NJ 07470.

There is special QSL information for sending a card to YN4SU. QSL to: Bengt Hallden, Domicilio Conocido, Nueva Guinea (Zelaya Central), Nicaragua (send registered air mail and IRCs are not accepted here).

T32, EAST KIRIBATI. Takashi/JR7TEQ, Hiro/JA1PCY and Hiro/JP1TRJ will be active from Christmas Island, October 1-7th. Activity will be on 160-6 meters and on SSB/CW/RTTY.

TA, TURKEY. Mill, LX1CC, will operate as YM3CC (special callsign) from Izmir (Selcuk-Pamucak) between September 15th and October 5th. He will be active on the HF bands (160, 80, 40, 20, 15, 10 meters), VHF/UHF

bands and the modes SSB, CW and FM. QSL via LX1CC.

TG, GUATEMALA. Toni, EA5RM, Radioaficionados-URE Magazine DX Editor, informs OPDX that the URE's "Radiosolidarity" group has received/confirmed the callsign TG0R by the autorithies, so all is ready for the Guatemala 2001 expedition. All their equipment has been tested in Spain and everything is working OK. They will be working on the installation of the Emergency Digital Network at the same time that they are doing the DXpedition. All the activities will be jointly done with the Club de Radioaficionados de Guatemala (CRAG). Their activity will take place September 17-26th. Operations will be on all the bands from 160-6 meters on SSB,CW and RTTY. QSL via EA4URE. Additional information, including an on-line log, can be found on the Web at: http://www.ure.es/

TI9, COCOS ISLAND. Henry/TI2HMG along with others to be announced soon, will be active as TI9M from February 4-16th. The licenses and permits are already secured. Activity will be on 160-6 meters including the WARC bands on CW/SSB/RTTY. An interesting Web site has been set up by Henry with maps, photos and detailed information about the operation and the island itself. We highly recommand a visit to the Web site at: http://www.qsl.net/ti2hmg/cocos.htm

W9DXCC. Just a reminder that the W9DXCC convention begins this week on Friday evening September 14th at the Holiday Inn in Rolling Meadows, Illinois - a northwest suburb of Chicago and convenient to O'Hare Airport. Join Carl, N4AA, and the gang at the DX Publications Welcome Reception at 7:30, followed by the Northern Illinois DX Association's hospitality suite at 10 PM. There is a full day of programs on Saturday followed by the traditional Dinner Banquet, including the DXCC countdown and Hog of the Year Award. Banquet speaker Bob Allphin, K4UEE, will review highlights from a career of award winning DXpeditions. Stay late and enjoy the Greater Milwaukee DX Association hospitality suite following the banquet. Details and on-line registration are on the Web at: http://www.qth.com/w9dxcc

YASME DX PRESS RELEASE (Manchester, Conn., USA, September 4, 2001).... DXCC Squared the Hard Way! The late Iris Colvin, W6QL, and Lloyd Colvin, W6KG, worked, confirmed, and received DXCC from more than 100 DXCC Countries, operating as a team. This fact has now been established as research continues on biographies of the Colvins. The biographies' author, Jim Cain, K1TN, continues to seek information, photos, and anecdotes on the Colvins and on the early (1950s) Yasme days. He can be reached at yasmebook@mybizz.net <mailto:yasmebook@mybizz.net> . "We've counted DXCCs from 109 DXCC countries so far," Cain said, "not including any of the dozens of DXCCs Lloyd and Iris achieved as individuals from California. Can anyone top this?"

ZK1, NORTH COOK ISLANDS (Update). Victor, ZK1CG, informs OPDX that their plans for Manihiki, North Cook Islands (OC-014), are almost complete; just the food, more fuel and antennas will be shipped sometime within a week. This will complete the shipments of gear and food for the six operators who will to be active in the CQ WW SSB Contest. Victor/ZK1CG, Roger/ZK1VVV (W7VV) and their host Tuatai/ZK1MA will fly to Manihiki on

October 18th to start setting up the antennas and do some testing for 24 hours before the contest. This effort will be the largest with the most antennas set-up for any North Cook operation in history. They want to make sure their score is something for other operators to take notice, and to make sure everyone has a chance to work North Cook on all the bands. They will be on Manihiki for 2 weeks with the main group for the contest, and then they will return to Rarotonga, South Cook (OC-013) for 2 to 3 weeks operating on all bands and modes. Victor reports that this is a costly expedition, so any donations would be a big help to the group. The group has donated to the Island a freezer and stove, plus gear for Tuatai/ZK1MA to be able to operate after the Atoll was hit by a hurricane a few years ago which wiped out his antennas and house. Donations can be sent to Roger, W7VV.

ZK1, NORTH COOK ISLANDS. Yuu/JR2KDN and Yasu/JI1NJC will be heading back to Penrhyn Island (OC-082), October 20th through November 3rd. They will receive their callsign upon their arrival. Activity will be on 160-6 meters using CW/SSB/RTTY/SSTV. They will have a beacon on 50.095 MHZ (breakable beacon) and will be listening on 50.145 and UP. Their equipment will be an IC-756PRO, IC-706, kilowatt AMP for HF and 6m, and atennas will be a Triband Yagi, R-7000, 5 element beam (6m) and Dipole/Vertical (160/80m). QSL via JR2KDN.

ZK1, NORTH COOK ISLANDS. Mike/KM9D and YL Jan/KF5TUG are now active as ZK1QMA and ZK1TUG, respectively, from Penrhyn Atoll (Tongareva Island), IOTA OC-082, until September 16th. Activity is expected to be on 160-10 meters including the WARC bands. Mike will be working mainly on CW, especially on the lower bands. Jan has been getting busy on SSB on the higher bands, especially on 15/10 meters after 1830z. QSL via OM2SA.

ZS, SOUTH AFRICA (Radio Ops To Operate From The Hell). Dennis, ZS4BS, informs OPDX that over the weekend of September 21-24th, twelve radio amateurs from the Western Cape will pack their equipment and make their way to "The Hell", where a special station will be erected. "The Hell" is also known as Gamkaskloof or Gamka's valley, and is situated in the Swartberg Mountains of the Southern Cape Province. [In the area between 33 deg 28 S, 21 deg 15 E and 33 deg 33 S, 21 deg 42 E.] An application has been made for the callsign ZS1HEL, and a special QSL card will be issued for contacts. The team will consist of Rassie/ZS1YT, Bob/ZR1BS, Clyde/ZS1CS, Bud/ZS1B, Johan/ZU1LR, Deon/ZR1DQ, Karl/ZS1KC, Willem/ZR1OR, Johan/ZS1WC, Alexander/ZR1BA, Martin/ZR1MH and Herman/ZS1HZ. It is hoped that many fellow hams will be able to make contact with this station in "The Hell". Information about the operating frequencies, modes and QSL information will be made available during next week.

From Texas with 100W into an attic dipole I've done Antarctica,
Argentina, Australia, Japan, and such. I realize that these
are not rare ones. But it does mean that I could be heard
by the rare ones if there were no pileups. Like that will happen!

Right place at the right time and bingo!

DX stations don't start out with a pileup. At first it's really quiet.
Then they hit the spotting nets and now you got a pileup.

Ouch, so you're going to be QRT during the Tennessee QSO Party next
weekend...

Anyone out there who needs any *other* TN counties should check it out.
1800-0100z next Sunday (going into early Monday UTC). I'll be activating
relatively rare Cheatham County, and several other rare ones can be counted
on to show up.

'fraid so, Doug. We got one of those "deals you can't refuse" on a house 2 minutes from the hospital in Winchester...AND..NO CC&R's! (Beats the 106 miles I am driving every day now!)

Will try to rig a dipole to throw out a few points along the way.

Heck, Franklin County is even rarer...

I may have found the one thing better than a house with no CC&Rs. I have two neighboring properties. One of them is entirely populated with horses & mules. (who don't watch much TV and don't think towers are ugly<grin>) The other is the stepdaughter of one ham, and the sister-in-law of another...

Good luck with the move. That's always a lot of work... Sometimes I think I'd rather drive 106 miles!

"Your" thoughts? At best, you've parroted words that you clearly
do not understand. You come here, ask a bunch of questions, and then
have the unmitigated gall to post that which you think you learned, but
do not understand, on a web page. By so doing, you fraudulently imply
and assume an expertise you do not have. And in so doing, you
propagate innaccuracies to the unsuspecting. Is that what you wish to
accomplish?

Your thoughts are right on the mark, but you forgot the fact that the web page he is using is a good example of the three or four WORST things one can do on a public site. He puts his "profound" plagiarism in format that many cannot read. He put a header up front telling visitors that if they are so stupid they dont have Word 2000, they should forget it. Clicking on most of the links will get you to a demo of some other program. Significantly, the logo for the demo is the front end of a horse- The other end would have also been appropriate.

Interesting situation here...

As of the time I am posting this, N1RZB had received a total of eight responses to his inquiry, and not one of them had anything to do with answering his question! Instead of helping the guy, everyone gripes and whines about cross-posting!

Yeah, I know that there are both written and unwritten rules of "netiquette", and perhaps N1RZB shouldn't have posted his query to some of the groups that he did post to. But perhaps we need to take a closer look at this. What's happened to the hobby? What's happened to hams being helpful to each other? Instead of getting an answer to his question, all he gets is bitched at by a bunch of self-appointed "interenet cops". We keep hearing that ham radio is "dying out". It's no wonder! When someone can't get a straight answer to a valid ham radio question, or get ANY answer in this case, it ain't hard to see why people aren't sticking with the hobby. I've heard it said that the internet is killing ham radio. This is a perfect example!

I wish I *could* give this gentleman an answer, but I really have no personal experience with six meters. I'm sure I'll be flamed for cross-posting this message, and for being one of the people who isn't giving the guy any help. At least I'm WILLING to help... I'm just not ABLE to help.

Actually,. I prefer "Papyrus Log" version 1.0. I have a right-handed hard drive with graphite, erasable memories.

Can accomodate almost an infinite number of variable entries.

Only $4.00 from the ARRL and most ham outlets.

I think these days he's referring primarily to "packet cluster". A
frequency or two on VHF/UHF (usually 2 meters) is host to a kind of chat
server. If a user reports a DX station, that information is forwarded to
all other users. The server in one area is linked to those in other areas,
allowing spotting over a very wide area. The frequencies used vary widely,
you'll need to inquire locally.

In many cases, these systems are also accessible over the Internet using a
telnet program. One in Finland has a web interface:
http://oh2aq.kolumbus.com/dxs . (yes, "Kolumbus")

Personally, I think they're pretty much useless as a real-time tool unless
you have high power and a large antenna. As William said, once a DX station
is reported on the system, the pileup is nearly instantaneous. (and often
contains quite a few callers who can't hear the DX...) Even with high
power, your chances of *hearing* the DX through the cacaphony are limited;
without it, your chances of being heard are pretty poor.

It's a good tool for informing you of new rare stations on the air, or the
operating habits of existing ones though. And for keeping track of
propagation.

Actually I was thinking Web Cluster when I typed spotting net, my bad.

Take a look at http://nc7j.qrq.com/clx/index.html as an example of
one.

On 10 meters you can do quite well with a modest station. Quite often
persistence and timing will win out over power. It can be quite
productive at times for the little guy.

Source record: 16043

Golly Doug - must respectively disagree. First for those working a job, raising a family, honey-dueing, etc, operating time is at premium. So for many, it is a valuable tool for catching a new one. Maybe one doesn't like DX by menu -- but it is a fact of DX life. Here in San Diego in addition to the Packet Cluster, there is DX announcements on one of our 220 MHz repeaters. Work honey-dues and listen to the DX anouncements all at the same time!

Next the biggest myth surrounding DXing is -- it takes a big antenna and amplifier to work DX after it is spotted on the cluster. Here in San Diego -- some experiences from "Little Pistols". 17M a few weeks back - packet cluster sez TA0/IK9YRE AT 0343 (after the band went out) -- took 3 calls. On 12M - packet sez HK5MQZ/)M Malpelo -- ONE CALL. On 10M HK5MQZ/)M Malpelo - two calls. VK9ML Mellish reef 10 M -- took an hour - but persistance will prevail. All of these were with a vertical and 100W to 600Watts. Some have worked more common DX (DU, 9M2, etc) in mobiles with a srewdriver antenna!!

Can't hear the DX -- Good DX operators operate split so you can almost always hear the DX if you have propagation. Hopefully the cops and uninformed will shut up.

And as for the DX summitt -- want to work Armenia EK ?? -- go to
http://oh2aq.kolumbus.com/dxs/oldlook.html?
Then click on "Spot Database Search" type in EK
get the operating times of EK stations -- be tuned up and ready at their operating times
THIS WORKS believe me.

In a nutshell - today ain't your Fathers (Hallicrafters) DX world -- things have changed -- logs and DXpedition freqs and skeds on the internet, DX Packet clusters, telnet, et al. If you don't have DX Packet capability, you are at the bottom of the DX food chain. Yes --- listen, listen, listen is still good advice if you have the time. Get em before they are announced on Packet - and you be the one to spot em.

But with 11 bands to check for DX -- well you better have lots of tuning time. And if you are at the 300 mark, you can listen for months and not hear a new one -- better have the word from News Letters, Packet or Telnet.

Conway Reef popped up yesterday with no advance announcement in any DX News Letters that I'm aware of - was on packet tho and a guy here worked em with a dipole at 32 feet and 100 Watts. Lucky you say -- luck had very little to do with it -- the local DXer is a top notch operator -- that and the packet spot made the "Luck"!!!!

Unlike you, Dean, I don't have any poignant predictions to make about the future of the hobby, but it is VERY clear what will happen to the newsgroups if people aren't discouraged from cross-posting to ten groups at once. THAT insight doesn't require any soul-searching at all.

What the original poster did was every bit as much a part of "the hobby" as tuning up a 2KW transmitter in the middle of the band without bothering to turn on his receiver first. Crossposting to 10 unrelated groups is an act that could only indicate careless naivete on the part of a newbie, or extreme discourtesy on the part of someone who should know better. A quick check of Mr. Moge's extensive posting history on Deja will reveal which of those two options is most likely to apply here.

Followups set to the appropriate group...

Hi all,
Hope you can help me.
I need a replacement internal speaker for a President HR-2510 and a Teaberry stalker IX (9 for those who don't do roman numerals) export. Can't remember the rating on the President speaker. That Stalker IX speaker is a 16 ohm 3 watt speaker that appears to be 2 1/2" or so from screw hole to screw hole. I think the one for a HR-2510 is the same size but I can't remember if it's 8 or 16 ohm... both are 3watt. Any help
tracking down good used ones or a source for new replacements are appreciated! -Jeremy 2-WA-076

Same yesterday with VK9XV; normally I don't do SSB anymore, but I know Bert PA3GIO sends these very beautiful cards...
I didn't know weather to laugh or to cry... After a couple minutes I gave up... If the DX-op says "ending alpha bravo again", you hear 10 stations shouting with the whole alphabet except alpha bravo in the call... Some fellows just like to tune for half a minute on the DX QRG, and start asking "who's the DX" in stead of just simple LISTENING... Oh well, luckily each ham is in his/her own shack - if we were together in a football arena, some people might get crushed by the enraged crowd...

Oh well, we've all heard these things a couple of times (too many)...

Not that these things do not happen in the CW portions of the bands, but I'd like to believe it's somewhat better (maybe due to the characteristics of the modulation and the qmaller amount of operators?).

Depends. I just checked the DX-Cluster for that specific callsign and found
no hint of a split-operation. In this case it's fair to call the DX-station
an <censored>.

>If the DX-op says "ending alpha bravo again", you hear 10 stations
>shouting with the whole alphabet except alpha bravo in the call... Some

It is very annoying, the DX is +10 and no problem but one station that has no timing at all in calling in a pileup just has to be +25. No way to hear who the DX is coming back to. You hope that the DX will work this guy soon.
Some of this is the DX stations fault. If he calls for an Alpha Bravo and several others call him and the DX picks up a Zulu Xray and works him, then the rest of the pileup hears this and then it gets even worse.
Getting good timing in a pile up is the best way to increase ones totals really.
I can't believe the pile ups on A71MA, I know he is loud, but you would think it was a top 10 country. Lots of fun anyway, once you work him for a new one.

From: AC6V <ac6v@amsat.org>
Message-ID: <3B9E1273.E5778456@amsat.org>
Source record: 15905

Some observations - the DX station has responsibilities here also.

1. When the DX station can pick out a full call on the first rush of calls -- the pileup develops a rhythm and it can avoid the incessant calling. No use to call a 2nd or 3rd time -- the DX station gets em on the first bang. Listen to the top DXers do this - masterful!

2. Work by continent, then district, then area if necessary to thin out the howling mob. Make it clear that those calling out of context will be on a "Black List". Here the DX should be aware of propagation patterns and work the W#'s before the propagation goes out, then catch the next area.

3. If a DX station can't manage and run the pileup efficiently -- then operate split! Or QSY and start another pileup. All them Packet chasers will have to wait til the next spot - hi hi. You and I will know how to find the new frequency or band!! And we don't spot em til we work em!!

In short -- if you create a pileup, then manage it, command it, the top dxers don't have a problem with this.

Some pileups are a pleasure to work, no matter how huge it gets, or how long it takes to get thru, when the DX station manages it efficiently.

So before you dump on the incessant callers, look at the way the pileup is being managed, the DX may be encourging this by poor DX pileup management.

My IRC's worth, never having been rare DX.

Deciding not to work split is asking for trouble all the way. Blame the
DX-station.

2467. WANTED: your thoughts on Yaesu FT-100 vs. Icom 706

Newsgroup: rec.radio.amateur.dx
Date: 2001-09-14 04:36:22 UTC
From: jason_hsu@my-deja.com
Message-ID: <f7d9a152.0109132036.eb7ecca@posting.google.com>
Source record: 15922
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.dx

I have a Kenwood TS-430S, and I have intended for some time to later replace it with the smaller Yaesu FT-100 or Icom 706. Due to a combination of factors (the need for portability in an emergency and the fact that my future as an engineer and my social life are so dependent on ham radio), I have decided to make the upgrade as soon as I find a new job.

The main reason I am interested in these two models: They provide capability on all of HF, 6m, 2m, and 70cm for only around $900.

What was the reason you chose the Yaesu FT-100 over the Icom 706 (or vice versa)? I'd like to understand the differences between the two. Which one tastes great, and which one is less filling?

P.S. Email me if you know anyone looking for an antenna engineer.

Jason Hsu, AG4DG

Glenn and Franki,

This Chuckles/sausage thread on rec.radio.amateur.dx has really been valuable to me as a DXer. I, along with the whole DX world, await the next tidbit of this thread, which enhances the enjoyment and education provided by our common hobby of amateur radio DXing.

Perhaps some DX club will copy all the exchanges and publish them in its newsletter.

73,
Jan, KX2A

Jan

You are absolutely right... From a DX point of view, this leads nowhere... That's why I myself chase DX on the AIR (preferrably HF bands) and not here...

When it comes to gathering DX info or discussing technical topics, there are more interesting ways and places (even on the WWW) to do it. What did you expect?
If someone asks a question here, most of the time there will be someone who answers like "what a stupid question" or "how did you get your license". It has come so far that some people put "newbe question" in the subject line, or start their message with "Please don't shoot me for asking this".

Oh well, there are other things in the world to worry about...

First of all: Who cares what you signed? Chuckles passes gas and you
appear, that is al that is important.

> And all I "wannabe" is just... NOT YOU...

Not to worry. Every time Chuckles passes gas, unlike me you are there
sniffing. NOT ME! You have succeeded Frank.

Looks like all you e-QSL detractors might be close to right concerning DXCC. You won't need a QSL at all just an entry in the Logbook of the World. QST says it should be on-line by this time next year or sooner. DXCC with no QSLs. Sweet!!!!!!!

Kerplop goes the E-QSL argument concerning DXCC.

Still ROFLMAO at the stick in the posterior group. I can just hear them howling now.

2477. FS: Ameritron AL-811 & Spare set of Tubes

Ameritron AL-811 & Spare Set of Tubes
This unit is just over a year old and in clean and perfect condition, no scratches dings or rubs. This unit has never failed or been serviced. It has been a non-smoking environment and ran conservatively (its rated at 600 watts and I ran it at 500). It has 10 meters enabled (just a wire cut on this model). It is wired for 110v and can easily be changed to 220v if that is your preference. The tubes are in perfect shape/full output. The price includes a spare set of new 811's. The original box and manual are included. If you like mint gear you will not be disappointed. Price $500 Oh, reason for selling: New Alpha finally arrived : -)

It is not new to get DXCC credit without a QSL - albeit it is new for it to be electronic. I had credit for a number of countries through entries in the DX Contest logs. You had to wait for the results to be published to verify that the station had sent a log and I think there was a limit on how many credits you could have for a given contest.

I didn't have any equipment (just got licensed) during the 2001 June (or July) VHF QSO contest this year...and I *just* missed the September one (the transverter literally came in the mail the Monday after...).

Are there any other contests where VHF'ers come out of the noise in great numbers? I'd like to start working on WAS, perhaps, and contests are a great way to raise the state totals.

Thanks for any help.

Jim

Yeah, well, the only thing that needs to be done now is to convince every single rare dx (generally from the countries where the running water means rain) to get a phone line, a computer with a modem, an Internet connection, and to upload their logs to the ARRL server on a regular basis. As an incentive, they'll get a huge reduction in the number of IRC's and dollar bills in the mail.

Yes, that will happen.

I'm afraid the next VHF contest is the VHF Sweepstakes, on January 19-21.

Do keep an ear on 6m though. We still have the winter E-skip season to
come, and some amount of skip seems to hit 50MHz just about any time of
year.

Probably. OTOH lots of people still will want that special QSL and are
going to shell out the bucks to get one in the mail.

> Yes, that will happen.

Yes, the Logbook of the World will happen and yes DXCC without QSL and
using electronic logs for verification will happen.

Like the no-code issue, it's a done deal. Like it or like it.

Oh, so now the manager will have an incentive in the form of a reduction in IRCs and dollar bills. That makes it a sure bet, then. I'm sure F6FNU, for example, will be tying up that ARRL server day and night.

> > As an incentive, they'll get a

I don't want to be a bad news bearer, but I believe the number is only to be used to report the cellphone and pager numbers of the people missing. I would leave the rescue effort to the professionals, especially since ham radio (or any other remote receiving system, for that matter) cannot be used for the purpose that you are suggesting. This aspect of the s&r is covered by the cellphone companies working in ground zero. Thanks for the suggestion, though. Btw, ham radio *is* helping in this emergency situation, as well as in any other. Just not in this particular way.

Hello OM ,

I want to "play" on PSK31 with my Icom 756-PRO but i've one problem :
When I transmit on PSK 31 (USB-D mode) there's a kind of distorted audio ,
" some little pieces are missing " .
Working on SSTV is working for 100 % .

73 , Hans , PA3HGT

I use the PRO for PSK31 all the time, taking audio in and out of the ACC(1) connector. I have not had any problems. Perhaps you have some RF getting into the computer or sound card.

2494. XP1AB - DXpedition to Grenland - looking for operators

Newsgroup: rec.radio.amateur.dx

DO YOU WANT YOUR EXPERIENCE OF YOUR LIFE?

JOIN THE XP1AB DXPEDITION AND FEEL/HEAR THE PILE UP FROM THE RIGHT END.

Join the XP1AB DXpedition to Sondrestrom. We leave Copenhagen Airport 24 October on 06.00 GMT and we are back in Copenhagen 31 October at 20.00 GMT.

The travel costs are on your own. The travel costs from Copenhagen Airport and back are approx. EUR 900 including hotel and 3 meals a day.

LET THE WORLD COME TO YOU.

We are QRV on all 6 contest bands during the CQWW SSB DX Contest on 27 and 28 October.
It is possible to work with own call/OX as soon as we are ready to go on air. Also on CW or RTTY.

You are

- A trained operators mainly SSB on HF.
- Used to use headset, foot switch and laptop for logging of QSO
- Speak at least English as well as your native language.
- Can travel in the mentioned period. It is also possible to travel form Copenhagen on Friday 26 October and back on 29 October. You can also travel from Canada.

ARE YOU SERIOS INTERESTED?

You can find details about the DXpedition on http://www.qsl.net/xp1ab

You can also contact me by E-mail jr@danamps.com, by phone (+45) 43 54 16 95 or by fax (+45) 43 53 16 95.

Please contact me as soon as possible.

Best 73 de OZ0J, Jorgen Romming

--
Now you have the change to work XP1AB.

XP1AB will be used during the CQWW SSB 2001 contest.

See details at http://www.qsl.net/xp1ab

Quitters never win - Winners never quit !!!
THERE CAN BE ONLY ONE !!!

Hans,

1. Make sure that the radio's speech processor is off.
2. Make sure that you use a 100:1 voltage divider in the line
from the sound card output to the radio's audio input. The five volts
out from the sound card is way too much for the radio, which is
expecting around 50 millivolts. The adjustment in Windows is far too
coarse to adjust to this level. It goes from too much to zero in one
jump.

73,
Jan, KX2A

SB DX @ WW < KB8NW $OPDX.529
Ohio/Penn DX Bulletin No. 529

The Ohio/Penn DX PacketCluster
DX Bulletin No. 529
BID: $OPDX.529
September 17, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, N1OLO, W3UR & The Daily DX, K4CY/9K2ZZ, K4VUD, K4ZW, N4AA & QRZ DX, K5JIM, W6OD, N7NG, K8CX, K8YSE, W8CNL, WB8YJF, W0GJ, DL1EK & DX News Letter, DL2OBF, FM5GU, JA1ELY, JI3DST, PA3HEP, PA0VHA, VK4AAR, YB1BOD and Ben Moses for the following DX information.

NOTE FROM THE EDITOR: The tragedy and terrorist act that took place in New York, September 11, 2001, will have an effect on everyone in years to come, especially the future youth of the world. Modern man (I use the term loosely after what has happen) has provided the world (by TV broadcasts) imagines that were horrifying. It is hard to believe that individuals would go to such great lengths to create such destruction and death. However, if the individuals who plotted this terrible act of terrorism think they have damaged the "American Spirit/Patriotism", they better think otherwise. Over the last several days, after reading my E-mail and messages from the DX Reflectors, I was "truly touched" by my fellow DXers/Amateurs from other countries expressing their condolences and outrage of this terrorist act. If anything, this tragedy has strenghtend the "American Spirit/Patriotism" and has bought the world closer together. Check out the following web site: http://uweb.ucsb.edu/~deter/thankyou.htm
My family would like to send our condolences to the families that have lost their loved ones in the World Trade Center tragedy and thank the many heroic individuals in their recuse work. Also, we would like to thank the many foreign individuals/amateurs/friends who expressed their condolences. Please pray for world peace and God bless America..... 73 de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 9/September, through Sunday, 16/September there were 218 countries active. Countries available: 3A, 3B8, 3C, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4U1I, 4W, 4X, 5A, 5B, 5N, 5R, 5U, 5Z, 6W, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, EA, EA6, EA8,

EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FO/a,
FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HK0/a,

ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As
always, you never know - "Work First Worry Later" (WFWL).

3B8, MAURITIUS. Jack/PA3BAG and Hans/PA0VHA will be active as 3B8/PA3BAG
and 3B8/PA0VHA from October 1-16th. Their activity will be on RTTY, PSK31,
CW and SSB on all bands including the WARC bands. QSL Manager for this
event is PA0VHA: Hans Vernhout, Ph.de Goedestraat 54, NL 3132 XR Vlaardingen,
The Netherlands. As members of the PI4CC contest group, see also their
home page at: http://www.pi4cc.nl

9K2USA, KUWAIT. Effective September 15th, the Kuwait Amateur Radio Society
(KARS), in conjunction with the Kuwait Ministry of Communications, has
authorized the use of the callsign 9K2USA. This single callsign 9K2USA
(NINE KILO TWO UNITED STATES of AMERICA) will be heard on all bands and
all modes and will be used by "all Kuwait Amateurs" simultaneously. As a
small token of the sympathy and support for the people of the United States
from the citizens of Kuwait, and as an expression of deep condolence,
the callsign will be used until the end of September. The Kuwait Amateur
Radio Society (KARS) will be doing the QSL chores. They will put together
a common database, and all QSLs will be via 9K2RA.

9L, SIERRA LEONE. Elmer, 9L1DX, a doctor working in Sierra Leone, is
expected to be there for the next two or three years. During his spare
time, look for him on 80/40/20/15/10 meters SSB. He was active during
the last week on 15 meters (between 21253 and 21300 kHz) at various times
(around 0030z, 1100z and 2345z). QSL via EA4CEN.

9M6, EAST MALAYSIA. Hein, DL2OBF, will be at the Hillview Gardens Resort
for this year's CQ WW DX SSB Contest. He will take part as 9M6A in the
Single Op/All Band/Assisted category. His operating time outside the
contest will be limited; some CW with a focus on the WARC bands is
possible. QSL via N2OO.

A2, BOSTWANA. Mako/JA1OEM and Toshi/JA1ELY will operate from Botswana
during the following schedule. Mako will operate between September 21st
and October 17th. His activity will be on 160-10 meters, SSB (limited
English)/CW. Toshi will operate between September 21-28th. His activity
will be on 80-10 meters SSB/CW/RTTY. They don't know what their callsigns
are, possibly A25/JA1OEM and A25/JA1ELY. QSL to homecall.
JA1OEM - Shinichi Toyofuku: P.O.Box 9, Sswara, 287-8691 JAPAN
JA1ELY - Toshikazu Kusano: P.O.Box 8, Kamata, Tokyo, 144-8691 JAPAN

A5, BHUTAN. Dr. Glenn Johnson, W0GJ, informs OPDX (in a long press release which will be sent to all OPDX InterNet Subscriber as an additional bulletin) that October 26, 2001, marks the inaugural day for the Bhutan Amateur Radio Club (BARC). The officers of the new club are:
President: Mr. Thinley Dorji
Director of the BTA
Ministry of Communications

Secretary: Mr. Phub Tshering,
Executive Engineer of the BTA

Member : Mr. Thinlay Wangchuck,
Ministry of Trade and Industry

Mr. Yasuo (Zorro) Miyazawa (JH1AJT) and Dr. Glenn Johnson (W0GJ) are Honorary/Founding Members, and have been issued special lifetime callsigns of A51A and A51B respectively. To celebrate the formation of the Bhutan Amateur Radio Club, A50A will be active as a multi-multi entry in the CQWW SSB Contest October 27-28th. A team of U.S. operators will be helping the licensed Bhutanese hams learn to operate in a contest environment from the Bhutan Ham Centre, operated by Yeshey Dorji, A51AA. Before and after the contest the U.S. hams will concentrate on the low bands, WARC bands and new modes. Expect A50A to be active in future contests and special events in Bhutan. Currently, here is the list of operators:
U.S. Operators: (Oct. 23 - Nov. 1) Bhutan Operators:
Dave Anderson, KW4DA - A52DA Yeshey Dorji, A51AA
Chuck Brady, N4BQW - A52CB Kesang Namgyel, A51KC
Pat Cahill, NOADQ - A52PC Parop Kinley, A51PK
Glenn Johnson, W0GJ - A51B Pema Rinzen, A51PR
Stewart Lewis, W0SHL - A52SL Dorji Yeshey, A51UD
Ken Nollet, K0EN - A52ED Ambika Gurung, A51YL
Steve Towle, W0HT - A52ST Wangpo Dorji, A51WD

QSL information for A50A: Bhutan Amateur Radio Club (BARC), P.O. Box 88 Thimphu, Bhutan (At least two green stamps required for return postage). Also, Bhutan is not set up to handle bureau cards yet. The American Team QSL information is via their home callsign. The Bhutanese operator's QSL information can be found on: http://www.qrz.com
To see more information on visiting Bhutan, check out the Web site: http://www.qsl.net/a51aa

DXCC NEWS. Wayne Mills, N7NG/1, Manager of the ARRL's Membership Services Department, reports: "Effective immediately, all applications for DXCC credit that are postmarked by September 30th, will be eligible for inclusion in the next Annual List. Applications do not need to be actually received in Newington by that date. All mail must show clear evidence of the posting date, or date of receipt by carriers other than the world postal system. This change should alleviate most problems arising from mail delays currently being reported. Applications will still be listed on the web as we receive them."

FM, MARTINIQUE. Operators and members of the Pordenone Gangsters Club, Andy/IV3BTY, Luke/IV3JVJ, Dan/IV3TDM, Leon/FM5DN, Dennis/FM5GU and

Lucien/FM5WD will be active as FM5GU in the CQWW SSB Contest as a Multi/Single entry. For details, check out the Web site: http://www.qsl.net/fm5gu

FO0/A, AUSTRAL ISLANDS. Jon/WB8YJF and Leo/K8PYD will be active from the Austral Islands, September 24th through October 3rd. There will be a heavy emphasis on RTTY. They will also be active on CW with some SSB. Their activity will include an entry in the CQWW RTTY Contest. Callsigns will be announced later (possibly FO0SEV and FO0FRY). Operations will be on 80-10 meters. They will use WB8YJF's callsign in the contest. QSLs go to home callsign direct, if possible (It is MUCH faster).

IOTA NEWS.....
AS-147. Takeshi, JE3DST, will be active from Okushiri Island (Okushiri-cho Okushiri-gun Hokkaidou) from September 22-25th, as JI3DST/8. Activity will be on 17/15/12/10/6 meters SSB. QSL via the Bureau ONLY (Please don't send QSL by Air mail.).

EU-128. Karl, DL1ZU, will activate the Schleswig-Holstein State East Group as DL1ZU/p, September 19th through October 7th. Activity will be on 80-10 meters on CW and PSK31. QSL via the homecall/bureau.

NA-136. John, N1OLO, informs OPDX that due to new restrictions placed on them by the island's owner, station N1EV will only be operating from Sheffield Island on September 30th, 1400-2100z. They will be operating on 15, 20, and 40 meters SSB. The modes CW/RTTY/PSK31 will be operated on a secondary basis. Please check the DX cluster for frequency and mode.

JT, MONGOLIA (Trip Cancelled). Ken, K4ZW, reports that "given the tragic events in the United States this week and the certainty of further action, the uncertainty of air travel out of Washington D.C., and the desires of our families, Karl/K4YT and I have decided to postpone our journey to Mongolia. It is our desire to complete this project in the near future once conditions dictate that it is prudent to do so. For those of you who have provided support for this effort, all the items have been procured and will be used towards their stated intent. Details regarding the rescheduling of our trip will be provided once they are known."

KC4, ANTARCTICA. Jim, WA2EUJ, who was active as KC4USV and working at McMurdo Station on their radio communications gear, indicated that he would be on the air as much as possible during the next few months. Jim is just one of several operators at KC4USV and states his QSL Manager is K1IED. Station KC4USV has been heard on or around 14203, 14250 or 18130 kHz, usually after 0000z and as late as 0800z.

KH3, JOHNSTON ATOLL. The K3J team finally made it to the Atoll after flight delays and clearance to fly due to the tragedy in New York. Their operation began September 14th. Operations are "expected" to end September 18th.

KH4, MIDWAY. Activity by KH4/DL7VFR and KH4/DL2RUM that was to take place September 20-29th, is now cancelled due to circumstances and tragedy in the USA (flights not assured, special security requirements on KH4).

LIGHTHOUSE ACTIVITY.....
Jim Buffington, K5JIM, Publicity Chairman for the Amateur Radio Lighthouse Society, reports that plans for "Lighthouse Christmas Lights 2001" have been announced by the Amateur Radio Lighthouse Society (ARLHS), sponsor of the special event. "It's not a contest, and you do NOT have to operate from a lighthouse in order to participate," said ARLHS President and Founder, Jim Weidner, K2JXW. "Christmas Lights" will take place from 0001z December 22, 2001, through 2359z January 2, 2002. Any and all modes can be used. Detailed information about the event, including suggested frequencies, can be found on the ARLHS Web site: http://www.arlhs.com
Certificates will be available for working five or more lighthouses or lightships, and for working ten or more ARLHS member stations.

LX, LUXEMBOURG. A group of Dutch radio amateurs will operate as LX9SW now through September 23rd. Activity will be on CW/SSB/RTTY on all bands, including the WARC bands. QSL via PA1KW, bureau ok. There will be an on-line log-search with info and links at:
http://www.qsl.net/pi4zut/lx/lx.htm

MU, GUERNSEY. Hein, DL2OBF, will be active in the CQ WW CW Contest as MU/DL2OBF. He will take part in the Single Op/All Band/Low Power category. There will be no operations outside the contest. QSL via DL2OBF.

QSL INFO AND NEWS.....
Larry, W6OD, reported that the QSLs and certificates for the Andorra "contest/anniversary" special event stations actived in March 2000 are being received. He received his on September 9th.

Charly, K4VUD, informed OPDX that he made over 4200 contacts over this past summer with his HS0ZCW callsign in Thailand. He had time to make only two contacts with his new India callsign, VU3CHE, but he did see the Taj Mahal and attend the Dalai Lama's birthday celebration in India. QSL via buro or direct to K4VUD.

SPECIAL THANKS. Alan, VK4AAR, states, "A word of thanks to the amateurs of the world who made it possible to donate around $20,000.00 (TO DATE) to the charity, Camp Quality, which works hard to make life a little more tolerable and pleasant for children suffering with cancer and other terminal illnesses. Surplus funds after postage stamps were bought made this possible. From the kids, Camp Quality, VK0MM and me..... thank you so much..... 73, Alan..VK4AAR."

T88, PALAU ISLAND. Nobu, JA7AYE, will operate as T88AY between September 20th and September 24th. Activity will be on 80-10 meters, SSB/CW. He will pay special attention for EU. QSL to homecall: Nobuyasu Hosaka, 98-118, Haramae, Oogawara, 989-1201 JAPAN.

XV, VIETNAM. Remember to look for Sam, JA1EUI, staying in Danang at the end of the week (September 21-28th). He hopes to sign XV3Z or XV3ZZ. His

activity will be on 80-6 meters SSB. QSL via JA1EUI: Satoru Matushima, 2469-5 Toda, Atugi, 243-0023, Japan.

YE, INDONESIA. Donny, YB1BOD, informs OPDX that the ORARI Lokal Bekasi Club station, YE1ZTC, will participate in the upcomming CQWW CW Contest and probably the Phone Contest. Last year they participate with the callsign YC1ZTC, however, shortly after they were granted the callsign YE1ZTC to enchance their DX operating (The Indonesian prefixes YC and YF prefix do not have privileges on 20 meter and the WARC bands). Their main bands for the contests will be the 15, 10 and 20 meters since they have marginal antennas on 160, 80 and 40 meters. They request to please lower your CW speed (25 - 30 wpm) since not all of their operators are used to contest style QSO (however they are training them). They will enter the contest as a Multi/Single entry. QSL cards should be either via the Bureau, the address listed on QRZ.COM or YB1BOD (who handles the cards for YE1ZTC).

ZL7, CHATHAM ISLANDS. Roger/G3SXW and Nigel/G3TXF are now active until September 23rd, as ZL7/homecall. Their activity will be CW only on the following suggested frequencies: 3503, 7003, 10103, 14023, 18073, 21023, 24893 and 28023 kHz (listening 1-3 kHz up). QSL via their home callsign, G3SXW and G3TXF. For more detailed information, check the Web page:
http://www.g3txf.com/dxtrip/zl7_g3txf/zl7.htm

I also might add that there are some interesting meteor showers that you can work on 6 meters. The Leonid shower in November is sometimes very good. When it is good the band can seem like a sporaid E openeing like it did in 1999.
There are really two ways to work meteor scatter. One is randomly and the other is to make a schedule with someone.
Look around the call frequency during the meteor shower and you should hear some people calling there.

Come on Walt, tell the truth. Most of the QSLs you receive from rare
DX stations are printed on palm leaves, bark or old Master Card junk
mail envelopes.

You don't have the Easter Island stone tablet QSL? Antarctic ice sheet
QSL? There's a place you find a dirt poor native population and poor
phone service!

CW is antiquated and replaced by much more efficient digital communications.
I would like to see the CW bands reduced in allocation by 90% to open up
SSB. CW contacts are few and far between, while SSB contacts are crowded.

2509. Special Event Station: "The Hell"

Newsgroup: rec.radio.amateur.dx
Date: 2001-09-19 08:56:47 UTC
From: Andrew Roos <andrew@exinet.co.za>
Message-ID: <3BA85DCF.D08F63B0@remove-this.qsl.net>
Source record: 15964
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur,rec.ham-radio,alt.ham-radio,alt.ham-radio.hf,alt.ham-radio.morse

South African radio amateurs will be operating a special event station with the callsign ZS1HELL from "Die Hell" from 16h00 UTC on Friday 21 September until 9h00 UTC on Monday 24 September.

Die Hell ("The Hell") is an extremely remote valley in the Swartberg mountains near Oudtshoorn. For many years it was thought to be uninhabited until about a hundred years ago when a completely self-contained and isolated population was discovered living in the valley. They remained cut off from the rest of the country until a road was built in 1960, but many areas remain accessible only on foot or by 4x4.

The special event station will issue a special QSL card to all contacts. The following frequencies will be used:

CW Phone
160m 1.834 1.834
80m 3.520 3.674
40m 7.020 7.080
20m 14.020 14.180
15m 21.020 21.280
10m 28.020 28.480

Two of the twelve operators are new amateurs so there will also be opportunites to work the station at slow morse speeds in the region of 10-15 w.p.m.

Hoping to work you from "Hell"
Andrew ZS1AN

Please NB that my reply email has been altered to prevent spam. The correct email address is my callsign at qsl.net.

On the other hand, if the SSB subbands were converted to CW only,
the reduced bandwidth requirement of CW would reduce congestion
dramatically.

That's why serious Dxers use CW effectively. Less QRM, less bandwidth, more Q's per hour. The recent K3J SSB operation was a mess of QRM and I never broke the SSB piles (1KW to Beam at 50 feet). But, CW contacts were completed in less than 2 minutes on 15 and 17 meters. My SSB contacts were early morning east coast on 20 and 12 meters before the piles.

I agree, lets get rid of SSB and use more efficient communications modes <grin>. Get with the program, CW is great! And YES it does take time and effort to become proficient.

I think that what should happen is we get rid of both CW and SSB and we all
go to PSK-31, which takes up less spectrum than a 13WPM CW signal.

In the real world, CW is good for passing information that is in a short,
predictable format like a contest exchange.
SSB is good for passing more complex information that is in a non
predictable format, like a rag chew contact.

As for PSK31, I quite often use a 500Hz CW filter because of problems with
not being able to turn off the AGC in my radio. I have more than once seen 4
PSK31 signals inside the bandpass of the CW filter, and none were bothering
each other. Not even CW with good operators could do that.

Actually it's gotten too easy. Time to go back to spark gap
transmitters. Let's use all the spectrum.

...and the neighbor thought he had a RFI problem.

BBBZZZZZZAAAAAAAAAPPPPP!

Well,

First let me apologize, this is not DX but I knew I could probably get a good answer here as DX'ers know the bands well.

My wife and I are Tech/Plus and are working on the General.

We have IC-706mkIIG's in the Cars and just purchased HS-1500's.

I will be working in IN, OH, MI while she is at home in IL.

I would think I would contacting her mostly in the evening, but some times during the day.

What is the best band for phone and Cw.

Hope to be ready for the test in about 2 weeks, working hard.

Ed

>
Speaking as another Seattle-area mediocre station, the Africans
can be some of the hardest areas for us to hit.

Patience is a virtue in this endeavor, and getting that A-3 up a little
higher will be of real value in the DX'n.

I have an A-3 myself, but currently I'm using an 80 meter dipole up
about 15 meters. The directive antenna is much preferred over
the non-directive.

Next time, when the other Seattle stations are giving the DX
5x9 reports, listen to see if they give a station description.
This happened to me once when 3W first came on. I listened
to the DX frequency and could hardly hear him. At that time
I had the A-3 at about 40 ft. One of the W7's from Seattle came
on and worked the DX with a reported 59 signal both ways.
Since I could not hear the DX, I was able to query the W7 via
the DX cluster. I asked him what kind of antenna he had.
The reply? Two 7 element mono banders stacked on 180 ft
tower.

Now, I don't feel so bad. The end result is that a big antenna
up high will beat a small one down low most every time.

Keep up your efforts and you will be rewarded.

DX IS!

Gary WG7X

I made a base station out of a mobile G&E CB radio and a 10 amp power supply. i have temporarily hooked up my TV antenna (no longer in use by me, we have satellite) and i can hear people 15 miles away with no trouble, but they can't hear me. i am getting an 18 ft. "big stick" antenna from my grandfather tomorrow, but i want to know what is available (that i can make, not buy) to boost the transmitting singal?

2531. TT8RH

Newsgroup: rec.radio.amateur.dx
Date: 2001-09-22 20:48:58 UTC
From: *n7ws@arrl.net
Message-ID: <3bacf7c2.20493514@news.triconet.org>
Source record: 15986

I worked TT8RH on 22 Jan 2001 and sent a card to the alleged manager F8BBT.

QRZ, Buckmaster, et al. do not have address for F8BBT. I located one via K4UTE:

Camboly Laurent; 3 allee de la Sambuy; 74000 Annecy; France.

This was just returned unopened from the French PO.

Has anyone received a QSL from this guy or have I worked another slim?

73,

Wes N7WS

2532. Re: Is the FCC doing anything about 10meter Freebanders.

Here is the search results from The daily DX archives...

==========
*** The Daily DX (c) ***
==========
Volume 5 Number 017
January 23, 2001
Edited by Bernie McClenny, W3UR

TT8RH - CHAD - This station was active on 21020 between 1245
and 1345Z and then on 14010 just after 1600Z. QSL via
F8BBT.

I realize this is of little help except it does seem to verify the correct
manager. With electronic qsl's (like I use) one never has these kinds of
issues....plus I have already saved over $1K (yes over $1,000) on
green-stamps,postage stamps and envelopes I didn't need to buy.....

CB operates on 11 meters. Your TV antenna was designed as a receiving antenna on a different band entirely, not as a transmitting antenna, so it might be a miracle that you haven't already cooked your radio. Get an antenna that was designed for CB.

Yes, I know he was active during this time, I *worked him*, remember.

Lots of sources give F8BBT as the manager but only one that I've found
gives a postal address and I think I've proved that was wrong.

So you're telling me that you have an eQSL from this station, right?

I didn't think so.

I happen to like getting real QSLs. I have a nice collection that I
can show to friends and neighbors and the foreign stamps go to the
little girl next door who collects them.

I also like good beer too, so I spend a lot of money on that. I know
that if I drank Keystone, I would have more change in my pocket. I
like fast cars too, so I have to buy premium gasoline for my Camaro.
I could buy a toy rice grinder and be money ahead, but I can't take it
with me.

Clearly you are more frugal than I, but "we pays our money and we
makes our choice."

Now, once again, do you have any worthwhile info on how I might get a
real QSL card from TT8RH?

N7WS
100% real QSL cards.
No packet
No DXcluster
No "Buddy contacts"

Hello Wes,

> I also like good beer too, so I spend a lot of money on that

That explains a lot Wes..have you been drinking beer today too?

>So you're telling me that you have an eQSL from this station, right?
>I didn't think so.

Your powers of perception fail miserably Wes...what I - did - say was that
I have saved over $1,000 in total qsl costs by going with electronic qsl's.
I'm sorry if my savings somehow offend you....

> I like fast cars too, so I have to buy premium gasoline for my Camaro.

Most mature adults long ago quit drinking and driving fast.....it's not
prudent behavior Wes....

>Now, once again, do you have any worthwhile info on how I might get a
>real QSL card from TT8RH?

Yes...I easily found this one within 30 seconds .... since you didn't
mention this one earlier perhaps this will work for you Wes....good luck and
keep collecting those 'real qsl cards' .....

Hello Rick,
I can relate to your thrill in getting the AP tonight..FB....great catch..and way to go!

For the longest time the VU was my "target country" and I was consumed with getting them on phone on any band. Finally got them one night and since have VU in the log 16 times on all high phone bands except 12m. Now I don't chase VU's any longer. After the VU quest it was AP and then for the longest time 9N until I also got them.

Now my "target country" is S2 (Bangladesh). Your obvious enthusiasm coupled with some tenacity and patience along with good listening skills and luck will get you those countries that currently seem elusive. Pakistan is a great snag.....now that you know your station can do the job it should help your confidence as a DX'er. Operating skill can be your secret weapon when face-to-face with some of the 'dx big guns'.....

For some really useful tips on DX'ing drop by The DX Page of my web site.....good luck OM!

hi there,

just got me self the yaesu ft-8100. and as most
people know, it has cross band capability on it.
im really interested in trying it with satellites. ok, i know its not multi
band and therefor limited to the ao-27 and iss, and the odd one or too. but
still, id really like the idea of getting a qsl card from the iss. basicly,
if i get into satellite working with fm, then it will make me get off me
arse and get a nice ft-207 or even better, a 726 :))). but i need lotsa info
about it. and software tracking for the pilot 5000 (palm os version 1.0.7
:( ) if poss. anyways, thanks if you can point in me the right direction. :)

Scott Elliott

September 24, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, W3UR & The Daily DX, N4AA & QRZ DX, K5YG, NH7A, WH7Y, K8AV, K8YSE, WB8YJF, DL1EK & DX News Letter, DL2VFR, G3SWH, HA1AG, I2UIY, IK1QBT, LU4EJ, ON4AME, OZ6OM & OZ 50 MHz DX Bulletin, PA0MIR, VA3RJ, VK4CP and YT1AD for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 16/September, through Sunday, 23/September there were 224 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4W, 4X, 5A, 5B, 5N, 5R, 5T, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE0A, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J2, J6, J7, JA, JT, JW, JX, JY, K, KG4, KH0, KH2, KH3, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, SM, SP, SU, SV, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TK, TL, TR, TT, UA, UA2, UA9, UK, UN, UR, V4, V5, V6, V7, V8, VE, VK, VK9C, VK9N, VP2V, VP5, VP6, VP8, VP9, VQ9, VR, VU, XE, XT, XU, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF,ZK1/n, ZK1/s, ZL, ZL7, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3B8, MAURITIUS. A couple of stations from here continue to be active on a few of the WARC bands. Taher, 3B8DB, generally hangs around 24896 kHz between 1115-1330z before he moves to 10 meters. Also, Abid, 3B8FG, can be found on 30 meters generally around 10105 kHz between 1300-1400z.

3D2, CONWAY REEF (Update/Reminder). Hrane, YT1AD, has sent out a press release (Nr. 2) containing the following information. The international

team of operators which include YT1AD, YU7AV, YU1DX, YU1AU, YZ7AA, N6TQA, RZ3AA and Z31FU/ZS6MG, are preparing for the big DXpedition to Conway Reef. Two callsigns will be used (to be announced the day of their operation), one for CW/RTTY and the other for SSB. They expect to arrive on the reef at 0700z, October 1st and operate until October 10th. Activity will be on 160-6 meters, in the DX windows, operating on CW/SSB/RTTY/PSK31 and possibly SSTV. QSLs for CW/RTTY go via YT1AD: Dr. Hrane Milosevic, 36 206 Vitanovac, Yugoslavia. QSLs for SSB go via Z32AU: Kostevski Dragan, P.O. Box 35, 6000 Ohrid, Macedonia. For up-to-date info, check the Web (after September 25th) at: http://www.kragujevac.co.yu/3d2

3W, VIETNAM. There was plenty of activity from this one during the past week. Hau, 3W2LI, from in Saigon, can usually be found on 15 meters (21270-21275) between 1300-1430z. Sam, 3W3ZZ, in Danan until September 28th, can also be found on 15 meters on various frequencies (21230, 21295, 21300 and 21360) between 1300-1400z and 0600-0730z. QSL via JA1EUI. Juergen, 3W9HRN, has been very active on 15/12/10 meters. Activity seems to be between 1100-1600z and as early as 0230z. QSL via DL1HRN.

5U, NIGER. The same crew that aired 5U2K, 5U3T and 5U5A in March of 2001 will go back to Niger in January/February of 2002 for a 2 week DXpedition. The group will be larger this time with participation of 3 to 4 new operators from Italy and USA. At least 3 stations will be put on air with special attention to 80/160 meters. Operations will take place on 160-10 meters on CW/SSB/RTTY/PSK31 and on 6 meters on CW/SSB. A dedicated Web page will be shortly put on-line, and it will include all the information about the upcoming activity. Callsigns (3) will be announced later.

9M6, EAST MALAYSIA. Two Japanese operators Mat/JA1JQJ and Kuni/JA8VE will be active between October 10-14th. They hope to receive the callsigns 9M6JQT and 9M6VET. Activity will be on 80-6 meters on CW/SSB. For CW, check 7 kHz from the low end of the band edge and on SSB, check the suggested frequencies: 3798, 7080, 14170, 18130, 21270, 24940, 28470 and 50120 kHz. QSL via homecalls.
JA1JQJ - Shigeo Matui, 2-31-10 Shimoseya, Yokohama, 246-0035 Japan.
JA8VE - Kunio Saito, 2-26-5-554 Nishituruma, Yamato, 242-0005 Japan.

9N, NEPAL. Operators Hiro/JA0BYS, Sato/JH0HDL and Mako/JI0LQJ will be in Kathmandu between September 24th and October 2nd. The group has applied for individual callsigns: 9N7BY, 9N7DL and 9N7QJ. They plan to operate on 80-10 meters and possibly 6 meters. QSLs all callsigns to JH0HDL.

A5, BHUTAN (Correction to OPDX.529). The correct listing of Bhutan operators are:
Yeshey Dorji, A51AA Pema Rinzen, A51PR
Kesang Namgyel, A51KC Dorji Yeshey, A51YL
Parop Kinley, A51PK Wangpo Dorji, A51WD

ARRL COMPUTER AND WEB SITE. We have been advised that the League's computer was hit by the new virus, and they have been working all week on it. This is the reason why the section, "List of DXCC Applications Received", seems to be stuck on September 18th. As of Sunday, September

23rd, the problem is almost cleared up.

C98, MOZAMBIQUE. Rei, C98RF, has been really active on 30/12/10 meters over the past week. Watch 12 meters 1100-1730z, 30 meters after 2100z and 10 meters very early after 0900z. QSL via DL6DQW.

CN, MOROCCO. Al, NH7A, informs OPDX that his CN2AC SOAB CQWW SSB Contest operation has been canceled due to the events on September 11th. He will instead operate from Maui as NH7A, SOAB in the contest. QSL via M0FCR.

ET, ETHIOPIA. Claudio, ET3VSC, has been pleasing many CW ops over the past week with activity on 12/10 meters. Look for him between 1830-2130z on either band. QSL via K3IRV.

FO & FO/A, FRENCH POLYNESIA AND AUSTRAL ISLANDS. Marcel, ON4QM, is signing FO0DEH again from French Polynesia and will be active between September 25th and October 25th. He plans to visit the Pukapuka Atoll (OC-062) and Rapa (OC-051) in the Austral Islands. There is a possibility he may also visit Reao Atoll (OC-238). QSL via ON4QM.

FO/A, AUSTRALS ISLANDS. Jon, WB8YJF, informs OPDX that Leo/K8PYD and he are postponing their DXpedition to Australs Island until the beginning of December, due to the events of the past two weeks and the chaos in the airline industry. Jon states their tickets are being re-written, and he will let us know when they find out the exact dates. Their operation will still have an emphasizies on RTTY.

FR/T, TROMELIN ISLAND. Jacques, FR5ZU, was heard signing FR5ZU/T this past week. His activity is expected to last until October 5th. He was heard on 17 meters between 1400-1500z and/or 15 meters 1400-1630z. QSL via JA8FCG

HC8, GALAPAGOS ISLANDS. Jon, N0JK, and a group of operators will be returning to the HC8N station on San Cristobal Island in the Galapagos, November 20-26th. They plan to participate in the CQ WW CW Contest. Their activity will be on HF and 6/2 meters as well as the satellites.

HS50, HUNGARY. Operators/members from the Hungarian's High Speed Club (HSC) (HA3OV/Anti, HA3NU/Lacy, HA1AG/Zoli etc.) will activate the HG50HSC callsign to commemorate the 50th anniversary of the High Speed Club. The HSC is dedicated to promoting High Speed Telegraphy for half of a century. The HSC contests of the past served as a cradle for several of today's contesters. QSL via the bureau (please indicate via HA1AG) or direct.
If you'd like to get your QSL via the bureau, just send an E-mail to:
ha1ag@compuserve.com
For more information, please visit their website at: http://www.hsc.de

IOTA NEWS.....
OC-108. John, YB5NOF, will be operating as YB5NOF/p on Anambas Island from now through September 26th. His activity will be SSB only running 100 watts into a R7 Cushcraft GP antenna. Try to look for him on 21260 and 14260 +/- kHz. QSL via YB5NOF:
John E.Daluas, P.O.Box 194/CPA, Ciputat 15401, INDONESIA.

IOTA TRIP. Nico, PA0MIR, will try to leave the Netherlands on October 8th and will try to operate in the WAG Contest with the callsign ZL1/PA0MIR (OC-201) and in the CQWW Contest with ZL3/PA0MIR. He will be active from OC-134 or OC-203 and from the different ZL regions until November 8th. From ZL-land, he will fly to Australia. Using the callsign VK3FEI/*, he will try to operate from OC-001, OC-006, OC-233 and OC-136. Other IOTAs are not yet determined, but he will remain in the region until March. Operation will also be tried from Lord Howe or from Norfolk Island if transport can be arranged. A trip to Fiji (3D2) is also planned too. Nico ask you for real reports (no standard 59(9)) except in the contests. QSL for all operations will be taken care of on his return, via PA0MIR: Nico van der Bijl, Lepelblad 129, NL 1441 VH Purmerend, The Netherlands. SWL-reports should contain at least 3 stations worked at the time/band reported. This is not a large-scale operation, but a single-operator with 100 watts using either a mobile vertical or dipoles. His operation time will be concentrated on the times for openings to EU.

JD, OGASAWARA. Operators JD1BKZ and JM1MKB/JD1 have been active on 6 meters from AS-031 (QL17CC). They will be there for the next 3-5 years. Their equipment is a TS-690S and "hat-hentena". QSL both JD1BKZ and JM1MKB/JD1 via the bureau. However, Yoshi, JE2DWZ, reports that if you need QSL faster than the bureau, you can QSL to JE2DWZ with a SAE and sufficient USD or IRC. He will be pleased to handle your QSL as a QSL Manager. Their QSL cards will be printed soon. JE2DWZ's address is: Yoshiyuki Mori, 20-16 Takiko-cho, Showa Nagoya, 466-0053 JAPAN.

KH6, HAWAII (Morocco Op Cancelled). Al, NH7A, informs OPDX that his CN2AC SOAB CQWW SSB Contest operation has been canceled due to the events of September 11th. He will instead operate from Maui as NH7A, SOAB in the contest. QSL via M0FCR.

LS2, VERDE ISLAND (Argentina). Radio Club Mar Del Plata (LU2DT) will activate Verde Island, November 23-25th, for the first time ever using the callsign LS2D. Verde Island is located 40 miles south from Bahia Blanca, Argentina, in the Atlantic Ocean. Suggested frequencies are:
CW - 3510, 7005, 14020, 21020, 28020 and 50110
SSB - 3680, 7080, 14190, 21290, 28400 and 50110 kHz.

OD, LEBANON. Pavel, OD5/OK1MU, provided some interesting activity this past week on 10 meters FM and the WARC bands. Watch around 29450 kHz beginning about 1400z. Also, look for him on 17 meters (around 18083 or 18160) after 1500z and again after 2030z. On 30 meters, try around 2230z. QSL via OK1TN.

OH0, ALAND ISLANDS. Pentti (aka Ben), OH3TY, will be active as OH0/OH3TY starting on September 24th. His activity will be mainly on 10 meters. Look for him to sign OH0HEY in the CQWW RTTY Contest. QSL via OH3TY, direct or the bureau is OK.

QSL INFO AND NEWS.....
Phil Whitchurch, G3SWH, informs OPDX that as a result of his recent visit to Madagascar and meetings with the local hams there, Phil is now the QSL Manager for the following Madagascar stations:

5R8FL, 5R8FT, 5R8FV, 5R8GO and 5R8GZ.

Mariano, EA9LS, informs OPDX that the log for his 2001 WAE SSB Contest operation is available on the Web at: http://dx.qsl.net/logs

QSL cards for Tony's recent TK/IK1QBT/p activity from Corsica (IOTA EU-014, DIFM TK-01) can be sent direct to: Tony Gallo, Via Capo S. Spirito 1/16, 17052 Borghetto S. Spirito - SV, Italy (or through the bureau). Pictures and logs at available at: http://www.qsl.net/ik1qbt

SPECIAL EVENT. Herman, ON4AME, announces that he will be active the weekend of September 28-30th, using the special callsign OS0TIB. This is to celebrate the 25th anniversary of the Metro in Brussels. For a special QSL card send it to the QSL Manager Eric, ON7RN.

SU, EGYPT. Said, SU1SK, was heard on 12 meters SSB and 10 meters FM this past week. Watch around 24945 or 24948 kHz after 1600z. Also, look him around 29350 kHz 0815z. QSL via direct to CBA. Ahmed, SU3AM, has also been active. His activity has been on 17/15/10 meters SSB mainly between 1600-1700z (also after 0830z). Watch frequencies 18150, 21303 and 28460 kHz. QSL via DL5ZBV.

TR, GABON. Jean-Claude, TR8XX, has been active on 17/12/10 meters CW. Watch 18082, 24905 and 28010 kHz between 1530-1730z. QSL via F2XX.

TT8, CHAD. Chris, TT8DX, was heard on 18150 kHz around 1800z. QSLs go to F5OGL. Paco, TT8FC, was heard begging for QSOs on 10 meters this past weekend. Watch 28470 kHz around 2130z. QSL via EA4AHK.

VP5, TURKS & CAICOS ISLANDS. Bill, VP5/K5GY has cancelled his trip to Providenciales. VP5YG will not be active during the CQ/WW RTTY Contest at the end of September.

VK, AUSTRALIA. Remember to look for Bert, PA3GIO, to be active as VK6GIO now through October 8th before his operation from Lord Howe Island. His activity will be very limited. He may have a chances to operate from Kangaroo Island (OC-139) using the callsign VK6GIO/5.

XU, CAMBODIA. Claude, XU7ABN, has been pleasing the digital guys by operating on RTTY and PSK31. His activity has been on 20 meters between 1830-1930z and on 15 meters around 1330z. QSL via F5JRY.

Excerpts and distribution of The OPDX Bulletin are granted as long as
KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS
online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with
the Sysop or send via InterNet Mail to:
kb8nw@barf80.nshore.org - OR - kb8nw@arrl.net
Use the VOICE or FAX answering machine at 440-237-8208 which shares the
same phone line as BARF-80 BBS using a data/fax/phone switch. To access:
1) Dial Number. 2) Wait for first ring (the second ring should be a false
ring from the fax/data switch box) and then dial four quick ones ("1111").
(NOTE: Some FAX machines that send single "BEEPS" every second will not
have to do this step.) 3) The phone will pick up and after the "BEEP"
leave your voice message or FAX.

2547. QSL Route for VK6CZ

Newsgroup: rec.radio.amateur.dx
Date: 2001-09-24 21:37:01 UTC
From: "Richard L. Dunklee, Jr." <rdunklee@att.net>
Message-ID: <3BAFA770.668D2C11@att.net>
Source record: 15802

Iworked VK6CZ, Christmas Island during the IARU contest. Sent a QSL to his address shown on qrz.com and buckmaster.com and it came back today as having moved. Anyone have a better address?

Address shown on qrz.com and Buckmaster.com:
Dennis O. Hardie
PO Box 577
Christmas Island, WA 6798
Australia

I hope the station I worked was not a pirate! I searched qsl.net and the Daily DX web sites for a qsl manager.

Richard L. Dunklee, Jr.

Hi Richard,

The prefix for the DXCC entity, Christmas Island, is VK9X. VK6 is part of Australia. Not sure why his address is listed as Christmas Island, WA (Western Australia) but I doubt he was operating from Christmas Island, the DXCC entity, with a VK6 call.

Anyway, the Austrailian Licensing Authority says:

Client_no: 197533
Name: Dennis O Hardie
Postal Address: 47 Toorak Rd
Suburb: RIVERVALE State: WA Postcode: 6103

73, Jim KH2D

Hi Rick,

Try VU on 20m long path .... about 1400 to 1530 GMT (1930 to 2100 local VU time). Usually We get K6 / W6s during this time. Conditions seems to be ok for a barefoot station with a "Normal Antenna" because that is what I have .

See you on 14 MHz...

Rahul - VU3RAZ

> Hi,
> can somebody explain to me why high frequencies have small wavelengths?

Walk down a path with a handful of pebbles. Drop 1 pebble each second. Measure how far apart they land. Now do the
same thing, but drop 2 stones per second (1/2 second apart). Measure how far apart they land. As the frequency at which
you drop the stones goes up, the wavelength (distance apart) shortens.

The same thing applies to radio waves, for exactly the same reason, only instead of walking speed, it's at the speed of light,
and instead of pebbles being dropped, it's electromagnetic waves vibrating.

2561. Re: Wavelength

Newsgroup: rec.radio.amateur.dx
Date: 2001-09-25 22:48:21 UTC
From: AC6V <ac6v@amsat.org>
Message-ID: <3BB109B5.8B850975@amsat.org>
Source record: 15815

The term "wavelength" is left over from the early days of radio. Back then, frequencies were
measured in terms of the distance between the peaks of two consecutive cycles of a radio wave
instead of the number of cycles per second.

From the formula for wavelength:
wavelength = 300 / frequency in MHz

So 28 MHz is a wavelength of 10.71 meters
and a frequency of 50 Mhz is a wavelength of 6 meters

So as you increase the denominator of an equation (freq) the otherside of the equation goes down (wavelength)

According to this formula, a frequency of 9680 kHz would be equivalent to a wavelength of 30.99 meters, which we would round to 31 meters. Thus, 9680 kHz, 9.68 MHz, and 31 meters all refer to the same operating frequency!

As the formula indicates, the wavelength of a radio signal decreases as its frequency increases.

Or if you prefer frequency is cycles per second and the more cycles you jam into a second of time - the shorter the distance between them - wavelength.

Maybe this will help with the distinction of a mail list and a newsgroup
and "subscribing".

News Groups fall into two categories moderated and unmoderated. In an
unmoderated
newsgroup, the local news server makes posted messages available for
reading as soon as they are posted. In a
moderated newsgroup, the local news server automatically e-mails the
message to a moderation address, where a
moderator acts as a gatekeeper, posting to the newsgroup only those
messages which the moderator feels is
appropriate, thus censoring non-relevant posts and garbage. News Groups
are also known as Use Groups.

For both types of NewsGroups, topics such as ("rec.radio.amateur.dx")
are posted to the world, for anyone to
read or post there. You do not have to subscribe to a newsgroup or send
anyone your E-Mail address -- just make
it active in your browser newsgroup function. See HELP in the Browser
menu. This shows how to invoke a newsgroup server and add the desired
newsgroups.

On the other hand -- you do have to subscribe to a "Mail List" aka
"Reflector" aka "E-Mail Newsletter"??? One of the wonders of the
internet is the
"Reflector" as it is a method of mailing and receiving specific topic
information to/from a select group of folks
interested in a specific discipline. You must subscribe to a Reflector,
Mail List, or E-Mail Newsletter. Typically
you have to send them your e-mail address (callsign in some cases) and
register. For Mail Lists -- see URL:
MailList

The following is an opportunity for the VHF/UHF enthusiast to make some unusual contacts. The Aurora activity, which may be seen as far south as Alabama when the moon sets early in the morning, may provide some VHF/UHF propagation activity you normaly do not get to participate in. While it will probably hinder HF, it may enhance and distort VHF/UHF activity.

For those of us who have not participated in such before, some guidelines are;

Point your antenna north
Sporatic contacts from a few seconds to 15 seconds may be heard
Throw your call sign out several times in a row, rapidly, such as W4CUE W4CUE W4CUE 599 AL
The station you may contact may be offset as much as 2KC or 3KC from where you hear him because of the Aurora

Most copies of the "Radio Handbook" by Editors and Engineers have plans in the "Broadside Arrays" section of the main antenna chapter (I'm looking in a 1949 version right now.) I remember reading an old article from a 1960's CQ Magazine that had an article about them, too, and it went into more detail, but I don't have any idea which issue.

I looked up the design info after hearing the big signal that a UA0 had on 20-Meters back in the early 1970's.

If you don't have the book, send me an SASE (to my QRZ.com address) and I'll send you a copy (it's not much, but will give you an idea of what's involved.) The diagram shows "6dB and 8dB gain version" Sterba Curtain Arrays. I believe it's one of those antennas that you can keep adding sections, only limited by the supports and available real estate (and $$$).

Larry K7LJ
(who visited W1AW yesterday and hoped to see one of the old rhombics that used to be pointed at the West Coast, but the rhombics have all been replaced by big towers and yagis.)

NY/NJ/PA (Radio) Octoberfest

Fellow Radio Aficionados!

You are all invited to (Radio) Octoberfest at Verkhovyna Mountainview Resort in Glen Spey, NY (NY,NJ,PA tri-state area) hosted by the Tesla Radioclub and Ukrainian-American Cultural Foundation - UACF on October 6, 2001, starting at noon till ???

Come and have fun meeting other hams, DXers, contesters, while having good time and drinking Octoberfest beer. Enjoy Ukrainian and German food, listen or dance to endless polka's. Wear your badge, hat or shirt with callsign proud and meet other radio aficionados around the "radio" table.

140 acre Verkhovyna resort is the new home to Tesla Radioclub N2EE station. Join the semi-serious discussion of how many towers do we need to put up there. Come, join the club and get a free beer.

Directions:
Take Hwy. 84 to Port Jervis, NY, NY exit 1; follow Rt. 6 through Port Jervis to traffic light with Rt. 87/42 signs, go through and follow Rt. 97 west for 10.8 miles to Pond Eddy (motel on right, bridge on left), turn right onto High Rd. (Rt. 41), go up the steep hill for 1.7 miles, Verkhovyna is on the left. Plenty of parking.
Maps are at www.UACF.net home page.

See you all there and join us yodeling in Morse code :-)
Nazdorovya, Prosit!

Yuri, K3BU
pres. Tesla Radioclub

Ooops, correction:

Take Hwy. 84 to Port Jervis, NY, NY exit 1; follow Rt. 6 through Port Jervis to traffic light with Rt. 97/42 signs, go through and follow Rt. 97 west for 10.8 miles to Pond Eddy (motel on right, bridge on left), turn right onto High Rd. (Rt. 41), go up the steep hill for 1.7 miles, Verkhovyna is on the left. Plenty of parking.
Maps are at www.UACF.net home page, click on directions.

|and drinking Octoberfest beer.

Tut tut Yuri,

AB7SL doesn't want you talking about having fun and beer drinking (is that redundant?) on this newsgroup. It isn't "mature" don't you know.

Shamelessly hyping some "maximum performance" commercial antenna is okay tho.

Have fun. I wish I could make it but it's a bit far from Arizona.

73,

If you're in any grade above elementary school grade six, you should repeat that particular grade. And maybe a few before it.

The Icom 706 is the best 6 meter rig available.

It has Subaudible tone encode and decode built in

Also, I found out that the hustler mobile antenna resonates exactly in the
middle of the 6 meter band with no coil installed.

Have fun.

2580. Looking for Native American Hams

Newsgroup: rec.radio.amateur.dx
Date: 2001-09-28 02:02:39 UTC
From: Kent <kwinrich@wi.rr.com>
Message-ID: <3TQs7.34718$ME2.3414470@typhoon.kc.rr.com>
Source record: 15835

I have a step son that is studying Native Americans in his 5th grade class.
I was hoping to be able to find a few Native American Hams that would be
willing to talk to the class and field questions they may have. We are
especially interested in Inuit, Clinket, Mayan tribes. We would do this
from their class (could be a good demo of HAM radio too!!)

Anyone out there that can lead me in the correct direction??

THANKS!!

Kent, K9EZ
Waukesha, WI

2581. 5A1A QSL Route

From: alleycat@nym.alias.net
Message-ID: <MQRs7.12108$Tu4.2828140@ratbert.tds.net>
Source record: 15836

I posted the following information I received via e-mail from 5A1A on July 28, 2001. Per Abubaker's instructions, I sent my QSL registered with $2 enclosed in a plain, white envelope with no reference to amateur radio on the outside on August 3. Today, September 27, I received his QSL in return. I had tried other routes twice, including the $2 and did not receive a reply. Sure, the cost of registered mail is a little high, but I am very happy to add this QSL to my collection. I do not begrudge the costs, and I will say a "thank you" to Abubaker for putting forth the effort to find a way to get cards in and out of his country.

Received this via e-mail, thought I would share it with the group:

I worked him on April 16, and have not received a card back as yet, however,
I think that I remember seeing this call listed in either OPDX or 425DX a
couple of weeks ago in their 'cards have been received from' announcements.

What the hell are you all talking about??!!??

Racism??!!?? All I am trying to do is find out if there are any Indian hams out there that would like to talk to some 5th graders about their experiences, history and lifestyle.

Has this hobby and this board gotten that low that a simple request for help gets tied up into all of your political garbage??!!!???

Grow up!!

Thanks you Mike, and yes I ment from the classROOM.

I really didnt think that this would have turned into such a political piece of garbage. I would be VERY embarrassed for my hobby had I shown the kids the responses that I have received so far.

Still looking for any Native American Hams that would like to share their story, history, and lifestyle with a bunch of 5th graders, and do this over the air while the kids are in their classroom.

I'm looking for info as to what a former East German callsign might have been changed to (old call was Y24MN). Of course, the Y-series German calls are no more, and are now DJ, DL, etc. prefix calls.

Anyone have info as to where the old to new callsigns can be found?

It's so easy to jerk his chain. Look at Charles, AB7SL - he sometimes
posts a note about some updates to his web site or about e-QSLs and a
couple of people jump up every time and howl. You can pull their strings
ever so gently, and they dance! It's always fun to watch and see just
how quickly they respond, and this time was no exception....

Wonders NEVER cease.....

How much disposable income does the average 5th grader have
spend on ham radio ? Most of them running FT-1000MP's ?

QRZ.com has a NAME search, if you know some common American
Indian names from the tribes you mentioned previously, you might
try plugging some of them into the web page and see what you can
find.

I tried "Slinging Bull", but no matches..... Maybe that was Sitting
Bull, I don't remember......

"Wolf That Dances With An HT" didn't work either, but I don't
know much about American Indian names.

Attack on America: How to Find Terrorists and Spies on the Air - Part 2

Ham radio operators across the nation and around the world continue
to look for ways to help in the United States war against terrorism.

Some are still providing communications in the New York City area
Others have headed the call by FCC Special Counsel Riley Hollingsworth to
watch the radio spectrum and report suspicious transmissions.

Last week, monitoring specialist Joe Schroeder, W9JUV, gave us a bit of
insight into what to listen for on the high frequency bands. Joe is
back with a look at the spectrum above 50 MHz and the way that terrorists
cells might try to use it: FRS probably not an option because there are
just to many people on it.

There's not so much the chance of being overheard and having the whistle
blown.

More likely, some kid is going to inadvertently break in and break up
the communications. Especially in a mall or some downtown area.

CB at 27 MHz is also a no. I would also say that the ham bands are not a
good alternative because there is to much of an opportunity for radio

amateurs to come across such communications and recognize that it is not
normal ham radio talk. What hoes on in the Amateur VHF and UHF bands is
so normal sounding that many hams readily recognize all of the voices. If
there was something abnormal going on it would stick out much more than
on an HF band like 20 or 40 meters.

One thing Riley Hollingsworth suggested was to tape any suspicious
communications. If you do, we would suggest using fresh tape and also

using a direct connection to your recorder from your station receiver.

This will eliminate the chance of room noise obscuring what you are trying to record.

And, if you do happen across something that needs to be reported probably the best place to forward it is directly to the Federal Bureau of Investigation. The FBI has set up a toll free number for leads or other information on the terrorist attack. It's at: (866) 483-5137

I didn't claim any answers Jim, but as usual you do your troll dance, expose your ignorance for all to see and then make sure nobody mistakes you for anything less than a fool.

Not surprising but sad to see you have added a bigotry to your routine.

Ignorance and bigotry, a match made in heaven.

There is a very fine line between safety and paranoia, security and mass hysteria. This type of appeal can only bring back the type of witch hunt that one senator in particular helped spread in the fifties.
There is also such thing as common sense that dictates that any terrorist will not be stupid enough to use public channels to announce his intentions, especially with the privacy protected technology available today.
But, with a public opinion in favor of fighting terrorists with conventional warfare, this is not surprising. Let's hope the FCC is prepared to handle the 10,000% increase in "suspicious" traffic reporting which will, no doubt, turn out to be anything but Bin Laden sending coded messages to his religious lunatics.

In conclusion, it's just another joke that will give some of us an illusion that we are safer than yesterday. I, for one, think it's much more dangerous to hear statements from the White House official spokesman that Americans must "watch what they say and what they do". That should be reported to someone.

Glenn, Glenn, Glenn. I realize that you have a tuff job, being the
poster child for the Remove Internet Access From Mental Institutions
Campaign, but you really should talk to your doctor and find
out if there isn't some medication that would calm you down.

> Ignorance and bigotry, a match made in heaven.

That's not bigotry, my boy. That's called SARCASTIC HUMOR.
Intended to make those who can think smile. No need to explain
to me why you aren't smiling, OK ?

In simple terms, with the hope that maybe, just maybe, you can grasp
the concept this time, and with no expectations that you would
smile, because we have long since determined that for you, smiling is
totally out of the question.....

"Sitting Bull" was a real American Indian. "Slinging Bull" is what
you monkeys have been doing ever since the guy asked the
original "Where Can I Find A Native American Ham" in the first
place. Get it ?

Somewhere I read in a book, or heard on the TV, that many
American Indian names, when 'translated' to English, come out
as "Wolf Who Dances With The Moon", etc. as there is probably
no other literal way to translate the meaning to English. Sounds a
bit strange in English, but the meaning conveys much better in the
native language, I would guess.

Anyway, I thought "Wolf Who Dances With HT's" was appropriate
in this case, due to the fact that we were dealing with fifth grade
hams. Get it ?

Not to mention, by the way, I think I added the only constructive idea
to this 'discussion' so far that was intended to help solve the
original problem, and that is the suggestion to look up
some American Indian names in the QRZ database. The original
poster, since he knows tribal names, may be able to do that. If
any other construction suggestions on how he can find what he's
looking for have been posted here, I must have missed them.

Since he's looking for speakers at his school, he can also use the name search feature at QRZ to find hams in a specific city or town.....

Unfortunately, I don't think there are any ham databases that can be searched by ethnicity or race. If there were, they'd have to have a special category for you, Glenn - Racing Around The Room Bouncing Off The Walls Looking For Somebody To Argue With on the Internet......

So go ahead, big fellow, slay me with your wit. Cut loose and use both halves if you'd like. Embarrass me in front of all the other kids, show everybody what a Totally In Control Touch Typist you really are.

Contest season is almost here anyway, and we need to get you tuned up so you can argue with the boys over on the contest email list too.

I've never met an American Indian. So I can truly say I doubt it's possible for me to not like American Indians. Unless you tell me that you are an American Indian. Then I will retract the above statement.

Beat me up, oh Keyboard Warrior of Usenet. I am totally at your mercy :-) Go for it, Glenn, call me some more names. Like we used to do in fifth grade, OK ?

I LOVE it when you call me names. But I must say it worries me a bit when you start "missing my sausage".

73, Jim KH2D

Kent --

I'll do some checking around this part of the country and see who's available. You might check with some clubs in New Mexico. While the particular Indian Nations you're most interested aren't to be found there, there is some history of Native American amateur activity after the second World War. Some of the Navajo "Code Talkers," who so distinguished themselves during the war, maintained their interest post war. As with most WWII vets, I'm sure their number are dwindling quickly, but they may have created an on-going interest in some of the remote communities in New Mexico and Arizona.

I'll check with some of my Native American friends here in Idaho.

I think you've got a good idea.

I think I'll also check my shack again for stray RF, though. It would apprear from some of the responses you've received that it's possible that prolonged exposure to RF might be the cause of GOMS -- Grumpy Old Man Syndrome.

What confuses me about you, Glenn, is that you take issue with anything, and everything, certain people have to say. And lucky me, I'm one of them. If I posted a message to this newsgroup saying I was giving away FT-1000D's to anybody who wanted one, you'd be the first one to respond. You'd be pissed off because they weren't FT-1000MP's and calling me one of the two or three fifth grade names in your vocabulary. Business as usual.

Because that seems to be your job. As if you were on a Mission From God......

Somewhere along the line, something must have been said or done that really got your tilt switch out of whack and you just can't seem to get over it.

Not that I care, not that your observations will ever change anything I have to say or where I say it, and not that I haven't noticed that this newsgroup is not the only place you operate as the 'opposition', but because you asked.....

Actually, there is a benefit to having you around. You constantly remind me what a waste of time discussing ham radio on UseNet is. Thanks.

73, Jim KH2D

What Jim snipped......

"No Jim, you are a bigot. Only a jackass would make jokes about
somebody's racial heritage. Only you would be a big enough of a
jackass to do it on an international level.
What part of that is so confusing to you Jim? "

Still waiting for an answer Jim.

Tell us how your contribution of constantly make rude remarks about
others helps ham radio or DX? What did you bigoted remark accomplish
other to show you for what you are Jim?

You are right Jim whenever you or Walt or the Sausage king spout off
and attack somebody I do take issue. You seem irate that people aren't

in awe of your rude remarks and bigoted attitude.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, KF2HC, N2VW, W3HNK, W3UR & The Daily DX, N4AA & QRZ DX, W4FOA, WA4FFW, K5JIM, W5KFT, K8EP, K8IW, K8YSE, W8CNL, W9DC, 4L1DA, DJ5JH, DL1EK & DX News Letter, DL3NM, F6BFH, FM5GU, G3PJT, G3UML, Japan DX News, JF6OJX, OH1EH, OZ5AAH, PA3FDO, SM4DHF, SP9FIH, VA3RJ and VK4DX for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 23/September, through Sunday, 30/September there were 205 countries active. Countries available: 3B8, 3C, 3D2, 3V, 3W, 4J, 4L, 4S, 4U1I, 4W, 4X, 5A, 5B, 5N, 5R, 5U, 5Z, 6Y, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9V, 9X, 9Y, A2, A4, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FW, FY, G, GI, GM, GU, GW, HA, HB, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J6, J7, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OZ, P2, P4, PA, PJ2, PY, PY0F, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T30, T7, T8, T9, TA, TF, TG, TI, TK, TL, TT, TU, UA, UA2, UA9, UK, UN, UR, V4, V5, V7, V8, VE, VK, VK9N, VP2E, VP2V, VP5, VP6, VP8, VP9, VR, VU, XE, YB, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZK1/s, ZL, ZL7, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3W6, VIETNAM. Remember to look for Bob, N4CD, to show up from here starting October 2nd through October 15th. His callsign is still unknown, but he has asked for 3W6CD. Activity will only be on 40/20/15/10 meters. QSL to N4CD direct or for overseas stations via the bureau. Please, no cards from stateside USA via the bureau.

4L, GEORGIA. David, 4L1DA, informs OPDX that station 4L0G will participate in the CQWW SSB Contest. Operators mentioned are: 4L1DA/David, 4L2M/Mamuka, 4L7O/Thomas, 4L7CE/Gogita and 4L4CR/Mike. QSL via DL7BO.

5B4, CYPRUS (Also Possibly ZC4). Rick, AI5P, will be active as 5B4/AI5P from October 4-11th. Reports indicate that he may also try to operate from the club station in the U.K. Sov. Base Area on Cyprus (ZC4) for a few hours.

5B4, CYPRUS. Johan, PA3FDO, will be active as 5B4/PA3FDO from October 13-23rd, using only a 100 watts and vertical dipoles. His focus will be on 12 and 17 meters for those who still need 5B4. QSL via homecall. Sending via the Bureau is OK.

5T5, MAURlTANIA. The "Japan DX News" reports that from October 6-16th, a seven member team from the International Amateur Radio Volunteers (IARV) organization will make their annual visit to the Sahara Desert as part of a technical aid program. They expect to be permitted to operate amateur radio with individual callsigns using the format 5T5*** as well as 5T5U. The operation will be carried out mainly in the CW mode, including activity on 10 MHz band. Send your QSL to each operator's home callsign.

9K2USA UPDATE. Bob, 9K2ZZ, reports that the positive response to the use of 9K2USA by Kuwait amateurs has been overwhelming. He states, "Thanks to all who have E-mailed the Kuwait Amateur Radio Society <9k2ra@kars.org>, your support is appreciated by both the Kuwaiti Amateurs, and those of us who are guest operators in Kuwait. The 'official' 9K2USA QSL card has been finalized." It is now posted on the website at: http://www.k4cy.com Bob states, "The cards are being printed this week, and logistics are now in place for a quick turnaround on cards received by the Radio Society. I would, once again, encourage those of you who have not E-mailed the Radio Society of Kuwait to please send them a message expressing your opinion on this unprecedented event. Thanks again for everyones help/support during the past weeks, Bob."

AMATEUR RADIO LIGHTHOUSE SOCIETY CONVENTION CANCELLED. Jim Buffington, K5JIM, Publicity Chairman for the Amateur Radio Lighthouse Society (ARLHS) announced Monday that its planned convention, which was set for November 9-11th in Brunswick, Georgia, has been cancelled. Spokesman Jim, K5JIM, said the event was apparently a victim of the terrorist bombings, at least in part, since some members who had planned to fly in from overseas opted out. "For that matter," said Buffington, "some who would have flown from distant locations in the U.S. also indicated a reluctance to travel." "Postponed would be a better word," said Buffington, "because we're already making plans for a meeting in 2002 and expect to announce the dates soon." Those who made reservations at the Holiday Inn in Brunswick are reminded to cancel them.

AP, PAKISTAN. Peter/ON6TT and Robert/S53R reportedly have left Afghanistan and are now staying in Islamabad. Both are expected to be active possibly on 160-17 meters. Both are expected to try to receive callsigns, however, Robert and Peter were heard using the callsigns AP2ARS. Robert has been heard on 40/30 meters over the past week.

C6,BAHAMAS. Ed, K8EP, will be active as C6A/K8EP from November 20-27th. Activity will be on CW/SSB and an entry in the CQWW CW Contest. QSL via K8EP.

CONTEST REMINDER! Mike, VK4DX, wants to remind everyone that the Oceania DX Contests, formerly known as VK/ZL Contests, will be held October 6-7th (SSB) and October 13-14th (CW). As of this year, the time has been changed, so the contest starts at 0800z on Saturday and ends at 0800z on Sunday. For full contest rules, please visit VK4DX's contest calendar or the NZART Web sites at: http://www.vk4dx.net
http://www.nzart.org.nz/nzart/update/contests/oceania/

DX BASH. Just a reminder that the annual DX BASH will be held next weekend, October 5-6th. There will be great programs on DXing, contesting, and all kinds of radio fun. All the info is available on the Web at: http://www.dxbash.com

FM, MARTINIQUE (Update). The Pordenone Gangsters (IV3TDM/Dan, IV3JVJ/Luca and IV3BTY/Andrea) will once again be here and will operate from October 22-26th. The callsigns will be FM/homecall, and they should be able to have two stations active simultaneously on two different bands. Their activity will be mainly SSB, but Luca is expected to operate some RTTY and Andrea on CW. On October 27-28th, they will join the FM5GU team for the CQWW SSB Contest. QSLs for FM/homecall operations should go to IV3TDM's CBA. QSLs for FM5GU operation is via KU9C's CBA. All details are available on the web site: http://www.qsl.net/fm5gu/The%20Pordenone%20Gangsters.htm

FO, MARQUESAS ISLANDS. Operators SP9FIH and SQ9LR will be on the air as FO/SP9FIH probably begining in the second half of October (depends on their job duties and airlines schedule). They plan to be active on 80-6 meters SSB and RTTY for 2 weeks from Nuku Hiva (OC-027). QSL via SP9FIH.

FS, FRENCH SAINT MARTIN. Look for Ann/W2AZK and Brian/KF2HC of the North Jersey DX Association (NJDXA) to be active from the French side of Saint Martin (IOTA NA-105) November 26th through December 2nd. They will operate SSB and CW on 40-10 meters using the callsigns FS/home. The bands 160/80 meters will be added if circumstances allow. Because of anticipated luggage restrictions ,they are planning a modest station which will include an IC-706, wire antennas, and possibly a Force-12 Sigma vertical dipole. Yagi antennas (including perhaps 6m), and a second station may be added if they find they have room to transport the extra equipment. QSL via their home callsign direct or via the bureau. Check "DX News" on NJDXA's Web page for any last minute announcements at: http://www.njdxa.org/

IOTA NEWS.....
AS-043. Operators JI1PLF/1, 7N1GMK/1, and 7N1PVR/1 plan to be active from Hachijo Island, November 2-5th. They will be on 80-10 meters, including the WARC bands SSB and CW. QSL via their home callsigns.

LIGHTHOUSE NEWS.....
AMATEUR RADIO LIGHTHOUSE SOCIETY CONVENTION CANCELLED. Jim Buffington,

K5JIM, Publicity Chairman for the Amateur Radio Lighthouse Society (ARLHS) announced Monday that its planned convention, which was set for November 9-11th in Brunswick, Georgia, has been cancelled. Spokesman Jim, K5JIM, said the event was apparently a victim of the terrorist bombings, at least in part, since some members who had planned to fly in from overseas opted out. "For that matter," said Buffington, "some who would have flown from distant locations in the U.S. also indicated a reluctance to travel. Postponed would be a better word," said Buffington, "because we're already making plans for a meeting in 2002 and expect to announce the dates soon." Those who made reservations at the Holiday Inn in Brunswick are reminded to cancel them.

Don, W9DC, informs OPDX that Ted, W8TTS, has added a current up-to-date list of WLHA to his web page for use in the "DX4Win" logging program and also a limited text version which contains only the Lighthouse names and WLHA numbers. The URL address is:
http://home.neo.rr.com/tsarah/www/w8tts.html

OOPPPSS (Correction in OPDX.530). Wolff, DJ5JH (HSC #372), informs OPDX that the HSC (mentioned in last week's bulletin) is not a Hungarian CW Club, but is a German High Speed Club founded in 1951 by Richard Dargatz, DL1XA, and others with over 1000 members. To become a member, one must have at least 5 QSOs of 30 minutes at 25 wpm with 5 different HSC members and the QSL cards with the confirmation of these facts.

OX3, GREENLAND. Ben, OZ5IPA, will be active from Kangerlussuak from October 27th through November 5th, outside of the CQWW Contest. Ben will be active on SSB/CW and on all bands including the WARC as a single operator 12 hrs/day (1000-2200z). There is a slight possibility he will be active on SSTV and RTTY October 30th. He will participate in the International Police Associations Contest the first weekend of November. His QSL is good for the "Sherlock Holmes Award" and most police awards. QSL via OZ5IPA direct only to: Ben Jakobsen, 9 Knoldager, DK-2670 Greve, Denmark. For more info, check the following Web pages:
Contest info - http://www.ipa-rc.de
Ben's Web - http://www.iparc.dk

QSL INFO AND NEWS.....
Mac, WA4FFW, reports, as of September 28th, all 3Y0C QSLs which he has received have been processed and mailed. This includes those not found in the log, Bureau, and SWL reports. He ask that you allow 2 weeks for delivery due to slowed mail to some areas, especially International mail. Mac stated all request which did not come up in the computer database were very carefully checked against Chuck's paper log. Resposes to all cards received have been completed. Approximately 90% of those NIL in the computer log was found in the paper log. The delay in the latest mailing of cards were due to the time required to verify against the paper log, and it certainly proved to be worth the effort for most of the requests. Mac wants to thank N4OL and WJ4T who worked endlessly to help get the cards out. A special thanks also to those who sent extra financial help with the QSL expense. He will continue to process

incoming cards promptly, but it will not be daily. He will now work on a backlog of cards for other stations he manages.

NOT THE QSL MANAGER. Hannes, DL3NM (ex-DL3NEO) is NOT the QSL Manager for 4U1ITU or 4U1VIC. He is receiving many direct QSLs for these calls, especially from USA. He can QSL only the following activities:
4U1ITU: August 21-26th, 1994
4U1VIC: November 20-21st, 1998.

QSL Manager, Joe, W3HNK, reported this past week, that anyone needing a JT1CO card to please send him your QSL and 1 USD ASAP, and he will get a QSL card back to you in due time!

RSGB HF AND IOTA CONVENTION will be held October 12-14th, at the Beaumont Conference Centre, Old Windsor, UK. A full line of programs and speakers are scheduled to take place at this year's event (OH2BH, G3KMA, G3ZAY, G3SWH, RW3GW, UA9OBA, The D68C Story, 3B6RF Agalega Dxpedition, VP8SDX Falklands, Cocos-Keeling/Chatham Island by G3SXW, ZD7K/ZD8K, Logbook of the World by N7NG and much much more). Booking details, online registration and the program can be found on the Web at: http://www.rsgb.org.uk
OPDX InterNet Subscribers will receive an additional bulletin with more details.

SPECIAL EVENT. Eric/KU6J and Ron/K6KYJ, will be active from 160 meters through 440 MHz on SSB, CW, Digital, RTTY, Satellite, and FM using the special callsign N6C. The "Special Event" callsign N6C has been assigned to the "2001 Colusa County California QSO Party Expedition". Their location will be at the Black Oak Camp (elevation 5,800 ft), in the Mendocino National Forest. This callsign will be valid only from October 4-11th. QSL via KU6J.

T30, WEST KIRIBATI. Eric, T30ES, a Peace Corps volunteer on Butari Tari Island (OC-17), continues to be active. He was heard on 14280 kHz usually between 1000-1200z on Thursdays and Sunday evenings (his time) and sometimes on Tuesday. He will be there for another year plus. He runs on low power (TS-430), on batteries which are charged on a solar panel which he borrows from a friend. His antenna is a dipole strung between two coconut trees. QSL via CARA: P O Box 3441, Danbury, CT 06813.

T32, EASTERN KIRIBATI. Hiro, JP1TRJ, informed OPDX that he and Takashi/ JR7TEQ and Hiro/JA1PCY will be active from Christmas Island (OC-024) from October 1-7th, signing T32RJ, T32EQ and T32CY respectively. Their activitty will be on SSB/CW/RTTY on 160-6 meters. QSL T32CY via JA1PCY, T32EQ via JR7TEQ and T32RJ via JP1TRJ.

TI, COSTA RICA. Goram, SM4DHF, will be active as TI2/SM4DHF from the QTH of Henry TI2HMG, from October 24th to November 4th. He will be taking part in the CQ WW Phone Contest as a Single Op/Single Band/Low Power entry (10, 15 or 20 meters, which will be decided later). Before and after the contest he will also be active on CW and RTTY. QSL via homecall SM4DHF.

V3, BELIZE. Begin look for Joe, K8JP, to be active and signing V31JP. He will be there until April 2002. He is mainly a CW operator.

VP5, TURKS AND CAICOS ISLANDS. The VP5T group will be operating from VP5JM's place on Providenciales (NA-002) in the Turks & Caicos Islands during the period of October 23-30th. Operators will be Frank/WA2VYA, Ken/K2WB and Jack/N2VW. They plan a Multi-Multi operation during the CQWW SSB Contest, October 27-28th as VP5T. QSL via N2VW. Before and after the contest the operators will operate as VP5/homecall. Their activity will be mostly on CW, the WARC bands and PSK31. QSL to homecall.

WRTC2002 PRESS RELEASE (#9). Ari, OH1EH, reports that the following experienced contesters have been nominated to represent their countries in WRTC2002:
CANADA : VE3EJ John Sluymer SWEDEN: SM5IMO Dan Hultgren
VE7ZO Jim Roberts SM3SGP Gunnar Widell

FINLAND: OH1MDR Timo Pohjola UKRAINE: UT4UZ Yuri "Jerry" Onipko
OH1MM Pasi Alanko UT3UA Sergey Vasilenko

GERMANY: DJ6QT Walter Skudlarek YUGOSLAVIA: YU7BW Robert Homolja
DJ2YA Ulrich Weiss YU1ZZ Milanovic Milan
DK3GI Roland Mensch
DL1IAO Stefan von Baltz

XU, CAMBODIA. Alan, F6BFH, informs OPDX that a French team (from the Presence Radioamateur) will be here between October 22nd through November 10th. The following will be involved with this operation as well as their specific duties:
Yves, F5TYY - Radio Op and video.
Alan, F6BFH - Radio Op and video. His XYL Danielle will take pictures, be narrator on the video and give "Moral Support".
Jacqueline, F6EGG - YL Radio Op and medical person in charge.
Bernard, F9IE - Radio Op and Logistic transmissions. His XYL Micheline will take pictures, design the QSL and give "Moral Support".
Alan/F6BFH has received his callsign, XU7ABW, the others will go to the Telecom Ministry in Phnom Penh to receive their lisences. The team will have two IC-706MK2 radios with a dipole for 80-6 meters and plan to be active on CW and SSB. They will be travelling like backpackers with only knapsacks, including the radio equipment. They will try to activate Koh Poah Island (AS-133) in the Shianoukville archipelago. QSL via home callsigns, and the bureau is 100%. Alan states this operation would not be possible without the help of Franck, DL4KQ (XU7ABR). Also, a special thanks goes to Mister Christian Pichon, Logistic and Technical Advisor for the Cambodian-German Health Project, and the team of Paul/F2YT, Josiane/F5MVT (Honor Members of Presence Radioamateur), for special technical support. ADDED NOTE: Alan states that a special cup will be awarded to the station having the maximum number of QSOs on the maximum number of bands. Send your request by E-mail to: f6bfh@wanadoo.fr

XX9, MACAU. Ed, K8EP, will be active as XX9TEP from October 11-17th. Activity will be on CW/SSB and probably on all bands. QSL to K8EP.

YN, NICARAGUA. Laurie, G3UML, informs OPDX that station YN2EJ will be activated from the city of Granada, Nicaragua, for the CQWWDX Phone Contest at the end of October. Operators will be Eddie/W5GCX, Laurie/G3UML and

Frosty/K5LBU. QSLs for EU/AF are via G3UML, all others go to W5GCX. All cards will be answered. This is a relatively modest Multi-Op/Single-Tx operation, using Icom transceivers, a small amplifier, a mini-quad and wire antennas. Last year the two U.S. Ops, signing YN2EJG, provided the only activity from Nicaragua and made almost 3000 QSOs.

ZL7 OPERATION WRAP-UP. The ZL7/G3SXW and ZL7/G3TXF operations are now QRT, but if you are interested, they now have the stats by continent and band from their trip to Chatham Island posted on their Web site:
http://www.g3txf.com/dxtrip/ZL7_G3TXF/ZL7.htm

ZONE 2. Hisato, 7K1WLE, is planning to stay at Resolute Bay on Cornwallis Island in the Queen Elizabeth Islands Group, Nunavut, Canada (Canada north polar region: CQ ZONE2, IOTA NA-009), from October 25-31st. He will possibly sign VY0/7K1WLE or AK2M/VY0. He will use an IC-706MKII w/IC-2KL and wire antenna. He will be active mainly on the low bands. His operation from ZONE 2 on low bands will be a great interest to low banders because Hisato's operation will be influenced by an aurora propagation. The sunrise/sunset at Resolute Bay is 1534z/2030z. Pilot stations for him are JP1IOF/Toshi and JF6OJX/Tad. QSL via JN1HOW.

You're a funny guy, Glenn. Imagine that I have to explain my
actions to a guy like you. Sounds like you've been sitting too close
to the microwave dish for way too long..... You just hurry up and
keep waiting, it'll give you something to do.

> You are right Jim whenever you or Walt or the Sausage king spout off
> and attack somebody I do take issue. You seem irate that people aren't
> in awe of your rude remarks and bigoted attitude.

O. IC. It's your job to keep things pretty around here. I got it
now. You're kinda like a self appointed network control for the ham
radio portion of the internet.

So you just continue your work.....

I'm not "irate" at all, Glenn. Matter of fact I'm so happy to have a
wonderful, articulate guy like you around to keep me and all the
other 'bad guys' on the internet in line.

After all, this Hambo/Rambo stuff is THE most important thing
in life, at least for those of us who haven't seen a TV or newspaper
lately.

73, Jim KH2D

Nice dance bigot. Your type never can justify their actions, they just blow smoke. Who would have expected more.

BTW, how does taking issue with a jack ass making bigoted remarks equate to "network control"? Oh, that was your straw man argument, never mind.

Jim -

Ignore Glenn Hansen, he is nothing but a lying bable-happy fool!!

He is well known for causing trouble on the radio related newsgroups
of usenet. He is also well known for stalking & harasing here on usenet.

About 6 years ago, he was caught doing several inappropriate things
on rec.radio.swap, but I won't get into that now. From about 1998-1999
he caused many problems on rec.radio.scanner. He has received warnings
& lost ISP access due to these activities.

He likes to hang out on a repeater in his hometown of Tacoma, Washington
playing junior radio cop & accuse others of wrong-doing; yet the
repeater owner denies the wrong doing of others & denies knowing who
Glenn is.

Glenn Hansen KB7PKC is a trouble maker!!!!

vandecasteele <guy.vandecasteele1@pandora.be> wrote:

> ... everywhere I find this abreviation DX. I'm wondering what it means.

The way I heard/read it:

Originally it meant "distance X", or "distance unknown", and stood for long-distance communication/reception. Now it has shifted a bit and includes communication with / reception of signals from any out-of-the-way place, in particular countries where there are not many radio operators or broadcast stations.

Usually, on shortwave it means intercontinental communications (although this tends to blur things somewhat: e.g. Spain - Morocco would be a DX contact, but Portugal - Russia wouldn't), and on VHF a distance of more than 500 km.

Always clear reception,
Jan-Martin

2636. Re: what means DX?

Newsgroup: rec.radio.amateur.dx

DX is allegedly an early telephone term for distant exchange. It is also defined in Funk & Wagnall's dictionary as Distance. The term dx appears in many math formulas as distance of x.

At any rate, for Amateur Radio, it is the sending and receiving of messages over long distances. On the HF bands, DXing is seeking and contacting radio stations outside one's country. Many certificates are awarded for contacting and confirming (via postcard (QSL card) a prescribed number of countries. For example, the American Radio Relay League offers the DX Century Club -it is the premier operating award in all of Amateur Radio. The basic certificate is awarded for working (contacting) and confirming at least 100 entities on the ARRL DXCC List. Avid operators seek contacts with the entire list -- 334 entities. Entities include nations, and certain islands, and other locations around the world.

Under desirable propagation conditions and at various times, it is possible to contact stations all over the world. Signals can be sent more than half way around the earth via a path known as long path -- that is the opposite path from the great circle "short" path.

In VHF and above, DXing might be of much shorter distances as propagation tends to be line of sight.

In Short Wave Listening, it is the pursuit of listening for foreign broadcast stations and other services. Shortwave listeners send postcards to the station describing the program heard, signal strength, etc. The broadcast station replies with a confirmation postcard. This aids the broadcast station to ascertain its global coverage. For the listener (who must have a fairly elaborate receiver and antenna), it is the satisfaction of hearing radio signals from far off exotic places.

Source record: 15792

Hi Guy,

A further footnote:

The earliest radio transmissions were sent via Morse code. For brevity in transmissions, combinations of various letters were derived from many sources including other languages.

Abbreviations of common words of various languages were also used. (ES = and). (Morse = * ***)(DX = Long distance) (There was once an Oil Company named simply "DX" and there motto was "The Long Distance Oil")

For a current (Short)list of Abbreviations, I also refer you to the site search at www.arrl.org.

Today in voice transmissions, "Q" signals still find their way into "Ham" vocabulary.

A further advantage of using "Q" signals, is that they are universally accepted across language barriers.

Even today,it is entirely possible to use only "Q" signals (and abbreviations) to communicate with others who do not speak your language but have a common interest.

"Q" Signals are usually 3 letters in length and represent a phrase or question.
(e.g. QSL = " I confirm your transmission"
or QSL? = "Will you confirm my transmission?") (See previous post of AC6V)..

For a current (short)list of many other "Q" signals, I refer you to the site search at www.arrl.org.

Military transmissions used "Z" signals for brevity.

There is a wealth of information with regard to the history of radio communication at this web site.

Look for the page for History of Amateur Radio Station W1AW.

All your questions are welcome.

Source record: 15799

Hello Ken,
I searched high and low at all my regular locations and could only find
this relevant info....

IARU Region 2 Conference official station in Guatemala

The IARU Region 2 conference will take place this week from October 1 to
October 5 2001, in Guatemala city Guatemala.

Mr. Marco Tulio Gudiel, TG9AGD, President of the Organizing Committee, has
communicated that an radio amateur station will be installed at the Marriott
Hotel, site of the conference, for delegates use.

The Call Letters assigned is TG0IARU.

He also inform that those radio amateurs visiting Guatemala in the occasion
of the conference, after register as delegates will receive a temporary
operation permit that will be issued by the Club de Radioaficionados de
Guatemala.

The call letters will be constructed by preceding your own with the prefix
"TG9"as in TG9/VE3CDM

Here is the QRZ info for TG9AGD

TG9AGD Lookups: 32
MARCO GUDIEL
P.O. BOX 115
GUATEMALA

Email: gudiel@guate.net

Good luck.....

2645. ZB2ID and 3W7CW disallowed for DXCC credit

Newsgroup: rec.radio.amateur.dx
Date: 2001-10-03 22:40:14 UTC
From: wb4kmh@qsl.net
Message-ID: <itMu7.22561$Tu4.4009659@ratbert.tds.net>
Source record: 15800

I received my submission for a DXCC endorsement back from ARRL today with a notation that my ZB2ID QSO on 20 April 1990 was a shipboard operation, and my 3W7CW QSO on 19 May 2001 was disallowed because of no documentation received. Does anyone have any information of either of these.

Also, is there a way to verify acceptability prior to paying for the application fee, registered mail, QSL costs, etc?

73,

Phil - WB4KMH

2655. NY/NJ/PA "Radio" Octoberfest this Saturday

Newsgroup: rec.radio.amateur.dx
Date: 2001-10-05 01:52:20 UTC
From: k3bu@aol.com
Message-ID: <20011004215220.08376.00001071@mb-ch.aol.com>
Source record: 15710

Reminder.
NY/NJ/PA "Radio" Octoberfest this Saturday

You are all invited to (Radio) Octoberfest at Verkhovyna Mountainview Resort in Glen Spey, NY (NY,NJ,PA tri-state area) hosted by the Tesla Radioclub and Ukrainian-American Cultural Foundation - UACF on October 6, 2001, starting at noon till ???

Come and have fun meeting other hams, DXers, contesters, while having good time and drinking Octoberfest beer. Enjoy Ukrainian and German food, listen or dance to endless polka's. Wear your badge, hat or shirt with callsign proud and meet other radio aficionados around the "radio" table.

140 acre Verkhovyna resort is the new home to Tesla Radioclub N2EE station. Join the semi-serious discussion of how many towers do we need to put up there. Come, join the club and get a free beer.

Directions:
Take Hwy. 84 to Port Jervis, NY exit 1; follow Rt. 6 through Port Jervis to traffic light with Rt. 97/42 signs, go through and follow Rt. 97 west for 10.8 miles to Pond Eddy (motel on right, bridge on left), turn right onto High Rd. (Rt. 41), go up the steep hill for 1.7 miles, Verkhovyna is on the left. Plenty of parking.
Maps and sattellite view of the resort are at www.UACF.net home page under directions.

See you all there and join us yodeling in Morse code :-)
Nazdorovya, Ein Prosit!

Yuri, K3BU
pres. Tesla Radioclub

2656. JA8FCG adress...

2658. FYI: How To Find QSL Routes

Newsgroup: rec.radio.amateur.dx
Date: 2001-10-05 14:22:33 UTC
From: AC6V <ac6v@amsat.org>
Message-ID: <3BBDC229.FA761F1A@amsat.org>
Source record: 15713

See many requests here for QSL info. In a recent trial over a month's period of time -- over 70% of the queries posted here could be found on the web.

So when you go thru the time and trouble to look it up for someone else -- why not tell the poster how and where you found it -- so next time -- they can look for themselves.

Make sense ?

Just a few resources.

http://www.halturnershow.com I think they call it "balance".
My recollections are of one black acquaintance of mine who had
a saying; "There's only two kinds of women in the world:
Whores and Bitches... There ain't no other kind."

Never mind that all the hookers in town gave their money to
people just like him so they could keep themselves in hi-heels,
and Heroin.

Reminds me of another saying; "Take my wife... PLEASE!"

If it were OK to kill the messenger, all reporters would be dead.

AMATEUR RADIO NEWSLINE(tm) REPORT #1260 - OCT. 5, 2001

Amateur Radio Newsline report number 1260 with a release date of Friday, October 5th, 2001 to follow in 5-4-3-2-1.

The following is a Q-S-T.

A big week for ham radio in space as A-O 40 proves G-P-S works in space and P C Sat goes into orbit. These stories are first on Amateur Radio Newsline report number 1260 coming your way right now.

(Billboard Cart Here)

**

HAM RADIO IN SPACE: GPS EXPERIMENT COULD REVOLUTIONIZE SPACE TRAVEL

AMSAT reports another success with its AO 40 satellite that holds the promise of changing the way men travel into space. This, with word that that the on board Global Positioning System -- or G-P-S experiment has now undergone successful testing. Roy Neal, K6DUE, has the details:

--

ABOUT 20 YEARS AGO THE AIR FORCE PUT A RING OF SATELLITES IN ORBIT CALLED THE GLOBAL POSITIONING SYSTEM, “G-P-S”. THEY WERE DESIGNED TO SHOW WHERE IN THE WORLD YOU ARE, WITH PINPOINT ACCURACY. THE AIR FORCE USED THEM TO GUIDE MISSILES AND MILITARY AIRCRAFT.

THE SYSTEM WAS MADE AVAILABLE FOR PUBLIC USE A FEW YEARS LATER AND HAS BECAME A MAINSTAY FOR NAVIGATING AIRLINERS, SHIPS AT SEA, TRUCKS AND CARS ON THE HIGHWAYS AND EVEN HIKERS . NASA WANTED TO KNOW IF GPS ALSO COULD BE USED TO PROVIDE POSITIONAL DATA OUTSIDE ITS RING OF SATELLITES. THE SPACE AGENCY TURNED TO AMATEUR RADIO’S AMSAT CORPORATION TO HELP WITH AN EXPERIMENT.

NASA PROVIDED TWO G-P-S RECEIVERS WHICH WERE INSTALLED ON THE A0-40 SATELLITE. THE “A” RECEIVER TO TUNE IN AT APOGEE, THE HIGHEST POINT IN ORBIT., THE “B” RECEIVER WOULD LISTEN AT PERIGEE, THE LOW POINT.

JIM WHITE, WD0E, THE AMSAT COORDINATOR AND CHIEF OPERATOR, HAS JUST MADE HIS FIRST REPORT ON THE ACTIVITY. HE SAID ”WE RECEIVED A SIGNAL FROM ABOUT 52 THOUSAND KILOMETERS OUT WITH GOOD SIGNAL LEVELS. FURTHER DATE IS BEING GATHERED AND THOSE DOWNLOADED SO FAR ARE BEING ANALYZED.”

THEY WERE DOWNLINKED THROUGH THE A0-40 S-BAND TRANSMITTER. AMSAT VICE PRESIDENT FRANK BAUER, KA3HDO, WHO WAS INSTRUMENTAL IN SETTING UP THE EXPERIMENT, SAID IT WILL REVOLUTIONIZE THE WAY GPS IS USED IN SPACE. BAUER SAID MANY FUTURE HIGH EARTH ORBITING SATELLITES WILL BE ABLE TO TAKE

ADVANTAGE OF GPS FOR AUTONOMOUS NAVIGATION AND STATIONKEEPING

FOR THE AMATEUR RADIO NEWSLINE…ROY NEAL, K6DUE.

--

The bottom line. It now looks as if a ham radio satellite may help change the way men and machines travel to and from space. (AMSAT, K6DUE)

HAM RADIO IN SPACE: KODIAK STAR ORBITS PCSAT

The long awaited Kodiak Star launch, carrying the P C SAT ham radio satellite into orbit is a success. According to the AMSAT News Service, the launch took place from Kodiak Alaska at 02:40 UTC on Sunday morning September 30th.

Initial Information indicates that all satellites were successfully deployed, and that the amateur radio satellites have been heard by hams in many countries. One of the first reports came from Derek Studholme ZL1AKJ of AMSAT-New Zealand. Derek said that stations down-under heard good telemetry signals from P C Sat's first two passes over New Zealand

The launch of the Kodiak Star had been delayed several times due to weather conditions and Solar Flares. On board the launch vehicle were the P C Sat, Sapphire and Starshine satellites. P C Sat is a Naval Academy Amateur Radio satellite. The Sapphire satellite also has Naval Academy involvement in a joint venture with Washington University. Starshine was the primary NASA payload. (AMSAT Remailer, VHF Reflector, ZL1AKJ)

ATTACK ON AMERICA: TWO MORE HAMS MISSING AT WTC

Amateur radio operations have now wound down but there is more sad news from what's become known as 'Ground Zero' in New York City. It now appears that two more hams may have lost their lives in the terrorist attack on the World Trade Center.

The ARRL Letter says that Rod Coppola, KA2KET, was the transmitter engineer on duty for Public Broadcasting station WNET, channel 13 at the time the attack occurred. Coppola is 46 and lives in New York City.

Also missing is Winston Grant, KA2DRF. Grant is a computer technician with Empire Blue Cross - Blue Shield. He is 59 and lives in West Hempstead, New York. Neither man has been seen since the twin towers collapsed after being hit by hijacked jetliners on September 11th. (ARRL)

**

ATTACK ON AMERICA: FINANCIAL ASSISTANCE FOR MISSING ENGINEERS FAMILIES

In a related development, the Portland Chapter of the Society of Broadcast Engineers and the ARRL both report that a fund has been established to assist the families of broadcast engineers still missing at the collapsed World Trade

Center. Checks can be sent to the Ennes Educational Foundation Trust % The Society of Broadcast Engineers Inc, 9247 N Meridian St., Suite 305, Indianapolis, Indiana. The Zipcode is 46260. Please mark your envelope to the attention of the “Broadcast Engineer Relief Fund.” (ARRL, Portland SBE)

**

AMERICA UNDER ATTACK: INDIANA HAMS SET UP COMMS AT GROUND ZERO

Ham radio operators from Indiana were among those who made the trek to New York City to aid in rescue efforts after the September 11th terrorist attack. Their job was communications. Amateur News Weekly’s Jack Parker, W8ISH, has more:

--

Thirty-six hours after the first airplane crashed into the World Trade Center Indiana's Task Force One was standing at the ground zero. Among the 62 members of this elite Search and Rescue team were two Indianapolis amateur radio operators.

Veteran firefighter Jim Curseaden, KB9ZFF and Ed Elrod, W9PTO made the 14 hour road trip to help with disaster efforts. Both men make up the communications arm of this search and rescue team.

The moment they arrived each man began setting up a UHF communications link from the ground zero to their staging point several miles away at the Javis convention center. According to Jim Curseaden, getting UHF signals through the concrete canyon of New York City was a major challenge.

Ed Elrod said they first installed a repeater on a nearby building and directed a
Yagi antenna at the mountain of rubble. The Javis convention center posed another radio obstacle. Hand held radios could not reach the repeater.

To fix this problem, Elrod wired a up a remote base on the roof of the convention
center. This new link made it possible to communicate with the Indiana search and rescue personnel above and below the world trade center ruins. Ed Elrods most inspirational moment came during his second trip out of the devastation.

All week hundreds of people had been lining the streets, cheering and showing signs of support. When heavy rains began dousing New York the crowds disappeared...He said the contrast was amazing. The streets were nearly empty; except for one lonely figure standing in the rain. It was an elderly woman, holding a sign that read: “Thank You.”

Reporting from Indianapolis, this is Jack Parker, W8ISH

--

The hams from Indianapolis were not the only ones who traveled to New York City to help in relief efforts. We plan to profile others in future Amateur Radio Newsline reports. (ARN, W8ISH)

ATTACK ON AMERICA: DOD WILL NOT GIVE UP ESSENTIAL SPECTRUM

In the wake of the September 11th terrorist attacks on New York City and the Pentagon, the Defense Department has renewed support for its view that it shouldn't give up its spectrum to make room for consumer wireless products. Congressional auditors say that the proposed changes now could pose a further threat to national security. Amateur Radio Newsline's Norm Seeley, KI7UP, has more

--

Supporters of the mobile communications industry still say that transfer of some current military spectrum to the private sector is essential to fill the high demand for such services as the next generation of mobile phones and wireless Internet access. But Congresses' General Accounting Office says that if the Defense Department makes room for new wireless consumer products before more research is conducted, it could endanger the nation because of potential interference with Pentagon operations.

And it goes even further. Defense Department officials say that besides creating interference, moving all defense systems out of the current spectrum would take until 2017. That, says the DoD, would cost billions of dollars to orbit new satellites and otherwise accommodate military needs.

In the meantime, the Federal Communications Commission announced on September 24th that it will expand the possible uses of the 2500 to 2690 MHz band. That spectrum is currently used for fixed wireless services. New rues may eventually include a mobile component so that the spectrum can be used for 3 G services such as high-speed Internet access or music and video downloads.

The FCC says that it had considered reallocating the 2500 to 2690 band as a primary allocation to new 3 G wireless service. Because of the outcry against taking the spectrum from schools and other incumbent users it instead voted to create a possible shared allocation instead.

The FCC says that the flexible allocation would allow some portable data applications to be offered under existing service rules and could provide flexibility for offering other new advanced fixed and mobile services in the future. But it added that it would have to explore service rules that would apply to allow mobile operations in the band in a separate future rule-making proceeding.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP.

--

A September 2002 deadline by Congress for an auction of new spectrum licenses for wireless services might be delayed because of the Pentagon's resistance to any allocation change. (Published news reports, FCC actions)

**

AMERICA UNDER ATTACK: HAM RADIO TRACKS THE RUN FOR AMERICA

They did it to show support to the firefighters, law enforcement agents and all Americans involved in the effort to rescue the victims of the recent act of terrorism. This, as Navy Ensigns Daniel Campos and Christine Fix, coordinated a relay run to carry our national flag from Virginia to New York City.

The goal was to carry the Stars and Stripes from the Pentagon to the World Trade Center. The run began on Friday September 28th and continued overnight until they arrived about 1800 UTC Saturday. Their route was tracked using the Global Positioning System capability of the United States Naval Academy’s Ham Radio club. Computer generated maps were able to show live the progress of the runners along the way. (VHF Reflector)

**

ATTACK ON AMERICA: MOROCCO CQWW CONTEST STATION CANCELS

The September 11th terrorist attack is now having an effect in the world of ham radio contesting. This, as Al Crespo, NH7A, tells the Ohio Penn DX news that his CN2AC CQ World Wide SSB Contest operation from Morocco has been canceled. Al says that he will instead operate from Maui using his NH7A callsign. (OPDX)

**

HAM RADIO HELPING HAND: IHS NEEDS OPERATORS FOR HONDURAS

International Health Services says that it needs ham radio operators to accompany medical and dental teams to villages in Honduras. According to an Internet posting by John Kirckof, KB0UUP, most of these villages I-H-S visits have no electricity or phones. Kickof says that IHS is often are the only medical care these local people will ever see:

--
In-Q: Honduras is the...
Out-Q:...each mission in February.

--

Kirckof, who is the Communications Director for I-H-S says the group will provide High Frequency gear for any operator who does not have his or her own portable rig. Both men an women are welcome to apply. Sign-up is now until about mid October. For some basic information, visit www.ihsofmn.org or contact John by e-mail to jmkkek@runestone.net. (KB0UUP, ARNewsline(tm))

**

SURVEY: CELL PHONE CURBS FAVORED WHILE DRIVING

Three out of four adults in the United States favor laws to curb the use of cellular telephones while driving. This, according to a survey released by a highway safety group. And its a survey that has some ham radio operators concerned as well. Amateur Radio Newsline's Don Wilbanks, KC5MFA filed this report:

--

The poll of 1,001 adults was carried out July 1st to the 19th by the Louis Harris organization for Advocates for Highway and Auto Safety. This is a coalition of consumer, health, safety and insurance groups who say that they are working to make U.S. roads safer. The results are almost startling.

Though nearly two out of three people surveyed report owning a cellular phone, the poll found a lopsided 76 percent backed restricting their use by drivers in motion except in emergencies. In fact, the poll found that mobile cellular phone use in vehicles topped the list of concerns that people wanted addressed. Cell phone use was closely followed by drunk driving and improving safety at intersections.

This poll and others like it are of concern to radio amateurs and operators of other mobile two-way radio gear. Currently, no federal law bars the use of cell phones while driving but several states
prohibit phones being held by hand while driving except in emergencies. Two-way radio users fear that any across the board federal ban on using a cellular phone while driving might also be
applied to other radio services as well.

Meantime, another report from the National Conference of State Legislatures says that laws suggesting bans on drivers using hand-held cell phones have now been proposed in 40 states. As previously reported, a measure in New York is recently won approval and at least a dozen municipalities have also established mobile cellular telephone bans.

For the Amateur Radio Newsline. I'm Don Wilbanks, KC5MFA, reporting from New Orleans.

--

The survey also says that all of these enacted and proposed laws appear to have widespread public support. (From media releases and published news reports)

**

SERVICES TO HAM RADIO: LOGBOOK TO THE WORLD UPDATE

Project Manager Wayne Mills, N7NG, says that access to the ARRL's proposed Logbook to the World will be for everyone. Bill Pasternak, WA6ITF, reports:

--

In a note to Pete Smith, N4ZR, and posted to the VHF reflector, Wayne Mills says that the only charge will be for usage. Mills explains that there will be a charge when utilizing a QSO record for a specific award such as the DXCC, Islands On The Air, Worked All Zones and the like.

Mills says this means that users will only pay for what he calls usable "QSL's. You will not have to pay for attempts to get a QSL as you currently do when you send them via mail -- whether direct or via a bureau. Mills believes should result in a dramatic saving as compared to tradition methods of obtaining QSLs.

Mills also notes that five years is about as far back as Logbook of the World will probably ever go. Initially says Mills, it won't go back even that far. This he says will be an attempt to manage the initial data in-rush.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF.

--

In addition to his work on Logbook to the World, Wayne Mills, N7NG, is the Membership Services Manager for the American Radio Relay League. (VHF Reflector)

ARNEWSLINE FUND REPORT: THANKING OUR AUGUST SUPPORTERS

Ladies and gentlemen, with the August listener appreciation list, here is Amateur Radio Newsline support fund administrator Andy Jarema, N6TCQ.

--
In the month of August we heard from:

Mt. Beacon ARC of Wappingers Falls, NY; Benton Bonney of Orlando; Hiram's Hams Amateur Radio Society of Miami.

A BIG thank you to Roy Blanchard, N5YHS of New Orleans; Mike King, W5PY of Slidell, LA; Daryl Stout, N5VLZ of Little Rock, AR; Robert Guidas, KB4ABF of Maynardville, TN; Radio Amateur Club of Knoxville, TN; Richard Wolf, WI8X also of Knoxville.

Monthly contributor Frank Hemko of Harrods Creek KY; Robert Majkrzak, KA8WQL and Cheryl Turner, KB8YKA of Berea, OH and Wally Willhard, W7MVK of Bountiful, UT.

From California, William Walters of San Jose; Daniel Hart, KE6UHG from Bakersfield; Robert Vitzelio, W6AEJ of Downey; our friends at the Pasadena Radio Club, W6KA and our old friend and star of last month's QST Magazine, Dave Bell, W6AQ of Hollywood.

Andy Jarema, N6TCQ. Thank you for your support.

--

More with Andy and the support fund in future newscasts. (ARNewsline Support Fund)

**

INTERNATIONAL - GUATEMALA: A BIG UHF WIN FOR HAM RADIO

A big win for ham radio in Guatemala. The Club de Radioaficionados de Guatemala says that nations spectrum regulators are returning the 430 to 440 MHz band to Amateur Radio use. Amateur Radio Newsline's Bill Burnett, KT4SB, reports from Miami.

--

It was five years ago, back in 1996, when the Guatemalan government suddenly banned hams from access that spectrum. Guatemala then auctioned those frequencies to commercial operations.

But reports out of Guatemala soon said that the reallocation was not working they way the government had envisioned. No reasons were given. Now comes word through AMSAT that these new users will be moved elsewhere and the 430 to 440 MHz band will be returned to its former use in Amateur Radio operations.

And in the hope of preventing this kind of an arbitrary reallocation from ever taking place again, the Guatemalan national Amateur Radio society says that it will ask the International Telecommunications Union to add a footnote to its table of allocations at the World Radiocommunication Conference 2003. One that will give the Amateur Radio service primary status from 430 to 440 MHz in that country.

From Miami, I'm Bill Burnett, KT4SB, reporting for the Amateur Radio Newsline.

--

The Club de Radioaficionados de Guatemala had petitioned the Guatemalan government to reverse its decision removing ham radio operations from the 70 centimeter band. (ARRL, AMSAT, Q-News, CRG, others)

**

INTERNATIONAL: BIG VK SITE FEES WIN

Hams down-under in V-K land are also celebrating after surviving a threat. This, to their use of several key repeater sites. Q-News Graham Kemp, VK4BB, has the details from Melbourne Australia:

--

Rob VK2MT reports on APC News that local clubs were faced with annual site bills of up to $3000. A lot of "e" and snail-mail correspondence was generated plus a couple of visits to Members of Parliament, both at the State & Federal level. What became obvious after about a month, was that the "softly-softly" approach -- while still holding a big stick -- was perhaps the

way to go.

Well, just over 3 months later and the dust has settled. Illawarra have been officially informed that there will be a maximum figure of $300.00 attached to each existing Amateur Club that has equipment at a TransGrid site. Also, they won't be charged per antenna -- as was going to be the case, all existing and documented by TransGrid antennas will be part of the deal.

For Q-News Australia, Im Graham Kemp, VKBB, reporting for the Amateur Radio Newsline.

--

Clubs will have to satisfy several provisos, such as insurance, priority of commercial users and the like. Overall though it is a satisfactory outcome for amateurs and clubs, who could have faced fees ten times as much. (Q-News)

**

INTERNATIONAL - JAPAN: WRTC-2002 AT HAM FAIR 2001

According to a recent WRTC press release, Yaesu will be the principle radio equipment supplier for WRTC 2002. This as WRTC representatives Martti Lane, OH2BH and Dennis Motschenbacher, K7BV sign a major sponsoring agreement with Jun Hasegawa, president of Vertex Standard Co.Ltd. Vertex Standard manufactures the Yaesu line of ham radio gear.

Lane and Motschenbacher signed the agreement while in Japan to represent WRTC 2002 at the recent "Ham Fair" in Yokohama. While at Ham Fair they invited Tack Kumagai, JE1CKA to act as the WRTC 2002 representative in Japan. Kumagai has accepted the post. (WRTC-2002 Press Release)

**

DX

In DX, yet another successful super low frequency report across the Pacific. Jeramy Boot, G4NJH, has more:

--

Low frequency signals have crossed the Pacific for the second time. During the Autumn equinox on the 21st of September, a number of New Zealand and Australian stations sent extremely slow Morse on their 165 to 190kHz LF band. Part of the signal from ZL6QH was received by VE7SL in south-west Canada just before his dawn, fading out some three minutes after sunrise. The path length is estimated to be 11,709 kilometres.

Radiated power was estimated to be 5 watts and the antenna was a long wire at the Quartz Hill club station, which is run by the Wellington Amateur Radio Club. Reception of a complete callsign is the next challenge. The short duration of the opening means that a faster mode must be used, but this is likely to worsen an already marginal signal to noise ratio. Permission is also being sought for ZL6QH to operate in the 136kHz band
--

Because of the extremely slow speed of the contact there is no audio to share with you. In fact, reception requires a computer and a special decoding program. Our thanks to Bob Vernall, ZL2CA, for much of the information on this historic radio event. (ZL2CA, RSGB)

**

THE FINAL ITEM: BANDPLANS ARE IMPORTANT TO THE FCC - PART 2

And finally this week, we take another look at the FCC's position on voluntary bandplans in the Amateur Radio service. According to the Special Counsel for Amateur Radio Riley Hollingsworth there are two kinds of problems the FCC sees. The first is the operator who simply does not know that a specific bandplan exists:

--

"Now, in the first case, not knowing about the bandplan. Thats more understandable than you might think at first. Unless an oprator really keeps up with Amateur publications including League publications, they wont know about the bandplans."

"Now, a lot of operators have a list of frequencies on which they are authorized to operate and they keep it right at the operating desk. I'd recommend having a second sheet with that frequency list that describes the bandplan for each band. In some ways the bandplans are more complex than the frequency list, but in fact they don't really inconvenience anyone and they really do enhance Amateur Radio and make it a lot more interesting -- and make it possible to do a lot more experimenting."

--

But what about that small but vocal group of hams who simply refuse to abide by bandplans by claiming its their right not to. For these people, Hollingsworth has some words as well:

--

"That attitude is very destructive, and they just can't stand it that there just might be an area where they just should not go because of a bandplan."

"Now, they do not stop to think that QRP or PSK-31 could not exist without bandplans. The fact that they have about 3,850 other desecrate frequencies, and don't have to bother the folks in the bandplan set-aside segments -- for example on 160 meters in the CW bandplan recommended segment -- that never occurs to them."

"And of coarse if they were adhering to a bandplan and someone bothered them, they would be the first to knock on the FCC's door."

--

As Hollingsworth stated last week, these are hams who are totally focused on rights and could care less about responsibilities. They do not care about the damage that they do to Amateur Radio and do not have a clue as to how much pressure is on our frequencies from entities that would like to see them taken

away. (RAIN)

**

NEWSCAST CLOSE

Who told the CW operator that keying at 60+wpm makes for faster operation?
Hang him higher. With superfast flutterfasing and signals over the pole it
is virtually impossible to copy the guy with a modest set up.

20+khz split is hardly acceptable either.

Apart from the fact that he has to repeat callsigns over and over.

Send Roger and Nigel over to the island and let them show how a steady
stream of QSOs without QRM can be achieved with 30 wpm.

Yes, I am in the log, despite all that, so I am not bitching about not
having worked them.

Peter Lemken

2673. Re: PC PAKRATT for Windows

Newsgroup: rec.radio.amateur.dx
Date: 2001-10-07 14:38:20 UTC
From: Rick Ruhl <ricker@cssincorp.com>
Message-ID: <_IZv7.29036$S27.1874638@e420r-atl2.usenetserver.com>
Source record: 15727

Hi Phil,

CSS is the copyright holder for PakRatt, and we discontinued it through Timewave in June, due to Microsoft ending support of DOS, Windows 3.1 and Windows 95 on December 31, 2001. No more support or develoment of PakRatt is available.

The 32 bit replacement is PkTerm for Windows. The new 1.5.2 update includes many of PakRatt's features, as well as support for Timewave's new PK-232/PSK-31 interface. It will run under any 32 bit version of Windows, from Windows 95 to Windows XP.

You can upgrade to Pkterm from your older copy of PakRatt for $50.00. All the info is at http://www.cssincorp.com/pkterm.

Rick - W4PC

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, WA2UUK, W3LEO, W3UR & The Daily DX, N4AA & QRZ DX, W4WX, KH6BZF, K8YSE, W0SD, CE6TBN, DJ7IK, DL1EK & DX News Letter, DL1SBF, DL5FU, EA5RD, F5NQL & UFT, GM4YXI, HA0HW, IK4WMH, IK7JWX, IN3QBR, JA1ELY, Japan DX News, OK1DOT, SV1XV, TG9AJR, VA3RJ, VK2UW, VK4AAR, YS1RR, Z35M, ZK1CG and ZP5YW for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 30/September, through Sunday, 7/October there were 218 countries active. Countries available: 3A, 3B8, 3D2, 3D2/c, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5Z, 6W, 6Y, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HC8, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J6, JA, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, SM, SP, SU, SV, SV5, SV9, T2, T30, T32, T7, T9, TA, TF, TG, TI, TK, TL, TR, TU, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2E, VP2V, VP5, VP6, VP8, VQ9, VR, VU, XE, XU, XW, XX9, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3D2, CONWAY REEF. The DXpedition team is now active as 3D2CI (CW) and 3D2CY (SSB and other modes). The team had a slight delay due to some luggage that was lost on the way to Fiji. The operators there are: YT1AD/Hrane, YU1AU/Micky, YU1DX/Fex, YU7AV/Vojo, YZ7AA/Steve, YU1NR/Ratko, N6TQR/Doug, K6NDV/Will, RZ3AA/Vlado and Z31FU/ZS6MG/Vlado. Activity is expected to last until October 11th. For the latest press release, go to VE3EXY's

Web site at: http://www.magma.ca/~ve3exy/index.html

8R, GUYANA. Esmond, 8R1AK, has been using the special callsign 8R1USA on 20/17/15/10 meters. Look for him around 28530, 21260, 18127 and 14247 kHz anywhere between 1900-0500z. QSL via 8R1AK.

8Z, SAUDI ARABIA. A station signing 8Z0A has been active over the past week on 20/15/10 meters. Not much is knwon about this activity other than the operator stated his name was Abdullah and to QSL via HZ1TA. We recommand to "Work First Worry Later" (WFWL).

9G1 GHANA. Arliss/W7XU, Richard/K5AND and Ed/W0SD will be operating from Elmina, Ghana, between October 27th through November 4th. Six meters will be the main emphasis, but there will also be activity on 80-10 meters, especially RTTY and PSK on the usual DX frequencies for RTTY. QSL via N0QJM.

A2, BOTSWANA. Toshi, JA1ELY, informed OPDX that he just came back from from Botswana last week but mentioned that 79 year old DXpeditioner Mako, JA1OEM, is still active and operating from Gabrone as A25/JA1OEM. He will continue to be active until October 17th. Toshi requests to "Please be patient with Mako's slow CW operation". Mako has been heard on CW on 40 meters between 2100-0200z, 30 meters after 0300z and 15 meters after 1930z.

C98, MOZAMBIQUE. Babs/DL7AFS (YL), Lot/DJ7ZG, Karl/DL2FAG and Simone/ DL8GCS/IV3NVN, will continue to be active as C98DC from Inhaca Island (AF-066), Mozambique until October 13th. The team of operators over the past week have been very active on 40/30/20/17/15/12 meters CW/SSB/RTTY, but keep an eye on the other bands that were not mentioned and some PSK31 activity. They will have online logs available after their DXpedition on their Web page at: http://www.qsl.net/dl7afs/index.html
QSL C98/DJ7ZG via DL7AFS (bureau) or direct to: Babs Linge, Eichwaldstr. 86, 34123 Kassel, Germany.

CN, MOROCCO. Look for Jacques, F6BEE, to be active from here for the CQWWDX CW Contest using the callsign CN2JS. Jacques will enter the contest as a Single Op/All Bands category, from the ARRAM ARC in Rabat. If he can bring an amplifier, he will operate High power. Jacques will arrive in Morocco on November 21st, but he thinks he will not be too active before the contest except to tune up the station (CW and some SSB). He will leave Morocco on Tuesday, November 27th. Jacques will also try to bring a R7000 (but his luggage is already very heavy); so possibly look for him on the WARC bands before the contest. QSL via F6BEE.

DXCC NEWS.....
Bill Moore, NC1L, DXCC Manager, announced this past week that the "DXCC has approved ZK1NDK (North Cook Islands) for DXCC credit. It was on the bad list for lack of documentation for a while. The documentation has been reviewed, and it is OK. People can now receive DXCC credit. Anyone who has submitted it and had it rejected, can contact us and we'll be able to update their record without having

to submit the card again. If not, it can be sent in the next submission."

John, N4MM, informed the users of the NJDXA's DX Reflector that three TT8 Chad operations are NOT good for DXCC. The reason given by the DXCC Desk is that NO documentation has been received at ARRL. Both TT8DX and TT8JE, which have been on recently, are not being accepted for DXCC. F5OGL is the QSL Manager for TT8DX, and John suggests that someone should get the word to these stations and tell them that their QSLs are no good for DXCC unless proper documentation is received at ARRL HQ DXCC Desk. John also mentioned that Bill Moore, NC1L, told him that there are many others from TT8 which are not being accepted due to the same problem.

FM, MARTINIQUE. Look for Jean Marc to be active from here as FM5/F5SGI, from February 19th to March 1st, 2002. He will be active on the HF bands, mostly on CW. He will operate from FM5CW's and FM5FA's stations. QSL via REF bureau or direct CBA.

FO/A, AUSTRAL ISLANDS. Eli, HA9RE, will be on Rurutu Island (OC-050), in the Austral group from October 17th through November 5th, and be active as FO0ARE/A. He will also be in the CQWW DX SSB Contest. He has two radios with him (100 watts output each) and several kinds of antennas to cover all 9 HF bands: 160/80/40 meters with wires, on the WARC bands and 20/15/10 meters with multi-band verticals and 2 HB9CV beams for 20 and 15 meters. QSL direct only with 2 USD to the QSL Manager HA8IB: Karoly Szabo, Fuzesgyarmat, Aradi U. 42, 5525 HUNGARY.

H4, SALOMOM ISLANDS. Look for Luca/IZ6DSQ and Ant/IZ8CCW to be active from here now through October 23rd. Callsigns are unknown as of going to press, but they expect to receive the callsign(s) upon their arrival. Their plan is to activate several islands. Islands mentioned as this was being written are: New Georgia (OC-149) on October 8-15th and Piegon Island (OC-065) in the Reef Island group on October 17-23rd.

HB0, LIECHTENSTEIN. Laci/HA0HW, Tomi/HA4DX and Geza/HA4XG will be here again during their annual autumn trip as in past years. The operation will take place from Schoenblick, Triesenberg (ASL: 1100m), between October 17-25th. Three stations are expected to be active on the HF bands on CW/SSB, maybe on RTTY, with yagis and vertical antennas by DunaX (http://www.pannondxc.hu/dunax). QSL the following callsigns, HB0/HA0HW/p, HB0/HA4DX/p and HB0/HA4XG/p via their home callsigns. Cards will be answered the same way as the operators received them. Direct cards will be answered direct, while bureau cards via bureau.

IOTA NEWS.....
AF-018. Mauro, IH9/IN3QBR, and Walter, IH9/IN3XUG, will be active from Pantelleria Island, Zone 33, from October 22-26th. Their activity will be on all bands, including the WARC Bands and perhaps 6 meters. Operations will be mostly on CW and RTTY. They will also enter in the CQWW SSB Contest with the IH9P team. Also, look for IR3Z to be operated by Fabrizio, IN3ZNR, during the CQWW SSB Contest. QSL information for all callsigns

(excluding IH9P) must be sent direct or bureau to IN3XUG.

EU-012. Chris/GM3WOJ and Keith/GM4YXI are returning to Shetland
between October 24-29th for the CQWW SSB contest. They will
be active during the contest using the unique callsign GZ7V.
The GZ prefix is only permitted by special arrangement and
so far, this is the only GZ callsign issued. GZ is the unique
prefix for Shetland. This counts as GM for DXCC purposes but
is a seperate multiplier in CQWW contests, as GM/Shetland is
a seperate WAE country. They were active last year also,
but many were unaware that GZ counted as Shetland and
therefore as a seperate multiplier. They will be entering
as a Multi/Multi category and will be active using high power.
They will arrive on Shetland on Wednesday, October 24th,
and after setting up antennas, they hope to be active on
10/18/24 MHz before the contest to give out EU-012 to IOTA
hunters using their home calls/P. QSL all Shetland QSOs
via ZS5BBO. See their website at: hhtp://www.GM7V.com

OC-154. Dan, VK8AN/6, will be back on Troughton Island beginning
October 10th through October 20th (or possibly the 24th).
He will pull his tower down before he leaves the island,
ahead of the cyclone season. He won't be putting the island
on air again until the season finishes, probably about April
next year. QSL is still via VK4AAR direct (address below):
Alan Roocroft, POB 421, Gatton 4343, Australia.

SA-018. Marco, CE6TBN, wil be going to Chiloe Island and will be on
the air as CE6TBN/7 from October 11-31st. He will take part
in the CQWW DX Contest as CE6TBN/7 as an All Band/Hi-power
entry. QSL via CE6TBN: Box 1234, Temuco, Chile.

IR7, ITALY. Alfredo, IK7JWX, informs OPDX that the following special
callsign will be used during all the weekends in December 2001: IR7GM.
The reason was not given for the use of the special callsign, however,
a special QSL will be available via IK7JWX, bureau or direct.

J4, GREECE. A group of Greek hams will be active as J41NIK during the 2001
JOTA event (October 20-21st) from Piraeus. Look for the 2nd Aero Scouts
Group to be active on the HF bands (80-10 meters), including PSK31 during
the evening hours of Saturday. QSL via SV1HR (direct or bureau).

J7, DOMINICA. Five members of the Flordia DXPedtion Group (FDXPG),
Bill/W4WX (J75WX), William/N2WB (J79WB), Bob/KR4DA (J79DA), Larry/W1LR
(J79LR) and Clarence/W9AAZ (J79AA), will be active from Dominica from
October 23-30th. They will do a Multi-Single entry in the CQ WW SSB DX
Contest. They have been assigned J75J for the contest. Look for them on
all bands, including 6 meters, on CW, SSB, PSK-31, RTTY, HELL, and MMTTY
before and after the contest. QSL J75J to KR4DA, J79WB direct to N2OO,
and the others via the bureau or direct to home callsigns. Check out
the team's Web page at: http://www.geocities.com/j79wb/index.html

KH6 CONVENTION. Propagation guru Lee, KH6BZF, wants to remind everyone that 4TH annual Hawai'i State Amateur Radio Convention will be held Saturday, October 13th, at Rainbow Park, Pearl Harbor, HI. For more details go to the Web page at:
http://www.pilikia.net/karc/hamfest/index.html

MM0, SCOTLAND. Leo, W3LEO, will once again be active from Portpatrick in the southwest part of Scotland from about October 14th through November 17th. However, Leo states that this is once again a vacation and not a "DXpedition" and "time on the air will depend on the antennas, propagation, and on when the nearby pubs are open..." His callsign will be MM0LEO and he plans to be active in the CQWW DX SSB Contest. He will use an Icom 706 (100 watts]), a R-5 vertical (10/12/15/17/20 meters), and a 40-meter dipole (in a delta configuration). QSL via his CBA (with SASE) or via the bureau to W3LEO. A new full color QSL card with a view of Portpatrick is now being printed. For some interesting photos and details of where Leo is staying, go to the Web pages below:
Moir Cottage (MM0LEO's QTH): http://www.moir-cottage.co.uk/
Harbour House (the nearby pub): http://www.harbourhouse.co.uk/

QSL INFO AND NEWS.....
Frank, EA5RD, informs OPDX that he is the QSL Manager for the following callsigns: CW5AM, CX4AT, CX5BE, WP4Q, LU3VAL and LV2V.

Steve, IK4WMH, informs OPDX that from now on he will be the QSL Manager for the IQ4T contest station. He reports that he has all the logs. Steve has received a big stack of cards via the bureau during the last few years and has been supplied with blank QSL cards. He will now start answering all the bureau cards. QSL cards for IQ4T are via IK4WMH, either direct (Stefano Turci, Cerchia S. Egidio 4460, 47023 Cesena, Italy) or via the bureau. Bureau requests via E-mail are welcome, send a message with the details of the QSOs, and the cards will be sent via the bureau as soon as possible. His E-mail address is: topdxer@tin.it

NEED A QSL MANAGER? Petr, OK1DOT, is looking/volunteering to become a QSL Manager for a rare station or DXpedition. He can be contacted via E-mail at: gustab.petr@azd.cz

The station TG0IARU, which was active between September 30th and October 6th, was a special event station to celebrate the XIV Conference of IARU Region II in Guatemala City, Guatemala. QSL via the CRAG (Guatemala Radio Club), P.O. BOX 115, Guatemala City 01001, Guatemala.

Andy, DJ7IK, announced that if you are interested in reading the TS7N story about the "Kerkennah 2000" DXpedition look at the following Web page: http://www.qsl.net/ts7n

Cezar, VE3LYC, indicates that he cannot act as QSL Manager for Jack's last summer/fall IOTA NA-173 operation from the Nunavut (Hudson Bay - QC Coast) South Group as VY0/W2NTJ until he sends the logs.

Just a note of interest/correction, Maylon Harvey, WA2UUK, informed OPDX that he operated XP1AB while on Temporary Duty (TDY) with the Air

Force at Sondrestrom AFB, Greenland, from July 20-29th, 1977. So as you can see the callsign has been used since the 1960's. Maylon also knows of one other operation by WA7ZLC who made 229 QSOs in August 1977 and gave WA3HUP as his QSL Manager. He also thinks there were some other small operations. XP1AB was the Air Force MARS callsign for Sondrestrom at that time. Maylon states he made 1,080 contacts and still has the logs and a few blank cards. In the years since then, he has received QSL requests and has sent cards to about 40% of those contacts. Anyone still wanting one, can send a SASE to WA2UUK (QRZ, CBA okay), and he will get a card out right away.

Mike, ZP5YW, reports that due to a recent mail rate increase in Paraguay, effective as October 1st, 1 IRC or 1 USD sent to ZP stations as return postage is no longer enough to cover the air mail cost of a letter. The new mail rates require 2 USDs to cover the mail rates to everywhere in the world except for neighboring Argentina (LU) and Brasil (PY), which is a little under 1 USD. Mike states IRCs are useless in Paraguay, as they cannot be redeemed, but they do use them for QSLs that they send to others countries, so they may still be usable.

T2, TUVALU. "Team Tuvalu" consisting of Ono/JH7OHF/AH6G (a member of K5K), Ted JJ1LIB/N1GO (a member of 5T5U/S07U), Hiko/JN1HOW/AH6PW (a member of 5T5U/S07U) and Mano/JQ1KNH/W6KNH are pleased to announce the following "big DXpedition for the world DX lovers". "Team Tuvalu" expects to make huge amount of contacts from T2-land (OC-015), especially on 160m for Europe and the East Coast of USA, and on 6m for Europe by long-pass opening. Operations will take place between November 1-8th, using the callsigns T20T or T22T (on HF) and T20SIX (on 6m). Activity will be on 160-6 meters SSB/CW/RTTY. They plan to have three stations on 24 hours a day.
Equipment: IC-756PRO+AMP, two TS-570G+AMP, FT-920+AMP, IC-706MK2(for 6m beacon, 50105/QSX 50130)
Antennas: a 4 element triband Yagi for 20m/15m/10m, a 4 element duoband Yagi for 17m/12m, 4 element and 7 element Yagis for 6m and 160-30m verticals/dipoles.
QSL information: HF via JN1HOW, 6m via JH7OHF, both direct only.
JN1HOW - Toshihiko Niwa, 1081-8 Sakae, Kitakawabe, 349-1213 JAPAN
JH7OHF - Katsushi Ono, 15-10 Gamokotobuki, Koshigaya, 343-0836 JAPAN

TG, GUATEMALA. Arno/DL1CW, Andy/DL3GA and Thomas/DB2TR (who is based in TG) will be active now through October 15th as TG/homecall. They will focus on the upper bands CW with an occasional operation on RTTY and SSB. Their equipment consists of Icom IC-706s, Ameritron ALS-600 (600w), Titanex LP5, Cushcraft R-7000 and wire antennas. They will try to be active during the premium times for Europe, North America and Japan, mosquitoes permitting ;-). QSL TG/DB2TR via DL1SBF, others via their home callsigns (bureau preferred).

USI NEWS. Tom/N1HCI, Murph/WA1VKO, Waine/KE1KX and Mark/K1RMC will be active from Bear Island (NH-NEW), New Hampshire, October 13th at 1400z. They will be operating on 7260 kHz LSB and 14260 kHz USB. CW operations are possible however times/frequencies are TBA.

V6, MICRONESIA. Masayoshi, JE1LES, will be active from October 22-28th as V63HJ. Activity will be on 20-6 meters with operations on CW/SSB/RTTY/ PSK31/SSTV. QSL via JE1LES.

WAG CONTEST. Wolf, DL5FU, wants to remind the DX community that the Worked All Germany Contest (WAG) is from 1500z, October 20th, through 1459z, October 21st. Activity will be on 80, 40, 20, 15, and 10 meter bands, CW or SSB or mixed, max. 18 hours of operating time for single operators are allowed. For foreign stations working German stations, the exchange is sending your report and a serial number. German stations will send report and their "DOK" (Distrikt-Orts-Kenner = District Location Nominator), e.g. K18. Multiplier is number of Districts (letter "K" in the example) per band (max. 26 per band). Contest rules can be found in detail at: http://www.darc.de/referate/dx/fedcg.htm

Z3, MACEDONIA. Vlado, Z35M, informs OPDX that he is running his own personal "QSO MARATHON" during the calendar year 2001 (January 1st-December 31st) from his home QTH and under his personal call Z35M. He states, as of October 2nd, he has made 26,420 QSOs on all HF bands. He hopes to reach 30,000 QSOs in about a month. His all-time QSO total is 136,920 since August 1987 (under his other callsign: YU5KV,4N5KV,Z32KV,Z350KV and Z35M). Vlado can usually be found on 20 meters CW (around 14026 kHz) between 2245 and 0400z. Also, check 10 meters CW/SSB between 1000 and 1500z.

ZD7, ST. HELENA ISLAND. Barry, ZD7MY, made a rare appearance a week ago on Sunday, September 30th, on 20 meters (14215 kHz around 0620z). Hopefully, this is a good sign that Barry will be active again. QSL via CBA.

ZD9, GOUGH ISLAND. Chris, ex-ZS8IR, is now active as ZD9IR and will be active for the next year. He is expected to be active on 160-10 meters CW/SSB/RTTY. Currently, reports indicate that he is only using a wire antenna, but he plans to put up a beam for 20/15/10 meters and better arrays for the lower bands. His activity over the past week were on 30/17/15/10 meters. QSL via ZS6EZ.

ZK1, SOUTH COOK ISLANDS (Also North Cook Info). Victor, ZK1CG, has informed OPDX earlier in the week that the Telecom of the Cook Islands have issued him a special callsign to use to show support for the "People of the United States" in these trying times. The callsign to be used is "ZK1USA". Victor will get special QSLs cards made up for this special callsign. He was spotted last week on 20 meters around 14245 kHz around 1415z and on a net on 14183 kHz around 0600z. QSL via ZK1CG: Victor Rivera, PO Box 618, Rarotonga Cook Islands, Via New Zealand.
Later in the week, Victor sent your editor another message containing more details of his special activity and the upcoming Manihiki, North Cook Island operation. Victor states he just started this past week using the ZK1USA callsign. However, since all of his antennas are set up on North Cook, he is only using a G5RV from Rarotonga until October 18th, when he flies up to Manihiki with Roger, W7VV (ZK1VVV). He mentioned that the callsign ZK1USA has caused a little stir especially on the ANZA Net. Victor states, "hams from the USA and around the world are sending E-mails thanking me for the thought and best wishes from the Cook Islands. The people of the Cook Islands have a very special feeling for the people of

the United States and they have expressed their thoughts and concern for the people lost in the tragic event that has effected everyone in one way or another. Most Americans do not know about the Cook Islands but a lot of them were stationed on two of the Islands during the Pacific war in the 40's on bases in the South Cooks and North Cooks. Being an American here in the Cooks for almost 25 years, I still feel a strong sense of being American and this will never change. Just happy that we can show in a small way our support and the Cook Island people are thinking of the people in America and Around the World in these trying times. When we return from the trip to Manihiki we will get a special QSL made up for this callsign to send out." He adds that for the CQWW SSB Contest they will use ZK1CG callsign as planned by the Tuatai Group: ZK1MA (Also ZK1CY), Roger/ZK1VVV (W7VV), Bob/ZK1ASQ (W7TSQ), John/ZK1APM (AA7PM), and Ralph/ ZK1AKX (VE7XF). The members will use their own callsigns before and after the Contest, and Victor will use the ZK1USA callsign before and after the contest. Victor wants to personally thank all the people who have sent donations to help them with this expedition to Manihiki.

Excerpts and distribution of The OPDX Bulletin are granted as long as KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS online at 440-237-8208 28.8k/14400/9600/2400/1200 and leave a message with the Sysop or send via InterNet Mail to:
kb8nw@barf80.nshore.org - OR - kb8nw@arrl.net
Use the VOICE or FAX answering machine at 440-237-8208 which shares the same phone line as BARF-80 BBS using a data/fax/phone switch. To access: 1) Dial Number. 2) Wait for first ring (the second ring should be a false ring from the fax/data switch box) and then dial four quick ones ("1111"). (NOTE: Some FAX machines that send single "BEEPS" every second will not have to do this step.) 3) The phone will pick up and after the "BEEP" leave your voice message or FAX.

2675. Anyone hear YA2WTC on 14.323 Afghanastan or pirate?

Newsgroup: rec.radio.amateur.dx
Date: 2001-10-08 00:22:37 UTC
From: Robert Casey <wa2ise@ix.netcom.com>
Message-ID: <3BC0F1CD.3F48D362@ix.netcom.com>
Source record: 15729

Think I heard "YA2WTC" on 20 at 23:58 zulu
on 14.323, couldn't work him. My handbook
says YA is Afghanastan, though no hams existed
there. Maybe a pirate? Or "underground"
station outside Talaban territory?

2676. Re: Anyone hear YA2WTC on 14.323 Afghanastan or pirate?

2680. List of the rec.radio newsgroups

Newsgroup: rec.radio.amateur.dx
Date: 2001-10-08 05:30:06 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <9prdku$c5v$1@news.hawaii.edu>
Source record: 15734
Cross-posted to: rec.radio.amateur.digital.misc,rec.radio.amateur.dx

Archive-name: radio/personal-brief-introduction

In an effort help ensure a poster's article reaches the appropriate audience, below is a list of the rec.radio newsgroups. In most cases, a group's name will explain its purpose. Cross-posting should rarely be necessary.

rec.radio.broadcasting (devoted to the broadcast industry; moderated)
rec.radio.cb
rec.radio.info (periodic informational bulletins; moderated)
rec.radio.scanner
rec.radio.shortwave
rec.radio.swap (for buying, selling, and trading; not a discussion group)

rec.radio.amateur.antenna
rec.radio.amateur.boatanchors (tube-type communications equipment)
rec.radio.amateur.digital.misc (packet, pactor and other digital modes)
rec.radio.amateur.dx (long-distance amateur communications)
rec.radio.amateur.equipment (questions, comments regarding commercially-built amateur gear; not for buying/selling)
rec.radio.amateur.homebrew (devoted to home-building ham gear)
rec.radio.amateur.policy (issues include code, restructuring, local restrictions in conflict with FCC R&R)
rec.radio.amateur.space (satellites, meteor scatter, EME)
rec.radio.amateur.misc (any amateur topic not covered in the above groups)

(At least two other English language radio hierarchies exist, prefaced with "uk" (United Kingdom), and "aus" (Australia), in place of "rec.")

Again, cross-posting should rarely be necessary. Many times, a long-running thread results from a single cross-posted article, and its content drifts further and further away from being "on-topic" in the various NGs which receive each and every followup.

For more detailed information, see "Guide to the Rec.radio Newsgroups" posted on the 15th of each month.

The high speed CI was a pirate, with a computer, not one of the
expedition team members. The team is using the CI suffix on CW
though, but not at 60 wpm.

I don't buy that. For a pirate they were on for too long and on too many occasion with the same style. Plus, it must have been a pirate form the central pacific with the same fluttery signal. Plus, they had the same style of operating going on during their first trip.

2695. 3A2DX - pirate station?

Newsgroup: rec.radio.amateur.dx
Date: 2001-10-13 18:12:04 UTC
From: Larry Gauthier <larryg5099@chartermi.net>
Message-ID: <tsh0vnbj477508@corp.supernews.com>
Source record: 15750

A station claiming the operator name of "Rob" and a home call of G3GM, with a QSL manager of F6TZ (his father-in-law), is operating right now at 24.945. QRZ reports him as a pirate - and none of the calls he referenced (his nor his father-in-law) are listed on QRZ.COM. When accused of being a pirate on the air, he said that he was among a large group of operators who has just paid $100+ dollars for a month-long license in Monaco.

Does anyone have the scoop on this dude?

AMATEUR RADIO NEWSLINE(tm) REPORT #1261 - OCT. 12, 2001

Amateur Radio Newsline report number 1261 with a release date of Friday, October 12th, 2001 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC says “yes” to S-D-R. This story is first on Amateur Radio Newsline report number 1261 coming your way right now.

(Billboard Cart Here)

**

EMERGING TECHNOLOGY: FCC APPROVES SDR

The FCC has taken the first steps in making Software Defined Radio or S-D-R a household word. This, as the regulatory agency adopts rules changes to authorize and begin deployment for a new generation of two way radio gear. Amateur Radio Newsline’s Bruce Tennant, K6PZW has more:

--

The Action took place on Friday September 14th at an open meeting in Washington D-C but the announcement was all but lost in the events occurring in New York City and the Pentagon only three days earlier. But what’s important is that this First Report and Order removes many barriers to entry of Software Defined Radio enabled products to the marketplace. And the new rules do allow manufacturers and operators of such devices to reconfigure them after they have been deployed in the field -- including -- possibly -- ham radio gear. This, says the FCC. will speed up the introduction of advanced technology and new services.

The new rules say that software modifications to an S-D-R can be made through what the FCC calls permissive change. The FCC describes this as a totally new form of filing process where the FCC identification number will not have to be changed nor will the equipment have to be relabeled each time its purpose is revised. In fact, the FCC says that it will permit use of an optional electronic label for S-D-R gear in which the FCC identification number could be displayed using a liquid crystal or similar screen. This will allow another party to obtain an equipment approval in its name and take over responsibility for compliance with operating rules that were the domain of the previous licensee.

The Commission has also adopted requirements saying that the license grant holder must take adequate steps to prevent the unauthorized software modification to S-D-R gear. But so far it has not set up any specific security requirements.

In Los Angeles, I’m Bruce Tennant, K6PZW, for the Amateur Radio Newsline.

--

More information on Software Defined Radio is on the web at several locations. The subscription S-D-R forum is the best. Its in cyberspace at www. sdrforum.org (W5YI Report, SDR Website, ARNewsline(tm))

**

AMERICA UNDER ATTACK: SATERN SAYS HAM HELP STILL NEEDED IN NYC

The last federal rescue crew left the World Trade Center disaster scene on Saturday, October 6th leaving New York officials to continue the nearly month-old effort to locate nearly 5,000 bodies buried in the rubble. The Urban Search and Rescue Task Force was the last of 20 Federal Emergency Management Agency teams sent in after the September 11 terrorist attacks that collapsed the twin towers, but their departure does not mean work is winding down. In fact, one volunteer agency says that ham radio operators will still be needed there for some time. Amateur Radio Newsline’s Henry Feinberg reports from near the scene.

--

Its the Salvation Army that needs radio operators to support the organization's World Trade Center relief operation in New York City. And even though it has cut one shift of radio operators the relief agency says that it still needs fresh Amateur Radio ham operators on a daily basis until further notice.

In a statement to the ARRL Letter, Jeff Schneller, N2HPO who is coordinating the Salvation Army Team Emergency Response or SATERN Network says that he is still short of people. Schneller says that the midnight to 8 AM shift has been suspended but they still needs six Amateur Radio operators per shift -- a total of 12 per day -- for the indefinite future.

SATERN needs these operators with their own base station radio gear at the Kennedy Airport warehouse set up from about 8 AM until about 9 PM -- possibly broken into shifts. SATERN also needs operators to ride with trucks to provide communication. If you can help, please visit http://www.satern.org for the latest information.

For the Amateur Radio Newsline, I’m Henry Feinberg, K2SSQ, 15 miles from ‘ground zero’ in West Orange New Jersey.

--

The Salvation Army said it's sending additional personnel from the Midwest to New York City to assist those who have been on duty since September 11th. In the area of ham radio, so far some 40 Amateur Radio operators have turned out to help support the Salvation Army relief effort with some coming from as far away as Missouri, North Carolina, Georgia and Florida. (ARRL, SATERN, published news reports)

**

AMERICA UNDER ATTACK: TERRORISM ATTACK CUES EAS DEBATE

When should the nations Emergency Alert System or E-A-S be activated? According to the trade publication Radio World, experts are debating that question because the E-A-S was not used following the September 11th terrorist attacks on New York's World Trade Center and the Pentagon.

Richard Rudman, W6TIA, is the chairman of the Emergency Alert System National Advisory Committee. He also chairs the Los Angeles County local E-A-S group. Rudman says that since the incidents that the national committee has recommended to the FCC that changes be made if a similar attack takes place again.

--

Richard Rudman W6TIA: "The Emergency Alert System -- at the local level -- ties into local emergency management. What I am suggesting is that we have to look at the elements of the critical infrastructure that might possibly have warnings based on the current threat and make sure that they are tired into local emergency management properly so that a decision can be made to issue an E-A-S warning if it is appropriate."

--

The question of whether an E-A-S civil warning should have been triggered has stirred strong debate among those subscribed to an on-line discussion remailer. Rudman says that the job of the E-A-S is to alert the public before an actual event occurs, rather than after the fact. He says that with the immediate live media coverage of the strikes on the two locations that the need for an E-A-S warning was lessened.

--

Richard Rudman W6TIA: "First of all, there wasn't enough information to give a clear warning of what was going on. You might as well have just put out an E-A-S message with one word -- 'panic.'"

"At the time that you get a warning you really have to have other information. I often say that our job -- quite often -- is to take people from the fear of the unknown to fear of the known. If you don't do that right, all you are doing is confusing people and possibly instilling panic."

--

Not everyone agrees. Radio World reports some speculation that there was enough time between the two plane crashes in New York that issuing an E-A-S alert might have saved additional lives.

The E-A-S was developed in 1994 to replace the then aging Emergency Broadcast System as a tool for the President of the United States and others to warn the public about emergency situations. But President George W. Bush chose instead to go directly to the mass media and did not issue an Emergency Alert Notification on the day of the terrorist attacks. As a result, E-A-S played no role in alerting the public to the emergency situations. (Radio World)

**

AMERICA UNDER ATTACK: REPEAL THE ECPA SO AMATEURS CAN MONITOR FOR TERRORISTS

A Michigan ham says its time for congress to repeal the Electronic Communications Privacy Act and lest SWL's monitor the cellular frequencies foe terrorist activities. Lloyd Ellsworth, NE8I, is circulating a letter to congress on the VHF Reflector that says the events of September 11th warrant giving the public the ability to again monitor cellular communications and report possible threats to the nations security onto authorities.

--

Lloyd Ellsworth NE8I: "If you have an area [of spectrum] -- for example 800 to 900 MHz -- where cellphones operate -- a terrorist could also conveniently operate there and not easily be caught. You would have someone specialized who had that [monitoring] equipment to receive him."

--

As Ellsworth's letter notes, the Electronic Communications Privacy Act forbids Americans from using a radio scanner receiver other device from eavesdropping cell phone and certain other radio communications. It also forbids the importation or sale in the country of equipment capable of interception of these signals. But says Ellsworth, these are tools and skills which any knowledgeable terrorist can easily use against America and Americans. And we all know that terrorists don't play by the rules.

--

Lloyd Ellsworth NE8I: "What I am concerned with is if a terrorist is able to freely operate and stands a very small chance of being caught while conducting some communications in that band -- they will."
--

Ellsworth says that repealing the E-C-P-A will even the playing field by giving law abiding Americans a way to listen for suspicious cellular phone calls or other radio signals that can be reported directly to an appropriate agency. Ellsworth notes that this would allow the average citizen, including police and law enforcement to directly to contribute fighting terrorism. Ellsworth adds that this would also put any terrorist on notice that any radio communications he or she may use is likely to be detected, intercepted and used against them. (ARNewsline(tm))

BREAK 1

This is ham radio news coming to you from the United States of America. We are the Amateur Radio Newsline, heard on bulletin stations around the world, including the Radio Club of El Cajon serving El Cajon California.

(5 sec pause here)

**

ENFORCEMENT: WARNING TO FISHERMEN GETS THEM OFF TWO METERS

It appears as if a warning letter was enough to get at least four ham fishing enthusiasts off of the two meter band. This, according to FCC Special Counsel Riley Hollingsworth who says that he has spoken with some of them and those operators are gone:

--
Riley Hollingsworth: “We had warned eight commercial fisherman in Alaska about operating on two meters without a license on the fishing vessel Evack and the fishing vessel Phoenix. Now four of these fishermen have called us or been in touch with us and apparently in addition to Marine equipment they were using amateur 2 meter handie-talkies. They have assured us that they have stopped using the [Amateur] equipment and our independent information indicates that too.”.
--

Hollingsworth says that his office is still waiting to hear from the other remaining radio users. (FCC, RAIN)

**

ENFORCEMENT: DON’T USE HAM GEAR WHILE HUNTING IF YOU ARE NOT A HAM

Fishing vessels are not the only unlicensed users showing up on the ham bands. In many areas it hunting season, and some of those on the prowl using amateur radio are not hams. The FCC’s Hollingsworth says that the agency has now warned four hunters in West Virginia about using unlicensed amateur gear while out hunting. (FCC, RAIN)

**

ENFORCEMENT: VK JAMMER FINED $3000 (AU)

The United States is not the only place bringing radio regulatory violators to justice. Q- News reports that the Australian Communications Authority has successfully prosecuted a man who cost a courier company an estimated $80,000 when he interfered with its two-way radio system.

In an all to familiar scenario here in the United States, the man who is an ex-employee of the company, played music over the two-way channel when the company was trying to pass on information to its drivers. Prosecution came after a long investigation by the Australian Communications Authority which direction finding equipment to track down the offender. He was fined $3000 after pleading guilty in Sydney's Downing Center Local Court to three charges of operating a radio transmitter without a license.

The Australian Communications Authority New South Wales Compliance Team Manager is Tony George. He says that the A-C-A works hard to detect unauthorized operation of radio transmitters. George added that the agency will act quickly to prosecute offenders. (Q-News, ACA)

**

RESCUE RADIO: HAMS CALLED OUT AFTER TEXAS BRIDGE COLLAPSE

Ham radio was called out after disaster struck in South Texas early on the morning of September 15th. This, after a 240-foot section of the Queen Isabella Causeway between South Padre Island and Port Isabel, Texas, collapsed after barges slammed into the bridge supports.

The mishap sent several vehicles plummeting into the water 80 feet below and claimed 11 lives. The Texas Department of Public Safety contacted John Teer, AK5Z, to request Amateur Radio assistance with communications, because all phone lines between South Padre Island and the mainland had been severed.

The ARRL Letter reports that Teer was able to get volunteers to place at the both the South Padre Island and the Port Isabell Emergency Operations Centers. The Department of Public Safety provided boat transportation to the Island for one operator. The hams then provided 2-meter communication for government and Red Cross officials on for two days until landline telephone and cellular service could be restored. Volunteering their services along with Teer were Pat Patterson, N5SLI, Virginia Scarth, KC5SAM, Ed Scarth, W8AHU, and Gregg Sargent, KAZ0ARS. (ARRL)

**

EMERGENCY COMMS: CELL PHONE LOCATOR DELAYED TO DEC 2005

People waiting for the cellular telephone industry to institute automatic emergency locating technology will have to wait some more. This, after the FCC gives some of the nation's largest mobile phone carriers more time to develop technology that allows emergency personnel to quickly locate callers who dial 911 from wireless phones.

ATT Wireleess, Cingular, Nextel, Sprint and Verizon had sought implementation schedule delays based on problems in obtaining the needed equipment from suppliers. The Federal Communications Commission mandated back in 1996 that all cellular phone companies have some location equipment in place and operational by 2002. Its now been pushed back to December 31st 2005. A similar delay was granted to VoiceStream last year. (Published news reports)

**

RADIO RULES: ANOTHER MASS CORES CONVERSION COMING

The ARRL Letter says that before the switchover to the new and mandatory Commission Registration System on December 3rd, the FCC plans to do a mass conversion from its current Universal Licensing System database.

The FCC established the Commission Registration System or CORES last year and has been in the process of implementing it. Once it becomes mandatory, everyone doing business with the FCC -- licensed or not -- must obtain and use a 10-digit F-C-C Registration Number -- or F-R-N.

The FCC calls the move is a first step toward streamlining fee collection and tracking. Many amateurs registered with the current Universal Licensing System were assigned an F-R-N by CORES in a mass conversion last year. Those who got one were notified by mail. (ARRL, FCC)

**

CONVENTIONS: DARA SAYS PLAN EARLY FOR HAMVENTION 2001

The Dayton Amateur Radio Association says that you should plan now to attend the 51st annual Dayton Hamvention. We have this report on the very special reasons why.

--
Dayton Hamvention 2002 is slated for next May 17 to the 19th. And in keeping with President Bush’s call for America to return to business as usual, the planners of the world's largest amateur radio gathering and trade show have sent out an early flyer. A flyer that tells everyone that the show will go on and that it will be bigger and better than ever before.

How do you make the best even better? How about the Hamvention’s new “All You Can Ride Option” advance purchase package. For a $3 additional fee over the price of a normal $17 advance purchase ticket price, show attendees can ride to and from the HARA Arena an unlimited number of times. If you wait till you get to Dayton it will cost you $22 not including bus service. Buying last minute bus rides will cost another $2 a day or $5 for the weekend. So the $3 in advance is quite a deal.

But that’s not all. If you post mark your ticket order before November 10th, you will also receive a limited edition Hamvention 2002 souvenir program. These normally sell an additional $5 at the door. And early reservations also get entered into the new Hamvention Gift Certificate Contest. Here, two ticket holders will be randomly picked to receive a $250 gift certificate redeemable for cash at Hamvention 2002.

For more information write to the Dayton Hamvention, Post Office Box 964, Dayton Ohio 45401. Or you can visit the Hamvention website at www.hamvention.org.

For the Amateur Radio Newsline, I’m Rick Johnson, KA9VZD.

--

Amateur Radio Newsline is already at work planning the Ham Radio Town Meeting for Hamvention 2002. Details on this in an upcoming newscast. (DARA)

**

CONVENTIONS: ELECTRONIC EQUIPMENT EXPO

Don't forget about the annual Electronic Equipment Expo, which has moved to Seattle from Bellevue this year. The dates are October 24th & 25th at the Stadium Exhibition Center in Seattle Washington and admission is free. The event is co-sponsored by Society of Broadcast Engineers Chapter 16. More information and online registration is at www.emexpo.org. (Portland SBE Newsletter)

**

HAM RADIO BUSNESS: THE HAM RADIO MARKETPLACE.COM

The Ham Radio Market located at is an Internet web board focused on radio equipment and "Ham Radio Stuff". According to President and Founder Bob

Hutchinson, N5CNN, it is operated as a public service for the ham radio community by the Wireless Industry Association which does not itself buy or sell anything. For more information visit http://hamradiomarket.com on the word wide web. (VHF Reflector)

ARNEWSLINE(tm) SUPPORT FUND UPDATE: ARNEWSLINE(tm) IS NOW A 501(C)(3) NOT FOR PROFIT CORPORATION

Ladies and gentlemen, with a long awaited announcement, here is Amateur Radio Newsline Support Fund Administrator, Andy Jarema, N6TCQ:

--

Just about a month ago I recorded an announcement similar to this. It was to be aired on newscast number 1257 which went to air on September 14th. After the events of September 11th, I felt it was best to delay a few weeks. As this is good news, I really do not want to hold off any longer.

Over the past two years we have all been working to bring Amateur Radio Newsline out from its old Westlink Radio Network identity and into its own individuality. This meant several things including a subtle name change, branding of our new name and revamping our website. It also meant becoming a self sustaining not for profit corporation. I am delighted to report that last goal has now been achieved.

Earlier this year, Amateur Radio Newsline Inc. was granted status as a California non-profit corporation. Then, in late August the I-R-S granted our petition and the Amateur Radio Newsline, Inc. became a Federal 501 (c)(3) tax exempt not for profit corporation. Yes, that’s right, as of August 20th, Newsline, as the programming arm of the old Westlink Radio Network is officially gone and the Amateur Radio Newsline as an entity unto itself came into being.

All of this was made possible by a generous donation from a Newsline supporter and benefactor who we are not at liberty to name. But it was that person to whom we at the Amateur Radio Newsline owe a deep debt of gratitude. So we pause a moment and say thank you. Thank your for helping make a dream of almost a quarter of a century become a reality.

We also want to thank the wonderful folks at the Holmsburg Amateur Radio Club in Pennsylvania under whose not-for-profit charter we have operated since incorporating as the Westlink Amateur Radio Network in the 1980’s. They are the people who said to us -- here is a place to start. They have been an

ardent supporter of what we do almost since we began our newscasts in the 1970’s. We will always consider them as being an important part of the Amateur Radio Newsline family.

Our final note this week. Just a reminder that the address for the Amateur Radio Newsline Support Fund still is PO Box 660937, Arcadia, CA 91066. If you missed it, don’t worry. It will be given again at the end of this week's newscast. For the Amateur Radio Newsline Support Fund report, I’m Andy Jarema, N6TCQ.

--

On behalf of everyone involved in the Amateur Radio Newsline, a big thank you to Andy and to our secret contributor for making it all happen. (ARNewsline(tm) Support Fund)

**

T-HUNTING: THE OWLS ARE BACK

Its fall and that means its migration time for numerous species. That includes that ever elusive Burrowing Owls. Here’s Joe Moell, K0OV, with the latest.

--
The fall 2001 migration period for Burrowing owls is beginning right now. Once again, Amateur Radio operators and VHF monitoring enthusiasts are being asked to help researchers study the patterns of this diminishing species. In addition to owls from the plains of Saskatchewan and Alberta, which hams have listened for since 1998, we're now being asked to monitor for 30 owls that were tagged near Moses Lake in eastern Washington state. Vicki Garcia of the University of Arizona wants our help, because it is uncertain if these birds spend the winter in California, or Baja California, or they go eastward to Nevada, Arizona, New Mexico or even to Texas.

The Canadian owl tags are in the 172 MHz range, while the Washington owl tags are near 150 MHz. If you live in a central state from North Dakota to Texas, or in any state to the west of that line, and you have sensitive monitoring equipment for these frequencies, your help is needed. For all the frequencies and monitoring information, go to my Web site, www.homingin.com. HomingIn is one word.

If you aren't on the Web, send e-mail to owls@homingin.com or postal mail to my callbook address. Again, that website is www.homingin.com

Thanks in advance for your help. From southern California, this is Joe Moell K-zero-Oscar-Victor for Amateur Radio Newsline

--

If you missed any of that, simply take your web browser to www.homingin.com. (K0OV)

**

NAMES IN THE NEWS: AMSAT-NA ANNOUNCES BOD ELECTION RESULTS

Some names in the news. This as AMSAT North America announces the results of its recent Board of Directors election. Barry Baines, WD4ASW, Dick Daniels, W4PUJ, Robin Haighton, VE3FRH, and Bill Tynan, W3XO, will retain their seats on the Board for the next two years. Bruce Paige, KK5DO is the first alternate and Dick Hambly, W2GPS is the second alternate. Paige and Hambly will serve until the next election. (ARRL, AMSAT-NA, others)

**

NET OPERATIONS: NEW NORTH TEXAS 222 MHZ NET

Dave Duval, K5UGM, in Dallas says that local hams are trying to start a new North Texas 222 MHz Net. They are also looking for station to check-in. The net operates on 222.105 MHz on Friday nights at 8 Central Time. If you think you can make the path, Bill says that the net will be listening for you. (VHF Reflector)

**

DX

In D-X, word that the same crew that aired 5U2K, 5U3T and 5U5A in March of 2001 will go back to Niger in January and February of 2002. This for a 2 week DXpedition with a larger crew that will include 3 to 4 new operators from Italy and the United States. At least 3 stations will be put on air with special attention paid to 80 and 160 meters. Overall operations will take place on 160 through 10 meters on CW, SSB, RTTY, PSK 31. Another station on 6 meters will operate CW and SSB. Callsigns will be announced at a later date.

Also, the electronic logbook is now on-line for the August 3rd tro the 5th K3L and National Lighthouse Weekend operation from Annapolis, Maryland. Stations who worked the AM Expedition to Thomas Point Lighthouse in the Chesapeake Bay can now check whether they made it to the official logbook. A photographic QSL certificate will soon be available. The QSL manager and other details are now posted at www.amfone.net/K3L. (Various DX sources)

**

THAT FINAL ITEM: HAM RADIO VS. A RUNAWAY BLIMP

And finally this week, what do you do if a blimp gets away? The answer. Call out ham radio. Amateur Radio Newsline's David Black, KB4KCH has the high flying details.

--

For members of the North Central Missouri Skywarn team…weather spotting means being on the lookout for hail, wall clouds and other severe weather…but the night of September 7th brought a situation they won’t forget anytime soon. Severe
thunderstorms were moving through the Kansas City area that evening, keeping amateur
radio Skywarn groups busy, assisting the National Weather Service. In the town of Trenton,
Glenn Briggs, KB0RPJ, was serving as Net Control for his spotters when heard a

request he didn’t believe at first.

--
IN We were discussing the squall line
OUT find it for them.
--

The blimp belonged to MetLife and had been parked at Kansas City’s Airport. It was scheduled for aerial photography during the following day’s Kansas City Chief’s football game. But mother nature had other plans for this airship as Briggs found out.

--
IN The t’ storms went thru and as it was moored at the downtown airport
OUT flying thru the air
--

For Briggs and his fellow hams, spotting suddenly brought forth a new challenge.

--
IN it was kind of interesting to try to look at the ..
OUT hit by a blimp
--

The blimp was in the air, flying out of control, for at least 45 minutes. The next task was to find it. Briggs says hams started a blimp watch.

--
IN We had begun sending hams out to try to track a NE trajectory
OUT land on a truck
--

A team of amateur radio spotters went to the scene and confirmed that blimp had been found. The crash site was a farm in the community of Chillicothe--that’s about 85 miles northeast of the Kansas City airport. The blimp fell to earth after its self deflation system activated. No one was injured. Members of the Skywarn team assisted with notifying the FAA and other officials in Kansas City. For Glenn Briggs and his fellow North Central Missouri Skywarn team members,
September 7th is a night to remember.

--
IN I would say it’s the most unusual
OUT our spotters will remember for years to come
--

Future weather spotting nets will undoubtedly include the usual…hail, high winds,
maybe even tornadoes. But at least one Skywarn team has the additional experience
of blimp spotting.

From Birmingham, Alabama, I’m David Black, KB4KCH, reporting for the Amateur Radio Newsline(tm).

--

And what else is there to say? (ARNewsline(tm))

From the 425 DX News at URL:
http://www.425dxn.org/425/425-n545.html

>>> DUCIE ISLAND 2001 <<<

Ducie Island (OC-182) should be the next new Entity to be added
to the DXCC
List. The Pitcairn Island Amateur Radio Association (PIARA) has
applied to
the IARU for membership and the closing date for voting is 15
November. If
PIARA becomes a member society of the IARU, Pitcairn will
become a DXCC
"Political Entity" and consequently Ducie Island, which is
separated from its
"Parent" (Pitcairn itself) by 350+ kilometres, will became a DXCC
"Geographic
Separation Entity".
PIARA has now announced that plans are complete for their
expedition to Ducie
Island [425DXN 529]. VP6TC, VP6DB, VP6BK/JA1BK, JF1IST, JA1SLS,
K9AJ, K5VT
and FO3BM will be active with a VP6 callsign to be
announced when the
operation starts, i.e. at 00.00 UTC on 16 November. The two main
frequencies
- 21020 kHz (CW) and 21295 kHz (SSB) - will be used 24 hours a
day. Other
prime frequencies include 28495 kHz and 14195 kHz for SSB and
14020 kHz for
CW, but some activity is planned to take place on the other
bands (160-6
metres) and on RTTY as well. Bill Avery, K6GNX will be the
pilot station,
while the QSL manager (direct and bureau) will be Garth Hamilton,
VE3HO. Logs
will be available at http://www.big.or.jp/~ham/dx.html.

Hallelujah - we are saved!!! All we have to do is drastically erode our privacy, probably followed by the accompanying erosion of freedoms and civil liberties and terrorism will be defeated.

Oh, yeah, and we also need to pass a law that will require the terrorists to use English in their daily terrorist activities, so that the "SWL amateurs" snooping on their neighbors cellphones can understand what's going on.

Next to come: repeal the Peeping Tom Privacy Act and allow amateur videophiles unlimited access to other people's bedrooms and bathrooms. After all - If you have an area [of real estate] -- for example 800 to 900 square feet -- where peple live -- a terrorist could also conveniently operate there and not easily be caught. You would have someone specialized who had that [monitoring] equipment to tape him.

What a boob.

73 .... Zoran WA7AA

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, NC1L, W3HNK, W3KT, W3UR & The Daily DX, N4AA & QRZ DX, K4VUD, KW4DA, W5AA, W5UE, AC8W, K8YSE, Luca Della Giovampaola, 9K2HN, DL1EK & DX News Letter, DL6FBL, F5NQL & UFT, G3SXW, G4CXT, HL1IWD, HP1AC, IW0DJB, JA3MZB, PA3AXU, PY2ZX, SP9FIH, UX5UO, VA3RJ, VE3SRE and XE1KK for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 7/October, through Sunday, 14/October there were 222 countries active. Countries available: 3A, 3B8, 3C, 3D2, 3D2/c, 3DA, 3V, 3W, 4J, 4L, 4S, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5U, 5Z, 6Y, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9U, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J6, J8, JA, JD/o, JT, JY, K, KG4, KH0, KH2, KH4, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S7, S9, SM, SP, SU, SV, SV5, SV9, T30, T32, T7, T8, T9, TA, TF, TG, TI, TK, TL, TR, TT, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VK9L, VK9N, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZK1/s, ZL, ZL7, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

4W, EAST TIMOR. Carlos, CU3FT, has arrived in East-Timor and is expected to sign 4W/CU3FT. His activity is due to start as soon as possible. No QSNs have been reported as of writing this. Look for him to be active on all bands especially the WARC bands and 6 meters. QSL via CT1EEB. Meanwhile, Thor, 4W6MM, continues to be active (usually seems to be on the weekends) usually after 0630z on 20/15 meters CW with some SSB activity.

6M BEACON BACK ON THE AIR! After several years off the air, PT7BCN came back to life again on the 6 meters band, frequency 50.078 MHz. The transmission is experimental, and listener's reports are welcome and can be sent to Luc, PT7WA, at: pt7wa@matrix.com.br
The beacon is located in the State of Cearah (PT7) on the North East side of Brazil. The 6 meters propagation to this part of Brazil can be diferent considering the usual paths to the South or even to the North part of the country.

9K, KUWAIT. Hamad, 9K2HN, states to look for him to sign 9K9X in the CQWW SSB Contest as a Single Op/All Band entry. QSL is "OK" via the Bureau.

A5, BHUTAN. Dave Anderson, KW4DA, will be active as A52DA from October 23rd through November 1st, 2001, from the Bhutan Ham Centre. Dave is part of the team going to Bhutan for the CQWW SSB Contest October 27th and 28th, operating as A50A. Prior to and following the contest he will be active on all bands and the following modes: CW, RTTY, PSK, SSB and SSTV. Other modes are possible if requested. There will be no set schedule, but E-mail will be monitored if a special mode or band is requested. Every attempt will be made to accommodate requests with time and equipment pending. The E-mail address for arranging special modes and schedules is: A52DA@Hotmail.com
The E-mail will be monitored as often as possible. QSL information for A52DA is to: Dave Anderson, KW4DA, 712 Baneberry Court, Asheville, NC 28803 USA (USA - SASE with Postage and DX - SASE with Postage). See the following Web page for information on visiting Bhutan at: http://www.qsl.net/a51aa

C6, BAHAMAS. Five members of the Magnolia DX Association will be active during the CQWW SSB Contest from Treasure Cay, Abaco Island (IOTA NA-080), using the callsign C6AKO. The group consists of Ernie/W5OXA, Randy/W5UE, Alan/N5PA, Stan/K5NY and Bernie/KK5EW. They will be there from October 22-29th. Most operators plan to be active the week prior to the contest using homecall/C6A on all bands on SSB, CW and perhaps RTTY. QSLs for the contest callsign (C6AKO) is via W5OXA. QSLs for pre-contest activity are via individual operator's home callsign. Updated information can be found on their Web page at: http://mdxa.org/c6a-2001.html

DXCC NEWS (Update!). Bill Moore, NC1L, DXCC Manager, reports "With the help of recent inquiries on the InterNet, DXCC has received, and accepted, documentation for TT8DX (Chad). Anyone who has submitted it and had it rejected should contact DXCC and we'll be able to update their record without having to submit the card again. If not, it can be sent in the next submission." It has also been reported that TT8JE is now good for DXCC.

EP, IRAN. EP3PTT was active over the past weekend on 15 meters SSB/RTTY. Watch around 21255 and 21080 kHz between 1230-1630z.

FO, MARQUESAS (Update). Janusz, SP9FIH, informed OPDX that his FO/SP9FIH operation will probably be on the air (depends on flight schedule) from October 24th through November 10th. Activity will be SSB only on 80-6 meters on the usual DX frequencies or 14180, 21280 and 28480 kHz. QSL

via SP9FIH: Janusz Wegrzyn, Box 480, 44-100 Gliwice, Poland.

FP, ST. PIERRE & MIQUELON. Stan/AC8W and Henry/K8DD will operate from here October 25-31st.They will use wire antennas and two 100w transceivers. Look for FP/AC8W and FP/K8DD as single band entries in the CQ World Wide DX SSB Contest. QSL via home call.

HP, PANAMA. Elio, HP1BYS, will be active in the CQWW SSB Contest as a Single Op/Single Band (20 meters) entry. QSL via HP1BYS.

HV, VATICAN. Station HV5PUL will be active from the Pontifical Lateran University (Vatican City State) on November 6th during "Dies Accademicus", the opening day of the academic year 2001-2002. Operations will be on the HF bands, and 6 and 2 meters from 0800-1700z. Other operations are scheduled for October 20th during the station's setup and after November 6th, however, calendar activities have to be defined. QSL HV5PUL to Luca, IW0DJB. For further updates and info, check the Web page at: http://www.pul.it

IOTA NEWS.....
AS-056. LAST CHANCE! Masa, JA6GXK, will leave Danjo Archipelago next spring for his work, however, he will be active continuously from Danjo Archipelago, as follows: November 6-15th, November 27the through December 6th and December 27th through January 7th, 2002. This is not a DXpedition, but he will be active in his spare time. QSL via the Bureau (JARL) or direct to the JA6GXK.

NA-NEW. OPDX has been informed that the members of the XE1RCS contest team will activate, for the first time, Isla de Lobos on Mexico's Veracruz State North Group, from Thursday, November 1st to Sunday, November 4th. This new IOTA operation will be active on SSB and CW with 4 stations: 2 on HF (80-10 meters including the WARC bands), one on 50 MHz and one on FM satellites. The special callsign and QSL info will be announced shortly.

JOTA INFO AVAILABLE. Malcolm, G4CXT, reports that location details, QSL information, operating schedules are available for all the UK stations taking part in the International Scout Jamboree on the Air (JOTA), October 20-21st, 2001, at the following Web site:
http://www.radio-scouting.org.uk/jota44.htm
This web site also contains activity information for the event and other Radio Scouting news from the UK and overseas.

LIGHTHOUSE ACTIVITY. The University of Florida Radio Club is planning a Lighthouse Operation for the weekend of October 20-21st. They plan to activate the Cedar Key Island Lighthouse on the west coast of Florida. It will be a first time ever operation from that lighthouse and is part of IOTA NA-76. They have permission to operate from approximately 10 AM Local Time (1400z) Saturday morning until 5 PM Local Time (2100z) Sunday night, the 21st. The lighthouse is only accessable by rowboat. The callsigns used will be W4DFU, The Gator Club, and WA4ET, David Price's callsign.

David is putting the effort together. The primary bands will be 10, 15, and 20 meters. Some operation may take place on 40 meters and 18 Mhz. It will be mostly SSB with some CW planned. QSL to W4DFU or WA4ET.

QSL INFO AND NEWS.....
QSL 3D2CY via Z32AU: Dragan Kostevski, P.O. Box 35, 6000 Ohrid, MACEDONIA. QSL cards for 3D2CI go via YT1AD.

STOP PLEASE! Well-known QSL Manager Joe Arcure, W3HNK, offered to help to obtain JT1CO cards. He must now withdraw his offer. Joe states, "Someone deemed it necessary to tell the world I was his QSL Manager and my mail load is out of hand. I am NOT nor do I plan to be his QSL Manager. Please ...no more cards...."

Charly, K4VUD, has informed the DX community to be careful in sending for his HS0ZCW cards. Some individuals are sending them to Thailand instead of the U.S. The address on "QRZ.COM" has Thailand listed on the last line of the address, but it is actually an U.S. address. The correct address is: Charly Harpole, 3100 HWY, 426 North, Geneva, FL 32732-9761 USA.

NEW ADDRESS FOR PA3AXU as of November 1st: G. Dijkers, NAPO 550, 3509VP Utrecht, The Netherlands.

Gennady, UX5UO, informs OPDX that QSLs for EN10U, EO10B, EO10N and EO10W, active on the air in celebration for the 10th Anniversary of the Independence of Ukraine, are now printed and available via UX5UO. QSL via the bureau or direct to: Gennady Treus, P. Box 925, Kiev-100, 02100, Ukraine. Meanwhile, QSL cards for EO10C, EO10K and EO10M are still being developed/printed.

SV9, CRETE. Ben, DL6FBL, will visit the QTH of Michael, SV9CVY, and be active during the CQWW DX SSB Contest, October 27-28, as a Single/Op/ All Band entry. Before the contest he will operate as SV9/DL6FBL for three days. More information on "Propagation and Operating Tips" to work Crete may be found on the following Web site at: http://www.dl6fbl.de/sv9cvy

T8, PALAU. Lee, HL1IWD, informs OPDX that he is scheduled to visit Palau during this month for a medical mission between October 20-24th. His callsign will be T88YB and he will mainly concentrated on 20 meters CW. All of the contacts will be confirmed automatically through the bureau.

TI, COSTA RICA. Dick, W5AA, will be active as W5AA/TI8 for the next 6 weeks starting October 18th. He hopes to finish 5BDXCC from here. He will be active mostly on 80 meters (ed. states he needs only 50 more countries on 80m) and will be active in the CQWW SSB Contest.

V4, St. KITTS & NEVIS ISLANDS. Sam, G4OHX, is expected to be active from here now through October 24th, as V47OHX. Sam will operate on 20 meters CW looking for FISTS and RSARS members to communicate their membership numbers. He has been heard on 14007 kHz around 2100z, 14017 kHz around 0030z and 14055 kHz around 1000z. QSL via his home callsign.

V6, DUCIE ISLAND (The Next New DXCC Entity!). "The Daily DX" reported early last week that the "Pitcairn Island Amateur Radio Association" (PIARA) has announced that all planning is now complete for their operation from Ducie Island and expects to be admitted into the IARU society on November 16th. If PIARA does become a member of the IARU, Pitcairn Island will become a "Political Entity" under DXCC Rules, "Section II. DXCC LIST CRITERIA" under "Criteria: 1.c)". Ducie Island will qualify as a new DXCC entity under the same section, but under "Criteria: 2.Geographic Separation Entity, Part b) Island Area (Separation by Water)". To celebrate the event, the group will be operational using a VP6 callsign to be announced at the beginning of the operation at 0000z on November 16th (depending upon any transportation problems that may arise). The group intends to provide contacts with as many different amateur radio operators as possible during their stay on the island. Operators will be Tom/VP6TC, Dave/VP6DB, Kan/VP6BK/JA1BK, Hitoshi/JF1IST, Tamama/JA1SLS, Mike/K9AJ, Vince/K5VT and Philippe/FO3BM. The pilot station is Dr. Bill Avery, K6GNX. QSL Manager is Garth Hamilton, VE3HO (cards can be sent via the bureau or direct with a SASE). Their suggested main band plan is as follows:
15 meters - Look for them to be active on 21020 kHz (CW) and 21295 kHz (SSB) 24 hours each day. This is to allow individuals more time to find and work the group depending on their propagation in their area.

20/10 meters - These two bands are expected to be their main SSB frequencies. Watch 28495 kHz and 14195 kHz. Also, watch 14020 kHz to be their main CW frequency other than 15 meters.
There will be some activity on the other bands (160-6 meters), as well as RTTY in addition to SSB and CW operations. However, it is expected that low band and WARC operations are more likely to take place in the last days of the operation. The reason for this is so they can concentrate on their main goal to allow as many stations as possible to work this rare IOTA and probable new DXCC entity. The group requests to please do not dupe your contacts, however, there will not be any blacklisting for duping a contact. A log search will be available on the Web at: http://www.big.or.jp/~ham/dx.html

WEB SITE CHANGE. Don, W9DC, informed OPDX that he has modified his Web page (which contains Island and Lighthouse Data) and has changed his E-mail addresses as follows:
Web Site - http://www.w9dc.com/
E-mail for Island data goes now to - IOTA@w9dc.com
E-mail for World Lighthouse Award data - WLH@w9dc.com
Would you be so kind as to update your records.

WRTC2002 PRESS RELEASE #10. Ari, OH1EH, in a press release, announced the new national teams that were nominated.
ASIATIC RUSSIA: LITHUANIA:
RA9JX Vadim Travin LY1DS Dainius Savicius
UA9CDV Oleg Usov LY2TA Andrius Ignotas

EUROPEAN RUSSIA: SLOVENIA:
Team #1 S53R Robert Kasca
RW1AC Vlad Aksenov S57AW Robert Bajuk
RW3QC Jack Danielyan

Team #2 WRTC2002 Team Selection sub-group
UA2FZ Igor Avdeev Ari Korhonen,OH1EH
RW4WR Alex Orlov TimoKlimoff, OH1NOA

HUNGARY:
HA1AG Zoli Pitman
HA3OV Antal (Anti) Hudanik

XT, BUKINA FASO. The Voodoo Contest Group will be active in the CQWW CW Contest, on November 24-25th, from Ouagadougou. They will enter as a Multi-Multi category with six stations. Operators will include G3PJT, G3SXW, G3XTT, G4BWP, G4IFB, G4PIQ, KC7V. QSL via G3SXW.

ZONE 2. "Team Zone 2" will again be activating the rare Zone 2 for this year's CQ World-Wide SSB Contest from their remote contest location in the northwestern part of the province of Quebec, Canada. This operation is totally powered by generator. The callsign will be VB2V, a special event callsign commemorating the "United Nations International Year of the Volunteer". They will be active from October 23rd to October 29th. If time permits they will activate the rare grid FO10 on six meters. The operators involved are: VE3DBF, VA3RD, VE3BIX, VE3BY, VA3KO, VE3TV, VA3RMF, VA3OK, NB1B, N1NK, VE3SRE, VE3TPZ, VE3KJS,VE3HAE, VA3TSG, VA3FIN and VE3XAP. QSL via VE3BY or USA ops can QSL via NB1B. For more information, check the Web site at: http://www.fortunecity.com/marina/westindia/597/zone2

The G4NJH UK Amateur Radio Pages have been completed revised.

The new pages include:
~~~~~~~~~~~~~~~

* An introduction to Amateur Radio
* Opinion and Comment
* An introduction to the different aspects and Modes of Radio
* Future of Radio
* Licensing Info
* Internet and Amateur Radio
* Some of the Radio Today published articles
* Links
* UK Rallies and Events
* GB2RS Weekly amateur Radio News in Real Audio - updated every week
* Short Wave Listeners' and Scanner Page

URL is nice and easy: http://go.to/g4njh and http://listen.to/gb2rs

Old URLs also apply and go to the same place:
http://www.innotts.co.uk/~asperges and
http://www.innotts.co.uk/~asperges/rsgb.html for GB2RS.

Everyone welcome!

Your right Dwight, I stepped over the line. I don't really wish harm to you or your family, BUT you have certainly wish harm to mine. For want of the ability to see some goat humping billionaire madman on TV, you'd rather put my family in harm's way? I don't follow that at all. What difference does it make to you whether or not they show his ugly face or broadcast his words? If you must hear him, go to the Internet. The Al whatever its called it broadcast on the Internet.

Why do your rights preclude mine? Why should I have to work and work in NY!!!! in fear so that you can drive your pickup to the local mall and shop at Sears? Is it because it's a NY thing as you stated?

Well friend, once NY is gone, they'll be coming after you (figuratively speaking)

You can play ostrich all you want, but if I can take the train to work and see soldiers standing watch, I'll feel a tad safer.

If the authorities want to do random searches, so be it. If they stop 1 person who can hurt my family, so be it

BTW, did you ready about the Portland Me Muslim group that has declared Jihad against the US?? It was in the papers. They have vowed to bring the fight again to various parts of the US. They're US citizens Dwight..what should we do with them? They seem to be hiding behind the very laws you wish to keep in place during this time of war.

What about all the terrorist cells that have been found in small towns throughout the US Dwight. Towns just like yours. What do we do Dwight. According to the Manny Moe and Jack of rights (the Texass boys and gal), they should be allowed free access of the citizens of this country because the Constitution allows it?? I dun think so Lucy

Just wait Dwight. Sooner or later, they'll find your small insignificant town and then they're be no one left to cry in your skittles and beer with you

TS 930

Best QSK there has ever been in a commercial rig. Plus, the easiest handling
of split operation (Switching between RX and TX QRG with a tiny switch while
you transmit. Together with QSK that's even better than a 2nd RX).

At the risk of posting off-topic I would say that operator skill is 100 times more crucial than what rig you happen to have in front of you...rig brand loyalty is going to skew the replies in this thread....

Source record: 15672

Well the best one hasn't been built yet. There is a lot of tradeoffs in designing a tranceiver. A contest rig may not be a DXERs choice or vice versa. And rag chewers could care less about what are "musts" for the DXer or contester. An RTTY operator may be more concerned with duty cycle more than any thing else.

CW ops may opt for a rig strictly on the basis of its CW performance, where phone ops may be more concerned with other characteristics. And your pocket book plays a big part in what folks buy. So the best rig for the money enters into it and that is why you will get a lot of "My Rig" is the best replies.

But our local repair guru who has about $50,000 worth of test equipment sez the finest receiver he has tested is the Yaseu FT-1000D. But he hasn't tested em all.

Heck, I am still using my vintage JRC twins, since I prefer
seperate RX/TX to a transceiver. Haven't had the urge
to upgrade the station in over 20 years. Operator skill is
the key given a good antenna and decent receiver.

There is no "best" or "perfect" radio. Each individual has likes and dislikes. I believe (but I may be wrong) the AC6V web site has some statistics as to which radio is most popular with DX'ers and contester's.

I firmly believe there is no substitute for hard (crystal or mechanical) filters, and no amount of propaganda will make a radio with ONLY dsp filters comparable. I personally feel that there are more FT-1000D's, FT-1000MP's and FT-1000MP MK 5's in use than any other brand or type radio. I will never again own a primary radio without dual receive.

I own an FT-1000MP with all filters with a FT-920 as a backup. Someday in the future I hope to get a MK 5 to replace the 920, and use the 1000MP as a backup to the MK 5.

This is a very controversial subject as everybody "pushes" their own favorite radio. Check the ARRL reviews, and other reviews where available, and YOUR answer will become obvious.

2721. Re: Best DX radio?

Newsgroup: rec.radio.amateur.dx
Date: 2001-10-17 02:29:14 UTC
From: AC6V <ac6v@amsat.org>
Message-ID: <3BCCECFA.357D0218@amsat.org>
Source record: 15676

Hi All -- although I took down the web page with the survey results -- here are the results in the order of the most popular. Here is a consensus of what DXers/Contesters use for DXing and contesting radios. Not necessarily the best ï¿½ but what they bought.

DXing ---- Yaesu FT-1000MP, FT-1000D, FT-990, FT-1000MP-MKV, FT-920, FT-1000
Kenwood TS-850, TS-940, TS-950ï¿½s, TS-570D, TS-870, TS-830, TS-930S, TS-440, TS-450
ICOM IC-706 MKII, IC-756PRO, IC-735, IC-751A, IC-706, IC-756, IC-738, IC-775DSP
Ten-Tec Omni Series ï¿½ particularly for CW. Also the Elecraft transceivers have FB specifications.

Contesters choices are Yaesu FT-1000MP, FT-1000MP, MKV, FT-1000D, Kenwood TS-850,
TS-940, TS-930S, ICOM IC-756PRO, IC-775DSP, IC-765, Ten-Tec OMNI VI+

WARNING -- these results do not necessarily indicate the "Best" radio, but what folks bought. DXers and contesters are serious folks -- so there is usually a good technical reason why they bought what they did. However brand loyality enters into buying decisions as well as price.

Important considerations for a DXing radio include excellent dynamic range, selectivity (filters) with sharp skirts and low ripple, low noise floor, sensitivity, cross-modulation, gain compression, intermod distortion, etc. and transmit distortion products as well as ability to hold up in the harsh contest environment. Nothing is more disconcerting than to be in a contest or pileup environment and have a receiver that canï¿½t handle the huge signals and the weak ones adequately, this coupled with poor selectivity is a lose-lose proposition.

All these specs for various rigs can be found at the ARRL web site. But first see the Index at URL:
http://www.qrz.com/files/library/qst_prod.txt
then search the ARRL web site for the desired radio.

Here's an ignorant question from a non-CW operator: why is QSK desirable?

Personally, I reckon the relays in my transceiver would drive me nuts
if the radio switched from TX to RX between every dit.

So what is Ten-Tec? Chopped liver? They're still the king of QSK, in my experience, though the TS-930 comes reasonably close. My K2 isn't bad, either, though a bit slow on switching from transmit to receive - you can easily hear between letters, but not between dots like on a Ten-Tec.

I will agree that the TS-930 is a fine radio, however - and quite reasonably priced on the used market these days. I love the user interface - for a radio with a lot of controls, it's remarkably easy to figure out how to use. It's very nice for Field Day - even ops who have never used one before catch on quickly.

Good QSK isn't done with relays; it's done with silent electronic switching. Any rig that uses relays to switch from transmit to receive is automatically disqualified (in my mind) from being considered as having "good QSK". Some radios have tried to make do with relatively silent reed relays (the Icom IC-735 comes to mind), but that doesn't quite do it for me.

QSK is essential to high-rate CW operating, because it means you waste less time. You can tell if somebody is trying to send at the same time you are. If your contest exchange isn't being received for some reason, you can immediately respond, rather than waiting until you have sent the whole thing. (By the way, it's also key to high-speed traffic handling for the same reasons.)

You can probably live without QSK for general DXing; it's certainly nice to have, though. I don't think you can be competitive as a CW contester without it.

Here is an unreasonable answer from an experienced CW-Operator: You can
follow a DX-station much more closely when you can stop transmitting the
millisecond you hear the DX-station through your QSK, even at high
speed. Plus, in Split Operation, you can monitor your own TX QRG even while
you are transmitting. Makes no sense yelling with a bunch of others on zero
beat and gives you the opportunity to tune the V>FO up or down a notch and
make yourself heard, while you would not have been heard when calling on
zero beat with another station.

Apart from that, nothing like a smooth relaxed 40wpm QSO with a QSK partner,
since you can interrupt any time, avoid unnecessary repeats and generally
have fun reacting in split seconds without the tiring "K" or "BK".

In my experience the Ten-Tec rigs do not come close to the TS 930 in terms of QSK operation. I trie a lot of them in my 20 years of CW-operation and I have not found one that could handle 60 wpm, continous dots and yet be able to tune in on a zero beat carrier while transmitting. Today, the Ten-Tec gears is far superior in terms of QSK when compared to other modern rigs, I grant you that. My TS 930 is a piece of almost 20 years old junk, but since I do CW only it does just what I need.

BTW, the Ten-Tec amps are really outstanding in terms of QSK. I have owned both the Hercules and the Titan 425 and their switching characteristics in CW were just superb in combo with my 930.

> My K2 isn't bad,
> either, though a bit slow on switching from transmit to receive - you

The K2 is a *beautiful* rig and offers a lot of things that other, lot more expensive transceivers don't. QSK is not one of its strengths, but due to its clean design it should be possible to modify it to faster TX/RX times.

Forgot to say that you cannot hear the switching in the 930. What you hear simply is the noise on the frequency, nothing more. Takes time to get used to *that*, though. Took me roughly 2 minutes to see the advantages and dump VOX-operation forever.

As in a previous post -- QSK mods are used employing "silent" electronic
switching. Some use a fast acting reed relay at the linear input and a vacuum
relay at the linear output.

AMATEUR RADIO NEWSLINE(tm) REPORT #1262 - OCT. 19, 2001

Amateur Radio Newsline report number 1262 with a release date of
Friday, October 19th, 2001 to follow in 5-4-3-2-1.

The following is a Q-S-T.

The International Amateur Radio Union speaks out on Morse and the ham radio community responds. This story is first on Amateur Radio Newsline report number 1262 coming your way right now.

(Billboard Cart Here)

**

INTERNATIONAL: IARU MEETS - MORSE ON ITS WAY OUT

The International Amateur Radio Union meets to discuss the future of our worldwide hobby service including the Morse code. Jeramy Boot, G4NJH, reports from Nottingham in the U-K:

--

The Administrative Council of the International Amateur Radio Union met between the 6th and 8th of October in Guatemala City. The principal business was to continue preparations for WRC-2003, which has several items of importance to the amateur services on its agenda.

Items discussed he harmonization of amateur and broadcasting allocations near 7 MHz; adequacy of HF broadcasting allocations below 10 MHz; possible revision of Article S25 of the international Radio Regulations; changes to terms and definitions in Article S1 as a result of amendments to Article S25; review of provisions concerning the formation of amateur callsigns in Article S19; additional allocations for 'Little LEO' satellites; study of a possible allocation to the earth exploration-satellite service for synthetic aperture radar near 435 MHz; and possible identification of globally harmonized frequency bands for use by agencies and organizations dealing with public protection and disaster relief. The IARU objectives with regard to these agenda items were affirmed.

The IARU Council adopted a resolution urging member societies to seek, as an interim measure, Morse code testing speeds not exceeding five words per minute. The IARU Council, setting aside previous decisions, resolved that IARU policy is to support the removal of Morse code testing as an ITU requirement for an amateur license to operate on frequencies below 30 MHz.

Jeramy Boot, G4NJH.

--

The next scheduled meeting of the IARU Council will be in September of 2002, immediately prior to the Region 1 Conference in San Marino. (RSGB)

**

CW: HAMS REACT TO IARU DECISION ON MORSE

The IARU policy decision to support the removal of Morse code testing as an international requirement for an amateur license to operate on frequencies below 30 MHz is again sparking a hot debate. This, between those who favor retaining mandatory Morse testing and others who want to see an end to CW as a requirement to operate the high frequency bands. There is really nothing new in the arguments on either side. Amateur Radio Newsline’s David Black, KB4KCH, has more:

--

Morse code. Most hams love it or hate it.

CW, as it's also known, was developed for land based telegraphy in the early 1800's by Samuel F.B. Morse. Morse code and ham radio have gone hand in hand ever since. But now, CW as a requirement for a ham license may be going away.

The International Amateur Radio Union Administrative Council has taken the first steps. Less than two weeks ago, the group voted to set aside any previous decisions and support removing Morse code testing as an ITU requirement for hams to operate on frequencies below 30 MHz. In effect, that move seems to suggest there's little chance that the IARU will support keeping Morse testing as a requirement for getting a ham radio license.

Long time CW operator Jerry Womble, WA4QIN, of Steele, Alabama, says losing code as a license requirement would not be good for the amateur radio service.

--

Jerry Womble, WA4QIN: “If you remove code from the process of getting' a ham license I think you dilute the talents in the community, and I think it means a little less to the person who actually gets the license that he did not go through a process that most of us have gone through to obtain our license”
--

But that view is not universal.

--
Jim Baker, N4RVH: “It wouldn't bother me if they did remove it”
--

Birmingham resident Jim Baker, N4RVH, says ham radio would continue just fine without Morse code as a license requirement.

--
Jim Baker, N4RVH: “Radio is gonna to continue and its gonna progress beyond that. With what the technology is getting into now it is going to far surpass what the code started out to do and that's to communicate.”

--

These people are the middle grounders. They welcome an open exchange of viewpoints but they also know that they must accept the judgment of the service's political leaders and the world body of telecommunications regulators.

One side or the other will lose, but both sides will eventually have to live with whatever the final ITU decision on Morse code testing turns out to be.

From Birmingham Alabama, I'm David Black, KB4KCH, reporting for the Amateur Radio Newsline.

--

The bottom line. Regardless what’s decided at the next World Radiocommunications conference, not everyone in ham radio is going to be happy. (ARNewsline™)

CHANCE FOR A RARE CONTACT: GHANA COMING TO 6 METERS

Its considered one of the rarest of the rare countries on VHF, but now Ghana is coming to 6 meters. This with word that a group of DXers will be operating from the city of Elmina from Friday, October 26th through 1700 UTC on Sunday, November 4th.

Arliss Thompson, W7XU, Richard Hanson, K5A-D and Ed Gray, W0SD are the expedition leaders. Thompson says that the group plans on using the call sign 9G5SIX. And while they will have the capability of operation on 160 through 10 meters they will concentrate mainly on operating the 50 MHz band both C-W and SSB.

As to gear, Thompson says that the station dedicated to 6 meter operation includes a pair of Yaesu FT-100D transceivers, a 3CX800 amplifier and a 7 element yagi on a 27 foot boom. A Icom IC-706 transceiver and loop antenna will be dedicated to monitoring 28.885 MHz on 10 meters. This is the internationally recognized frequency used by 50 MHz operators to plan 6 meter D-X contacts.

And to let everyone know if the signal from Ghana is on the air, Thompson says that they will establish a beacon on 50.106 MHz. If you hear it, there is a better than even chance you can tune up the band and make contact directly with the D-X pedition itself.

As to the High Frequency bands, Thompson says they will use a Yaesu FT-746 with Acom kilowatt amplifier feeding wire, vertical and loop antennas for 160 through 10 meters. That station will be primarily manned by W0SD. QSL information will be released at a later date.

We will have more D-X related information at the end of this weeks Amateur Radio Newsline report. (VHF Reflector)

**

AMERICA FIGHTS BACK: A NEW EAS STRUCTURE

As reported last week, the Emergency Alert System or EAS was not activated before or during the terrorist attacks on the World Trade Center and the Pentagon. Instead, President Bush chose to use the commercial media as a way of informing the public. And shortly after the attacks the FCC suspended the need for regular tests of the EAS system for a short period of time, presumably so as not to cause panic in the general public that another attack was taking place.

Does this mean that the EAS need restructuring or modification? Richard Rudman, W6TIA, is the chairman of the Emergency Alert System National Advisory Committee. He says that its time to look at future technology and how it can be incorporated into the E-A-S system to better serve the American public.

--
Richard Rudman W6TIA: "Where I really hope we can take this is to look at something that my national advisory committee already is studying under the heading of Advanced Warning Systems. Amateur Radio operators are already familiar with them because we have been doing this for years. We have a lot of advanced warning systems."

"We need to look at the capabilities of technology are, what people are going to have for personal communications devices in the future and come up with some intelligent ways to allow people to program their devices so that they can get alerts to the hazards they want to be notified about, in some cases 24 hours a day, 7 days a week wherever they are."
--

From Rudman's comments it appears as if the concepts developed by ham radio operators along with overall advancements in personal communications technology could play a role in the future of the Emergency Alert System. Translated into everyday language, it means saving lives. (ARNewsline™)

**

AMERICA FIGHTS BACK: BAYGEN RADIOS DROPPED ON AFGHANISTAN

Radio has become an important tool in the United States military campaign in Afghanistan. In addition to its on tactical communications, the United States air dropping wind up radios to the Afghan public. Amateur Radio Newsline's Bruce Tennant, K6PZW has the details:

--
For more than two weeks the United States and its coalition allies have not only been dropping bombs and food ration packs into Afghanistan. They have also been air dropping a new secret weapon in their war on terrorism. The world famous Bay-Gen wind-up radio.

According to the British Broadcasting Company on-line service, Americans forces have reportedly also been air-dropping hundreds of the small Bay-Gen Freeplay wind-up radios into Afghanistan as the first step in what promises to be a battle for the hearts and minds of the Afghan people. The radios are thought to be specially designed fixed-frequency models that will automatically tune to information broadcasts issued by the United States military.

The BBC says that Washington is relying on the work of its renowned Commando Solo broadcasting unit to reach Afghans over the airwaves. The six EC-130 planes that make up the Air National Guard's Commando Solo fleet serve as flying radio stations. The unit has a record of operating in U-S conflicts such as those in Panama, Bosnia and Haiti. And in addition to the efforts by the U-S military to air-drop radios, relief agencies are also working to supply commercial wind-up models to refugees, many of whom have fled their homes because of severe food shortages in Afghanistan.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW, in Los Angeles.

--

The BBC on-line article says that the wind-up radios will be used to publicize food drops and the message that "the people of Afghanistan are not the enemy." The article also quotes journalist Nick Grace, of the website Clandestineradio.com who believes the Commando Solo unit is also involved in jamming the Taleban-run station Voice of Shari'ah. (BBC)

**

HAM RADIO AND THE WAR: TERRORIST ATTACKS CAUSE 2 METER BEACON DELAY

The terrorist attacks in New York City and the Pentagon caused a new ham radio beacon to be delayed. This, according to Tim Marek, K7XC, who was getting ready to put one on 144.288 MHz from Northern Nevada when the attacks on the East coast occurred.

Marek is a Radar Tech on the Naval Electronic Warfare Range in Nevada and he says service to the nation came first. In a posting to the VHF Reflector, Marek says the Navy compressed a four week pilot training event into two weeks. As a result he wound up working 18 straight days of 12 hour or longer shifts helping to train US pilots for their missions.

This task completed, Marek, has finished assembling the new beacon and has K7XC slash B running 10 watts into a Ringo Ranger from his home in grid DMZ09. He hopes to find a mountaintop location and a horizontal antenna for it in the near future. A 432 MHz beacon at the same location is in the works as well. (VHF Reflector)

**

HAM RADIO AND THE WAR: HEALTH CONCERNS CAUSE CQ TO ASK CONTESTERS TO E-MAIL LOGS

This is Rich Moseson, W2VU, Editor of CQ magazine, with a message for anyone planning to participate in next weekend's CQ World Wide DX Contest, or any other CQ-sponsored contest.

Because of security concerns, we are asking everyone who submits a log for our contests to do so by e-mail. The rules for each contest give you the appropriate e-mail address. Logs received through the mail at the CQ offices will be held unopened until all potential health risks have been evaluated. We cannot guarantee that these logs will ever be opened.

We know this will inconvenience a small number of participants in our contests and we regret the need to make this request. But our logs come from all over the world, and even from Trenton, New Jersey. And while the risk that amateurs might be involved in any sort of terrorist activity is very small, mail en route may be subject to tampering. We cannot ask our staff members or contest committee volunteers to possibly expose themselves to dangerous packages sent through the mail when there is an alternative.

We've already received several e-mail messages critical of this request, suggesting that we are giving in to terrorists. We don't see it that way. We are not canceling the contest. But we are taking reasonable precautions to protect our staff from what is, based on this week's news, a very real and fast-growing threat. (CQ Magazine, W2VU)

**

ENFORCEMENT: PART 15 VS HAM RADIO

Interference to a Washington state two meter repeater has been traced to a legal albeit faulty Part 15 device. The Portland, Oregon FCC office recently investigated interference to the Clark County Amateur Radio Club repeater in Vancouver operating on 147.84 MHz. The interference was traced to a Gemini model V C 2000 Part 15 video transmitter located about one mile away. The owner was contacted and voluntarily removed the device from service. Interference gone. Case closed. (Portland SBE Bulletin)

**

EMERGING TECHNOLOGY: SATELLITE RADIO VS. RF LIGHTING

A major battle has developed between the deliverers of satellite radio and a company that will soon manufacture R-F lighting. This, as XM Satellite Radio and Sirius Satellite Radio ask the FCC to reduce the level of allowed emissions from a particular new model of outdoor light bulb to reduce potential interference to satellite delivered radio signals.

The trade publication Radio World reports that Sirius and XM have specifically asked the FCC to require that Fusion Lighting lower the bulbs radio frequency emission levels y 99.9% of current levels. According to Radio World, Fusion's R-F lamps are designed to operate in an unlicensed portion of the microwave spectrum. Unfortunately, the lamps hold the possibility of interfere with S-band communications channels used by satellite services.

But Fusion says that granting the request would be undue overegulation and effectively put the company out of business. They say that the microwave powered lamps are still in development and at least a year from commercial sale.

Reportedly, the FCC has already spent several months trying to resolve the dispute. So far, no resolution. (Radio World)

**

EMERGING TECHNOLOGY: PAY TO LISTEN TO OLD ART BELL RADIO SHOWS

If you are a fan of Art Bell, W6OBB's, "Coast to Coast A-M" radio program and you miss tuning in one night, its going to cost you money to hear a repeat of the show on the world wide web. This, after Premiere Radio Networks announces that as of Monday October 15th there will be a fee to access old shows.

According to the Premiere announcement the longtime free audio streaming has disappeared and has been replaced with a new $6.95 a month subscription service called Art Bell's StreamLink. With StreamLink you can listen anytime you like to any Art Bell Show from the last 30 days.

Not everyone is happy with the decision to charge including Bell. According to a posting to his website, it was not his decision to change the free Internet access. Rather it was a decision made by Premiere based on cost.

Bell says that there are now millions of people on the Internet and bandwidth costs money. About $1.5 million per year for all the Premiere shows. He says that Premiere hopes to break even.

W6OBB says that he has been receiving many angry e-mails and that he understands the anger at having to pay for what was free. But he also understands the company cannot continue to cover the ever growing cost.

Bell adds there is at least one bright spot. Says W6OBB, "it is still free on the Radio."

More information is on the web at www.artbell.com. (Art Bell Website)

SPECIAL EVENTS: JOTA 2001 AND THE ISS

If you are hearing this newscast between 0001 local time on Saturday, October 20th, and 2359 local time on Sunday, October 21st, then as soon as its over get on the air to contact the Boy Scouts Jamboree On The Air 2001. Several hundred thousand Scouts and Scout Leaders and others are expected to be on around the world for this annual event.

Listen for scouts on 3.740 and 3.940 on 75 meters, 7.270 on 40, 14.290 on 20, 21.360 on 15, 28.390 MHz on 10 plus the WARC bands.

And as a special added attraction, International Space Station Commander Frank Culbertson, KD5OPQ has said that he will try to make some general QSO's for the scouting Jamboree. He will operate on the usual ham radio space to ground

frequencies. Because of Culbertson's limited time on the air, non-scouting stations are being asked to give preference to scouts trying for a contact with KD5OPQ on board the ISS. (Q-News, SAREX Remailer, K6DUE, KC6ROL)

OUR HERITAGE: RADIO PIONEER DONALD HINGS

Tom Farley, KD6NSP writing in the CGC Communicator notes that he is always trying to publicize radio pioneers that have not been written about. One of these is Donald Hings whom Farley describes as a Canadian wireless inventor who came up with an early form of the walkie talkie and played a big role in the Canadian and British war effort.

Unrecognized compared to people like the late Al Gross, Hings was recently presented with the Order of Canada by her Excellency, the Right Honorable Adrienne Clarkson, the Governor General of British Columbia.

His granddaughter has built a nice web site to honor his radio accomplishments. Its at http://sitka.triumf.ca/morgan/dlhings. (CGC Communicator)

**

OUR HERITAGE: THE SOUTHERN APPALACHIAN RADIO MUSEUM

According to an Internet posting by John Travis, W4QCF, if you like old radios, there is a new museum just for you. Called the Southern Appalachian Radio Museum, its located in Ashville North Carolina and is described as a dream come true for many years for members of the Quarter Century Wireless Association Smoky Mountain Chapter 145. The sponsoring group also recently received the club call W4AFM, which once belonged to Bill Hayes who was licensed in 1926. You can get a glimpse at what's there by visiting the museum website at www.saradiomuseum.org. The real world museum is open every Wednesday evening and John Travis says that you are invited to come and see it. (W4QCF)

**

NAMES IN THE NEWS: W6VQP NAMED FELLOW IN THE RADIO CLUB OF AMERICA

The Radio Club of America has announced its list of names to be inducted as Fellows in the organization. Among them is one well known to anyone who remembers the very early days of our news reporting operation.

One of the 20 inductees for the year 2001 is Radio Design Group president James R. Hendershot. Ham radio oprerators better know him as Jim Hendershot WA6VQP, the founder of the Westlink Radio Network. Westlink Radio was the original

name of the Amateur Radio Newsline when we first went on the air way back in 1977. (ARNewsline™)

**

INTERNATIONAL - IRELAND: NEW TELEPHONE TECHNOLOGY COULD CAUSE RFI

New high speed telephone technology in Ireland has been announced by their regulatory agency Eircom. The new system will provide Internet access using ADSL brand named 'I stream' using existing phone lines with subcarriers in the range 100 kHz to 1.1 MHz. This will allow faster speed downloading from the Internet and allow for existing voice calls to be carried on the same phone lines in the range 0 to 4 kHz.

But there is a downside. A large number of reports from United Kingdom trials show that radio receivers placed near the phone lines will have strong interference in the Long Wave and Medium Wave bands. There also may be interference in the High Frequency bands. And the system may be susceptible to interference from High Frequency transmitters as well. More details are available at www.eircom.ie. (IRTS, Q-News)

**

DX

In DX, C98RF in Mozambique has been really active on 30, 12 and 10 meters. Watch 12 meters from 1100-1730 UTC, 30 meters after 2100 UTC and 10 meters very early after 0900 UTC. QSL via DL6DQW. (OPDX)

And ET3VSC in Etheopia has been pleasing many CW operators over the past week with activity on 12 and 10 meters. Look for him between 1830 to 2130 UTC on either band. QSL via K3IRV. (OPDX)

**

THAT FINAL ITEM: WHO REALLY WAS SAMUEL FB MORSE

And finally, we started this weeks newscast with reference to the Morse Code. There is no need to tell anyone that the Morse code is synonymous with ham radio. For almost a hundred years the “code” has been such an integral part of the Amateur Radio service that for some in the hobby its a way of life. To others it was a dreaded obstacle to upgrading to a higher license class until restructuring capped the test speed at 5 words per minute. Yet without the code there might never have been ham radio because its use preceded voice transmission by many years. Even so, there are probably very few in the hobby who know much about the man behind the dots and dashes. But as Amateur Radio Newsline’s Henry Feinberg K2SSQ tells us, the code is only a small part of the story of the man:

--

Samuel Finley Breese Morse was not a ham radio operator. In fact, radio was more than a century away when he was born on April 27, 1791, in Charlestown, Massachusetts.

His childhood is described as almost mundane. He was the son of Jedidiah Morse, a church pastor who was as well known for his abilities in geography. A close family friend was Noah Webster who was equally known for his dictionaries.

Morse attended college at Yale where he is described as having been an indifferent student. But his interest was aroused by lectures of the then newly-developing subject of electricity. After college, to the his parents dismay, Morse directed his enthusiasm to painting which he studied in England. After settling in New York City in 1825, he became one of the most respected painters of his time.

In 1832, while returning by ship from another period of art study in Europe, Morse heard a conversation about the newly discovered electromagnet and conceived of the idea of an electric telegraph. By 1835 he probably had his first working model in the New York University building where he taught art. Being poor, Morse used such crude materials as an old artist's canvas stretcher to hold it, a home-made battery and an old clock-work to move the paper on which dots and dashes were to be recorded.

In 1837 Morse acquired two partners to help him develop his telegraph. One was Leonard Gale, a quiet professor of science at New York University and Alfred Vail, a young man who made available both his mechanical skills and his family's New Jersey iron works to help construct better telegraph models. With the aid of his new partners, Morse applied for a patent for his new telegraph in 1837, which he described as including a dot and dash code to represent numbers, a dictionary to turn the numbers into words and a set of sawtooth type for sending signals.

By 1838, at an exhibition of his telegraph in New York, Morse transmitted ten words per minute. He had dispensed with his number-word dictionary, using instead the dot-dash code directly for letters. Though changes in detail were to be made later, the Morse code that was to become standard throughout the world had essentially come into being.

During the next few years Morse exhibited his telegraph before savants, businessmen and committees of Congress, hoping to find the funds to give his telegraph a large-scale test. He met considerable skepticism that any message could really be sent from city to city over wire. On his own, in 1843, without significant help from his discouraged partners, Morse finally secured funds from Congress to construct the first telegraph line in the U. S. from Baltimore to Washington D.C. Morse directed the wires to be mounted on poles and by May 1844, the first inter-city electromagnetic telegraph line in the world was ready. Then, from the Capitol building in Washington, Morse sent a Biblical quotation as the first formal message on the line to Baltimore These were four words that changed the world of telecommunications forever. The four simple words: "What Hath God Wrought!" And trhe rest -- as they say -- is history.

For the Amateur Radio Newsline, I’m Henry Feinberg, K2SSQ.

--

By the way, some of the information in this story came from the Locust Grove Samuel Morse historical site at www.morsehistoricsite.org. If you want to

learn more about the man and his contributions to society, we say its well worth a visit. Its one of the best. (Various Morse related websites)

This may sound like a dumb question, but it's the first time I've encountered it. Last night I worked a station just before midnight my local time. Thus the UTC time was in the next day.

When I fill out my QSL card to send off, I'm assuming I put the same date as the UTC time? This is the first time I've had this happen, and just want to make sure I fill out the card correctly.

Thanks,

Robert / N4IXT

Source record: 15601

Recently, I worked C98DC on four bands in 3 modes, and show the QSL manager as AF066. Not sure where that came from - but does someone has the correct QSL info for C98DC?

Thanks in advance,

-larry

The Ohio/Penn DX PacketCluster
DX Bulletin No. 534
BID: $OPDX.534
October 22, 2001
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, KA2AEV, K2JXW, N3SIG, W3UR & The Daily DX, K4ZW, KJ4UY, N4AA & QRZ DX, N4CD, K5LBU, K6NDV, K8YSE, CO2TK, DF4RD, DL1EK & DX News Letter, E21EIC, F5NQL & UFT, G0PSE, GI0DVU, IV3UHL, JI3DST, JJ1LIB, LU1FAM, LU4FPZ, M0DXR, T97M, VA3RJ and ZL1UD for the following DX information.

IMPORTANT NOTICE BY EDITOR: Last weekend BARF-80 BBS (Home of the OPDX) began to show signs of problems and right after sending out OPDX.533, the system failed. Currently, the system is totally down, but I was able to retrieve most of my E-mail up through last Thursday (which was a real chore) for this week's bulletin. Due to the major technical problems on BARF-80, I am unable to send the following bulletin direct to the OPDX Mail List Server on "NSHORE.ORG" and the three DX Reflectors. Thanks to the Sysop on "NSHORE.ORG", the following bulletin was entered into the mail list for me. However, it does not look good for next week's bulletin, unless I am able to retrieve my E-mails from "NSHORE.ORG" (which is currently being held) while BARF-80 is being "totally reconfigured to LINUX". Please continue to send your DX info/announcements, and be patient during the next few weeks as this transition takes place. A special thanks goes out to the Sysops of "NSHORE" and "HAMNET" for their help in getting BARF-80 back on-line..... 73 and GUD DX de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 14/October, through Sunday, 21/October there were 228 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4S, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5U, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE0A, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E3, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3,

J6, J7, J8, JA, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S7, S9, SM, SP, SU, SV, SV5, SV9, T30, T7, T8, T9, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VK9L, VK9N, VP2E, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, XZ, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZK1/n, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

8Q, MALDIVES. Mark Haynes, M0DXR, informs OPDX that he has recently established a group of DXers which consists of members of the younger generation. The group is named the "Crystal Clear DX Group". They plan to undertake a DXpedition to the Maldives in August 2002. The team will consist of five to six operators with 3 stations on air for as much time as propagation will allow. The group has 3 main objectives:
1) To promote DXpedition and HF DXing for the younger generation and encourage similar future operations.
2) To show that a group of youngsters are capable of setting up and running a DXpedition to the point where it is recognized for its quality.
3) To concentrate on those stations who need 8Q7 as a new country on various band/mode slots. They plan to make at least 30,000 QSOs!
The team includes Tony/EA2AIJ, Simon/M0CLW, Fabian/ DJ1YFK, Mark/M0DXR, and one more youngster from the UK. Activity will be on all bands including the WARC bands. However, since most of the members on the team are still full time students in education, they are currently looking for assistance, contributions to help with their finances and sponsoring. If you can help, please contact Mark at: m0dxr@qsl.net
ADDED NOTE: Mark Haynes, M0DXR, was a team member of the Comoros Dxpedition D68C that took place earlier this year. He also won the RSGB Young Amateur of the Year award 1999/2000, and is the training secretary at his local club, Harlow, near London.

CO2, CUBA. Pepin, CO2TK, reports that he will be active in the CQWW SSB Contest as a Single Op/Low Power/Single Band (10 meters) entry. QSL via F6FNU.

CORRECTION. Last week in OPDX.533 we listed the prefix "V6" for Ducie Island, it should have been "VP6". (ed. Not sure what happened, maybe the "P" key was not pressed all the way down.)

E3, ERITREA. E30NA is now active. Activity began on October 19th and with QSN reports on 20/17/15/12/10/6 meters over the past week. However, activity is expected on 160-6 meters on the usual DX frequencies. The team of operators are: Chris/DL5NAM, Wolf/OE2VEL, Falk/DK7YY and Marcus/DJ7EO. They should be active until November 3rd. The team's QTH is approx. 10 miles SE of Asmara, the capital city of Eritrea (Grid Locator: KK95GB). It was mentioned this past week that there will be NO operations from any of the E30 islands at all! All IOTA activities had to be cancelled due to the political situation and power problems. More details are available on

the E30NA Web site at: http://www.qsl.net/e30na

FG, GUADELOUPE. Edin, T97M, will be active as FG/T97M from October 22-30th. Activity will be on all bands, SSB, CW and RTTY. QSL via K2PF: Ralph G. Fariello, 23 Old Village Rd, Hillsborough, NJ 08844-4008, USA. Also, Edwin will join Danny, T93M, to be active in the CQWW DX Contest as a Multi/Single sign FG5BG.

HS/E2, THAILAND (CQWW SSB Activity). Champ, E21EIC, informed OPDX that the HS0AC HQ station of RAST cannot be active in CQWW SSB Contest because the HS0AC shack will move out to a new area and currently has no electrical power. So, Champ states that he, E20RRW and HS0XNO will be active in the CQWW Contest from his home as E21EIC as a Multi/Single class. His team will use a Kenwood TS-940s w/100w and a 8 element 4 band Yagi and dipoles. QSL via E21EIC (Direct or Bureau). Champ also mentioned to look for the following Thai hams to be active in the contest:
HS5AYO SOAB LP QSL via CBA
HS1CKC SOAB HP QSL via CBA
HS4BPQ SOSB 15m. LP QSL via E21EIC
HS9EQY SOAB LP QSL via E21EIC
E20HHK SOSB 20m. LP QSL via E21EIC

IOTA NEWS.....
AS-079. Take, JI3DST, will be active from Miyako Island (Miyako-jima Hirara City, Okinawa-ken) from December 29th (0700z) through January 5th (0000z). He will sign JI3DST/6. His activity will be on 40/17/15/12/10/6 meters SSB. QSL via the Bureau (Bureau is BEST) or direct to JI3DST:
Takeshi Funaki, 2-18-26 Hannan-cho Abeno-ku Osaka-city, Osaka 545-0021, Japan.

EU-130. Paolo, IV3UHL, informs OPDX that he will take part in the CQWW DX SSB Contest from Gorghi Island. For those interested in IIA, the reference number is UD-08. His callsign will be IV3UHL/P, and he will be operating as a Single Band (20m) entry. The island is uninhabitated (exeption: birds, mice, small snakes, mosquitos etc.). His station will be powered by a gasoline generator. The rig will be IC-775 and the antenna is a vertical loop.

JT, MONGOLIA. Ken, K4ZW, reports that he is in the process of rescheduling his trip to JT-land. Travel will commence before the end of the year. The dates will be announced at a later time. The good news is that conditions to those areas that are in need of Zone 23 will be better than if they had gone last month. Ken states, "Just need to make sure I pack a few extra pair of long underwear!"

KC6, ANTARCTICA. Chris Post, N3SIG, Firefighter/EMT in the United States Antarctic Program at the McMurdo Station on Ross Island in Antarctica (IOTA AN-011), is now active as KC4/N3SIG until March 2002. He informs OPDX that he will be active (usually) every other day starting around 2000-2100 Eastern U.S. time. He will also be active for the CQWW SSB

Contest at the end of this month. His main modes of operation are SSB on 20/18/15 meters. Look for him on 14243 kHz to start. Chris also informed OPDX that special QSOs can be arranged by sending an E-mail to the following address: n3sig@arrl.net
All QSL cards go to AI3D, please include a SASE.

LIGHTHOUSE NEWS.....
Jim, K2JXW, Founder and President of the Amateur Radio Lighthouse Society (ARLHS), announced the ARLHS second annual "ARLHS Lighthouse Christmas Lights QSO Party" will take place December 22-23rd. See the fellowing Web site for guidelines and prizes:
http://www.waterw.com/%7eweidner/arlhs/xmas-guide.htm
Or visit pages 2 and 3 of the society's web site at: http://www.arlhs.com

ARLHS members Anita/N5AOK and H. O./WA5MLT will activate Boliver Point Light, Texas, during the Amateur Radio Lighthouse Society's second annual Lighthouse Christmas Lights event 2001. The event period will start 0001z Saturday, December 22 and will continue through 2359z Sunday, December 23rd. Listen for the special event callsign N5L. Activity during the daytime will be on 20/15/10 meters and during nighttime on 40 meters. QSL direct with SASE to N5AOK.

LT1, ARGENTINA. The team of LU1FAM, LU1FD, LU1FGE, LU1FGZ, LU1FKR, LU2FT, LU3FP, LU3FQG, LU3FZW, LU5FA, LU5FHM and LU6FQD is glad to inform OPDX that the next Multi-Multi operation from LT1F "Bad Power" will be in the upcoming CQWW DX SSB Contest. QSL via LU1FKR.

LT5, ARGENTINA. Bob/LU2FA and Seba/LU4FPZ will be operating in the CQWW SSB Contest as LT5F and as a Multi Single entry. Pay special attention to 80 meters.

PJ4, NETHERLANDS ANTILLES. Peter, PA3CNX, will be active from November 5-30th, while on holidays from Bonaire (SA-006), and will be signing PJ4/PA3CNX. His equipment will consist of: Kenwood TS-2000 (160m-70 cm), Windom antenna for 80/40/20/10 meters (Tnx GB Antennas). His suggested frequencies are: on SSB - 3790, 7070, 14340, 28440 and on FM 29580 kHz. If 6 meters is open, he will call around 50110 kHz. QSL via the bureau PA3CNX (R08), or direct via the callbook address. For the latest information, check Peter's Web site at: http://home.wxs.nl/~cnx

QSL INFO AND NEWS.....
Bob, N4CD, reports that his 3W2DC activity from Ho Chi Minh City, Vietnam, between October 2-15th is now QRT. He made 5000 QSOs, mostly on CW. However, there was very high QRN at his operating location in downtown Ho Chi Minh City (Saigon). His license allowed him only to operate on 10/15/20 meters. QSL via N4CD, direct or via the Bureau. His address is: Bob Voss, 3133 Charring Cross, Plano, TX 75025, USA.

Will, K6NDV, is now back home after his 3D2CI/3D2CY operation and reports that with the help of Doug, N6RT, the Logs are now on-line at: http://dx.qsl.net/logs
(Just follow the 3D2CI - 3D2CY - 3D2AD link).

Tom, G0PSE, reports that the log from the activity by GB0SM, which took place between October 6-13th, from St. Mary's, Isles of Scilly (IOTA EU-011), is now available on-line at: http://www.qsl.net/gb0sm
E-mail QSL requests for cards to be received via the Bureau can be sent to: tom@tctaylor.demon.co.uk -or- g0pse@qsl.net

Please note the QSL cards for GB0REL have now been dispatched. This station was active from Rathlin East Light during the International Lighthouse Weekend, 2001. Any station who worked GB0REL and has not received a QSL card should contact Jim, GI0PGC, whose address is correct in all current callbooks. His E-mail address is: jim.henry@btinternet.com

SPECIAL EVENT. Members of the REF89's and F5KCC's activated the special callsign TM5SIA during the 23th International Hamexpo in Auxerre on October 20-21st. They will continue to use the callsign until October 30th. Activity will be on all bands HF and VHF, CW/SSB/FM and maybe some RTTY. Locator is JN17. They request to please avoid double QSOs on same band. Some of them will enter the CQWWDX SSB Contest on the last weekend of October. All the contacts will be confirmed. QSL Manager is Pierre, F2WS.

T2, TUVALU. A group of JA operators will be active from here between November 1-8th and they are calling their operation "The Tuvalu membership of the United Nations commemorative DXpedition". Team TUVALU consists of:
Katsu JH7OHF/AH6G a member of K5K
Ted JJ1LIB/N1GO a member of 5T5U/S07U
Hiko JN1HOW/AH6PW a member of 5T5U/S07U
Mamo JQ1KNH/W6KNH a member of 5T5U/S07U
Their activity will be on 160-6 meters CW/SSB/RTTY. They will also have a 6 meter beacon on 50105/QSX 50130 kHz. The team will pay special attention on 160m for EU/East Coast and 6 meters for EU on long-path openings. They will have 3 stations active 24 hours day and use the special callsigns T2T (HF) and T2SIX (6m) to commemorate Tuvalu's entry into the United Nations. Pilot stations are: HF - 7K1WLE and JF6OJX; 6m - JA1RJU. Equipment will be: IC-756PRO+AMP, two TS-570G+AMP, FT-920+AMP, IC-706MK2 (for 6m beacon). Antennas are: a 4 element triband Yagi for 20/15/10 meters, a 4 element duoband Yagi for 17/12 meters, a 4 and 7 element Yagi for 6 meters and a 160-30m verticals/dipoles. QSL information is: HF via JN1HOW and 6m via JH7OHF, both direct only.
JN1HOW - Toshihiko Niwa: 1081-8 Sakae, Kitakawabe, 349-1213 JAPAN
JH7OHF - Katsushi Ono: 15-10 Gamokotobuki, Koshigaya, 343-0836 JAPAN
For more info and a possible log search, go to the Web page: http://www1.famm.ne.jp/~ndxa/pedi/t2-2001/t2-2001.html

V2, ANTIGUA. Team Antigua will once again activate V26B on the Beautiful Island Nation of Antigua and Barbuda in the 2001 running of the CQWW SSB Contest on October 27th and 28th. Their plans are to enter the contest as a Multioperator/Multi-transmitter category (Grid Square is FK-97 and IOTA Number is NA-100). Members of Team Antigua will also make special attempts to be active on RTTY, PSK31, 160 meters and the WARC Bands a few days both before and after the contest. There is also a possibility

of some 6 meter with conditions permitting! It is most likely the operators will make their presence felt on all bands starting on or about October 22th until about November 4th. The members of Team Antigua and their callsigns are:
V26A Dale, N3BNA - QSL via WB3DNA V26O Bob, N5NJ - QSL via N5NJ
V26AK Tony, N2TK - QSL via N2TK V26OC Brian, N3OC - QSL via N3OC
V26B Sam, WT3Q - QSL via WT3Q V26TZ Tom, ZP5AZL - QSL via W3HNK
V26E Darrel, AB2E - QSL via AB2E V26U Bill, W2UDT - QSL via W2UDT
V26EW Ed, N2ED - QSL via N2ED V26YR John, W2YR - QSL via W2YR
There will be a few new members who will announce their QSL routes once their Antigian callsigns become finalized. TWO ADDED NOTES OF INTEREST:
1) The "Special Collectors Edition (Worked 5 Band and 6 Band) Certificate Program" from V26B is continuing this year. However, due to the extreme costs of mailing everyone who has worked them on all 5 and 6 bands in the past (and there have been quite a few certificates mailed), they are now requesting that if you work them on 5 or 6 bands and would like a certificate, to please send them a "Self Addressed Stamped Envelope (Business Size)" along with 1 USD or IRC equalivant (to assist with printing costs) with your log information to W2UDT for processing.
2) SPECIAL TOP GUN PLAQUE CONTINUES FOR THE 2001 CQWW SSB EVENT - Starting on October 27th through the end of the 2001 CQWW SSB Contest, a Special Plaque is available to the "FIRST" operator to work V26B on all 6 Bands during the Contest. This Plaque is being sponsored by their very own Mr. Douglas Priest, W3CF/V26DX.
For a complete station description, complete with photographs and rate charts of the Team Antigua, V26B, Superstation. Please visit their Web page at http://www.frc-contest.org
and click on the DXpeditions page and then the Team Antigua, V26B Link!

V4, ST. KITTS & NEVIS. Larry, KJ4UY, will once again be going to Nevis as V47UY. He will be leaving on November 21st, and will operate from November 22nd thru December 4th and returning to Florida on December 5th. Larry will be staying at his good friend Karl's, V44NK, QTH. He will be using Karl's Kenwood TS450S/Heathkit SB220 or his Icom IC-756 with a KLM KT34A for 10/15/20 meters, an A3WS for 12-17 meters, a 30 and 40 meter dipole, and a HF2V for 40/80/160 meters (160 meters 100 watts only). Larry will be operating SSB/RTTY/PSK-31, with some CW, and will be operating all the bands that he has propagation. He will try to operate the CQWW CW contest to give others a multiplier, but he states that his CW is QRS, so please have patience. He hopes that it will help him improve. Please QSL to Larry's home callsign, KJ4UY. USA hams send SASE. DX send SAE plus return postage or via bureau. Larry looks forward to giving out as many as possible contacts for a new country or/and new band/mode country.

YN, NICARAGUA (Reminder/Update). Frosty, K5LBU, anounces that he will be making his third trip to YN2-land for the CQWW SSB Contest. He will leave Houston on October 24th, arriving the same day. He will team up with Ed/ W5GCX, and Laurei/G3UML. They will start putting up antennas on the 24th, so that they will be able to play on the air and check them out before Friday at the start of the contest. Activity will be on 160-10 meters. This time

they will have a Mini-Quad that will have 3 elements and a Balun that will
let them transmit on 6 meters. They will use a new callsign this year
during the contest which is shorter; listen for YN2EJ. Laurei/G3UML will
do the QSLs for Europe and Africa and Frosty/K5LBU will do the QSL cards
for all other areas.

ZL1, NEW ZEALAND (Special Event/Activity). The Hamilton Amateur Radio Club
in Hamilton, New Zealand, has applied for and been given the callsign ZL6JAM
for uses during and after the "16th New Zealand Scout Jamboree" at Mystery
Creek Hamilton from December 29th to January 6, 2002. The station will be
active from the site from 2000-0500z during this period, and outside these
hours if possible. As this station is being set up for Scouts (both boys
and girls aged 11 to 16), these kids would love to talk to kids around
their own age, as well as Hams from around the world. The frequencies
planned are: 3593, 3677, 7075 and 14260 kHz. They will be as near as
possible to those frequencies. 15m and 10m will be used depending on
conditions. A special QSL card is being printed for the Jamboree. QSL
details are direct with 1 IRC or 1 USD to: ZL6JAM, P O Box 606,
Hamilton, New Zealand. Please include an addressed envelope with direct
QSL applications. No stamp required.

If you are in EST, it was tomorrow from about 8PM your time in UTC.
You are -4 hours from UTC. You will, no doubt, have hundreds of QSO's
that log in tomorrows date. As others have stated, ALWAYS use UTC
when logging and QSL'ing.

Good DX'ing.

In my few years DXing I've heard quite a few awful DX operators with fully loaded rigs and amps. Biggest waste of RF I've ever seen. Everyone hears them, and before they know it everyone's yelling back, and they have no idea how to handle that. If I could, I'd take their FT1000s and TS930s and give 'em one of $150 "do it yourself" QRP rigs to play with...

On the contrast, I've seen very skilled operators working the heck out of DX with a $1000 100W rig.

What rig you have really makes no difference... if you know how to work it.

2756. TR messes up time of day?

Newsgroup: rec.radio.amateur.dx
Date: 2001-10-22 11:24:33 UTC
From: ti2dll@email.com
Message-ID: <9r0vlg$qji0f$4@ID-7470.news.dfncis.de>
Source record: 15610

Anyone ever had a problem with TR log messing up the time of day all of a sudden and without warning? I was recently operating a contest using a laptop computer... I got off the rig for a while to do some stuff around the shack, and then got back to the contest. When I checked my log a few days later, I found that the time of contacts had been consderably shifted. What I'm wondering now was whether the problem was my computer or the TR log. Any ideas?

The XP1AB DXpedition to Sondrestrom, Greenland is close to take place. This E-mail contain the latest news regarding the DXpedition.

1) The XP1AB eill be used ONE time only and only during the DXpedition. On 1 November 2001 the license will be withdrawn. We are QRV during the CQWW Contest on all 6 contest bands and on Monday 29 October on CW and RTTY. The XP prefix will NOT be gived free again ever!!!

2) We expect to go on air with own call signs/OX from Thursday 25 October (late afternoon or early evening) and we will stay on air until the CQWW starts.

3) We will try to be QRV on 160 M CW from Thursday everning (25 October) and/or Friday evening BEFORE the CQWW contest. Unfortunately, it will NOT be possible to work 160 M AFTER the contest.

4) We do have a YL operator with us. Her call is OZ5ABD and her name is Isa. For amateurs that collect YL's it will be possible work Greenland with a YL operator in the other end. Isa expects also to work CW before/after the contest.

5) The expedition expects to stop on Monday 29 October at approx. 21 GMT. Thueday 30 October will be used to pack all equipment back in the boxes etc.

73 de OZ0J, J&#65533;rgen
oz0j@roemming.dk

Now you have the chance to work XP1AB.

XP1AB will be used during the CQWW SSB 2001 contest.

See details at http://www.qsl.net/xp1ab

Some information on postal reply coupons in French and English can be
found at http://mapage.noos.fr/AndreH1/ .

Here is a 1994 list of countries who do not accept IRCs:
Abu Dhabi, Anguilla, Antigua, N.Antilles, Bahamas, Bahrein, Bhutan,
Bolivia, Brunei, Bulgary, Cayman, China, C.I.S., Colombia, Czech Rep.,
Dominicana Rep., Dominica, Falkland, Gilbert, Grenada, Guyana, Honduras,
Korea North, Korea South, Lesotho, Nepal, New Hebrides, Montserrat, Oman,
Peru, Qatar, Romania, Saudi Arabia, St.Kitts & Nevis, Saint Lucia, Saint
Vincent, Swaziland, Taiwan, Tonga, Hungary, Vatican City, Vietnam, Virgin
Island, Yemen, Zimbabwe
However, I have found that IRCs are sometimes accepted by hams in these
countries, because they can use it as return postage for their own letters.

Apparently, IRCs are of no use in Libya, too, at least that's what Abubaker
(5A1A) says.

The authority in any case should be the UPU - see http://www.upu.int/ .

Source record: 15617

Dear Colleague

surfing on the web and searching for a cubical tribander I have found the

CUBEX antenna (see at www.cubex.com) I asked for info on the italian HAM forum and people told me that they prefere a 3 elements yagi has the HY GAIN TH3MK4 instead of the 2 elements cubical quad by CUBEX (friends told

me to have tested personally). Well my idea is that it's impossible that a 3 el.yagi 3 band works better than a 2 ele quad monobander for 10/15/20

also if you have to do a lot of attention and maintenance to the 2 quad.

Please if anybody has the cubex let me know on private your impression

73 (sorry for my english)

Hi there,

do you know the VHF-DX-Onlinedatabase?

Since a few days the new release of our VHF-DX-database is online!
With informations about more than 43.000 members.
(CALL, DXCC_WAE, LOCATOR, NEW_OLD_CALL, ACTIVITY, RIG, ...)
You can search for calls and locators.

http://vhf-dx.scam.de/

Also iti¿½s possible that everyone can modify his own data record.

Just take a look.

Begin Quote:

FCC Stops Accepting Filings Enclosed in Envelopes:
The FCC announced this week that, effective immediately, hand or messenger-delivered filings enclosed in envelopes will not be accepted at FCC Headquarters until further notice. The Commission is encouraging everyone to file electronically or via fax whenever possible.

Filings and other documents in envelopes or packages destined for the FCC should continue to be addressed to FCC Headquarters, 445 12th Street SW, Washington, DC 20554. At least for now, these deliveries will be diverted to the FCC's Capitol Heights facility--at 9300 East Hampton Drive, Capitol Heights, Maryland--for special handling. The FCC said it's looking for an alternative Washington, DC, site to accept delivery of filings on a more permanent basis.

A Public Notice said that starting Monday, October 22, the FCC will accept originals and copies of official filings addressed to the Commission's Secretary "held together with rubber bands or fasteners" only at its Capitol Heights facility . The FCC was accepting no hand-delivered or messenger-delivered filings--in envelopes or otherwise--before October 22. Filing deadlines for both paper and electronic filings were extended in light of the new procedures.

The changes were necessary "as a precautionary measure," the FCC said. "As the Commission continues to balance its efforts to be accessible to its customers with the need for heightened security measures, the Commission encourages its customers to make full use of the Commission's electronic filing systems to facilitate the filing of documents," an FCC announcement said.

The FCC Public Notice made no direct reference to the current anthrax scare. It also made no mention of any change in procedures regarding filings mailed in envelopes to its Gettysburg, Pennsylvania, office--where Amateur Service applications typically are sent.

The FCC said the Commission's Office of the Secretary will work with bureaus and offices, as appropriate, to handle bulk filings in accordance with the just-announced precautionary measures. The new no-envelopes procedures extend to filings requesting confidential treatment under the Commission's rules.

The FCC directed all questions about the new procedures to the Commission's Secretary, msalas@fcc.gov, or 202-418-0300.

Visit the FCC Web Site for more information.

http://www.fcc.gov/

The ARRL Letter Vol. 20, No. 42 October 19, 2001

----------And Consider this one ----------
Begin Quote:

CQ Asks Contesters to E-Mail All Logs:
CQ magazine is asking all participants in CQ-sponsored Amateur Radio contests to submit their logs electronically. "In light of recent events regarding hazardous items sent through the mail, logs received through the mail at the CQ offices will be held unopened until all potential health risks have been evaluated," a CQ Communications news release said. CQ said it cannot guarantee that logs submitted via the US Postal Service will be opened.

All logs for the CQ World Wide DX Contest, the CQ WPX Contest, the CQ World Wide 160-Meter Contest, the CQ World Wide VHF Contest and the CQ/RTTY Journal RTTY contests should be submitted via e-mail according to the instructions in the rules for each contest.

CQ Communications President Dick Ross, K2MGA, said CQ regrets the inconvenience to contesters lacking Internet or e-mail access or those who log by hand, but he said CQ did not want to risk the chance that staff members or contest committee volunteers might be exposed to dangerous packages sent through the mail. CQ suggested that contesters not now using computer logging programs start doing so.

CQ also suggested that hand loggers transcribe their logs into an ASCII (.txt) file using a word processor, separating each contact element with a tab, separating each contact with a carriage return, and e-mailing the resulting file to the address listed in the contest rules. "Be sure to include the required information about your station in a covering e-mail message," the CQ notice advised.--CQ Communications news release

PT0T and PY1VOY/PY0T QSLs received yesterday. Very fast response,
beautiful card.

Thanks to PY1VOY (Rick) and PY1LVF (Vieira) for an excellent operation
from Trindade Isl.

Denny, W3DRY

Hello ! I'm thinking of working USA/VE on 160 meter during CQWWDX SSB contest this weekend !
Since I'm not a 160 meter expert, I wonder what part of the band to find them. I'm sure there is someone that can tell me that, so I can work a lot of you during the test!
Thanks in advance and 73's, cu in the test !

AMATEUR RADIO NEWSLINE(tm) REPORT #1263 - OCT. 26, 2001

Amateur Radio Newsline report number 1263 with a release date of
Friday, October 26th, 2001 to follow in 5-4-3-2-1.

The following is a Q-S-T.

The ARRL says to get ready to fight to protect the 70 centimeter band and the FCC says to stop sending paper to its Washington office. These stories are first on Amateur Radio Newsline report number 1263 coming your way right now.

(Billboard Cart Here)

**

FORCED SPECTRUM SHARING: BATTLE LOOMS OVER PART 15 ACCESS TO 425-435 MHZ

The American Radio Relay League says that a battle is looming with the FCC over the agency’s proposes changes to its Part 15 rules governing unlicensed devices. Changes that would allow operation of advanced radio frequency identification devices between 425 and 435 MHz. And it could spell the word trouble for ham radio as we hear from our South-East Bureau Chief, David Black, KB4KCH.

--
The ARRL Letter explains the League's position. The FCC has decided to grant a request made earlier this year by SAVI Technology Inc. SAVI wants to us the spectrum for radio frequency package identification tags. To help make that happen, the FCC is issuing a Notice of Proposed Rule Making.

In comments on the VHF Reflector, Russ Pillsbury, K2TXB, discusses SAVI. He describes it as a big, multi-national company with significant worldwide funding. Pillsbury also says SAVI has large United States defense department contracts as well.

SAVI Technology sells radiolocation and wireless inventory control products. SAVI says it needs the rules change to meet customer demand for increased radio frequency identification system capabilities. And the FCC says it agrees with SAVI. The Commission says changes
to its Part 15 rules would allow more advanced radio frequency ID systems on the 433 MHz band and would serve the public interest.

The Commission proposes creating a new section to Part 15. It would allow operating radio frequency ID systems between 425 and 435 MHz. Transmissions could be up to two minutes at a time. Maximum field strengths would be at the level now permitted only for extremely short-duration, intermittent control signals. And that's what ham radio operators don't like. They see that as a high potential for interference to Amateur Radio operations nationwide. And

it's why the ARRL fiercely opposes the rules change.

The League takes a strong stand. The ARRL says the FCC has set the stage for another battle between amateur and commercial interests. League Executive Vice President Dave Sumner, K1ZZ, accuses the FCC of not having thought this one through. Sumner normally expresses ARRL Board policy. He says the Part 15 radio frequency identification proposal is: "contrary to the whole philosophy of the Part 15 rules."

Sumner says the radio identification devices SAVI proposes belong on other frequencies--specifically, those authorized for use by devices regulated by FCC Part 18 rules. Those regulations cover Industrial, Scientific and Medical devices. The FCC counters, saying the proposed rules change dealing with the ID systems is to harmonize its own rules with those in other parts of the world.

But Sumner fires back. He says 433.9 MHz is allocated for Industrial, Scientific and Medical devices only in ten European countries but not in the rest of the world. And it is not permitted in North and South America which make up I-T-U Region 2.

From the South East Bureau in Birmingham Alabama, I'm David Black, KB4KCH, for the Amateur Radio Newsline.

--

Another portion of the proposed rules change involves the Industrial, Scientific and Medical frequency allocation at 13.56 MHz. Dave Sumner says at first glance that proposal might permit increased emissions in the bottom 10 kHz of the 20-meter amateur band. Sumner adds that the ARRL will take a closer look at this section of the overall proposal before assessing its interference potential. The entire Notice of Proposed Rule Making and Order is contained in ET Docket 01-278 is available on the FCC website at www.fcc.gov and the ARRL Website at www.arrl.org. (ARRL, K2TXB, VHF Reflector)

**

FORCED SPECTRUM SHARING: FCC ISSUES 430 MHZ EXPERIMENTAL LICENSE FOR SOCAL

Hams in Southern California are on alert after the FCC issues an Experimental License to Digital Wireless Corporation in Los Angeles to test its systems in the 420 to 430 MHz Amateur Radio band. Digital Wireless Corporation is a manufacturer of secure, all-digital, Internet-linked trunked and non-trunked dispatch radio equipment that provides secure conversations and seamless network coverage for business, government and military users. The license with the call sign W-C-2-X-K-K permits holder Brent Jaybush and Digital wireless to operate within 5 km of their factory in Los Angeles through February 01, 2003. (FCC, ARNewsline(tm))

**
FORCED SPECTRUM SHARING: ARRL - NO COMMERCIAL USERS AT 2390-2400 MHz.

The ARRL says that it urges the FCC -- ‘in the strongest possible terms' -- to make no commercial allocations in the 2390 to 2400 MHz primary Amateur Radio

Service allocation. In a bulletin to its members released on Wednesday, October 24th the League did however tentatively suggest hams might be willing to share the band with compatible government services that are displaced to make room for advanced wireless systems.

In its communication to the regulatory agency, the ARRL tells the FCC that advanced wireless systems are fundamentally incompatible with continued amateur access to the band.' The ARRL says the federal government 'has historically been a compatible sharing partner and that government uses would offer 'the least disruptive opportunities for sharing' in the band. (ARRL Bulletin)

**

RESTRUCTURING: NEW LICENSING REGS IN NEW ZEALAND

It’s a nation that now only has two license classes and a 5 word per minute code test. This as New Zealand joins the worldwide move toward simplifying the entry to ham radio. Amateur Radio Newsline’s Jim Meachen ZL2BHF has more:

--

The introduction of New Zealand’s Radiocommunications Regulations 2001 has brought changes for Amateur Radio Licensing in New Zealand. Forthwith there are only two classes of Amateur Radio Licence available -- The Limited and The General. The Novice and the Novice/Limited licences grades have been removed.

The Limited licensing procedure remains unchanged and the General licensing procedure is changed by the lowering of the Morse Code test to 5 words-per-minute. Novice and Novice/Limited licences will no longer be granted. Existing licences in these categories will remain valid under the new Regulations and with their original licence provisions.

New Zealand’s Licensing Authority the Ministry of Economic Development is encouraging existing Novice and Novice/Limited licensees to review their qualifications to see if they now meet the requirements of the new General Licence.

Amateur who have passed the previous Novice Morse test of 6 wpm and attained a pass of 50% or more in the theory and regulations examination, or 66% or more in the new multiple-choice computer-generated examination now meet the requirement for a General Licence and can immediately submit an application for an upgrade.

The existing ZL callsign grouping that indicates the class of licence of the holder will remain in force. This will require all licensees upgrading to a General licence to obtain a new callsign.

Included in the new Regulations is a long awaited provision for variation to the manner in which an amateur examination is carried out if there is need to vary the examination process for a candidate with a particular disability. Variation will be at the Chief Executive's discretion and the Ministry will deal with each case as it arises.

It is expected that the New Zealand Association of Radio Transmitter Morse Examiners will test at 12 wpm on request for those who may wish to meet this higher operating standard for overseas travel.

From Auckland New Zealand I'm Jim Meachen ZL2BHF for Newsline.

--

With more and more nations turning to 5 words per minute Morse testing, it appears as if it will soon be the standard -- worldwide. (NZART, ZL2BHF)

RADIO AND THE WAR: FCC STOPS ACCEPTING FILINGS IN ENVELOPES

If you are planning to write to the FCC in Washinton D-C – the word is – don't. This as the agency issues a public notice saying that filings enclosed in envelopes will not be accepted until further notice.

The reason is the same as the one CQ Magazine stated last week when it said it will no longer accept mailed in paper logs – the possibility of bio contamination. And while the FCC notice makes no direct reference to the anthrax scare, the Broadcasting and Cable newsletter says most view it at as a precautionary.

In a nutshell, heres what the FCC says to do. Document filers and messengers delivering paper communications to the agency will be asked to dispose of envelopes in a receptacle outside of its Washington, D.C., headquarters. Mail and packages delivered to the agency will be opened at an off-site location. If you must send a paper filing to the FCC, the only way it can be done is by clipping the papers together with a rubber band or other fastener with no envelope. Then you either hand carry it or courier it to 9300 East Hampton Drive, in Capitol Heights, Maryland. Those requesting confidential treatment of their documents must have materials placed in commission-provided envelopes. The FCC also says that filers have the option of submitting any document electronically.

And what about filings by U-S Mail to the Gettysburg Licensing facility in Pennslvania? Items like ham radio license renewals and the like? According to the ARRL Letter, the public notice on FCC mail makes no mention of any change in procedures regarding filings in envelopes to Gettysburg, but that could change at any time. (Broadcasting & Cable, ARRL)

**

RADIO AND THE WAR: RADIO SOLO HEARD IN THE USA

Last week we reported that the United States has been air dropping Bay Gen wind up radios into Afghanistan. We also said that the government six EC-130 planes that make up the Air National Guard's Commando Solo fleet serve as flying radio stations. Now we can give you an idea of what the airborn transmission to the Afghan populations sounds like. Take a listen:

--
Audio here
--

That signal was reportedly recorded by a shortwave listener on the U-S East coast on October 18th and posted to the Internet. And while we do not know exactly what's being said, an English translation posted to the Pentagon's website indicates its probably a transmission to Taliban fighters and might well say: "When you decide to surrender, approach United States forces with your hands in the air. Sling your weapon across your back muzzle towards the ground. Remove your magazine and expel any rounds. Doing this is your only chance of survival." (shortwave.com, ARNewsline(tm))

**

RADIO AND THE WAR: A RUN ON RADIOS

One of the hottest selling consumer electronic items since September 11th is the scanner radio. According to several news reports, the people buying them say that it gives them a sense of security knowing what's taking place in the community in light of the terror attacks on New York City and the Pentagon.

One story says that the Radio Shack chain, based in Fort Worth, Texas, has reported a major increase in sales. The same with such dealers as Scanner World USA, a mail-order business based in Albany, N.Y., and Uniden America Corp. of Fort Worth. In fact, some retailers report sales are up 10 percent to 30 percent compared with the same period last year.

That article quotes Norm Schrein, KA8PGJ, who is president of the Bearcat Radio Club in Dayton, Ohio. Schrein says he went to a trade show in Peoria, Illinois, four days after the attack. Business was so brisk that his stock of scanners was all but cleaned out.

But scanners are not the only hot product running off dealer shelves these days. All-band shortwave radios are running a close second. According to one news story the lure of shortwave receivers is that they allow for listening to broadcasts from around the world, including airline, shipping and military communications. Other reports say that shortwave gives the public yet another avenue to get news items not regularly reported by the U-S press. (Various published news reports)

**

ENFORCEMENT: DON'T USE ILLEGAL GEAR FOR BUSINESS

A Kentucky towing company is told to stop using the ham bands to communicate. This after the FCC receives complaints that the company's trucks have been heard on 10 meters. Riley Hollingsworth, is the FCC's Special Counsel for Amateur Radio enforcement matters:

--
Hollingsworth: “We sent a warning notice to STI Towing and Repair in Walton and Florence Kentucky about using 10 meter Amateur equipment in their business operation. Related to that, we sent a warning to an employee licensee of the company [named] Robert McCoy, N4ZTA of Florence Kentucky about the same matter.

Now that employee may have equipped the trucks wth unlicensed equipment. The trucks are tow-trucks number 21, 27, 52, 97, 99 and RR4 operating in the Walton and Florence Kentucky areas.”
--
STI Towing and Repair was given the usual time to respond. (FCC, RAIN)

**
ARRL MEMBERS: THE LEAGUE NEEDS YOU IN THE CC&R EFFORT

If you are an ARRL member, listen up. This one is for you.

Have you ever been denied the ability to put up an antenna, or to operate an Amateur Radio transmitter? Have you had any other restriction on your Amateur Radio activities because you live in a housing development or condominium complex governed by private land use regulations? Well, the ARRL Board of Directors has adopted a goal of trying for legislative action that helps overcome the unreasonable restrictions of C-C-and R’s that prohibit or restrict Amateur Radio antennas. And you can help. Heres how.

According to the ARRL Letter, the league has a sample letter at its website. That’s in cyberspace at www.arrl.org. If you are affected by a CC&R, or know someone in your Congressional district who is, please adapt the sample letter to your own situation and consider sending it to your member of Congress. And if you decide to write please send a copy to the ARRL's Office of Legislative Affairs.

To find your Senator's mailing address check www.senate.gov/contacting/index.cfm. To find your Representative's, check www.house.gov/writerep. (ARRL)

**

AWARDS: DARA OPENS NOMINATIONS FOR HAM OF THE YEAR

The Dayton Amateur Radio Association says its opening the nominating period for the 2002 Dayton Hamvention Awards. There are three awards presented each year. They are the Radio Amateur of the Year, Special Achievement, and Technical Excellence.

The Radio Amateur of the Year is described as the special person who has made a long term commitment to the advancement of amateur radio. We are looking for a well-rounded individual who has contributed to our hobby in some outstanding way. The Technical Excellence award is for the person who has made an outstanding technical advancement in the field of amateur radio while the Special Achievement Award is reserved for the ham who has made an outstanding contribution to the advancement of amateur radio. This latter award is usually given to a respected amateur who spearheaded a single significant project.

All amateurs Novice through Extra are eligible. Awards are decided by the Awards Committee, based partially upon the information received. Magazine articles, newsletters, newspaper clippings, videos and the like are appreciated but cannot be returned. The deadline for nominations is January 31, 2002. Nominations can be submitted by US Mail to Post Office Box 964, Dayton Ohio 45401 or by completing the convenient e-form on the web at www.hamvention.org. (DARA)

**

NAMES IN THE NEWS: HAP HOLLY KC9RP TO SPEAK IN L.A.

If you live in the Los Angeles area, and have never had the opportunity to meet RAIN Producer Hap Holly, KC9RP, you will have you chance very soon. This as Hap and his wife Stephanie venture west to the City of Angeles for a speaking engagement by KC9RP.

Hap will be the guest of the TRW Amateur Radio Club at its Thanksgiving Awards Banquet the evening of November 10th. There is one caveat. This event is for active TRW Radio Club members and their guests only. More information is on the web at www.w6trw.com under the subject Annual Banquet. (ARNewsline(tm))

**

NAMES IN THE NEWS: W4WYR NAMED A “CHAMP”

The ARRL Letter says that Southeastern Division Vice Director Evelyn Gauzens, W4WYR, is the recipient of the 2001 Citizens' Ham Mobile-Marine Patrol or CHAMP Award. Gauzens was selected for her work as co-founder of the famed Miami Tropical Hamboree ham radio convention and as being a prominent community activist. The South Florida FM Association, Citizens' Crime Watch, and the Miami-Dade Police Department established Citizens' Ham Mobile-Marine Patrol in 1994. (ARRL)

(5 sec pause here)

**

EMERGING TECHNOLOGY: HIGH SPEED INTERNET CONNECTIONS GROWING

It won't ever replace ham radio for versatility, but high-speed lines connecting people to the Internet increased by 63% during the second half of year 2000 That’s a total of 7.1 million new connections. Of the 7.1 million high-speed lines, 5.2 million were residential and small business subscribers. The CGC Communicator says that the rate of high-speed growth for the full year of 2000 was 158%. (CGC Communicator)

**

ON THE AIR: CULBERTSON A HIT AT JOTA 2001

Astronaut Frank Culbertson left a global trail of excited Scouts the weekend of October 20 th as he made rapid-fire QSO's during the worldwide Jamboree-on-the-Air. The commander of the Expedition Three crew on board the International Space Station used the NA1SS call sign to rack up contacts in many places including Australia. There on Saturday, the 20th, Tony Hutcheson, VK5ZAI, took a portable station to the Riverland Scout Hall where a crowd of about 60 watched as one of the senior Girl Scouts asked Culbertson a question. Back here in the United States, sixteen Boy Scouts from Troop 48 in New Orleans gathered at the station of K5CFW, to pull off a quick QSO.

On the early afternoon pass over the U-S, KD4SFF, using the phonetics "Scouting for Fun," set up a station in his backyard in Greenville, South Carolina. He had five Scouts from Boy Scout Troop 555 over. Frank told one of them that he had grown up in South Carolina, and that he, too, had been a Scout.

Culbertson has been very active on the 2 meter band from the ISS. He talks to several schools each week as well as numerous open QSO’s worldwide. (AMSAT)

**

HAM RADIO IN SPACE: NEW STATION AT UK NATIONAL SPACE CENTER

A new Amateur Radio Satellite Service ground station has been opened at the United Kingdom’s National Space Center in Leicester. Using the call sign GB2NSC the station will operate at the heart of the center in the 'Space Now' attractions area, That’s the same location where the National Space Center Amateur Radio Society is demonstrating how to contact amateur radio equipment on board the International Space Station. (GB2RS)

**

SCIENCE AND SPACE: NASA’S GOLDIN ANNOUNCES RETIREMENT

Daniel Goldin, who pushed NASA to be leaner and faster and then came under fire for it, says he will retire from the space agency next month. after nearly 10 years in the job. The longest-serving administrator of the National Aeronautics and Space Administration Goldin will leave in mid-November with a record of 160 successful space missions international space station that is now permanently occupied. Cost over-runs in the billions of dollars are said to have contributed to his leaving the agency. (Published news reports)

**

INTERNATIONAL: WINLINK ILLEGAL TO OPERATE IN VK

It appears that the very popular WINLINK messaging system is illegal to use in Australia. WINLINK is a program and intertie network that provides full-featured digital E-mail transfer, position reporting and weather service to the global amateur radio community where Internet access is not available. But as Q-News Graham Kemp VK4BB, tells us, the Australian Communications Agency says – “no!”

--

In news services this week we see the WIA's Federal Technical Advisory Committee Chairman John Martin VK3KWA reminding operators it's "just not on" to operate this program "down under". John has had discussion with the ACA on the topic, it's not a simple matter of changing the amateur regulations, rather the issue is tied in with legislation including the Telecommunications Act.

John concludes that in the short term there is no chance whatsoever of any change in the ACA's ruling that Winlink is illegal in Australia. Packet radio bulletin board operators should also be very careful about forwarding any Winlink traffic, and preferably filter it for manual checking before allowing it to go through.

--

Currently there are WINLINK nodes in the United States and nations worldwide. The one major exception is Australia. For the rest of the world where it is legal, more information is on the web at www.winlink.org. (Q-News)

**

ON THE AIR: LONG PATH FRIENDSHIP NET.

In this time of turmoil a group of hams from around the world are going to try to bring some light to the end of a rather dark tunnel. This with a new on-the-air fellowship gathering called the Long Path Friendship Net.

The net will start at 1430 UTC, Sundays on 14.165 MHz with K6HAE and WTZ in California and ZS6AN in South Africa as control stations. The founders say that this is a big planet and there are enough natural disasters to be dealt with as well as some sad man-made ones for which the proficient and friendly radio operator is a valued contributor.

Again, that’s the new Long Path Friendship Net every Sunday at 1430 UTC on 14.165 MHz in the Extra segment of the 20 meter band. (Press release)

**

DX

In DX, the ARRL’s DXCC Desk reports that the ZK1NDK North Cook Island operation now good for DXCC credit. Hams who submitted request for ZK1NDK and were denied credit may contact the Leagues DXCC desk and have their records updated without having to resubmit cards. (OPDX, Daily DX, others)

**

THAT FINAL ITEM: REAL SKY HOOKS

And finally this week, you may find this one hard to believe, but its true. It comes under the heading of an honest to goodness sky hook -- and no we are not kidding. Bill Pasternak, WA6ITF, has more:

--

The proposal for these sky hooks comes from ATG industries in southern England. It wants to build reflective airships and have them operate at a height of

65,000 feet.

These craft would be unmanned and would station keep using solar powered electric engines and a lightweight diesel engine. ATG claims that these "skyhook" ships could keep position for up to 5 years. That they could act as a transponders for services such mobile telephones, broadband internet and digital radio.

ATG estimates that nineteen of these sky hook ships could cover most of the U.K. and replace as many as 4000 mobile telephone poles and up to 10,000 towers that are expected to be needed for the new G-3 technology.

For the Amateur Radio Newsline, I’m Bill Pasternak, WA6ITF.

--

Its not known how long these sky hook ships will take to develop or if they will ever be deployed. (Telecom Daily)

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at
www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

Before we go, this advisory. The Amateur Radio Newsline Incorporated is not soliciting for affinity credit cards in our name or that of the old Westlink Radio Network. Nor are we telemarketing amateurs to sign up for any affinity credit card.

If someone calls you trying to get you to sign up for a credit card supposely sponsored by the Amateur Radio Newsline, get all the information you can including the full name of the telemarketing representative, information on sponsoring organization and the bank issuing the card. Then say no, hang up and drop us an e-mail with the details. We will take it from there.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Roy Neal, K6DUE, saying God Bless America, 73, and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2001. All rights reserved.

No problem working DX that is in the contest even though you may not be contesting yourself. You will need to give the correct info during the brief contact which for this weekend's CQ Worldwide SSB HF contest is a signal report and your CQ zone number....

Since you will not be contesting (and submitting your scores) there is no requirement that you log any of the contacts you make....good luck and I hope you snag some " new ones "

You might want to look at the DX tips I have posted on The DX Page of the website listed below...they can be beneficial...

From today until 31/12/2001, all Belgian amateurs are alowed to use the OQ (OSCAR QUEEN) prefix to celebrate the birth of our new princess, Elisabeth.

She's the first daughter of Prince Filip (who will take the throne after his father, the current King Albert II) and Princess Mathilde, and Elisabeth will eventually become Queen of Belgium.

Hope to see you all on the bands as OQ5ZO!

I have had a pair in a QRO HF-2500DX for over 4 years, and they are
still running at or very close to full initial output. I seldom run
more than 1200 w pep, but can go to 2+ KW plus into a dummy.

Non-Svetlana branded NOS Russian surplus GU-74B tubes can be purchased
from eastern European sources for around $80 each delivered to the
USA. If you are nervous about sending a money order to Lithuania (you
shouldn't be) there is a domestic source who gets about $100 each.

AMATEUR RADIO NEWSLINE(tm) REPORT #1264 – NOV. 2, 2001

==========

A NOTE TO THOSE WHO ONLY “READ” AMATEUR RADIO NEWSLINE(tm)

For those of you who only know of the Amateur Radio Newsline (tm) as a text newsletter we would like to invite you to listen to the audio version. This Amateur Radio Newsline (tm) script is actually written for the “spoken word.” It is recorded each by professional broadcasters and is available for private listening or rebroadcast over your repeater. Three methods of delivery are available: Streaming audio using RealAudio, FTP RealAudio or dial-in telephone. Please visit our website at http://www.arnewsline.org for a list of telephone numbers (you have to pay your own long distance charges) and links to audio servers providing our voice newscast (for free). We think you will find the time you spend listening to be a rewarding experience.

de
The Amateur Radio Newsline(tm) Production Team

==========

Amateur Radio Newsline report number 1264 with a release date of Friday, November 2nd, 2001 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Hand held radios to Antarctica, Georgia to host the 2002 United States Amateur Radio Direction Finding championship games and the F-C-C takes action on illegal C-B radios. These stories are first on Amateur Radio Newsline report number 1264 coming your way right now.

HAM RADIO TECHNOLOGY: IRLP REACHES ANTARCTICA

Imagine picking up your H-T, calling your friend and asking him how the weather is. He responds with a crisp clear signal and tells you that its 70 below Zero and snowing. Outside your window the thermometer says its 80 and you plan a day at the beach. Welcome to the world of Internet Repeater Linking as the system expands its global coverage to Antarctica. Nate Dueher, WYZ0X, has more from Denver Colorado:

--

The Internet Radio Linking Project has come to Antartica. On October 23rd, Chuck N0NHJ, set up the first Internet radio link on the continent. A few days

later we caught Chuck and a few other hams on the air to ask him a few questions. Let's listen in...

Terry, N0PQV in Denver, Colorado was the first to say hello:

--

[recording]

--

I got a chance to ask a question of Chuck that I wanted to know. Chuck, how many hams are on the station and how many are active on
IRLP?

--
[recording]
--

And yet another question from Ian, M0CJY in Rottherham, Yorkshire, England...

--
[recording]
--

One of the other questions we had was Justin KC0LBH who wanted to know all about that famous Anartic daylight:

--
[recording]
--

That's all we have time for today. If you'd like more information on the IRLP project on the World Wide Web, go to www.irlp.net. This is Nate Duehr, WY0X reporting.

--

Once again, if you are interested in tying your repeater to the Internet Repeater Linking Project go to www.irlp.net on the world wide web. (NY0X, ARNewsline(tm)) {This complete very ecxciting QSO is available in RealAudio at www.arnewsline.org on the FTP transfer page}

**

RADIOSPORTS: ATLANTA TO HOST NEXT US ARDF CHAMPIONSHIP GAMES

The South-East will host the next United States 2002 Amateur Radio Direction Finding competition. Newsline's Joe Moell, K0OV, tells us where and when the event will be held.

--

The Georgia Orienteering Club has been selected to host the second USA Radio-Orienteering Championships, to take place April 19-21, 2002. The competition will get under way near Atlanta on Friday afternoon with a practice

event, followed on Saturday by the main two-meter hunt and on Sunday by the 80-meter hunt.

In addition to the hunts, there will be a cookout on Friday evening, a dinner on Saturday night, and an award ceremony following the 80 meter hunt, all included in the registration fee. Lodging options include cabins in the park and campgrounds with RV hookups. There are also many local motels and bed-and-breakfast inns.

Standard international rules will be used for these foxhunts, which are all on foot in beautiful woods near Callaway Gardens. The Championships are open to anyone, beginner or expert.

Slovakia will host the next World Championships of foxhunting in fall 2002. Positions on USA's team that will travel to these championships will be determined by individual performances in the Atlanta event, as well as in last summer's USA Championships in Albuquerque.

It's not too early to start making plans to attend the second Radio-Orienteering Championships near Atlanta. For more details and registration information, see the official Championships Web site. The exact URL is rather long, but you can get there in just a couple of clicks by going to my foxhunting Web site: www.homingin.com. That's "homingin" -- as one word -- homingin.com. Or you can write to me at my callbook address.

From sunny southern California, where foxhunters are already practicing for the championships, this is Joe Moell K0OV, for the Amateur Radio Newsline.

--

Again, the web address for more information is www.homingin.com. (ARNewsline(tm), K0OV)

**

ENFORCEMENT: FCC VS ILLEGAL CB SETS

The FCC has gone after some illegal gear seemingly designed for operation on the Class D 11 meter Citizens Band. This, as it issues a citation to an alleged supplier of the equipment in Oregon. Amateur Radio Newsline’s Norm Steely, KI7UP has the details.

--

In its September 17th letter to Truck-n-Travel and copied to its owner, Eugene Trucking Haven, FCC Portland Oregon Resident Agent Ben Nugen leaves no doubt as to what is going to happen. Either stop selling non-FCC Certified radio gear or the consequences.

His letter states that last July 23 that agents from the FCC observed uncertified Citizens Band radios displayed and offered for sale inside the Truck-n-Travel located on East Pearl Street in the city of Coberg. The FCC says the radios included four models from Galaxy and one from a company called Delta Force. The Commission says its records show that one of these CB sets

have been granted an FCC equipment authorization. It warns Truck-n-Travel that the marketing of these CB radios, or even just advertising them is a violation of Sections 2.803 and 15.101 of the Commission’s rules. It tells Truck-n-Travel that it can fine them up to $10,000 per violation per day and that can go on to a maximum of $82,500.

The letter then gives Truck-n-Travel the same warning that numerous ham radio violators have received over the past several years. It tells the company that, in accordance with Section 503(b)(5) of the Communications Act, it has 14 days from the date it received the citation to submit any statement it has to make concerning the alleged violation. And the FCC adds that the Commission staff will use all relevant material information it has -- including information disclosed in the Truck-n-Travel reply to determine what, if any, enforcement action is required to assure current and future rules compliance.

--

More on this case as information is made available. (FCC)

**

ENFORCEMENT: NY REPEATER UNDER SCRUTINY

The FCC has told a repeater owner to explain the operation of his machine. A repeater that FCC Special Counsel Riley Hollingsworth says is on the air all by itself:

--

Hollingsworth: “We opened an audit of a repeater opewrating in Elmhurst New York, KB2PRV, after our evidence showed no identification, no appart control operator, and no apparent coordination.”
--

Hollingsworth says that the letter of inquiry went to Ramon D. Florimon who holds the KB2PRV callsign. He was given 30 days from reciept of the October 2nd letter to respond to the FCC. (FCC)

**

BREAK 1

This is ham radio news coming to you from the United States of America. We are the Amateur Radio Newsline, heard on bulletin stations around the world, including the Southern California Amateur Teleprinter Society net serving West Covina California.

(5 sec pause here)

**

RADIO REGULATIONS: FCC CLARIFIES FUTURE OF CORES

The FCC's Wireless Telecommunications Bureau has clarified several issues regarding Amateur Service implementation of the Commission Registration

System--or CORES. The ARRL Letter says that starting December 3, everyone doing business with the FCC--including amateur licensees--must obtain and use a 10-digit FCC Registration Number when filing.

Amateur licensees now registered in the Universal Licensing System or U-L-S already have been cross-registered in CORES and issued a FCC Registration Number by mail. The FCC said it planned another cross-registration by November 28th. Amateurs can check to see if they have an FCC Registration Number via a U-L-S license search. Many Internet call sign servers, including ARRL's, also can provide this information. (ARRL)

**

RESCUE RADIO: JUNGLE RESCUE ASSIST

Ham radio played a role in reuniting with his family a man who had been hiding in the jungles of Guatemala for over three decades. The C-Q Magazine website reports that 72-year-old Salomon Vides of El Salvador emerged from the Guatemalan jungle recently after hiding there for 32 years from a war that lasted about 100 hours.

In 1969, El Salvador invaded Honduras and Vides, a migrant worker, ran into the jungle to escape retaliatory raids. The Organization of American States quickly brought the war to an end, but Vides says he never got the word. He was discovered in August by Rene Sonabo, a taxi driver and Guatemalan ham radio operator, and Sonabo’s son. After persuading Vides that no one was trying to kill him, Sonabo used his amateur station to relay the news to Vides’s stunned family in El Salvador. He has since been reunited with his brother, but the family had not been able to locate his wife and three children. (CQ)

**

THE LAW: THE COST OF ATTACHING TO POLES

The United States Supreme Court is examining a complex Internet case that could eventually affect the availability of online services and what most people pay for them. The court is expected to rule by next summer on a fight over the cost of establishing and maintaining some Internet and wireless networks.

Specifically, the fight concerns the rent that cable television companies must pay utilities to attach wires for high-speed Internet service to the utilities' poles, and whether the Federal Communications Commission can control the rate. The justices also will consider whether cellular telephone companies are entitled to pay government-limited rates for attaching their equipment to utility poles.

A federal appeals panel ruled last year that the FCC does not have the authority to regulate pole rental rates for Internet service. The FCC claims Congress intended it to have that power. The Supreme Court will decide. (Published News Reports)

**

REPEATER OWNERS ATTENTION: RADIO TOWERS FOR SALE

Are you a repeater owner or a club that operates a repeater? Have you ever dreamed of owning your own mountain-top or high rise repeater site? Well if you have, listen up.

In an e-mail to Amateur Radio Newsline, Tom Swierczewski, the Zoning Representative for American Tower Corporation says that the company has several hundred communications towers for sale throughout the United States. According to Swierczewski, sites vary in height from 100 to 400 feet tall and many include large buildings.

If you or anyone you know is interested in this or if you want to receive additional information on specific tower sites, please contact Swierczewski at American Tower Corporation. The information you need to do this is in the printed edition of this weeks Amateur Radio Newsline report. More information is in cyberspace at www.americantower.com.

(Contact information: 1101 Perimeter Drive, Suite 225, Schaumburg, Illinois 60173. His phone number is 847-240-1508 X 663 - Central US time. E-mail is thomas.swierczewski@americantower.com.) (Tom Swierczewski)

HAM RADIO BUSINESS: VK MAGAZINE BITES THE DUST

Another failure in the international ham radio marketplace. This, with the announcement that Australia's longest-running electronics magazine has ceased publication.

Victoria’s A-P-C News reports the current issue of Electronics Australia Today will be the last and it’s a decision saddens many V-K amateurs. This is because many generations grew up building equipment from circuits published in the magazine.

Electronics Australia Today traces its history back to Wireless Weekly, which started in 1922. Radio and Hobbies was formed out of Wireless Weekly in 1939. This was renamed Radio Television and Hobbies in the 1950s and Electronics Australia in 1965. (APC News)

HAMVENTION 2002 UPDATE: HAMVENTION TO HONOR THOSE WHO PERISHED ON SEPTEMBER 11, 2001

The Dayton Amateur Radio Association will honor the memory of those killed in the September 11th terrorist attacks and the hams who then volunteered their services to the nation by dedicating the 2002 Hamvention to the theme of Emergency Preparedness. In a letter to potential vendors, the Hamvention Planning Committee said that it was very concerned over the terror attacks and believes that emphasizing the emergency communications aspect of ham radio was a very apropos way to honor those lost in the tragedy.

The letter also contained another rather surprising announcement. The Hamvention planners say that they will limit the number of non-ham radio booths normally purchased by those in the computer industry. In fact, the letter makes it clear that the only computer related vendors permitted to the inside

display area will be those whose products directly relate to Amateur Radio.

This will be the 51st annual Hamvention. The venue remains the HARA Arena just North-West of downtown Dayton. The dates are May 17th, 18th and 19th, 2002. More information is on the web at www.hamvention.org (DARA)

RADIO MILESTONE: NRCDXAS AT #200

The National Radio Club's D-X Audio Service will have its 200th issue available this month. Founder and producer Fred Vobbe, W8HDU says he does not think that is a bad record for what he describes as a little audio based magazine talking about broadcast radio that was started in April 1985. We say, congratulations to Fred and to the National Radio Club's D-X Audio Service on this milestone. (W8HDU)

OUR HERITAGE: HELP RESTORE THE LST-325 RADIO ROOM

Bob Wilder, AF2HD, is part of the team that's restoring the LST-325 Radio Room and he needs your help. Bob says that most of the radio equipment needed for the restoration of the radio room has been found. Also, they have received a donation from a trucking company in the east who is going to pack and ship the stuff on that side of the country and transport it to Mobile Alabama where the work is taking place.

Unfortunately, some of the gear is on the West Coast. It took $190,000 to perform all the work needed to repair the ships hull, front door and ramp, as well as to sandblast and paint the ship. As a result, cash is short.

Bob says that what's needed now is to receive a donation by some west coast trucker or person who can help getting the equipment out there packed and shipped eastward. At least as far as Dallas where the East coasts trucker can move it to Mobile.

Wilder says that Fred Chapman, W4CHT is coordinating the move. If you can help -- or at least direct the group to a trucking company willing to make such a donation, please contact W4CHT by e-mail to nnn0ppe@infi.net . Bob Wilder can be e-mailed at bwild@earthlink.net (AF2HD)

HAM RADIO IN SPACE: HAM RADIO BALLOON LAUNCH DECEMBER 1ST

Arizona Near Space Research says that it will launch a ham radio carrying balloon on December 1st, weather permitting. The group had hoped to launch from a local hamfest but the urban location of the event is in enhanced Class B airspace which is currently off limits. Instead, a monitoring station will be at the hamfest event. Full information on the flight can be found on the Superstition Amateur Radio Club website. It's in cyberspace at www.qsl.net/wb7tjd. (Superstition Amateur Radio Club)

**

HAM RADIO IN SPACE: LOTS OF HAMS TALKING TO THE ISS

And while on the subject of Amateur Radio in space, hams world-wide are excited about being able to talk to the International Space Station fairly often these days. This is because Commander Frank Culbertson tries to get on the air for general Q-S-O's whenever he can. And he recently had one with Berto Willems, ON1CAU, who had his tape recorder rolling. Take a listen.

--
Audio Only - No Text Available (Download Newscast Real Audio File at www.arnewsline.org)

--

ON1CAU says that contact took place at about 15:25 UTC during the recent Scouts Jamboree on the Air. And obviously signals were 5 9 full quieting – both ways. (ON1CAU, AMSAT BBS)

SPACE EXPLORATION: 2001 A MARS ODYSSEY - A SUCCESS

NASA's 2001 Mars Odyssey spacecraft was safely inserted into orbit around the red planet on October 25 th. This, slighly over two years after the space agency suffered back-to-back failures by Mars missions.

Odyssey arrived nearly directly on its target - 480 miles above Mars' surface. No orbital insertion or areobraking problems were reported by ground controllers. 2001 - A Mars Odyssey is the space probe that hams had been invited to track when it was launched earlier this year. (NASA)

INTERNATIONAL: NZART STRAIGHT KEY NIGHT

The first ever Straight Key Night in Kiwi-Land is slated to be held on the evening of Sunday November 4th. Operation will be limited to 80 Meters from 8pm until 11pm local New Zealand time.

The event is sponsored by the New Zealand's Amateur Radio Transmitters which says to lubricate that old Morse key and enjoy an evening of old time radio fun. NZART it will be an activity night in which everyone can be a winner with a certificate to prove it. For more information visit www.nzart.org.nz on the world wide web. (NZART)

**

DX

In D-X, Gary Halstead, K8KFJ in West Virginia reports a top notch trans-Atlantic QSO on 6 meters. On October 23rd at about 13:50 U-T-C Gary contacted CN8LI in gridsquare IM64. The Q-S-O took place on 50.130 MHz with K8KFJ running 100 watts to a M2 loop at only 20 feet. Gary lives in grid EM98 in the Charleston West Va. area. (VHF Reflector)

Also, Reid Hill, KC5YKX of Corpus Christi Texas says by way of the VHF Reflector that he will be doing VHF - UHF Century Club QSL card checking at the South Texas Amateur Radio Club annual Hamfest on November 10th. Reid also says that Mark Mireles, AD5CA will be doing the Worked All States checking at the same event. The Hamfest will be held at Swanter Park in Corpus Christi. Festivities start at 8:00 AM and go to at least after lunch. Contact Reid by e-mail to kc5ykx@swbell.ne if you need card checking but can not attend this event. (VHF Reflector)

2806. Reducing RFI from lamp dimmers, how I did it.

Newsgroup: rec.radio.amateur.dx
Date: 2001-11-06 02:13:31 UTC
From: Robert Casey <wa2ise@ix.netcom.com>
Message-ID: <3BE7474B.AF3CCC55@ix.netcom.com>
Source record: 15561
Cross-posted to: rec.antiques.radio+phono,rec.radio.amateur.dx,rec.radio.amateur.homebrew,rec.radio.shortwave

No, I didn't throw the lamp away. What I found helps
a lot is a cap of around 0.2uF AC rated across the
powerline feed connected at the dimmer circuit. While
I was away, my mom bought a Chinese made floor
lamp with dimmer control. Very noisy. Well, she's
away for a few days so I took this lamp apart to
try to clean up the dimmer. With am AM radio tuned to
a weak station, I poked around the dimmer circuit.
Thus the above 0.2uF cap result. Also, the lamp
is made of metal, so to make this metal act as a
shield for the remaining RFI, I connected an AC
rated 0.01uF cap from the neutral to the metal.
(The dimmer circuit is completely in the hot side
of the line, the lamp has a polarized plug that
forces this to happen).

This may help for in the wall dimmers too. If
the house uses conduit or BX cable, that would
help act as a shield. Romex, don't know.

2807. DX stations that won't QSL

Newsgroup: rec.radio.amateur.dx
Date: 2001-11-06 02:24:16 UTC
From: Michael Brown <mbrown@qx.net>

I worked a station this morning in the Chec republic. I had a good qso with him, but after I told him I would get a card in the mail to him via the bureau, the guy acted like he really didn't want to qsl. This seemed kind of strange to me seeing as how he was calling CQ, and I answered his call. It would seem to me that if you are a DX station and you have your beam (?) pointed toward the U.S. that you would want to qsl with the stations that answers your call. The guy I talked to seeme like he really didn't wantr to fool with a card. Has anyone else run across this with DX stations, and I am missing something? Please send me an e-mail and let me know. Thanks!

You've got a lot of faith that every outlet you are using doesn't have the
hot/neutral mis-wired.

Good luck.

WARNING WILL ROBINSON !!! Save the trip- Rat Shack has absolutely
nothing even close to a .2 AC rated UL cap. In fact, you will have to
order them or go to a real electronics house in a place like Dayton OH.

I repeat:

you have an excessive amount of faith that every outlet you use is wired
correctly.

there is no way to guarantee that your 'UL approved non-lethal leakage'
capacitor is going to remain that way

good luck

Mike,

I have made the same experience with about more than 50% of US-HAM's
who don't want to exchange a QSL via the bureau. Very often I get the
information: Only via direct. That means for me: 3 US-Dollars for
postage
and return postage. Guess, what I am thinking and doing.

Good luck in QSL-ing!

I hope you do not refer to 'certified ' electricians.

In the UK I have never heard of such a suspicion.
BTW all wall sockets are earthed ,each plug has an earth pin ,each plug has
a fuse.
Moreover most if not all modern/new houses have switchboard magnetic
circuit breakers rather than wire fuses and those circuit breakers
associated with wall sockets and heavy duty circuits for cookers and
immersion heaters incorporate earth leak detection (set @ 30 mA)

I have zero faith they are wired correctly. I guess you don't have any
radios, TV's or other devices in your home with .01 bypass caps hooked
to any metal parts, eh ? I'd like clarification on how this idea is
different in any way from thousands of other appliances ?

I think the trouble developes when a "'certified" electrician from the UK comes to visit friends or relatives here in the US, helps them with a little wiring while here, and gets confused by the differences in our color coding schemes.

A good source for the part is PC power supplies, monitors, TV sets
and microwave ovens. Just make sure any capacitors are discharged
before poking around.

Frank;

My concern is this:

in the US, we have, at least in new construction, and in any which has been
updated, three-wire outlets

'hot' terminal, color coded brass or copper colored (black wire)
neutral', coded silver (white wire)
ground (what you refer to as 'earth'), coded green (green wire)

it is no trick at all for an inexperienced person to switch the wires going
to the 'hot' and 'neutral'

if this happens, any device using a 'neutral to chassis' (transformerless)
scheme will have its chassis hot in respect to true or earth ground.

in the US, your 'earth-leak detector' circuit breakers are called
'ground-fault-circuit-interrupters' (GFCI's) and may be either installed in
the breaker panel or incorporated into an outlet in the circuit; if the
latter is the case, all outlets 'downstream' from the GFI outlet will be
protected.

they work by comparing the current in the 'hot' and 'neutral' leads, any imbalance beyond a certain point will cause a shut-off of the circuit protected.

I'm not sure of the trip-point for our GFI's, but 30 mA sounds awfully high.

My concern with the original poster is this:

Given an improperly wired outlet;
and the possibility of excessive leakage through the capacitor he installed between 'neutral' and the metal part of the lamp, a potential shock (or worse) hazard exists.

Perhaps it is excessive caution on my part, but years of working around high-voltage, high-power broadcast equipment has made me err on the side of caution in these matters.

GCFI breakers inthe US are designed for a 5 ma differential current. But, that is only an approximate design objective and individual units could be higher, though not likely much lower.

I find no reason to connect a capacitor between the metal case of a device and "neutral."

Our National Electric Code requires that chassis and case be connected to the a-c safety ground - our Green wire. The NEC requires that all line-powered devices have their user-accessible metal parts be connected to safety ground.

In the "old days" such as in the 40's, transformerless AC/DC radios, for example, commonly had a "line capacitor" from the chassis to one side of the line. In those days of unpolarized plugs and no real standard for wiring or inspecting convenience outlets in the home, it was a crap shoot as to whether the chassis was being returned to the line or to neutral via the capacitor. Some designs also used a large resistor in parallel with the line cap. A loud hum in the radio, sometimes tunable, was the clue that the line cap had gone bad.

Funny the little things you remember 56 years later . . .

It's easy enough to check to make sure an outlet is wired correctly. You can
get a testing plug at hardware stores or Radio Shack.

"In God we trust. ALL others we verify!"

It is very easy to check the outlets.

I find more than half of the outlets I check are either reversed
polarity
or have an open ground.

1) I KNOW that every outlet in my home is wired correctly
2) I do not install 0.01 caps from what is allegedly 'neutral' to exposed
metal parts on my appliances.

does that clarify it enough for you?

Here's another way to test for proper polarity: take a small neon tester, stick one probe in the narrow slot of the receptacle, the other probe in the grounded "U" hole or center screw. The light should glow.

If the tester doesn't light, test between the wide slot and ground. If it lights now, the polarity is reversed. It it still doesn't light, the receptacle isn't grounded. Either way, the receptacle should be rewired.

QSLing has been a challange since the early days of amateur radio.
Not all stations QSL. At least this guy was up front about it. Lots of
stations say they'll QSL then just throw your card in the trash. Some
even suppliment their income with QSL's by requiring a 'green stamp'
or IRC then throwing your card in the trash. (one FR5 station comes to
mind, he likes to QSL just enough stations to keep the others trying).
I think about 60% returns is about average.

With JA qsl cards, I find that
there is a tendency for the JAs to qsl each qso, so it is not uncommon to
receive in the buro envelope multiple cards from some stations. I solve
this by replying with one card listing all the contacts that required
verification. Culturally, the JAs are quite diligent in qsl-ing !!

The lamp is a 2 wire with polarized plug. And the outlets in this
house are correctly wired (tested). And I found experimently
that connecting the metal case of the lamp and neutral reduced
the RFI. To avoid lethal shock hazard in case this lamp gets
used in another house which has miswired plugs, I used a 0.01uF
250VAC rated ceramic cap. 250VAC is equivalent to 1.4KVDC
(why that high: transient spikes on the powerline). Look at a
PC switching supply and you'll usually find 0.01 or similar
sized caps from both sides of the line to the case ground. Also
true of most VGA monitors.

If such radios are packaged properly, ie, no exposed metal
parts (including mounting screws) and captive knobs, it's
not a problem.

Maybe not, but you can mail-order out of the stack of catalogs they
have on hand from industrial component suppliers. As an example, I
can go into the local RS store and order just about any tube you can
think of out of their various catalogs.

For many orders, they'll pick up the shipping charges.

I have myself dozens of radios and appliances that come from the factory with such caps, however. Such as every Philco I have, for example. Not that i am even recommending doing this to lamps dimmers- I just avoid using them as possible.

I believe if I am wanting to make a contact I must be willing to QSL but
many do not think this way.Some have an understandable "been there, done
that" attitude and I need to let them enjoy the hobby as they wish but I
will always answer all QSLs.It's not just the DX stations.

I know what you mean. I just sent 7 lbs of QSLs to the buro (all TNX
QSL). About 2 lbs were JA and 3 lbs DL. At the current ARRL rate that
was $56 to them, plus about $4 postage, cost of QSLs, labels, etc. All
that from about 1 year's worth of contesting!
I still do it though...

Absolutely! Why, seductive bass becomes aggressive in presence...<G>

I find it interesting that the thread has ventured into GFCI outlets
as well, since I get ugly RFI from THEM too.

Latest source of quite strong RFI, and never before picked up by
another set than the one I had open last night: a rechargeable
toothbrush, on 75 meters.

if you take out the removeable brush part, does it go to a higher frequency?

If I expected a card back from you, I would send you an SASE. I would never expect you to make the first move.

I have on occasion originated a card when I didn't expect one back, such as several times when I was the first QSO for a new ham. I then send my card along with a note welcoming them to the fold. I figure that they don't have any cards, but they would like to have mine, so they get one.

Reducing RFI from lamp dimmers.

Buy a lamp dimmer from the last 2 decades and replace the one you have from the 60s.

Any good quality dimmer like those from Lutron will be shielded and do not cause RFI to AM or shortwave radios. If yours does, it is old and probably the kind that you turn with a round knob. Time to get a new one, they don't cost very much.

Yeah, but why buy from Radio Shack when there are so many starving
restoration specialists out here? I sell tubes, so does Bill Turner, and
probably a dozen others on this site.

We appreciate your business more. Even Bill!

And, our prices are usually better, even with shipping.

During the recent contest madness, I worked four stations that I cannot find in any callsign lookup. These
are: ZY5G L80AA VB2B 4O3A (that is a letter O in the last one).

My ears are not as young as they were a few years ago and I may have got them wrong. Does anyone have suggestions
for any of these?

That's where I get my parts. At work I'd scrounge the dead
VGA monitors out of the trash bin, remove the circuit board
and re-throw out the cabinet and CRT. Lots of high voltage
parts.

Those RF by-pass capacitors (preferably ceramic type) should be rated
well above the AC line voltage. I use 1-KV. This gives some insurance
against shorting out. I don't think you can buy such caps' at Radio
Shack.

Hello Bill,
Your ears are still ok! All mentioned calls are results of the trend to
use calls as short as possible during a contest activity to gain time
for QSO's.
All cards should be possible via bureaus:
ZY5G: Brasil Contest Call
L80AA: Argentina
VB2B: Canada
4O3A: Yugoslavia

Do not surprised if you hear G6G or M5A next time. UK is actual the
leader in the competition of the shortest contest call, but Italy,
France, Russia, U.S. or China can follow soon.

Best DX, and keep your ears running well for the next contest!

Arno - DL1CW

> around high-voltage, high-power broadcast equipment has made me err
> on the side of caution in these matters.

Well, when you're dealing with kilovolts at amps, I can understand that level of caution. Here, however, we are dealing with a lamp which at most, if miswired, has 120VAC (US standard, Frank) on the chassis if the chassis is ``grounded'' to the ``neutral'' lead.

I've been hit by a badly grounded institutional refrigerator before, as well as hit by a hot wire I didn't know was hot. It's not bad. Believe me---if he has a miswired outlet, he'll know it the first time he touches the lamp. Getting shocked by 120VAC isn't that nasty. Of course, there are always exceptions, however I would tend to believe that a low-current line-power shock wouldn't tend to be lethal.

In any case, however: Test that outlet! Better to be safe than sorry.

Good Luck,

Henry C. Gernhardt, III

Source record: 15512

Any US station expecting a card from another US station should
include an SASE, or at least enough postage for a postcard and
a return address label.

Although I do QSL 100%, I know many hams just trash cards that
don't include an SASE. This is paticularly true of contest stations.
After a contest operation (like SSCW this weekend) I'll get a lot
of cards without return postage. The cost of QSLing is bad enough
but having to fill out all those return addresses is a real pain.

DX is easier, if there's no SASE it goes to the bureau.

You can be sure that any contact I need a card for will get an
SASE from me.
--
Steve

BTW: One of my big complaints about stateside QSL's is the way
the cards are sometimes designed. Many cards have the
name and address spread all over the card. (name at the
top, street on one side, state on the other, etc). These cards
may look cute to the owner but they are a royal pain to QSL
from. If you have a low return rate, have a look at your cards.
How much trouble is it to read the address?

Much like the radio collector who told his wife if she ever saw
him being shocked not to grab him but get something like a board
and knock him loose from the voltage source. One day she came into
the kitchen and saw him standing next to the cabinet with his back
to her and he was shaking violently. She noticed a cord running
from him to the cabinet. She immediately rushed to the back door
where she found a length of 2X4, picking it up she rushed back and
swung with all her might, knocking him across the kitchen,
breaking his arm and two ribs. Up to that point he was happily
listening to his favorite song on his walkman.

Most all of the new dimmers are RFI suppressed, including the
Lutrons. The problem is less that they radiate RFI, but that they
still put switching transients on the mains, which is where most of
the noise getting into vintage sets comes from.

To cure this requires two things: Chokes on the mains to suppress
the transients, and caps to bypass the noise.

This is true of new dimmers, including the Lutrons.

Not at all. Not even the SLIGHTEST noise difference on AM or SW when turning the lights on or off, or dimming them in-between with the RF shielded Lutron dimmers. ...now when I try to use one of my x-10 dimmers, then you can't listen to the radio at all, not even in another room.

I'm not sure what you're listening to, but I did refer to vintage
sets. I'll send you an MP3 of my Lutron dimmers through my Grundig
Majestic. Outdoor antenna, shielded transmission line...all the
noise is coming in through the mains.

2864. reciever inop

Newsgroup: rec.radio.amateur.dx

I know this newsgroup is mainly geared for Ham radio, but I have problem that maybe someone can direct me to where to find help.

I have a Boom box with the AM reciever not working. I don't hear anything but a few pops when I tune the dial. I can tune to FM, but not AM. I can hear the faint hiss but thats all I hear.

Any suggestions or directions would be appreciated.

2865. Re: DX stations that won't QSL

Newsgroup: rec.radio.amateur.dx

AB7RS,

I am one that as you say; does not think this way. I do not feel that each contact mandates a QSL. It's the radio technology and not the postage chase that interest me. I will QSL 100% if I get an SASE, SAE w/IRC or SAE w/$. Otherwise I don't bother. If you contest or have a large number of QSO's a year (19000 from 11/97 alone according to DX4Win log for me) then the cost to print, ARRL processing fee, and mailing to the ARRL even becomes significant plus all the dupe QSLs from stations worked more than once yet QSL's each contact. Since I am not interested in collecting more common QSL's, I'm not receptive to bearing the ARRL postage and processing fee cost for you to confirm your contact... ain't gonna happen.

When I want a card I SASE and don't expect the other guy to pay ARRL processing fees or postage for confirming the contact.

I expect with the recent postal anthrax scares and no doubt increasing postage coming that QSL'ing will continue to decline. In the near future a centralized electronic log system suits me fine and if you want a hard copy, send an SASE.

Just another opinion.

KL7J - Les,

you made about 19,000 QSO's, mostly in contest, that's fine!
In the same time frame I made about 10,000 QSO's (says DX4WIN)
with the rare mult "DL" :-) .. and I am QSL-ing each received
bureau-card, when the QSO is in the log.

Just a few questions:

1. Do you believe, everyone who is calling you in a contest,
is a contester and need KL7 for a mult only? Or do you believe,
that many stations are not contesters, but are calling you,
because they want to give their points to you and want to get
KL7 confirmed?
2. Do you believe, every DX (i.e. DL) is willing to pay US-$ 3,-
for postage & return-postage just to receive your card in
response?

Yes, I know the fees of the ARRL! Other Amateurradio-Clubs in this
World don't ask for a fee!

Hi Waldemar,
I looked into that option. 2lbs. to DL is $15.50. 3 lbs. package to DL
would cost $17.50 postage. (There used to be a special cheap rate for
"small packets" but they don't have that any more). So, a bit cheaper
than ARRL rate, but then I need to find another box, packing material,
etc. I felt it wasn't worth the trouble. Maybe next time... Or, maybe
now, every DL has my card, and I won't get any more :.)

Hmmm ... are you sure? ;-) ;-) There are about 35000 German hams who may use shortwave, give or take a few thousand, not counting those of other classes who might contact you via satellite ... all of them potential "candidates" for a QSL card from you ... among them the writer of these lines who is sure he hasn't got yet one, I've only worked about 10 U.S. stations up to now ;-)

Let's take the 35000 class 1 operators alone - then with about 15 cards per ounce, that's about 66 kg (over 10 stone) of paper. Poor mailman ;-)

On a more serious note, perhaps we radio amateurs should lobby the UPU or first our national postal administrations to introduce a special reduced rate for QSL cards - how about this? But I don't know how this works. I have only read that some C.I.S. country (was it the Ukraine) has/had free postage for at least some kind of letters with QSL cards ...

Hi Jan,
Just out of curiousity, I checked to see how many QSOs I've confirmed
with DL since I started computer logging (1991). DX4WIN tells me it's
4012! So only 31000 to go :.)

> KE4PIB

Ouch! There is nothing low-current or non-dangerous about 120-volt AC line voltage.

The severity of electrical shock depends on the current flowing through the victim, the current path, and sometimes on the frequency, if the current is AC.

Assuming you have a current path that involves some vital organ(s), such as the heart or lungs, 10mA is very dangerous, and many medical texts simply say that currents of 25 mA "are lethal".

A current path through or across the chest is about the worst, which is the source of the old electrician's maxim, "Keep one hand in a pocket."

AC power can also have the effect of fibrillating the heartbeat, and 60Hz is a frequency right in the "most effective" range.

Because electrocution is caused by current, anecdotes cut both ways, as human skin resistance can vary by three orders of magnitude. I certainly know someone who put 800 VDC between two dry hands, and got nothing more than a wake-up jolt; yet an old book on telegraphy asserts that one unlucky man was killed by a 22.5 volt DC battery bank.

Sorry to sound like a scold, but any representation that line power isn't lethal stuff is more than nonsense, its DANGEROUS nonsense.

Robert Wieland, who used to be in charge of Electrical Safety for the College of Engineering, University of Delaware.

P.S. Putting something across a solid-state dimmer to reduce the generation of RF interference is old stuff, in the 1970s, every dimmer & "speed control" schematic had a series combination of a resistor & a ceramic capacitor, which was called the "snubber network". Sounds like low-bidder equipment is now leaving that out.

There really is no way to keep an SCR from making chop (not RFI as other intelligent life forms have illuminated, though it is line-current interference). Whether the chop affects one radio and not another is up for grabs and is the real world. For my shop area, I ended up filtering its whole branch ckt with a 20 amp L-C network on both legs. I found the filter dirt cheap from a reseller, and I wish I'd gotten a dozen & put one on every branch, to isolate it from the line-current interferences originating on other branches.

The idea is great when applied at a corded appliance. Where things fall apart is where folks start assuming they can safely modify a wall-mounted light dimmer without affecting its safety rating. Heck, an extension cord my be UL approved, but does that mean it can be used in place of romex for in the wall wiring?

Also, big difference for UL caps for line bypass and ACROSS the line ratings.

So, you don't replace wax caps with 200 or 400 VDC ratings when used in early radios between the chassis and AC line? UL approved caps are made for that purpose.

Many early SW receivers, such as Hallicrafter S38 used a wax paper isolation cap between the 'hot' chassis and metal cabinet... 50/50 shot on the line cord polarity, and worse odds on the leakage currents in a 50 year old under-rated wax beauty.

DK3VN - Walt

Regarding your items;

1). Although I don't contest other that USA Sweepstakes, I realize some in a contest scenario would like a card. If you want to search for KL7's that use bureau and contact them, we know you are free to do so otherwise directs works.

2). You always have the option of paying the direct postage or finding another station. A better option is soon coming I hope, secure electronic logs kept somewhere accessible to the public and ARRL. Interesting you note the ARRL and the fees they charge for processing which is true, yet you seem to expect me to incur costs for you to paper confirm a 20 second contact that is a priority to you but not important paper to me.

Interestingly with the ARRL in the past, when I stamped a card Not in Log, the bureau returned it to me instead of forwarding it on. Direct would notify one of a "Not in Log" status quickly instead of waiting years and wondering.

To some the QSL or many QSL's from the same station is important, to others it is unimportant wallpaper or somewhere in-between. It seems if there is a very high priority for the card, go direct. If not, try the bureau and after a year if no answer then go direct. There is room for all views and we each enjoy the hobby in different ways. It's interesting, albeit I doubt anything is going to change until centralized secure electronic logs.

2883. Guide to the rec.radio Newsgroups

Newsgroup: rec.radio.amateur.dx
Date: 2001-11-09 06:16:29 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <9sfsbtpnk1@news.hawaii.edu>
Source record: 15538
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.digital.misc

Archive-name: radio/personal-intro

This message describes the rec.radio.amateur.*, rec.radio.cb, rec.radio.info, and rec.radio.swap newsgroups, as well as their Internet mailing list counterparts and complements. It is intended to serve as a guide for the new reader on what to find where. Questions and comments may be directed to Jeffrey Herman, KH6O, jeffreyh@hawaii.edu, or Paul Schleck, K3FU, pschleck@novia.net.

This message was last changed on 14 March, 1998.

History
=======

Way back when, before there was a Usenet, the Internet hosted a mailing list for hams, called (appropriately enough) INFO-HAMS. Ham radio discussions were held on the mailing list, and sent to the mailboxes of those who had signed up for it. When the Usenet software was created, and net news as we now know it was developed, a newsgroup was created for hams: net.ham-radio. The mailing list and the newsgroup were gatewayed together, eventually.

Over the years, as the net grew, the volume of discussion became progressively higher. First one by one, and then as part of two reorganizations, what was once one group became many. In the process, developments elsewhere on the net were reflected in the groups as they were created, most notably the change to place all of the ham radio groups in one hierarchy.

The collection of newsgroups continues to grow as more people join the net, and as more topics of discussion gain volume, I expect to see more groups be created as well. This follows what is happening on the rest of the net.

Nearly all of the radio newsgroups have corresponding mailing lists, the notable exception being rec.radio.swap. There are also a few mailing lists that don't have newsgroups.

The Current Groups
==================

It's important to post messages to the group that's appropriate for them, and not to the groups that aren't. The whole idea of having different newsgroups is so that folks who aren't interested in, say, homebrewing, don't have to wade through messages about homebrewing on the way to read about Field Day. Posting appropriately is just good etiquette.

The rec.radio.amateur.misc group is the catchall. It is what rec.ham-radio was renamed to during the first major reorganization. Any amateur radio-related message that's not more appropriate in one of the other groups belongs here, from contesting to DX to ragchewing on VHF to information on becoming a ham.

The group rec.radio.amateur.digital.misc is for discussions related to (surprise!) digital amateur radio. This doesn't have to be the common two-meter AX.25 variety of packet radio, either; some of the most knowledgeable folks in radio digital communications can be found here, and anything in the general area is welcome. The name was changed to emphasize this, and to encourage discussion not only of other text-based digital modes, such as AMTOR, RTTY, and Clover, but things like digital voice and video as well. The former group, rec.radio.amateur.packet, was removed on September 21st, 1993. It is obsolete, and you should use .digital.misc instead (or the appropriate new mailing list, mentioned below). The group has .misc as part of the name to allow further specialization if the users wish it, such as .digital.tcp-ip.

The swap group is rec.radio.swap. This recognizes a fact that became evident shortly after the original group was formed: Hams don't just swap ham radio gear, and other folks besides hams swap ham equipment. If you have radio equipment, or test gear, or computer stuff that hams would be interested in, here's the place. Equipment wanted postings belong here too. Discussions about the equipment generally don't; if you wish to discuss a particular posting with the buyer, email is a much better way to do it, and the other groups, especially .equipment and .homebrew, are the place for public discussions. There is now a regular posting with information on how to go about buying and selling items in rec.radio.swap; please refer to it before you post there. To answer a frequently asked question: No, there is no mailing list that goes along with this group. If you can't read Usenet news directly, you're out of luck.

The group rec.radio.amateur.policy was created as a place for all the discussions that seem to drag on interminably about the many rules, regulations, legalities, and policies that surround amateur radio, both existing and proposed. Recent changes to the Amateur Radio Rules (FCC Part 97) have finally laid to rest the Great Usenet Pizza Autopatch Debate - it's now legal to order a pizza on the autopatch, if you're not in the pizza business - as well as complaints about now-preempted local scanner laws hostile to amateurs, but plenty of discussion about what a bunch of rotten no-goodniks the local frequency coordinating body is, as well as the neverending no-code debate, may still be found here.

The group rec.radio.cb is the place for all discussion about the Citizens' Band radio service. Such discussions have been very inflammatory in rec.ham-radio in the past; please do not cross-post to both rec.radio.cb and rec.radio.amateur.* unless the topic is genuinely of interest to both hams and CBers - and very few topics are.

The rec.radio.info group is just what its name implies: it's the place where informational messages from across rec.radio.* may be found, regardless of where else they're posted. As of this writing, information

posted to the group includes Cary Oler's daily solar progagation bulletins, ARRL bulletins, the Frequently Asked Questions files for the various groups, and radio modification instructions. This group is moderated, so you cannot post to it directly; if you try, even if your message is crossposted to one of the other groups, your message will be mailed to the moderator, who is currently David Dodell, WB7TPY. The email address for submissions to the group is rec.radio.info-moderator@primenet.com. Inquires and other adminis- trivia should be directed to rec.radio.info-request@primenet.com. For more information about rec.radio.info, consult the introduction and posting guidelines that are regularly posted to that newsgroup.

The groups r.r.amateur.antenna, .boatanchors, .dx, .equipment, .homebrew, and .space are for more specialized areas of ham radio: discussions about antennas, the older tube based amateur, military, and commercial gear, commercially-made equipment, homebrewing, and amateur radio space operations. The .equipment group is NOT the place for buying or selling equipment; that's what rec.radio.swap is for. Similarly, the .space group is specifically about amateur radio in space, such as the OSCAR program and SAREX, the Shuttle Amateur Radio EXperiment; other groups cover other aspects of satellites and space. Homebrewing isn't about making your own alcoholic beverages at home (that's rec.crafts.brewing), but rather construction of radio and electronic equipment by the amateur experimenter. The .dx group is devoted to long distance amateur communications. Each of these subgroups has its own charter and FAQ; please refer to the archives to find these documents.

Except for rec.radio.swap and rec.radio.cb, all of these newsgroups are available by Internet electronic mail in digest format; send a mail message containing "help" on a line by itself to listserv@ucsd.edu for instructions on how to use the mail server.

All of the groups can be posted to by electronic mail, though, by using a gateway at the University of Texas at Austin. To post a message this way, change the name of the group you wish to post to by replacing all of the '.'s with '-'s - for example, rec.radio.swap becomes rec-radio-swap - and send to that name@cs.utexas.edu (rec-radio-swap@cs.utexas.edu, for example). You may crosspost by including multiple addresses as Cc: entries (but see below). This gateway's continued availability is at the pleasure of the admins at UT-Austin, and is subject to going away at any time - and especially if forgeries and other net.abuses become a problem. You have been warned.

Mailing Lists
==========

In addition to the mailing lists that mirror the Usenet newsgroups, there also are a few that stand alone. These cover specific areas of ham radio, and discussion is focused on just those areas. PLEASE BE SURE TO SAVE THE WELCOME MESSAGE YOU RECEIVE AFTER SUBSCRIBING -- IT WILL CONTAIN IMPORTANT INFO REGARDING UNSUBSCRIBING!

The cq-contest mailing list is for discussions of contesting in ham radio. To join, send an email to cq-contesting-request@contesting.com.

The DX mailing list covers the finer points of DXing. This one is also joined by mailing "subscribe" on a line by itself, this time to dx-request@unbc.edu.

There's also a VHF mailing list, for VHF operators of the weak signal persuasion. You can join this one be sending "subscribe vhf" on a line by itself to vhf-request@w6yx.stanford.edu.

The QRP-L list is devoted to building and operating gear at low-power outputs. To subscribe, send an email to listproc@lehigh.edu and only write: subscribe qrp-l Your Name.

The TopBand e-list is devoted to all areas of operation on 160m. To subscribe, send an email to majordomo@contesting.com and only write: subscribe topband and follow the instructions you'll be sent. This site, contesting.com, also hosts a couple dozen other ham-related e-lists. Use the above address, and only write: lists to get the entire index.

The Boatanchors e-list is devoted to the older tube-based ham, military, and commercial communications gear. To subscribe, send an email to: listserv@listserv.tempe.gov and only write: subscribe boatanchors

For homebuilding transmitters and receivers using tube technology, there is the Glowbugs e-list; send an email to: majordomo@piobaire.mines.uidaho.edu and only write: subscribe glowbugs <your@address.here>

The VHF DX discussion list can be accessed by sending an email to: majordomo@blacksheep.org and only writing: subscribe VHF-DX-discuss.

We now have a list devoted to amateur radio history. To subscribe, send an email to: ham-radio-history-subscribe@egroups.com - leave the body of the message blank.

Qth.net hosts over 100 ham-related e-lists, including lists devoted to each state, manufacturer, mode, band - too many to state here. Send an email to majordomo@qth.net and only write: lists to get the complete index.

For one of the most complete indexes of email lists, see the excellent web site http://pw2.netcom.com/~ac6v/pageae.html

Please do NOT send subscription requests to the mailing lists themselves; that doesn't work very often, and is very annoying to those on the list. Also, please keep your electronic mail address current with any mailing lists you subscribe to, as dealing with returned email is a nuisance for the person maintaining the mailing list.

A Few Words on Crossposting
==========

Please do not crosspost messages to two or more groups unless there is genuine interest in both groups in the topic being discussed, and when you do, please include a header line of the form "Followup-To: group.name" in your article's headers (before the first blank line). This will cause followups to your article to go to the group listed in the Followup-To: line. If you wish to have replies to go to you by email, rather than be posted, use the word "poster" instead of the name of a group. Such a line appears in the headers of this article.

One of the few examples of productive cross-posting is with the rec.radio.info newsgroup. To provide a filtered presentation of information articles, while still maintaining visibility in their home newsgroups, the moderator strongly encourages cross-posting. All information articles should be submitted to the rec.radio.info moderator so that he may simultaneously cross-post your information to the appropriate newsgroups. Most newsreaders will only present the article once, and network bandwidth is conserved since only one article is propagated. If you make regular informational postings, and have made arrangements with the moderator to post directly to the group, please cross-post as appropriate.

Yeah, we all read that and were told that BS in school, yet as many times as I have gotten shocked by so much more, and zapped from the 120 ac line throughout my long life, I laugh at that. People get struck by lighting and survive, so fear not your electrical outlet.

> AC power can also have the effect of fibrillating the heartbeat, and 60Hz

You sound just like Thomas Edison who said the same thing about Tesla's 60 Hz AC system and would go around finding lost dogs and cats and would electrocute them to death trying to scare people from Tesla's 60 Hz AC system and stay with Edison's DC system of supplying homes with power.

Telsa would play with AC and high voltage devices all his life, said they were healthy, and lived to a very old age dying in his sleep, not of any cancer.

> than a wake-up jolt; yet an old book on telegraphy asserts that one

Do you know how many AMPS you can get from a car battery? Ever try grabbing one hand on each post of a car battery to see what happens? Absolutely nothing.

> Sorry to sound like a scold, but any representation that line power isn't
> lethal stuff is more than nonsense, its DANGEROUS nonsense.

I'll agree with that! What ever adjective you want to put in front of it is fine.

No, the point was all the old dimmers cause noise, but not any of the good quality new ones. There were no quality shielded old ones put into homes at the time of construction.

But yes, you can still find cheap $3 dimmers today that are not RF shielded and cause just as much noise as the one your are replacing.

> my long life, I laugh at that.

He keeps talking about the current, you keep harping about the voltage - if we're talking about the lethal amount of electricity, voltage has got nothing to do with it and your statements are non sequitur. The fact that you got zapped from 120VAC and I got zapped by 220 and 120VAC many times is completely irrelevant - in both of these cases the amount of current flowing through our hearts was not sufficient enough to defibrillate it. That kind of folklore, however, does not justify irresponsible handling of dangerous voltages. And yes, it is voltages in this case, since the current through our bodies pretty much follows the Ohm's law. The problem is that it is impossible to say "don't handle sources that will pump over 25mA through your heart" since that current depends on a variety of factors, from the person's weight, fluid intake, perspiration, to the voltage, frequency, path of the current, ground insulation, length of exposure, etc.
The bottom line is that the household voltage, either 120V or 220V is unsafe because it can be lethal under many circumstances. The fact that you survived touching it does not make it any more safe than the fact that many people survived playing Russian roulette.

> People get struck by lighting and survive, so
> fear not your electrical outlet.

This is such a nonsense that it almost doesn't deserve commenting. First of all, nobody survives after being "struck by lightning". One may survive an indirect hit a few dozen feet away or so, but being hit with a direct hit from the source of hundreds of million Volts kills a person flat out, not by defibrillating the heart (as the 120V would likely do), but by instantly cooking the vital organs, including the brain. According to this logic, we can safely stand in the bathtub full of water and grab the hot wire in the nearest electrical socket. After all, it is much less than a lightning.

This is a strawman argument. Edison may have done that (while conveniently forgetting the fact that the same amount of DC kills just as efficiently as AC), but it's got nothing to do with the biological and medical facts.

> Telsa would play with AC and high voltage devices all his life, said they were
> healthy, and lived to a very old age dying in his sleep, not of any cancer.

And this is the argument from authority. Tesla said AC was healthy - it must be healthy!!! Not to mention that again you built up a nice non sequitur strawman - nobody mentioned cancer to begin with.

> > than a wake-up jolt; yet an old book on telegraphy asserts that one

> nothing.

First of all, no one claimed that the car battery would kill you. Second, the ampacity of the car battery is irrelevant. Third, the fact is that under the right conditions (admittedly, very bizarre and extremely rare conditions) 22.5V *can* be hazardous. It is considered, however, that voltages under 50V are safe to handle.

Sorry to sound like a scold, but any representation that line power isn't lethal stuff is more than nonsense, its DANGEROUS nonsense.

I'll agree with that! What ever adjective you want to put in front of it is
fine.

++++++++++++

Just for info : At least in the UK and probably other countries as well , in industry , isolation transformers 230 ---> 110 V are used for portable tools ,with the secondary winding having an earthed (US terminology : grounded) centre tap.
This means that in case of equipment or cable failure the max voltage to earth (ground) is 55 V, which is considered SAFE ,eg does not constitute a risk of electrocution.

Your knowledge of simple electronics is quite amazing. Never has one
person provided such a compilation of mis-information and
mis-understanding.

You can't get any AMPS from a battery unless there is a finite resistance.

Current through a body is determined by the resistance of the path. If you have a 12 volt potential and tests show that .025 Amp can kill, then R=12/.025 or 480 ohms. Less resistence = MORE current = More certain injury. For 110 VAC, 110/.025 = 440 Ohms. This resistance is quite possible for a path through the human body.

If you need further proof, I suggest you connect one side of a 110 V line to a bucket of water, Stand in the bucket and grab the other lead of the 110 source with your hand. Film at eleven (Darwin awards) Services on Saturday.

Marital problems? Toss your wife's hair dryed into her bathtub whilst she in basking therein. OOOPS. I didn't know the thing was loaded.

I don't think that old trick works anymore, for years hair dryers have
come with a built in GFI at the plug end of the cord.

That is true. The reason people survive is generally their skin has
high resistance but the internal organs do not. So for someone to
take a lethal shock they have to have conductive skin at the entry
and exit paths.

Wrong.

People survive lightning strikes -- direct lightning strikes -- all
the time. Being in the Front Range of the Rockies, climbers get hit
all the time. Some die. Many do not. Those that don't get truly
memorable burns. Those that do die die because of the heart
fibrillation, not "instant cooking of the vital organs." The actual
amount of energy in a lightning strike is relatively low -- it is
just delivered over a very short period of time.

Having had these arguments before I can give you direct citations
if you are willing to listen to an opinion other than your own.

Wrong again. The higher the frequency, the more lethal
the current is. I don't know why. Do you have a ham license?
Do you remember anything about the RF safety/RF burn issue?

That's not to say that DC is safer -- it's just dangerous in
different ways. Breaking a DC short circuit is harder than
breaking an ac short because there's no zero-crossing to make
a nice interruption of the arc.

Agreed. Non-sequitur. "My great grampa lived to 133 and smoked 5
packs a day, therefore cigarettes are healthy." Not hardly.

> > nothing.

But if he got a low resistance path through the chest it could
possibly be lethal. Some people have more conductive skin than
others. I can get a nasty shock from 24 volts. An electrician
I knew as a child had exceedingly dry skin -- he tested 120 volt
circuits by licking his fingers and putting them across the circuit.
240 volt circuits didn't require licking his fingers.

If you want to see a low resitance path across a battery and
see how much current it can deliver, drop a wrench across a car
battery. Hint: Wear safety gear and a rubber lab coat, and
be prepared for splattering acid.

I think he's agreeing with the use of the word "nonsense" and a
deliberate misparsing of the sentence.

Me, I think you guys both are off the deep end a little here.

The original guy was talking about tying a 0.01 uF AC cap from
the neutral to the lamp frame. Failure of that cap, combined with
a miswired house, would cause a potential safety hazard. Yet that
cap arrangement is done all the time. Take your Sony TV. Disconnect
it from the cable system, the satellite, the stereo/AV system --
isolate it. Now measure the voltage from the cable/antenna
shield (on the F connector) to ground. Surprised? That's 'cause
they have two caps, one to each side of the line, just as described
above. Yet UL approves. (I wonder if that arrangement is also
there on CE approved versions.) I know this because I am so
sick and tired of ground-loop-induced hum in my A/V system
because of this. I have to ground the shit out of everything
to get rid of it. At my old apartment the cable system wasn't
properly grounded -- big surprise -- and I had to use an
RF isolation transformer to get rid of the problems caused by
the cable system floating well above ground.

Oh, please... Have you ever seen a tree split in half by lightning? How about fulgurites (glass tubes) on a sandy beach produced by lightning strikes melting sand at about 12,000 degree Fahrenheit? Those effects cannot be made by a source of "relatively low" energy. Whoever was hit by a lightning and survived, most likely was hit by a stray weak(er) streak from the main path of the lightning. An average lightning releases about 250 kWh (that's kilowatt hours) of energy. The fact that the event is brief (a few ms) can be used in a simple mathematical calculation which will show that the amount of *power* released in those few milliseconds is enormous. The current flowing through the lightning bolts is in the order of tens of thousands of Amperes and the temperatures within the main bolt can reach over 50,000 degrees Fahrenheit!
No one survives a direct hit by lightning! If a lightning bolt hits you directly, your body will be cooked instantly. You *may* have a chance if you are hit with a streak from the main bolt (by far the most common case) and that streak happens to be relatively weak.

> Having had these arguments before I can give you direct citations
> if you are willing to listen to an opinion other than your own.

Please do. Testimonials will not count, btw, only scientific observations and data.

> the current is.

Are you kidding me? You might want to look up "skin effect" and other phenomena.

> I don't know why. Do you have a ham license?

What's that got to do with anything? And yes, I do - a simple scrolling down to the bottom would have revealed it.

> Do you remember anything about the RF safety/RF burn issue?

RF burn is a completely different effect. You can have much more current flowing through your body in RF frequencies than the 50/60Hz current, yet nothing would happen except a varying degree of skin burn. Due to the skin effect, almost no electrical current flows through the body, but only through the skin. The skin effect is proportional to the frequency. Therefore, the statement that "The higher the frequency, the more lethal the current is" is clearly nonsense. That is not a license to handle high frequency sources like candy, but simply to be aware what the hazards are in what particular situation.

> That's not to say that DC is safer -- it's just dangerous in
> different ways.

There is no much difference between the DC and 50/60Hz, except for the biological fact about the heart valve palpitation timing which is fairly close to the household voltage cycle.

> Breaking a DC short circuit is harder than
> breaking an ac short because there's no zero-crossing to make
> a nice interruption of the arc.

Fine, but what has this got to do with what we're discussing.

> Me, I think you guys both are off the deep end a little here.
> The original guy was talking about tying a 0.01 uF AC cap from
> the neutral to the lamp frame. Failure of that cap....[snip]

I was purposely not addressing the issue of this method. I simply wanted to point out the fallacies of the unfounded, illogical, circular and backward reasoning, which in this case might make a difference between someone's life and death. But if you can show me in what point I was off the deep end, I'd be much obliged.

Over 200. The only reason you can grab the terminals with bare hands and not have a problem is the voltage is to low to overcome skin resistance. Go for a swim, get out and grab that same battery while you are still wet. We will wait a couple of days to give you time to complete the experiment. When you do, come back and tell us what you learned (if you can). I once built an arc welder that ran off batteries. One jeep battery (24 volt) or two car batteries and you could weld 1/8 inch steel quite well.

This must not be very common practice. I am a woodworker and correspond with lots of UK woodworkers. Something that comes up all the time is voltage of tools. Many have expressed a desire to buy tools while visiting the US (because they are substantially less expensive here) but have the concern over the voltage difference. If what you say was that common, they would already own the transformers necessary. I'm not saying that it is not done, just that it is not standard practice. As far as 55 volts being safe, I doubt that anyone of any authority believes this to be true. The term is probably "safer".

PS, you must wet your hands and stand in a bucket of water or else you will not die or get injured and
will only get a nasty unpleasant shock.

> Wet human skin (R) is conductive enough to allow a fatal current (I)
> to pass through the body at electrical mains voltages (E).

Why is it we have to soak ourselves in water before working with electricity before you can somehow
prove a point that it is dangerous? Should we put some SALT in the water first and have someone shoot
a gun to our heads as we work around electricity so you can be REALLY right?

From someone who never turns the circuit breaker off when changing a light switch or dimmer, or unplugs
a radio or vcr before working on it, I have been shocked with the AC hundreds of times and it doesn't
even make me jump anymore. You can preach all you want, but you are NEVER going to convince me that
it is dangerous because I know from experience that it isn't.

Of course I don't do these things in the shower as you somehow are obsessed with.

> degree Fahrenheit? Those effects cannot be made by a source of "relatively low" energy.

Yes, they can. The key words are "energy" and "relatively." It's a
high amount of power (energy/time) but low energy. According to

http://www.weatherwise.org/qr/qry.lightningpower.html

Which has the clearest description for those who need small words,
"The energy input in a typical 3-mile long lightning channel is
estimated to be one billion to ten billion joules. [One Joule is
one watt-second.] One hundred joules of energy will keep a 100-watt
light bulb going for one second. One billion joules will keep the
light bulb lit for 116 days." (References on that page.)

That's not all that much energy, relatively speaking. Release it
over 30ms, (IEEE 8/22 lightning profile) however, and you do have
a huge blast of *power.* The reason the trees explode and
the fulgerites form is that tree sap and fulgerites are poor
conductors, becoming the "weak link" in the circuit. The sand

melts; the water in the sap explosively expands when it boils.

> Whoever was hit by a lightning and survived, most likely was hit by a stray weak(er)
> streak from the main path of the lightning.

No. See below.

> An average lightning releases about 250 kWh
> (that's kilowatt hours) of energy.

Actually slightly higher at the bottom end, but it still doesn't
matter.

Suggest you watch your local news on stormy days. Direct strikes are
common on soccer fields. Gary Coffman in r.r.a.antenna refers to a
PGA player (Hale Irwin?) who has been hit twice, on camera both times.

> If a lightning bolt hits you directly, your

>
> Please do. Testimonials will not count, btw, only scientific observations and data.

From when I got into this argument last year, I basically collected
info over a three week period. Here is that info:

10-July-2000:

In Boulder today a 9 year old boy from Texas was hit by lightning
and is now in Denver Children's Hospital in critical condition.
He's alive because a bystander administered CPR. For Boulderites,
the strike occurred on Panorama Point off Flagstaff Mountain Rd.
Two other children had minor injuries from "flying debris" and
were treated and released from Boulder Community hospital.

I suppose you could call them to try and wangle out details if
they'll let you have them...

There are also numerous grass fires burning due to lightning from
these storms.

10-July-2000:

Follow up... John Albeter, 45 was struck a couple of days ago. He
was showing his burns off on KCNC-4, the local CBS affiliate. They
claim that at least 3 people have been hit and survived "in the last
few days."

Unfortunately, their web site is intentionally kept out of date as
compared to the broadcast info, so nothing is there, yet. But try

http://www.kcncnews4.com/

Later this week or consider getting a copy of tomorrow's (Tuesday's)
Rocky Mountain News (which shares stories with KCNC).

18-July-2000:

Follow up... because of the storms we have had over the last few
days, there have been a lot of strikes. KCNC-4 in Denver reports
that 9 people (including the above) have been hit, with only 1
fatality. One couple who were hit actually hiked to get help
for the burns on their legs (ouch!); the dead individual was
climbing a mountain when he was hit -- the rescue/recovery
crews needed a couple of days to pick up his body because the
lightning was too dangerous for them to go get him.

Bottom line -- lots of lightning survivors, and the single
fatality didn't get himself blasted into tiny fragments.

(I stopped collecting data at that point, given I'd made my
point in 8 days.)

There's even a survivors' support group:

http://www.mindspring.com/~lightningstrike/

Since you don't want testimonials -- a reasonable thing --
you might want to skip to the "links" section and follow
the one put there by the MD. I haven't explored them since
last year, so I don't vouch for their quality.

> like candy, but simply to be aware what the hazards are in what particular situation.

Suggest you look up medical information on current necessary to stop
a heart at DC, 60 Hz, 400Hz and 1kHz. I may be totally out of line
on RF, but I do know that *up to a point, well within the frequencies
we are talking about,* ac is more lethal than DC.

> > That's not to say that DC is safer -- it's just dangerous in

>
> Fine, but what has this got to do with what we're discussing.

Well, because you seem like a smartass, and so I felt I should explain
why DC can be dangerous in a different way. Next time I'll remember
to put "but I digress" on that part of the message to avoid the other
obvious smartass answer.

> > Me, I think you guys both are off the deep end a little here.
> > The original guy was talking about tying a 0.01 uF AC cap from
> > the neutral to the lamp frame. Failure of that cap....[snip]
>
> I was purposely not addressing the issue of this method.

Why? That was what the thread was all about? People bitch about
topic drift all the time, and instead of helping the guy, you
continue on a tangent? Dumbass, not smartass.

> I simply wanted to point out the
> fallacies of the unfounded, illogical, circular and backward reasoning, which in this
> case might make a difference between someone's life and death. But if you can show me in
> what point I was off the deep end, I'd be much obliged.
>

I was not able to give as complete a reply as I wanted. I would
suggest getting a copy of "The 'Grounds' for Lightning and EMP
Protection' published by Polyphaser corporation. They do
professional lightning and NEMP protection. People who use
their products properly (like many -- but not all -- radio and
TV stations) stay on the air while their towers are being
pounded. The Joule-rating of the supressors is surprisingly
low (their resistence when conducting is very very low).

Suggest also that you use your favorite usenet search engine
to look up any posts by Gary Coffman in rec.radio.amateur.antenna.
He's an expert -- a real one, not a wannabe -- in the field.

I will quote some of his postings in their entirety to spare
you the trouble of working on this:

Yes, relative to a nuclear explosion, say, or a volcanic eruption, it's not much. But if a 100 kg (220 pound) man absorbed a billion joules, it would raise his temperature by 1100 degrees C (1900 degrees F). As far as the person is concerned, there's no practical difference between the energy in the lightning strike and the energy in a nuclear bomb.

One can only hope that no young experimenters take this liers advice at face
value.
His knowledge of electricity and its effects is nil.

The 120 volt receptacle in your house is dangerous. No exceptions !

To Steve: Go back to scholl and learn something before you post any
more lies to this group.

Hi ALl,

I have surplus to requirements an MFJ 989c 3kw ATU for sale.
I'm asking UKï¿½180.00 for it prefer buyer collects but will send via
snail mail if you are willing to pay the cost of postage.

Anyone interested please email me direct.

Cheers!

And you feel that the entire lighning strike energy would be released
only in the person... why? No energy released to ionize the
atmosphere, released in light, etc?

Sorry, Roy, while I have respect for you and Tom W8JI, you are both dead wrong on this subject. There is too much actual, existing empirical evidence for you to study if you are willing to open your mind to it with regard to this subject. In my previous posting I gave references for you to follow up. I can't force you to do your legwork, but the references are there, and you can follow them up if you are willing.

Make that no current. The "Van de Graaff" generates a static charge.
The person is standing on a insulated platform.

The generator is turned off and discharged. Then the person on the
insulated platform places his hand on the upper sphere and keeps it
there. The generator starts raising the potential of the upper sphere
and the body of the person in contact with it.

The generator is shut down and discharged before the person removes
his hand from the sphere.

Get a grip people.

120 VAC *is* lethal. Period. Not always, but often enough.
Lightning is lethal. Not always but often enough.

Geeze, this is beginning to sound like one of the operating system dick
wars.

My first experience with 120 VAC was when my dad was remodeling the
kitchen back in 1965. He said, pointing to the wires hanging down where the
wall switch used to be, "If you together, the light comes on." Well, I
did, one
finger and thumb on each wire. Holy jumping Mary. The second time I held
on to the insulation.

I've been working with electrical and electronic equipment since about
1967 or
so. And I've been bitten by a variety of things. AC, DC, high voltage,
RF and
the ringer signal across the telephone line. All various degrees of
unpleasantness.

The below is a collection of anecdotal evidence.

An older electrician once told me, "The human body makes a great voltmeter.
120 VAC is annoying. 440 VAC knocks you across the room. 220 VAC hangs
on and kills you."

However, one of the electricians where I worked, who really should have
known
better, was vacuuming the pool at his house. He pulled the vacuum into
the pool
and reflexively grabbed it. He died.

The typical technique at the wrecking yards I used to go to for testing
a car battery
was to bounce a lug wrench across the terminals. Yeah, I know. I pointed
it out,
"I've been doing it like this for years." And eventually, he found one
with a full charge.
he's blind now.

I'm still breathing, and although my eyesight isn't was it used to be,
it hasn't been
altered by an exploding car battery.

Electricity can and will kill you. It just take the right combination of circumstances
to do it. I've just been lucky so far.

I think the key thing to keep in mind here is "Familiarity breeds contempt."

Sorry about the massive cross posting, but someone had to "Click here to check
reality."

Sorry, exactly what was it I said that was "dead wrong"? Of course a person doesn't absorb all the energy in a lightning strike, and I didn't say a person would. The purpose of my posting was to put the idea of "not all that much energy" in perspective. Although it looks from the simple minded analysis that only 1% of the energy of a 1 GJ strike, or 0.1% of the energy from a 10 GJ strike would be fatal just from heating effects, I doubt that's what kills most lightning victims. As I recall, it takes only somewhere between 10 and 100 mA through the heart to kill a person, and that can be accomplished with little energy indeed.

The premise is wrong. The person does NOT absorb a billion joules.

> The purpose of my posting was to put the idea of
> "not all that much energy" in perspective.

As was mine. People do NOT die of being cooked down to carbon by lightning strikes (at least usually -- you could maybe find one example, but not 100); they die of cardiac arrest and if someone nearby knows CPR, they usually live.

Lightning is not so immensely powerful that people never survive a hit. The odds are in your favor, actually. Ask a doctor who works in an ER.

> Although it looks from the
> simple minded analysis that only 1% of the energy of a 1 GJ strike, or
> 0.1% of the energy from a 10 GJ strike would be fatal just from heating
> effects, I doubt that's what kills most lightning victims.

It is correct that 100,000,000 J would kill the person from heating effects, but that's not how much gets released. The analysis is too simple-minded. Consider a 3 mile long lighning strike (15840 feet) compared to the 6 foot height of a man. I'm sure this is wrong, but if we assume the conductivity of the lightning path through the atmosphere is uniform, a strike on a person suggests that he is slightly more conductive than the alternate path, the last 6 feet of ionized air to the ground.

Now, measuring my thumb-to-thumb resistance, and I have conductive skin (recall I said that I can feel a shock from 24 VDC), I got 2Mohm from thumb-to-thumb. Gary Coffman asserts that the interior body's resistance is less than 1kohm. Whether you agree what that figure or not, do we agree that the interior of the body is salt-water and far more conductive than the skin?

I figured that a 1 billion joule (10^9) lightning strike could at most
release 379000 joules over that 6 foot man before side-flashing past
him for better conductivity. Of that energy, 1/2000 of it will be
released as heat in internal organs. 190 joules.

This, too, is a simple-minded analysis. It assumes the ground is
of uniform conductivity within 6 feet of the man. This also assumes
that the ionized path is of uniform resistence. Finally, and this
is its weakest point, it makes no assumtions about the energy
necessary to form the ionized path, but generally stepped leaders
aren't visible but strikes are, so I suggest it is less than that
released by the strike.

Your turn.

Ob rec.radio.shortwave:

Lightning is not an immutable force. A good lightning protection
system will save your equipment from direct strikes -- everything
that is protected, provided you do it all properly. Commercial
equipment is hit all the time. Do you really think that TV stations
in FL replace their trasmitter equipment each time their towers
take a strike? (And most commercial sites do NOT do the job
perfectly. For example, running the coax across from the tower
to the building instead of running it to the ground, across the
ground, and up into the building. One extension cord bypassing
the "ground window" protection of the mains.)

Pick up a Polyphaser catalog for free and see what a *real* grounding
system looks like. Take a trip online as well to look at their
document on ham radio station protection.

http://www.polyphaser.com/pdf/PTD1016.pdf

(Just a satisfied customer, blah, blah, blah, etc.)

> As I recall,

I don't find anything to disagree with in your posting. I'm far from an expert on the topic (limited to the level of converting joules to calories with the aid of a book), and found it educational.

Wow, so you might get say 380 kJ, with very nearly all of it being dissipated in the skin (since you say only 190 J ends up inside the body). That's gotta cook the skin pretty badly. I imagine, then, that even victims who survive are often badly burned.

I take it the wrench welded itself to the terminals and kept the short
going?

I've long been in the habit of checking before jumping a battery by
swinging the free ends of the jumper cables in a fast arc to justskip
across one another...always with the cables away from my face, and my
back to the connected battery.

There used to be a guy at one of the local shops who did the wrench
trick, but with a fuse-element shaped strip of tinfoil clipped to a
dowel rod instead of the wrench.

Old Tupperware lids are your friends. Find one that's about
battery-sized, and lay it over the battery whenever you're working
under the hood.

Also keeps that nasty blue-white deposit off your clothes if you have
to lean over the battery.

That they do. The one example I sited -- the guy who was later
interviewed on TV, had3 or 4 4-inch diameter blisters on his
chest in a diagonal "string of pearls" pattern from each return
stroke. As they say, "that's gotta hurt."

Gary,

I received a card for 3 QSOs with FR/F6KDF/T. I do not have a record of the address to which I mailed my QSL. The card does not have an address either;
however, the verification stamp says verified by F6KDF. Here is the QRZ address for F6KDF.

F6KDF
RADIO CLUB DE LA GENDARMERIE
292 ROUTE DE GENAS
69677 BRON CEDEX
FRANCE

To be honest, I do not remember this address, but you should check it against what you used. You should probably use $2.00 and an SAE. I do not know their
policy re "Not in Log," such as if your time does not match closely enough to their log time, even though you know that you are in there. Usually, a small error like
that will get you a reply telling you to check your logbook.

Right. It translates into over 250 kWh which is what I said - you even say up to 2.5 MWh - how low is that? The problem is your following statement:

> That's not all that much energy, relatively speaking. Release it
> over 30ms, (IEEE 8/22 lightning profile) however, and you do have
> a huge blast of *power.* The reason the trees explode and
> the fulgerites form is that tree sap and fulgerites are poor
> conductors, becoming the "weak link" in the circuit. The sand
> melts; the water in the sap explosively expands when it boils.

Let's forget the subjective feeling about what constitutes "not all that much energy". I consider 1e9 J a hefty amount of energy, but I suppose if you compare it to the fusion output of the Sun, it is very
little. You say, however, that the reason tress explode and fulgurites form is because "they are poor conductors". Just what kind of a conductor is the human body? You can't convince me that a lightning that
will split a 100 foot tree in half will simply pass through the human body without causing much damage at all. Now, having said that, there are lightnings and there are lightnings: obviously not all of them
will be as strong as what can be witnessed during a major thunderstorm. I don't think that what most people are being hit with is a full power lightning, especially considering the fact that these seem to be
mostly hits before the storm even begins (since no one in his right mind would probably be standing in the open during a thunderstorm). However, I concede that apparently it is possible to survive a direct
hit. Fine.

> on RF, but I do know that *up to a point, well within the frequencies
> we are talking about,* ac is more lethal than DC.

Up to a point is a different story, but once that point is crossed (fairly quickly, as far as AC goes), skin effect kicks in and the only damage comes from the skin burn. You failed to mention that point
before and the only thing you said was that the lethality of AC was proportional to the frequency, which is incorrect.

> > > Breaking a DC short circuit is harder than

> *why* DC can be dangerous in a different way. Next time I'll remember
> to put "but I digress" on that part of the message to avoid the other
> obvious smartass answer.

I don't think I'm the only smartass in this discussion. It takes two to tango - after all, you are the one who steered my post (which obviously tried to point out the ridiculous notion of HV being safe) away
from the original point to the mostly irrelevant discussion about lightnings and such. Also, breaking a short circuit (either DC or AC) in the real world situation is difficult because the short electrically
welds the conductors, and once that happens, any amount of zero-crossing is irrelevant..

> > > Me, I think you guys both are off the deep end a little here.

> Why? That was what the thread was all about? People bitch about
> topic drift all the time, and instead of helping the guy, you
> continue on a tangent? Dumbass, not smartass.

Excuse me, if you would for a second kindly remove your blinds, you would notice that my response (i.e. my first post in this thread) was meant to refute the nonsense of the

previous poster. My post dealt with
safety exclusively and nothing else. Now, go back and review your responses to my posts and see how on topic they are. And I'm supposed to be a smartass.

> > I simply wanted to point out the
> > fallacies of the unfounded, illogical, circular and backward reasoning, which in this

in
> > what point I was off the deep end, I'd be much obliged.
>
> I was not able to give as complete a reply as I wanted... [snip]

There you go again - notice who keeps drifting from the intended message of my sub-thread. Besides, the thread ceased to be on-topic (RFI from lamp dimmers) a long time ago. You keep accusing me of being a
dumbass/smartass when all the while you keep doing the very things I'm supposed to be guilty of. What has all this lightning stuff got to do with the safety with AC, DC and HV circuits? But I suppose I'm being
a smartass again? Any other insults to help your cause?

AMATEUR RADIO NEWSLINE(tm) REPORT #1265 – NOV. 9, 2001

Amateur Radio Newsline report number 1265 with a release date of Friday, November 9th, 2001 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Ham radio leads the way at the New York City Marathon. This story is first on Amateur Radio Newsline report number 1265 coming your way right now.

(Billboard Cart Here)

**

HAM RADIO AND SPORTS: - THE NEW YORK CITY MARATHON

Ham radio was once again at the start and finish -- and all along the route of this years 32nd running of the New York City Marathon. This years event was held Sunday November 4th and was dedicated to victims of September 11th terrorist attacks. Its theme -- “United We Run.”

The starting line was at the Staten Island Side of the Verrazano Narrows Bridge. According to Stew Seit, WA2JNF, who was assigned there, it was a moment of total patriotism:

--

WA2JNF: “On the bridge waiting for the cannon to go off, everyone began singing patriotic songs. It would brng a tear to your eye. There were 30,000 people singing. It was something to be seen.”
--

But Seit and almost 500 other hams were there to provide communications for the event. And according to WA2JNF, even though there were lots of cellular phones, it was ham radio that was the communications backbone once again:

--
WA2JNF: “Everyone was running around with digital radios, Nextel’s, cellular phones. But when the need came to get the message through they turned to us hams. Regardless of how many cell-phones or trunked radios they have tied around their necks, when the message was of priority nature, and they wanted to make sure it got through, they spoke to one of the hams who was handling the communications and we got the message through”
--

The crowd lining the route was estimated at more than two million. Many were waving small American flags in memory of the thousands killed in the terrorist attacks.

ARRL Hudson Division Vice Director Steve Mendelsohn, W2ML, heads up the the ham radio communications for the Marathon. In fact, he has been organizing the ham radio effort ever since Amateur Radio became a part of the event many years ago. He says that for him, for the group of Amateur Radio volunteer communicators and for the people of the Big Apple, this years New York City Marathon was like none ever before:

--
W2ML: ”It was truly a celebration of life. It was a way of saying to the terrorists: ‘look -- we are going on with our lives. You didn’t stop us. On the contrary, you united us.’ “
--

Tesfaye Jifar of Ethiopia set a record in winning the mens catagory. He ran the 26.2 mile course in 2 hours, 7 minutes, 43 seconds. The old record of 2 hours, 8 minutes and 1 second was set in 1989. And as Jifar broke the record it was a corps of ham radio operators that guided him -- and the 30,000 other competitors in the New York City Marathon -- to a safe completion of this years run.

More on the Marathon is on the web at www.nyrrc.org. Our complete interview with Steve Mendelsohn W2ML can be downloaded from our FTP page by clicking on the newscast number at the top of the www.arnewsline.org home page. (ARNewsline(tm))

**

RADIO AND SPORTS: THE SANTA CLARITA MARATHON

Sunday November 4th also saw another Marathon where ham radio played an important role. This one took place in Amateur Radio Newslines’s own back yard. It was the Santa Clarita 5 K Marathon and featured ham radio as it primary communications. Take a listen:

--
Audio Here
--

About three dozen hams from the Los Angeles County Disaster Communications Service and the Santa Clarita Valley Amateur Radio Club provided this years communications support. Most of it was on two meter F-M using the 146.79 MHz W6JW club repeater.

--
Audio here
--

The Santa Clarita Marathon may take place in a Los Angeles suburb, but it is by no means a small event. Several thousand runners take part and its course is USA Track and Field certified. In fact, this event is a qualifying race for the famed Boston Marathon.

More information on the event is at www.scmarathon.org. The Santa Clarita Amateur Radio club’s home in cyberspace is www.w6jw.org. (ARNewsline(tm))

**

TECHNOLOGY AND RADIO RULES: FCC PUTS KENWOOD "SKY COMMAND" PETITION ON PUBLIC NOTICE

Turning to regulatory matters, the FCC has put a rulemaking petition from Kenwood Communications Corporation requesting that the government relax restrictions on Amateur Radio auxiliary station operation on public notice. Amateur Radio Newsline’s Bruce Tennant K6PZW has the details:

--
The FCC assigned the rulemaking number RM-10313 to the petition in which Kenwood asks the government to permit hams to use control methods like its own Sky Command radio remote system.

According to the ARRL Letter, Kenwood’s Sky Command lets a user control a fixed location High Frequency station using a pair of dual-band VHf/UHF transceivers on frequencies in the 70-cm and 2 meter bands. Kenwood wants a change in Part 97 rules that would expand permission to operate an auxiliary station on all 2-meter frequencies above 144.5 Mhz, except on 145.8 to 146.0 MHz.

And while not mentioning Sky Command by name, Kenwood says that the proposed rule change would allow the development and use by amateurs of new technology devices and increase the utility of the limited amateur allocations. Current FCC rules limit auxiliary operation to certain frequencies above 222.15 MHz.

In July 2000, the FCC declared that use of the Sky Command did not comply with Amateur Service rules--specifically Section 97.201(b). It also declined to grant a waiver make it legal. The ARRL commented in opposition to Kenwood's earlier efforts to have the system eclared to be in compliance, and it refused to permit Sky Command advertisements to be published in its QST magazine.

In its Petition for Rule Making, Kenwood asserts that auxiliary operation is poorly defined and significantly overregulated in the FCC rules. Kenwood also argues that present limitations on auxiliary operation no longer are appropriate in today's amateur environment and should be withdrawn.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW.

--

Again, the Commission has assigned the rulemaking number RM-10313 to the petition from Kenwood. Those interested may view and comment on it via the FCC's Electronic Comment Filing System. (ARRL)

TECHNOLOGY AND RADIO RULES: DIGITAL WIRELINE REMOTE BASE OPERATION BEING TRIED IN THE UK

A British ham radio operator has been granted permission to experiment with a digital wireline multi-band remote-base system. The experimental station was made possible by combining a popular H-F transceiver, the support of the national ham radio society and a cooperative government regulatory agency. Jeramy Boot, G4NJH, reports from Nottingham in the U-K:

--

Dave Gould, G3UEG, has received a Notice of Variation as a Special Research Permit to set up an HF station that is remotely controlled over the telephone network. This has come after 16 months effort liaising with the RSGB Licensing Advisory Committee and the Radiocommunications Agency and has been finally approved after a site inspection. The system is based on a Kachina 505DSP transceiver and Kachina's own specially-designed remote control system. The audio is digitised and then multiplexed with the control signals. The resulting single data stream is encoded and then passed over the telephone network using standard modems. At the remote end the data is decoded and the audio is split from the control signals and passed to the transceiver. The system will operate at a line speed of 28K or better and includes strong security, failsafe and shut-down measures.

Jeramy Boot, G4NJH
--

While we in North America take wireline and radio remote-base operations for granted its new to many other parts of the world. Anyone interested in receiving further information or with ideas to assist Dave Gould, G3UEG, may contact him by e-mail at david.gould@btinternet.com (RSGB)

**

ATTACK ON AMERICA: COMANDO SOLO DOES NOT WANT RECEPTION REPORTS NOW

If you are an SWL or ham who listens to shortwave -- and -- if you are planning to send a confirmation card to Radio Solo, the word right now is -- dont! This as the United States forces 193rd Special Operations Wing asks that reception reports and cassette tapes of its Commando Solo flying radio station broadcasts over Afghanistan not mailed to them at this time.

According to the Media Network e-newsletter there are two reasons. Obviously, they are involved in operations over a theater of war and need to lessen their peripheral workload. Also, due to the Anthrax scare in the United States, the U.S. mail system is overloaded with new safety procedures. In other words, your report may be indefinitely delayed or never opened. (Media Network E-Newsletter)

**

ATTACK ON AMERICA: NYC TELEVISION SEEKS NEW HOME

Seven weeks after a terrorist attack caused the collapse of the World Trade Center, hundreds of thousands of homes in the New York City area remain unable to receive more than four television stations. Because the main antennas atop the north tower came down, all the local stations, except Channels 2 and 41, which had backup antennas on the Empire State Building, had lost a significant part of their audiences. The situation improved last week when two more of the stations that lost their main transmitters began broadcasting from the Empire State Building site. Amateur Radio Newsline's Henry Feinberg has more:

--
On Thursday morninng, October 31st, Tribune-owned WPIX-TV channel 11 switched on a transmitter giving it an over-the-air signal said to be similar to what it was prior to the terrorist attacks. WNBC-TV channel 4 -- which in the late 1940's was the first to broadcast from the Empire site -- made a triumphant return later the same day when it flipped the switch on its new Empire located transmitter.

As an interim step to get back on the air, most local broadcasters had opted to use the old Armstrong Tower located in Alpine New Jersey. But the Alpine tower is not high enough and is to far away from the majority of the New York City demographic audience to provide clear reception throughout the metropolitan region.

The Empire State Building was the home to almost all New York City television broadcasters before the World Trade Center was built. Many broadcasters want to return to it but the New York Times says that Empire has to little space and not enough electrical power to accommodate the demands of all the stations. So a coalition of 11 broadcasters in and around New York are exploring options that include sharing management of a broadcast tower built to their specifications and needs.

The Times says that the long-term situation may be the construction of an enormous stand-alone broadcast tower. One that is perhaps 2,000 feet high and preferably be somewhere near the World Trade Center twin towers site.

But broadcasters will face a large number of issues if they persue the stand alone tower idea. Chief among them are the wants and desires of the residents of New York City. Many of them have made it clear that the area where the twin towers once stood be rebuilt a both a new trade center and also as a lasting monument to those who died in the terrorist attacks of September 11th, 2001.

Not far from the Armostrong Tower in Alpine New Jersey, I'm Henry Feinberg, K2SSQ, reporting for the Amateur Radio Newsline.

--

Aside from the political issues mentioned in Henry's report there will be numerous other technical roadblocks. First is that of protecting the Philadelphia and Boston demographic television markets from interference. And if such a project is approved by the city at a different location, the Federal Aviation Administration will likely demand that it be built where it will avoid established flight patterns for local airports. And there are not very many of those in and around the metro New York City area. (ARNewsline(tm) from various published news reports.)

ATTACK ON AMERICA: VERTEX STANDARD / YAESU DONATES GEAR

According to a recent story in the ARRL Letter, Vertex Standard, which manufacturers Yaesu brand gear, has donated several pieces of equipment to Virginia ARES. The manufacturer had arranged to loan an FT-7100 transceiver and three of it's VX-5 hand-held's during the response to assist the Salvation Army at the Pentagon terrorist attack site. When the work concluded, Virginia Section Emergency Coordinator Tom Gregory, N4NW, e-mailed to thank the company and to inquire about returning the equipment. Vertex Standard Executive Vice President Mikio Maruya, WA6F told him that Virginia ARES was welcome to keep it on hand for future emergencies. The Woodbridge, Virginia, Ham Radio Outlet store cooperated in providing the Virginia ARES team with the needed equipment on September 13th. (ARRL)

REPEATER COORDINATION NEWS: NFCB AND NFCC ELECTION RESULTS

The National Frequency Coordination Council -- or NFCC -- has elected Nels Harvey, WA9JOB as its new President. Harvey replaces Owen Wormser, K6LEW. Wormser had served as Chairman of the original drafting group that resulted in creation of the NFCC back in mid 1990's and as several terms as President.

Also elected to office are Dave Baughn, K4XI as NFCC Vice President, Dick Isely, W9GIG as Secretary and Clay Freinwald, K7CR as the organizations Treasurer. Meantime, Clay Freinwald, K7CR, and Nels Harvey, WA9JOB, have also been elected for two year terms on the National Frequency Coordinators' Board of Directors. Both ran unopposed. (ARNewsline(tm))

**

REPEATER COORDINATION NEWS: SERA DROPS UNKNOWN CATEGORY

The South Eastern Repeater Association says that it has dropped use of the term 'unknown' for listing repeaters that it has little or no information on. According to the organizations publication Repeater Journal, the listing of about 150 repeaters as 'unknown' was intended to prod their owners to file delinquent updates or help clear the groups records of repeaters that are no longer on the air.

It did neither, but it did cause confusion for ham radio enforcement efforts. This occurred earlier this year when FCC Special Counsel Riley Hollingsworth cited the South Eastern Repeater Association's Unknown Repeater List as grounds for dismissing a complaint against an uncoordinated West Virginia repeater that had been accused of interfering with a coordinated system in Kentucky. The coordination counsel's FCC Liaison is reportedly working with Hollingsworth's office to clear up the confusion. (SERA Repeater Journal)

INTERNATIONAL – BAHAMAS: FEES GOING UP

The annual fee for those holding a Bahamian Amateur Radio license has increased to $25. According to the ARRL news, The new fee applies for licenses renewed after August 1. The cost to "catch up" on past renewal fees prior to 2002 is $6 per year. Some US amateurs with Bahamian tickets were surprised to get letters requesting the back renewal fees and threatening fines and revocation. According to Dick Long, C6AKE, the Bahamian Public Utilities Commission--which handles licensing there--collects $6 a year for the years your license has been expired--this has always been its policy, he says. If you don't plan to use your license anytime soon, Long advises returning it to the P-U-C or sending a letter stating that you won't be using it again. "If, at some future time, you want to return to the Bahamas, you can always apply for a new license," he added. The P-U-C e-mail address is puc@batelnet.bs. (ARRL)

**

INTERNATIONAL - BELGIUM: A BLESSED EVENT

Hams in Belgium are getting to take part in a truly blessed event. This, as John Devoldere ON4UN who is the President of the Belgian national Amateur Radio society announces that nations radio amateurs can use the special prefix OQ instead of their usual ON or OT prefixes.

According to Devoldere, Belgian telecom authorities issued this special prefix on the occasion of the birth of Princess Elisabeth. The permission to use the OQ prefix began on October 26th, runs until December 31st. (RSGB)

**

INTERNATIONAL - NEW ZEALAND: THE NATIONS HAM-STATS

The New Zealand Ministry of Economic Development reports that as of November 1st that nation has 3,295 General Class license holders, 1717 Limited license class, 24 Limited Novice and 25 Novice class operators. These hams share 205 voice repeaters, 19 television repeaters, 29 digipeters, and 42 beacon operations. Mix in two fixed licenses and the grand total is 5358 licenses issued. (NZART)

HAM RADIO IN SPACE: ISS TALKS TO NEW YORK CITY SCHOOL

Ten elementary school students from New York City had some very specific questions about current events for International Space Station Commander Frank Culbertson. To the question, "What did it look like in New York on September 11," Culbertson responded that he could see the smoke rising from the World Trade Center site and drifting south.

--
Culbertson: “On September 11th we happened to be coming over a few hours after the attack and I could see a large column of smoke coming out of the World Trade Center and floating off to the South and a kind of a fog of smoke all over the Southern part of the city.”
--

Culbertson went on to explain that he took pictures of the tragedy from space. He further related that he found out about the event while talking to his doctor during a scheduled medical conference.

Another youngster wanted to know, "What does Afghanistan look like from space?" Culbertson answered that it appeared to be very desolate and rugged.

The questions could be expected. The children are students at P.S. 234, with its regular campus only two blocks from the site of the World Trade Center.

On September 11, all 650 students at the school and their teachers evacuated their building without a single casualty. The school community has stayed together despite the turmoil, and is now housed in temporary quarters elsewhere in Manhattan. Culbertson told the students that he admired them for their courage, and told them to continue to study.

--
Culbertson: “ I want you to know that the whole world is very proud of you. Its to bad that you had to move from school to school, but we are very proud that you are continuing to work and take your education seriously. Things will be alright. Don’t worry.”
--

The students asked a total of twenty questions during the ten-minute contact. Some thirty teachers and parents and reporters were also on hand as were reporters from the New York Post and New York Daily News newspapers.

The ham radio contact was made through the Amateur Radio on the International Space Station project, an international coalition and was carried live by MSNBC on its website. Former NBC science editor and Newsline anchorman Roy Neal, K6DUE, moderated the event. Communication was handled through W6SRJ, a club station at Santa Rosa Community College in California, with Herb Sullivan at the controls.

P.S. 234 has its own website. Its in cyberspace at www.ps234.org/about.html (ARISS via K5YFL)

HAM RADIO IN SPACE: AMSAT-OSCAR 40 UPDATE

AMSAT's Peter Guezlow, DB2OS, reports magnetorquing of the OSCAR 40 ham radio satellite is again in progress. Guezlow also says that operational periods for the RUDAK system have been extended recently. This, to allow downloading of several important RUDAK G-P-S files.

AO-40 is currently in a long period during which the Earth eclipses the sun near the satellite's perigee. This actually began about August 28th, and will rapidly increase in length. The eclipses will continue well into June 2002. (AMSAT-NA)

**

SPACE AND SCIENCE: A LOT OF BIRDS UP THERE

SpaceDaily reports a new survey by the Teal Group has identified some 600 active satellites in Earth orbit or in deep space. The survey factored in all satellites launched since 1980, and, after a process of elimination, arrived at an estimate of 600 to 610 for satellites that remain active today. (AMSAT-NA)

**

DX

In D-X, you may recall that shortly after the September 11th terrorist attacks on New York City and the Pentagon, the government of Kuwait permitted its ham radio operators to the call sign 9K2USA. Now Bob Furzer, 9K2ZZ, reports a very positive response to the use of 9K2USA.

9K2USA was used by all Kuwaiti hams through September 30th as a token of the sympathy and support for the people of the United States from the citizens of Kuwait. It was also meant to be a statement of deep condolence.

Furzer now tells the Ohio Penn D-X Newsletter that the Kuwait Amateur Radio Society wants to thank all of those radio amateurs who e-mailed their support of the use of this special call. 9K2ZZ also says that the design of an official commemorative 9K2USA Q-S-L card has been finalized and is now posted on the website at www.k4cy.com. (OPDX)

From the U-K comes word of a new microwave D-X record. At least a new record for that nation. On Sunday October 21st the UK distance record for the 47 GHz band was raised from 163 to 203 kilometres. This happened when G7MRF and G0HNW, from Cambret Hill in grid I-O-74 had a two-way CW contact with G0IVA in gridsquare I-O-73 in North Wales. This distance comfortably exceeds the former record of 161 kilometres set in September 1999 by the same group. Reports of RST 519 and 419 were exchanged. (RSGB)

**

THAT FINAL ITEM: A MESSAGE TO REPEATER OWNERS FROM THE FCC

And finally this week, a word about repeater communications responsibility. It comes from the FCC's chief ham radio rules enforcer Riley Hollingsworth, and was included in a recent RAIN Enforcement Log Question and Answer session. If you own and operate a repeater, the next few minutes will be very important to you:

--

First of all, no licensee is required by the [FCC] rules to set up a repeater. When you do so, you do have certain responsibilities.

First, assuming that you have applied for and received coordination from your local repeater coordinating body -- if there is one -- and in a lot of areas there are not and in which case you would skip that step. As long as you are not interfering with a coordinated repeater, everything is all-right.

Once you start a repeater, you have to keep a few things in mind. First of all, if it is using your call sign -- it is your station -- and you are responsible for it. You do have a few alternatives as far as controlling it, but essentially it is your station and your responsibility.

The rule that states that you are not responsible for inadvertent transmissions I am afraid is often misunderstood. It only applies to inadvertent transmissions. [These are] transmissions that you let through on the repeater -- and I think it was designed for [modes like] packet anyway that you let through on the repeater before you realized what was happening.

Now, rules violations that occur by your users on a day-in and day-out basis or rule violations that go on for several hours are your responsibility as well as that of the users that are committing the violations. No dictionary in the world would define those types of situations as "inadvertent," and I am afraid that a lot of people just do not understand that.

If you put a repeater on [the air] you are responsible for its proper operation. Now, if you can't do that, or you do not have the time or the inclination [to properly control it], then your choice is to shut if off and to do something else. This is very important in these times because Amateurs are being listened to more than ever before.

Everyone seems to be buying scanners and short-wave radios. Very often a repeater is new person's first exposure to Amateur Radio -- and a potential recruit -- I might add. And, very often, it is the news media's first exposure to Amateur Radio.

If your repeater is an embarrassment to Amateur Radio, then you should shut it down and seriously examine your motives for wanting a repeater. You will be held responsible for regularly occurring rules violations, as well as the people committing the violations.

I would hope that more and more Amateurs would understand this. I think that the rule that you are not responsible for inadvertent transmissions has been misinterpreted by a number of people.

--

What Hollingsworth really seems to be saying is that your repeater is kind of like your house and your surrounding property. Yes, you have responsibility to make your home secure for you and your family. You also have a responsibility to keep it and its surroundings neat and clean so that your neighbors will also enjoy the view. (FCC, RAIN)

Dear OM,

My name is Franï¿½ois.
I am a member of a french logistic team going to Geographic North Pole each april. We establish a drifting base at 89 North Latitude, wich name Borneo, for scientistific researchs.

When I was student, my hobby was HAM, with the call sign FE 4834.
Actually, I dont have a station, because I have 2 young children. But I hope I will have a new one in some years!!

My hobby actually is collecting polar QSL cards from North or South Pole.
So, can I ask you if you can help me ?
Do you have any spare QSL from North Pole or Antarctica?

I can send you letters and post cards I have cancelled at the North Pole station with the official post office cachet during my past expeditions.

I'll send you also a SASE with IRC.

I hope we can do good exchanges!
I send you all my best regards and 73's,

SWL Franï¿½ois.

I have yet to get a QSL from 5R despite working and QSLing many. So I'm always on the lookout for more.

A few minutes ago I'm tuning 20 CW and there is 5R8GZ on 14.020. He's about 559 in AZ and working real QSOs; RST, name, QTH, 73s, etc.

I listen to a couple of Qs and when he signs, I drop my call in twice. He answers someone on the east coast and I figure I'll never get through so I decide to move on. I put him in memory and figure I check back later and see if propagation is better.

I tune around a bit and don't hear much so I decide to listen to the pile for awhile. I recall his freq and I'll be damned, he's calling me!

Now if my luck holds I'll get a QSL.

Just out of curiosity, it says on the website: "Finally the other day, he
was given verbal permission to bring his Icom 706 Mark 2G into the country
and to operate on 20m with a home made 20m dipole".
Does that 20m mean the same thing in P5 than in Europe 14.000MHz-14.350MHz?
If so how come he's operating on 28Megs?

Source record: 15498

Early birds may catch more than their proverbial worms
this week. In the predawn hours of Sunday, Nov.18, the annual
Leonid meteor shower may put on one of its best shows in
decades, according to various scientists modeling the
expected Leonid activity this year.

Try some meteor bounce DX contacts.

<snip>
The much anticipated announcement of Pitcairn's induction into the
IARU was delayed. The vote will be tallied first thing today and an
announcement is expected. Meanwhile the VP6 Ducie Island team left
Mangareva, Gambier Islands shortly after sunrise yesterday. The team
was last heard operating maritime mobile around 1800Z on Thursday.
They have not shown up for any of their schedules, as of press time.
Tom Christian, VP6TC, reported there were several small earthquakes
felt on Pitcairn yesterday. In Fiji yesterday another earthquake was
reported at 0813Z measuring 4.6 on the Richter scale. The team is
expected at Pitcairn Island around sunrise local time. One station
reported working Mike, K9AJ/FO0MIC, who supposedly said the team would
be up and active on Sunday or Monday. Let's hope this is incorrect
and the team does show up around mid Saturday (Z) as was reported
yesterday.

2951. Re: Meteor shower this weekend, try some meteor scatter DX

Newsgroup: rec.radio.amateur.dx
Date: 2001-11-16 17:37:29 UTC
From: leonids@arksky.org
Message-ID: <2a64f69d.0111160937.2f11cfe1@posting.google.com>
Source record: 15356

If all goes according to predictions, this meteor shower (The Leonids) will the most spectacular meteor event since 1833. Projected counts are upwards to 8000 per hour in Asia, and 3000 to 4000 per hour in North America's mid-west and western states. If all this holds true, VHF meteor propagation will be like none other we've seen.

I would like to ask for volunteers to submit your reports on stations worked during this phenomena at The Arkansas Sky Observatory website. If we get enough volunteers between now and Sunday morning, we will provide an online form to submit your information. In the meantime for those interested in doing some scientific contributions for this event, please visit the website to learn more about this upcoming event and contact us if you are interested in contributing to the effort.

The website URL is: http://www.arksky.org

All information will be analyzed, both visual and radio propagation reports, and forwarded to the participating astronomical organizations. Results of all observations and participants will be available on the website shortly thereafter.

Since I've been out of the VHF/UHF scene for years, I would like to urge all those in the know, to spread the word about this event, plus the opportunity to have some great VHF fun and participate in a real scientific study at the same time!!

>Shack.

Using a high-voltage capacitor is not enough. If you are going to connect a capacitor across the AC line, it must be AC rated. The reason for this is that AC current will flow through the capacitor and a non-AC rated capacitor may overheat and/or explode.

Digikey and others sell capacitors rated to go across the AC line.

Hi Henry -- 6M has been open lately -- lots of activity.
Calling frequencies are:
SIX METERS

50.06-50.09 Beacons
50.0-50.1 CW
50.090 CW Calling Freq
50.7 RTTY Calling Frequency
50.100 to 50.130 DX Window (USB)
50.110 DX Calling Frequency (USB)
50.115 DXpeditions Frequently operate CW and SSB here
50.1-50.6 Weak Signal, AM
50.4 National AM Simplex Frequency
52.525 National FM Simplex Frequency
50.125 National SSB Simplex Frequency (USB)

6 Meter Simplex Frequencies --52.020, 52.040, 52.540, 53.000, 53.020,
53.520, 53.900

Also 28.885 MHz -- This is the 6M DX Liaison Frequency -- Listen here for
6 Meter DX opening announcements and discussions.

Lots more calling frequencies at URL:
http://ac6v.com/callfreq.htm
--
73 From AC6V, Rod In Oceanside, CA
I doubt, therefore I might be!

AMATEUR RADIO NEWSLINE(tm) REPORT #1266 – NOV. 16, 2001

Amateur Radio Newsline report number 1266 with a release date of
Friday, November 16th, 2001 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio operators respond to a plane crash in New York City and Russia says “No” to No-Code. These stories are first on Amateur Radio Newsline report number 1266 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAMS HELP IN AFTERMATH OF NYC JETLINER CRASH

Ham radio operators in New York City, still weary from the aftermath of the September 11th terrorist attacks were called out once again. This, after an American Airlines jetliner in route to the Dominican Republic broke up in flight shortly after takeoff from Kennedy Airport. The Airbus A-300 had 265 passangers and crew. It crashed moments after takeoff setting homes ablaze on thrr Rockaway penninsulia. There were no known survivors. We have more in this report:

--

When American Airlines Flight 587 crashed just minutes after takeoff from Kennedy Airport in New York City on November 12th, the Salvation Army was one of the first groups to arrive at the disaster scene. It brought in several mobile canteens to help feed rescue workers and residents whose houses had been damaged or destroyed.

The Salvation Army regularly uses ham radio operators in its SATERN network to maintain communications between its units at a disaster site. This being the second disaster to hit New York in two months' time, the Salvation Army Incident Commander asked the SATERN disaster command operator, Carlos Varon, K2LCV,to request additional ham volunteers. Operators were needed to staff the canteens and a mobile command post.

Initially up to a half dozen ham stations were to be set up at various locations near the crash site and another at Salvation Army Headquarters in Manhattan. It was anticipated that the communications mission would last three to four days.

Also, according to ARRL New York City and Long Island Section Manager George Tranos, N2GA, the League's Amateur Radio Emergency Service was on standby for the American Red Cross. Hams were later reported as providing communications support to the Red Cross for its operations.

But getting to any assignment was not easy. New York officials initially feared this was another terror attack and put the city into a near lock-down, closing all airports, bridges and tunnels for several hours after the crash. In addition, the crash site itself was on an island, and access to the area was severely restricted. All this made it difficult for ham volunteers to reach their assignments. Finally, they were all told to gather in one place where they would be escorted in by a Salvation Army command vehicle.

Among those who helped organize the ham radio response was Mark Phillips, KC2ENI, the ARR Emergency Coordinator for Queens County. The Rockaway Command station was Joseph Albertus KB2QLE and Net Control on the 147.090 MHz repeater was Michael Lunetta W2MPL.

From the offices of CQ Magazine, I'm Rich Moseson, W2VU.

--

Authorities who found the flight data recorder said it contains information leading to an initial conclusion that mechanical failure of the Airbus jet was the cause of the crash. (W2VU, WB2FXN, K2VMR, N2GA, and communications monitored on the 147.09 repeater)
**

RESTRUCTURING: RUSSIA SAYS NYET TO NO-CODE

The Russian Federation has said ‘nyet’ to no-code. According to the W.I.A. Victoria News, the Federation says that there are good reasons for the Amateur Service to continue with Morse as a license requirement for operation below 30MHz. It also says that it has no plans to make any changes to its domestic licence conditions. Amateur Radio Newsline’s Roy Neal. K6DUE, takes a look at the surprise Russian position:

--

"Keep the Morse Code." That's the position of The Russian Federation. It was revealed by the International Telecommunications Union on the 12th of October, when that organization released a position document for the World Radio Conference of 2003..

The Russian Federation told the ITU that it supports most changes to International Radio Regulation S-25, which sets forth qualifications for radio amateurs. But, says the Federation, keep the Morse code. Reasons? First a strong belief that Morse testing is the big difference between Amateur Radio and the Russian version of Citizen's Radio Services. The Russian Federation also points out that lowering the code requirement in many other nations has not led to a significant increase in the number of hams in those countries.

The Federation says that it surveyed Russian radio operators and found overwhelming support for retention of the code and the Russians say Morse is one of the most effective means of communication in emergencies with clear benefits in reducing interference on the high frequency bands.

What does it mean to the rest of the world, this decision to retain Morse testing? Jim Linton, VK3PC, is the author of Australia's "Morse Code Watch."

He says the Russian Federation's position can be accomodated easily. This because any new I-T-U Radio Regulation S-25 to come out of the World Radio Conference in 2003 will set only a minimum qualification standard for radio amateurs. It will not force that standard on any country.

For the Amateur Radio Newsline, Roy Neal, K6DUE

--

As previously reported, the IARU Administrative Council voted on October 8th to support dropping Morse as a qualifying criterion for high frequency access. It says that Morse testing is no longer relevant to the healthy future of amateur radio. (W.I.A. Victoria, W5YI Report)

THE 100TH ANNIVERSARY OF MARCONI'S HISTORIC TRANS-ATLANTIC RADIO TRANSMISSION

I’m Bill Pasternak, WA6ITF, in Los Angeles, with a late breaking bit of radio history.

December 12th will mark the 100th anniversary of the first Trans-Atlantic radio transmission by Guglielmo Marconi. To commemorate the event, The Marconi Radio Club and The Falmouth Amateur Radio Association radio operators are making plans to celebrate this important historical event from December 11th to the 16th. And in this very rare recorded interview supplied by Q-News, Marconi himself commented on the his first contact across the Atrlantic pond. Take a listen:

--
Audio of Marconi commentary here. No text available. Please listen to audio newscast. Links are at http://www.arnewsline.org.
--

The signal Marconi referred to was a series of the letter S transmitted using CW across the Atlantic from Poldhu, Cornwall England to St John's, Newfoundland. For this 100th anniversary, the Marconi Radio Club will be using the call sign W1AA slash CC and will be operating from Cape Cod, Massachusetts, U.S.A.. This was the location of Marconi's 1903 Trans-Atlantic radio station. Marconi's 1903 call sign back then was "C C"

For exact times, frequencies and modes of operation for W1AA slash CC go to www.qrz.com/database?callsign=w1aa) (K1VV, Marconi Radio Club W1AA. Marconi audio supplied by Q-News)

AMERICA AT WAR: G3 MAY HAVE TO WAIT

It now appears very unlikely that new G 3 personal communications technology will share the same spectrum worldwide. Amateur Radio Newsline’sa Henry Feinberg, K2SSQ, tells us the U-S military has other ideas:

--

While Europe and Asia have reached accord on commen frequencies for the introduction of G 3, the September 11th terrorist attacks in New York City and Washington have convinced the Departrment of Defense to take a different position. The DoD now says that it is not in the national interest to relinquist spectrum in the 1710 to 1850 Mhz band just because that happens to be the same spectrum to be used commercially overseas.

According to the latest issue of the W5YI Report the Cellular Telecommunications and Internet Association says that the Department of Defense will encounter interference from 3 G wireless devices but the DoD disagrees. It says that whatever equipment it has is far more powerful. The DoD adds that it may interfere with 3 G cellular telephones oversaeas but that the cellphones will not adversly impact on the military or its operations.

For the Amateur Radio Newsline, I’m Henry Feinberg, K2SSQ.

--

In other words, over here in the United States, if G 3 wants 1710 to 1850 Mhz -- its going to have to wait. (W5YI Report)

**

AMERICA AT WAR: EMERGENCY CELLULAR TELEPHONE PLAN

Verizon Wireless and the United States government are in the final stages of a deal that would give some emergency officials priority access to the company's cellular network. Under the agreement, about 2,000 federal, state and local officials would be given a code that allows them priority over others trying to make calls.

The system, intended to be used only in times of crisis, would be operational in New York, Washington and Salt Lake City, the site of the 2002 Winter Olympics. Verizon has submitted a request to the Federal Communications Commission, which must review and approve some elements of the plan. According to a government official who spoke on condition of anonymity, others trying to make calls could get busy signals because of the plan. (Published news reports)

**

ENFORCEMENT: FCC TO CB OPERATOR – TIME TO PAY THE FINE

The FCC has told a mid-West C-B operator that he has to pay the price of breaking the rules. This after the agency affirms a $9500 Monetary Forfeiture issued last summer to Klaus D. Kramer of Oklahoma City Oklahoma.

--
The Klaus Kramer story goes back to last February. This is when the FCC received several complaints of a CB radio station operating with excessive power in Oklahoma City. The Dallas office sent agents to locate the source of the transmissions. In the course of the two day investigation the agents traced transmissions to three locations including Mikes Cycle Shop. The latter is a business owned by Klaus Kramer.
The agents conducted inspections that revealed that Mr. Kramer violated Section 301 of the Communications Act by operating radio transmitters without authorization. Kramer admitted to making the transmissions and voluntarily relinquished the equipment. On March 12th the Dallas office issued two Notices of Violation to Kramer. In response to the Notice's of Violation, Kramer acknowledged the violations and indicated that he would discontinue operation of the station. On July 13th, the Commission's Dallas Texas field office issued the Notice of Apparent Liability for Forfeiture in the amount of $9500 to Kramer for the noted violations. Kramer filed a response to the NAL on August 14th claiming that the amount was excessive.
In denying Kramers appeal, the FCC's November 8th order says that its Dallas office has complaints regarding similar operations on two separate occasions in March 1998 and October 1999. In both of those instances, Kramer also voluntarily the offending equipment and on at least one occasion stated that the violations would not be repeated. None the less, the FCC says that its investigation has revealed that Mr. Kramer again: "...violated our rules" in February 2001. Thus says the government, imposition of the $9500 is not excessive and is proper in this case.
For the Amateur Radio Newsline, I'm Don Wilbanks, KC5MFA, reporting.
--
Kramer was given the usual thirty days to pay the fine. He also has the option of further appeals. (FCC)
**

ENFORCEMENT: FCC TO STATION OWNER - YOU ARE OFF THE AIR

Hams are not the only ones feeling the pinch of the Federal Communications Commission action. Five Midwestern radio stations have gone off the air after the agency denies an appeal by their owner who the FCC says was found unfit to continue to operate them.

Back in 1994 the owner was convicted of crimes involving minors. He was sentenced to an eight-year term and was released in 1999 after serving five. Last July he was told by the FCC that he no longer held the minimum requisite requirements to remain a Commission license. Also, that he would lose his licenses to operate the stations within 90 days.

Last month he petitioned the FCC to allow him to continue operating the stations. The FCC denied his request on October 3rd and the stations stopped broadcasting just after midnight October 4th. The FCC says it plans to auction off the station licenses. The owner is reportedly considering an appeal. (FCC, other published reports)

**

FCC NEWS: MASS MEDIA BUREAU APPOINTMENT

Nina Shafran has been named Deputy Chief of the FCC’s Mass Media Bureau Audio Division. Shafran joins the Commission from the staff of the Dow, Lohnes & Albertson communications group where she specialized in broadcast matters. (FCC)

HAMVENTION UPDATE 2002: DISPELLING RUMORS

If you are one of those who heard a rumor that the Dayton Hamvention is leraving its longtime home at the HARA Arena, then forget it. Its nothing more than the normally irresponsible Internet rumor mill working overtime. Bill Pasternak, WA6ITF, has more:

--
According to planners posting to the official Hamvention website, the erroneous rumor began the week of Hamvention 2001. This, after it was was allegedly printed in a Chicago newspaper that the HARA Arena had been sold. It had not been.

The Hamvention Committee spent the weekend of the 2001 event reassuring its vendors and attendees that HARA had not been sold. Also, that Hamvention's contract had not been "bought out" and that it would be back at HARA.

But that’s not all. The HARA Arena management issued its own formal statement. It also satated that the HARA had not been sold, and that it will not be razed. We at Amateur Radio Newsline were there. We heard it first hand.

Most important the HARA folks reitterated what the Dayton Amateur Radio Association has stated. The Hamvention will be there as promised. And as those of you who received last months mass mailing already know, the dates are May 17th, 18th and 19th, 2002. We will see you there.

For the Amateur Radio Newsline, I’m Bill Pasternak WA6ITF in Los Angeles.

--

So much for the rumors on the Newsgroups and other internet gossip spots. The real story is always at www.hamvention.org. (DARA)

EMERGING TECHNOLOGY: DTV ROLLOUT UPDATE

Roughly two-thirds of commercial television stations plan to broadcast a digital signal by a federal government deadline of May 1, 2002. This, according to the National Association of Broadcasters.

In a report to the Federal Communications Commission, the industry group said that many of those that won't make the deadline are waiting for equipment to be delivered and expect to have digital broadcasts on the air in the months afterward. But some stations in smaller markets are having a hard time paying for the upgrade, the association says.

Right now, most home television sets in use receive only analog signals. But congress has mandated that broadcasters must give up their analog channels to the government by 2006. As a result, there are concerns that consumers won't have made the costly upgrade to
televisions that can receive digital signals by that date. (News release)

**
HAM RADIO IN SPACE: ISS TALKS TO WISCONSIN SCHOOL

Students at Tremper High School in Kenosha, Wisconsin, asked questions the morning of November 6th of the International Space Station Expedition Three Commander Frank Culbertson that got some very personal responses. Culbertson told the teens that he certainly did not expect as much to be happening on Earth during his stay at the orbital outpost, in obvious reference to terrorist attacks. He said that he wished that he could have been with his family during the most stressful times, but he took comfort in knowing that they were strong, and could get by.

On a brighter note, Culbertson said that his current mission is the high point of his space career. He added that he hoped some of students at Tremper High can do the same thing some day.

In response to another question, Culbertson said that he hoped to see cheaper access to space, and hoped for a manned Mars mission and a permanent lunar base during his lifetime.

The contact was an event facilitated through the Amateur Radio on the International Space Station project, sponsored by AMSAT, ARRL and NASA. In all, fourteen students asked one question each during the contact. About 60 other students and a few teachers witnessed the event in person, while M-S-N-B-C carried the audio portion of the contact live over its website. (ARISS release by Gene Chapline, K5YFL)

**

HAM RADIO IN SPACE: NEW ANTENNAS HEADING TOWARD THE ISS

The International Space Station could have a new set of ham band antennas by early in 2002. The antennas are expected to be trtansported to te ISS this month and installed around the perimeter of the Service Module. This will give the I-S-S ham station high frequency, VHF, UHF and microwave capabilities.

The most interesting of all the new antennas is the high frequency array. Its made up of a two and one half meter long flexable tape that will definately work on 10 meters and holds posibilities on 15 and 20 as well. This particular antenna was a joint effort of the Italian, Russian and United States ARISS design team. (ARISS)

**

HAM RADIO IN SPACE: STARSHINE NEEDS TELEMETRY REPORTS

Ground controllers of the Starshine-3 ham radio satellite are seeking volunteer amateur radio operators and others worldwide to monitor and report telemetry from the recently-launched satellite. Starshine 3 transmits 9600 bit per second AX-25 protocol packet telemetry every 2 minutes on 145.825 MHz.

The satellite’s primary mission is to involve school children from around the world in space and radio sciences. Students should be able visually track the satellite during morning and evening passes by recording its telltale mirror flashes and reporting their observations to Project Starshine. To report Starshine 3 telemetry or to learn more about it, please visit http://epulation.com/starshine/starshine3. More information about Project Starshine is available at www.azinet.com/starshine. (STARSHINE vis AMSAT-NA)

**

CONTESTS: THE PSK-31 DEATH MATCH

Call it a truly different kind of contest. This, as the Michigan DX Association announces that it will sponsor the PSK-31 Death Match. The dates are December 7th through the 9th and a trophy will be awarded to the highest overall score. Just what is the PSK-31 Death Match and what are its rules? You can find out on the web at www.geocities.com/mdxa1/death match.html (Internet release)

**

DX

In DX, a big surprise for 6 meter enthuiasts. Jeramy boot, G4NJH, has the details:

--

A combination of high solar flux and low magnetic activity provided world-wide F-layer propagation on 50MHz during the week up to the 4th of November. Strong backscatter and the occasional Sporadic E openings meant that all continents were worked from the UK on 50MHz during the course of the week.

On Tuesday, the 6th of November, a solar coronal mass ejection hit the earth's magnetic field at 0150UTC and triggered widespread auroras. Observers as far south as central California reported seeing vivid displays of the Northern Lights, although we had no reports of visible auroras in the UK at the time of compiling this bulletin.

--

As we go to air 6 meters remains a worldwide D-X paradise. More information is on the web at www.rsgb.org and on the subscription VHF reflector. (G4NJH)

In other D-X news word that two Spanish operators will be in Cameroon between the 11th and 23rd of November. The pair will be working on the installation of HF and VHF stations in hospitals and missions. In their spare time they will be on the air as TJ2RSF on the High Frequenvcy bands. Activity will be mainly SSB, with some RTTY and CW. (VHF Reflector)

And Chris Post, N3SIG, who is a Firefighter and EMT in the United States Antarctic Program at the McMurdo Station on Ross Island is now active as KC4/N3SIG until March 2002. Post told the Ohio Penn D-X newsletter that he will be active every other day starting around 2000-2100 Eastern U.S. time primerally using SSB on 20, 18 and 15 meters. All QSL cards go to AI3D and be sure to include an S-A-S-E. (OPDX)

**

THAT FINAL ITEM: HAM RADIO IN LEBANON

And finally this week, a look at how ham radio is able to survive in Lebanon. Q-News Graham Kemp, VK4BB, looks at the nation, its licensing system and its Amateur Radio Community:

--
Wireless communication was first introduced in Lebanon by French soldiers during the French mandate; consequently, a number of curious and interested Lebanese took on this hobby and started operating under a permit and a call sign provided by the French Authorities.

With Lebanon gaining its independence in 1943, the Ministry of Post and Telecommunications become the issuer of the license to own and operate an Amateur station.

In 2000, there were 230 licensed ham operators in Lebanon, and anyone over 18 years is eligible to acquire a radio amateur license.

Maximum authorised transmitting power is 1,000 watts. The exam is prepared by RAL and is supervised by governmental officials. It comes in three separate parts, which involve multiple choice questions which include theoretical questions on electronics, antennas, and other technical information. Also rules and regulations of amateur radio, and the laws of communication. Also, a test on how to establish a vocal contact over the air.

Their Society is the RAL-- the Radio Amateurs of Lebanon which, like ours represent him or her before the Local authorities and the IARU

From Q-News Australia, I’m Graham Kemp, VK4BB, reporting for the Amateur Radio Newsline.

--

Truly an amazing story of how ham radio can survive even in the midst of geo-political problems that have plagued the Middle East for as long as man can remember. (Q-News)

Hi,

>Hey , did you never hear of a shorted capacitor?

No, I never heard of an X- or Y-rated capacitor shorting. They're designed not to. Well, strictly, I believe they're designed to self-clear without catching fire, but the result is the same: they don't fail shorted.

That's not the experience I had. I just put in a new LUTRON model
FS-5F today, to see if it'd reduce the RF noise. It did not. S9
noise interference before and after the swap. My receiver is an ICOM
R-70, with the antenna is in the attic and therefore close to house
wiring. Maybe that accounts for the difference between your situation
and mine. Seems to me, that whether the RF is radiating directly from

the device, or reradiating from the house wiring is a moot point. Are there any other models out there that are known to be better? How about the ones with three speeds vice continuous speed control? I just assume replace it entirely with an ON/OFF switch, but the wife likes the dimmers ;-)

Going across the line with a bypass cap will have minimal effect. The radiation is common mode, and filtering across the line won't do much. If you think about it, the dimmer serves as a RF noise generator, and the AC lines on either side becomes the legs of a random length dipole. Effectively filtering on of these will require caps across the poles (switch), and series chokes to form a LPF that can brute force filter the RF energy, and perhaps caps across the line as well.

An "X- or Y-rated" capacitor was not mentioned, by me,
or Hagstar (to whom I addressed my post, or Glen to whom
Hagstar was responding, or Robert (the original poster) to whom
Glen was replying.

I take it you are willing to bet your life on an "X- rated or Y-rated"
capacitor, whatever that is.

What really surprises me about this thread is that no one mentioned
replacing the line cord with a 3 prong, grounding style cord and
plug, and connecting the ground to the metal part of the lamp.
(Hopefully it was mentioned, and I just missed it.) It solves the
problem safely.

I don't think it's acutally an acronym. (but I'm sure someone will come up with something it stands for!)

It means a pirate, a station who isn't where he says he is. For example, if I were to decide to fire up on 14.195 calling CQ with the call "VP6DS/d Ducie Island" this morning, I'd be a Slim. (and a lid and a few dozen other expletives!)

Phil wrote: I see this acronym (SLIM) often, what does it mean?
==========

Phil tis ham slang for a phony or pretender -- not an acronym

>From Merriam-Websters
Main Entry: 1slim
Pronunciation: 'slim
Function: adjective
Inflected Form(s): slimï¿½mer; slimï¿½mest
Etymology: Dutch, bad, inferior, from Middle Dutch
slimp crooked,
bad; akin to Middle High German slimp awry
Date: 1657
1 : of small diameter or thickness in proportion to

the height or length :
SLENDER
2 a : MEAN, WORTHLESS b : ADROIT, CRAFTY
3 a : inferior in quality or amount : SLIGHT b :
SCANTY, SMALL <a
slim chance>
So probably crooked and crafty huh!!
==========
According to W6YOO
Hi Rod,

Well, I believe the following definitions to be accurate but as you
know,on the Internet, you'll always
get an argument:

Slim - Someone pretending to be a DX station, usually rare, that is
supposed to be on the air. For
example, someone in southern Argentina pretending to be Heard Island,
VK0IR

Pirate - Someone using an existing callsign and operating on the air,
e.g. claiming to be WA6YOO/4
on an North Carolina island group. What would happen is that I would
suddenly be surprised by
receiving a number of QSL cards and wonder "What Happened?"

Bootlegger - Someone, usually not a Ham but a wannabe, making up a
callsign, one usually not in
the callbook, and getting on the air. Sometimes it is someone who
already bought a radio, took the

test and flunked, and then gets on the air anyway.

These definitions are somewhat flexible because some of their aspects might be combined.

73 W6YOO
==========

Another legend, myth, etc. from years ago -- is a guy who was conducting

a phoney operation -- sed he was on volcanic island which had just arisen from the sea. When asked his handle -- as you can guess - he replied -- SLIM
==========
AC6V Humor - From http://ac6v.com/humor.htm

Avast and QRZ From P1RTE on Charcoal Island - Handle here is Slim

Hey Slim where is Charcoal Island Located????

Avast Matey - tis in the Barbecues

Source record: 15388

In the continuing saga of the pursuit of a qsl from 5R8EE let me share this.

QRZ.COM lists FR5EL as manager. They give the following address for him:

MICHAEL HOARAU, FR5EL
P.O. BOX 87
LE TAMPON CEDEX, LA REUNION F-97832,
FRANCE

This does not work.

QRZ also list a "direct" route of:

MICHAEL HOARAU, 5R8EE
P.O. BOX 87 (IN MADAGASCAR, BUT SEND TO REUNION VIA FRANCE)
LE TAMPON CEDEX, LA REUNION F-97832 FRANCE,
MADAGASCAR

That doesn't work.

Buckmaster also lists FR5EL as manager with the following address:

MICHEL HOARAU, FR5EL
58 BD CHARLES BEAUDELAIRE TROIS MARES
LE TAMPON, 97430
REUNION IS.

This doesn't work either, but at least this one actually made it to Reunion Isl.
before being returned. I guess that's progress.

Sure hope G3SWH comes through with 5R8GZ and 5R8HA.

OJ5E is not M�rket Reef. I'm certain that it was just plain OH. We had a domestic WRTC warmup competition here in Finland on 3-11-01 when some stations were allowed to use OJ prefix. OJ5 is not M�rket only OJ0 is. If I remember correctly all the QSL's are handled through buro.

DX'ers

I'm trying to figure out old what to do with some older entries in my logging program as it relates to DXCC and the old Soviet Union. Prior to 1991 I had all the old Soviet Union republics confirmed under their old prefixes.

Question #1: Do contacts made prior to 1991 count towards current DXCC listing of the new independent counties? For example, I have a QSL card for Armenia prior to 1991 under the old UG prefix. After 1991 the indepedent republic of Armenia became prefix EK. Is EK a new country for me or do all the old prior UG contacts count for EK?

Question #2: What is the best thing for me to do with my logging software? Should I change my logging database to reflect UG as an inactive DXCC country and add EK as a seperate new country or just change the prefix from UG to EK?

As a side note, I noticed that the current DXCC deleted countries list on th ARRL website mentions Czechoslovakia is a deleted country and the new countries of Czech Republic and Slovak Republic have been added. Seems like the old Soviet Union should be handled the same way for the same reasons. But the USSR republics aren't mentioned on the DXCC deleted list.

I realize I should have asked these questions 10 years ago but I've been inactive for a while.... ;-)

Thanks for any guidance you might be able to give me.

The old UG count as EK and vice-versa.

Depends on your logging software's capabilities. I use DX4WIN, which allows callsign exceptions, as well as start and end date for various prefixes. This way an oddball call can be difined correctly, and a prefix no longer used, but still an active counter on the DXCC list can also be defined correctly.

Yes.

> Question #2: What is the best thing for me to do with my logging
> software? Should I change my logging database to reflect UG as an
> inactive DXCC country and add EK as a seperate new country or just
> change the prefix from UG to EK?

It depends on what software you use and what its capabilities are. If you can change the country-prefix mapping in it, do it. Normally s/w vendors offer free or inexpensive updates that include DXCC changes, so look it up on the Web.

> As a side note, I noticed that the current DXCC deleted countries list

> the new countries of Czech Republic and Slovak Republic have been
> added. Seems like the old Soviet Union should be handled the same way
> for the same reasons. But the USSR republics aren't mentioned on the
> DXCC deleted list.

Negative. Nothing changed in the status of all the ex-USSR countries because all of them had been separate DXCC entities even before the country broke apart, i.e. there was no "Soviet Union" DXCC like YU and OK were (notice the DXCC difference between the two latter examples as well).

Hello Brent,
I would suggest you take a look at the W9INN MPD-5C dipole. It has resonance on 10-15-20-40-80m and comes in either 78ft length or 87 ft length. The longer version has a bit more bandwidth on the lower bands. It is rated for 1500w pep and comes assembled and pre-tuned to your specs. I have had the 78ft version up at 54ft for over 5 years with no trouble and 299 DXCC countries to boot....it works well.

The official W9INN page is at the web site listed below. There are illustrations, real-world measured bandwidth data and contact info.

AMATEUR RADIO NEWSLINE(tm) REPORT #1267 – NOV. 23, 2001

Amateur Radio Newsline report number 1267 with a release date of
Friday, November 23rd, 2001 to follow in 5-4-3-2-1.

The following is a Q-S-T. Six meters suprises the world and the night of the meteors are first on this weeks Amateur Radio Newsline report number 1267 coming your way right now.

(Billboard Cart Here)

**

THE BIG 6 METER OPENING

--
Cold Open Audio Here: N6KNW working Japan on 6 meters
--

That’s Brad Marckwardt, N6KNW, in Santa Clarita California working Japan on Saturday November 17th. No big deal you say? Well the band was 6 meters. It was the wrong time of the year for this kind of D-X. And less we forget, while Brad was working Japan, other hams were making equally amazing 6 meter D-X contacts like California to New York and Alaska to the lower 48. Take a listen:

--
Audio Here: Alaska to California, New York to California
--

The 6 meter DX was not limited to North America. Reports came in from around the world of similar single, double and even triple hop F 2 contacts.

From Costa Rica, Carlos Diez, TI5KD, reports that he started out the day working Europeans including GW4VEQ at about 13:50 UTC. Ten hours later, at 23:05 UTC Carlos crossed the Pacific with his signal, contacting JA4MBM for his first ever Costa Rica to Japan short path QSO.

The experts say that that the current solar cycle peaked in 2000 and that we are on the downside. But it appears that someone forgot to tell the VHF and UHF bands that its not time for D-X. It simply keeps rolling in on 6 meters and above and seems to get better and better with each opening.

Our thanks to Dave Booth, KC6WFS, who took time out from working some of the DX to make the recordings you heard in this report. And less we forget, the six meter band is still opening up almost every day – at least as this newscast is being prepared. (ARNewsline (tm))

**

THE ROCKS IN THE SKY: THE LEONID METEORS AND HAM RADIO

As if the 6 meter opening were not enough to bring bragging rights to many V-H-F enthusiasts, a few hours later came the light show in the sky. It was the Leonid Meteor Shower and hams who enjoy bouncing their signals off the ionized trails of meteors were not disappointed. One of them was Joe Hannigan. WL7M in Fritz Creek Alaska heard commenting during another 6 meter F2 opening:

--
Sound here
--

We do not have any of the sounds of the contacts. Much of it is high speed C-W or computerized using WSJT. But we do have some reports courtesy of the VHF Reflector.

Lets start with Sam Horton, KD4ESV of Bradenton Florida. He says that he was operating from grid square E L 87. Horton says that by 18:23 UTC he had worked twelve states including Alaska.

But that’s not all. Tim Marek, K7XC, of Fallon Nevada, operating as a Rover from grid square DM09 had one of the best meteor scatter reports. We don’t have time to cover it all, but here are a few stations that he worked starting with KB5XC in DM65, then AA7A in Arizona, K7MI in grid CN73 and W7USB in DN17. Tim added that W1IPL in grid DN62 went in the log along with K5JL in EM15 at about 03:23 AM local time.

K7XC says that all of these contacts were made mobile on 2 meters. Marek used an Icom IC 706 Mark 2 G transceiver driving a 170 watt power amplifier into a yagi antenna on his rover vehicle. Marek says that he spent the entire night chasing QSO’s on the space borne rocks. He wrote his report at about 6 a-m local time adding that he intended to crawl into bed and planned to sleep till noon. That is, if his pet cat would let him. (ARNewsline(tm))

**

HAM RADIO IN SPACE: HAPPY BIRTHDAY AO-40

The AMSAT Oscar 40 ham radio satellite has celebrated its first year in space. Then called Phase 3 D, the satellite was launched on November 16, 2000 aboard an Ariane 5 booster rocket from Kourou, French Guiana.

Even though the bird suffered some major damage during an orbital transfer maneuver, it has survived. After several months of work by the team at AMSAT Germany, transponder operation started last May 5th. At that time the U-band and L1-band uplinks were connected to the S-2 transmitter passband downlink via the satellites on-board Matrix switch. Since then, hams on Earth have made hundreds of contacts though the satellite.

AO-40 is currently in a long period during in which the Earth eclipses the Sun near perigee. The eclipses actually began about August 28th, and will rapidly increase in length. They will continue well into June 2002. For the current transponder operating schedule visit:

http://www.amsat-dl.org/journal/adlj-p3d.htm (AMSAT-NA)

BREAK 1

This is ham radio news coming to you from the United States of America. We are the Amateur Radio Newsline, heard on bulletin stations around the world, and welcoming the Douglas County Amateur Radio Club’s W0UK serving Lawrence, Kansas.

(5 sec pause here)

**

AMERICA AT WAR: FCC GETTYSBURG CHANGES MAIL ADDRESS

We told you it might happen and it has. At least for package deliveries. This, as the FCC’s Gettysburg, Pennsylvania office, announces that it has moved its mail handling facilities off-site.

The reason is the same as reported for FCC in Washington and CQ Magazine. Simply a precaution in case some of the strange people that we all call terrorists decide to target the Gettysburg licensing facility.

Its all fairly simple. Effective immediately, all overnight couriers, United Parcel Service and Federal Express deliveries have to go to a new location. That address is the FCC Gettysburg, Rear entrance, 35 York Street, Gettysburg, PA 17325.

The change does not affect US Postal Service deliveries. At least not yet. They will continue to be accepted at the office's physical address on Fairfield Road and diverted to the off-site mailroom. (FCC)

**

AMERICA AT WAR: VANITY LICENSING ON HOLD

I’m Henry Feinberg, K2SSQ, with late breaking news about the Amateur Radio Vanity Call Sign program which is now, effectively, on hold. This, after the recently announced changes in mail handling procedures at the FCC's Gettysburg, Pennsylvania license processing facility.

As reported, mail directed to the FCC Gettysburg office was being held pending the start of special handling precautions to address any biohazards. Now that ARRL has issued a further bulletin on the matter. It quotes the ARRL’s VEC Manager Bart Jahnke, W9JJ. He says that the FCC has processed vanity applications received through October 14. But says Jhanke, vanity applications received after that date remain on hold for now.

There is some good news. The FCC is tracking the receipt date for each piece of mail. Because the agency gives equal priority to paper and electronic applications, all vanity processing was being suspended until the mail situation is resolved. Once the FCC begins opening its backlog of mail, most applications will probably be processed in about 18 days based on date

received.

But there could still be problems for another group of filers. These are hams who waited till near the end of the two year grace period on renewing ham radio licenses. Jahnke says applications from those filing for renewal near the end of their two-year grace period will only be accepted for processing if they get to the FCC before the grace period expires.

For the Amateur Radio Newsline, I'm Henry Freinberg, K2SSQ. (ARRL Bulletin, FCC)

**

AMERICA AT WAR: THE PSYCHOLOGICAL SIDE OF RADIO

The media is not only reporting the war against terrorism. According to the Media Network e-newsletter, it has also become heavily involved.

Here in the United States, media organizations like NBC were the first to be targeted by those spreading the anthrax virus. And the e-newsletter says that in Afghanistan, silencing the Taliban's voice and putting in a replacement was one of the first aims of the US led military campaign. That plan seems to be succeeding, with the restoration of "normal" radio services in the key city of Mazar-e-Sharif and a few days later in Kabul itself.

In another development, the psychological warfare broadcasts of "Information Radio" have only been heard irregularly on shortwave. Media Network says that it has contacted those responsible for running the operation to find out its current status.

As soon as Media Network get some updated information, it will be posted at http://www.rnw.nl/realradio/features/html/afghanistan010917.html (Media Network)

**

ENFORCEMENT: FCC VS. RF ELECTRONICS- AN EPILOGUE

The FCC says that it is thanking the owner of R-F Electronics for his decision to stop selling non certified amplifier kits and says that its closing the matter. But the owner of the company does not appear to be ready to say "you're welcome." In fact, Sidney Lee Martin, KD4YBC, is using the World Wide Web to launch a verbal counter attack against the regulatory agency. Amateur Radio Newsline's David Black, KB4KCH, visited the spot in cyberspace and has the rest of the story:

--

Sidney Lee Martin ran afoul of the FCC for allegedly selling illegal power amplifiers for use on amateur HF and 6 meter frequencies. On September 19th, the Commission's Riley Hollingsworth wrote to Martin, telling him to stop the sales -- or face enforcement action.

With the threat of being taken to court and having his amateur radio license put in jeopardy, Martin shut his sales operation down September 25th. And he's

taking a few verbal shots at the Commission.

Accusing the agency of being on a jihad, Martin says the FCC attacked and destroyed his business while letting another company continue selling non-certified amplifier kits. Martin says he will use his former business website to provide updates and comments on his tangle with the Commission. He's urging amateurs to ask questions and learn the truth.

In the meantime, the FCC appears to be closing the matter, at least as far as Martin's business is concerned. In an October first letter to Martin, the FCC's Hollingsworth notes Martin's comments that he has stopped selling non-certified equipment and thanks him for his cooperation.

The letter closes with Hollingsworth saying the Commission will review information Martin supplied about other sources selling non-certified equipment.

From Birmingham Alabama, I’m David Black, KB4KCH, reporting for the Amateur Radio Newsline.

--

If you are interested in seeing what Martin has to say about the FCC, take your web browser over to http://members.aol.com/rfelectron/rfelect.htm (ARNewsline)

**

ENFORCEMENT DOWN UNDER: A VERY BUSY ACA

The United States is not the only place where the government has been actively enforcing its radio regulations. So has the Australian Communications Authority -- or ACA. And the figures for the past year are now in and Q-News Graham Kemp, VK4BB, has them:

--

From this years ACA Annual Report we learn that this year, 12 penalties in lieu of prosecution were issued, three are under consideration by the ACA for withdrawal, seven were paid totalling $6,270 Australian, and two went to prosecution. In addition, prosecution proceedings without issuing penalties in lieu were instigated against six other persons for a total of 22 offenses.

During the year, the ACA conducted 1,200 Radiocommunications licence investigations, resulting in the issue of 267 verbal and 557 written warnings. No licence suspensions or cancellation actions were undertaken this year.

The ACA also investigated 781 complaints of interference to Radiocommunications services, and search and rescue authorities were assisted with the location of approximately 104 emergency
position-indicating radio beacons. Although careless handling or faults caused many of these, 21 beacons had been maliciously activated with the intent of disrupting emergency services.

From Q-News Australia, I’m Graham Kemp, VK4BB, reporting for the Amateur Radio Newsline.

--

Be it the United States, Australia or anywhere else, the same words always apply. Don’t do the crime if you cant pay the fine. (Q-News, ACA)

**

ARRL NEWS: THE BIG PROJECT EXPANDS

Some good news out of Newington. This, with word from the ARRL Schools wishing to take part in the Big Project can contact Jerry Hill, KH6HU at ARRL Headquarters, Field and Education Section, 225 Main St., Newington Connecticut, 06111. You can also find them in cyberspace at www.arrl.org. (ARRL)

**

ARRL NEWS: THE 2001 ARRL DIVISIONAL ELECTIONS

The results are in for the fall 2001 ARRL divisional elections and there are really no big surprises. In the Southeastern Division, Georgia Section Manager Sandy Donahue, W4RU, of Atlanta, Georgia, outpolled West Central Florida Assistant Section Manager Paul Toth, NA4AR, of Seminole, Florida by 478 votes. The final count was Donahue at 2783 and Toth at 2305. Both were contending for the seat being vacated by Vice Director Evelyn Gauzens, W4WYR, who decided not to seek a new term after 22 years of service.

In the Southwestern Division, San Diego Section Manager Tuck Miller, NZ6T, of National City, California, defeated Ned Stearns, AA7A, of Scottsdale, Arizona. The vote was 2485 to 2208. Miller assumes the vice director's position being vacated by Art Goddard, W6XD, who ran unopposed for director.

Last but by no means least, incumbent Pacific Division Vice Director Bob Vallio, W6RGG, of Castro Valley, California garnered 1924 votes to beat back a challenge by Gerald D. Griffin, K6MD, of Pacific Grove, California. Griffin polled 1225 votes. All those elected officially take office on January 1st, 2002. (ARRL)

**

HAM INDUSTRY NEWS: ELECRAFT IMPROVES THE K1

Elecraft's very popular K 1 compact CW transceiver has just became a four-bander. In addition to the 2-band version, the rig is now available with a single band-switched module that covers 40, 30, 20, and either 17 or 15 meters. No hardware or firmware changes are necessary to use the 4-band module and the module can also be ordered as an option to upgrade existing K 1 transceivers. For more information or to order, visit www.elecraft.com or e-mail sales@ elecraft.com. (Elecraft release)

**

BREAK 2

News never takes a vacation and neither do we. Coming to you from the United States of America, this is the Amateur Radio Newsline with links to the world at our only official website -- www.arnewsline.org.

**

COMMUNICATIONS BUSINESS: MORE LAYOFFS AT MOTOROLA

High tech giant Motorola has announced that it is reducing its work force by another 7,000 jobs, including an unspecified number of layoffs. The announcement came a day after the telecommunications giant reported a $1.4 billion loss for the quarter ended September 30.

Faced by a weakened economy and slower industry growth in worldwide cellphone sales, Motorola already this year had announced 32,000 job cuts to a work force that stood at 147,000 last December. That would increase the total cuts to 39,000 and trim the work force to approximately 108,000 by the end of the year - a reduction of about 26 percent. A company spokesperson indicated there could be more. (Published news reports)

**

HAMFESTS AND CONVENTIONS: SUPERFEST 2002

The Amateur Electronic Supply 8th annual Superfest open house is now slated for April 5th and 6th 2002 at the AES store in Milwaukee Wisconsin. According to a note from Molly Schreiber of AES, manufacturer representatives will be on hand displaying their wares and several forums are being scheduled. And as in years past, ham radio clubs are being invited to participate with free display space. Information on this and more is at the AES Superfest website. Its a long URL. Its in cyberspace at /www.aesham.com/superfest/sf.html. (AES Release)

**

RADIO PUBLICATIONS: DEPARTURE MESSAGE

CW aficionados attention. This one is for you. It’s a new book called Departure Message by Charles Lunsford that tells the story of an enlisted aircrew member flying as an Airborne Radio Operator in the 1950s.

Lunsford’s book traces one of the last of the Radio Operators trained in International Morse Code and who flew in the last aircraft purchased by the United States Air Force which had a Morse key as standard equipment. The book also describes some of the radio and radar aids of the time and the first top-secret transponders for identification.

Departure Message is published on-line by greatunpublished.com and is available in paperback or for download. More information is on the web at greatunpublished.com. (Charles Lunsford)

**

EMERGING TECHNOLOGY: APPLE I-POD

Apple Computer has unveiled a revolutionary new portable music player that can hold an entire music collection. It also takes Apple outside its core computer business for the first time in eight years.

The Apple "i-Pod" is the size and shape of a deck of cards, with a small LCD screen and round dial on a white front and a stainless steel back. It holds

about 1,000 songs in the MP3 music format and has a battery life of 8to 10 hours.

The only negative. The “i-Pod” currently will only work with Apple Macintosh computers, but that may change. About 7 million existing Macintoshes have the necessary hardware and software to be compatible with iPod. Apple president Steve Jobs says the company is considering porting it to windows based machines as well. (Apple release)

**

TECHNOLOGY FAILURE: COMPUTER FAILURE AT THE CALTECH USGS EARTHQUAKE MESSAGING SITE

A 5.1 magnitude earthquake near Anza California on October 30th should have generated an almost-immediate e-mail message to all southern California Seismic Network e-mail subscribers. However, this particular message was delayed about seven hours due to a catastrophic network hardware failure that occurred minutes before the shaker. To subscribe to this free and usually reliable reporting service, see http://pasadena.wr.usgs.gov/latest/mailing_lists.html (CGC Communicator)

**

INTERNATIONAL - FRANCE: ARISS-EUROPE QSL ADDRESS

The ARISS-Europe QSL Bureau's address has changed. Effective immediately, all European requests for ARISS QSL cards are to be addressed to AMSAT - France, 14 bis, rue des Gourlis, 92500 Rueil Malmaison, France.

Those applying for a QSL should include a self addressed envelope and two International Reply Coupons to cover the handling cost. The ARISS-Europe QSL Manager is Christophe Candebat, F1MOJ. His email address is F1MOJ@aol.com. (ON1CAU)

**

INTERNATIONAL - AUSTRALIA: VK 80 METER SSB BAND TO BE EXPANDED

The Australian 80-meter SSB 'DX Window', at present limited to a 4-kHz segment around 3798 kHz, is due to be expanded - but not until 2004. Jeramy Boot, G4NJH, has more:

--

The Australian 80-metre SSB 'DX Window', at present limited to a 4-kHz segment around 3798kHz, is due to be expanded - but not until 2004. In Australia, the band 3700 - 3800kHz is presently allocated to the commercial land mobile service, effectively limiting amateur SSB operation to a single frequency. Following an approach by the Wireless Institute of Australia, the Australian Communications Authority has agreed to proceed with a change in the allocation of the band 3776 - 3800kHz. The ACA's intention is to reallocate this band to the amateur service on a primary basis from the 1st of January 2004. Jeramy Boot, G4NJH.

--

Current commercial users of that spectrum won’t be left out in the cold. They will be moved to existing land mobile spectrum adjacent to the new amateur band by the end of December 2003. (RSGB)

**

SPECIAL EVENTS: K7A PEARL HARBOR DAY STATION

Pearl Harbor Day will be celebrated in the ham radio world December 7, 8 and 9, when Special Events Station K7A comes on the air from Phoenix Arizona. K7A will be operational on most High Frequency bands. More information is posted on www.aztenx.org (Superstition ARC)

**

DX

In-D-X, Jim Weidner, K2JXW, who is the founder and president of the Amateur Radio Lighthouse Society announced the groups second annual Lighthouse Christmas Lights QSO Party. The event is scheduled for December 22nd to the 23rd. For more information please visit www.arlhs.com on the world wide web. (News release)

**

THAT FINAL ITEM: VK HAM RADIO IN THE AIR ON THE AIR

And finally this week, the story of the celebration of an old airplane and the part played by ham radio. It was an unusual job for hams. Again, from Australia, Q-News Graham Kemp, VK4BB:

--

VK4's Redcliffe & Districts Radio Club Inc. ran a radio link, at the request of Redcliffe City Councillor Ian Poyitt, from an aircraft to Redcliffe Radio Station 99.7 FM. The Link commemorated the 70th anniversary of the Tiger Moth. There was approximately 100 old aircraft participating in this rare fly-past.

--
Flight Audio Here
--

A hand held scanner's audio was fed directly into the mixing desk. A 2 meter radio using a quarter wave antenna from the aircraft, then a crossband link to take the 2 meter signal from the aircraft and retransmitted this on 70cm using the clubs new Yaesu FT-847.

The flight went off without a hitch with Steve Harris VK4HRS as the Aeronautical Mobile Announcer, having flown for the first time and enjoyed himself immensely.

--

Well done Steve and all at the Redcliffe Club. (Q-News)

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address
is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at
Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

A reminder that the Dayton Amateur Radio Association has opened the nominating period for the 2002 Dayton Hamvention Awards. There are three awards presented each year. They are the Radio Amateur of the Year, Special Achievement, and Technical Excellence.

All amateurs Novice through Extra are eligible. Awards are decided by the Awards Committee, based partially upon the information received. Magazine articles, newsletters, newspaper clippings, videos and the like are appreciated but cannot be returned. The deadline for nominations is January 31, 2002. Nominations can be submitted by US Mail to Post Office Box 964, Dayton Ohio 45401 or by completing the convenient e-form on the web at www.hamvention.org.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, KC5MFA in New Orleans saying God Bless America, 73, and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2001. All rights reserved.

I think it refers to the fact that the op is a Pirate and the chances
of the QSO being good are "SLIM".

Message-ID: <ErpM7.2434$Ju6.713898@news20.bellglobal.com>
Source record: 15413

The origin of the term SLIM is, I believe, as follows:

On a date I cannot recall in the mid-1960s, an operator showed up on 20m CW, identifying himself as 8X8A, claiming he was located on "Cray Island," an island that had just emerged from the ocean floor following a major undersea volcanic event. The operator said his name was "Slim."

Huge pileups endured for a few days, then "Slim" was exposed as a pirate and he disappeared from the bands.

Ever since, Pirates have been called "Slim."

What made "Slim's" claim even partly credible in the first place was the emergence of Surtsey, an island near Iceland in (I think) 1964. Surtsey rose from the floor of the Atlantic as a result of undersea volcanic activity. It was a major news event at the time.

I never heard any of this at the time as I was four years old and not yet a ham. I read the reports in QSTs and 73 Magazine (when that magazine was worth the paper it was printed on) of the time.

I have been using this site for some time now, and I want to thank the good people behind it. Not only have I been able to add impressively to my DXCC score, but it is great that someone tells the wonderfully skilled and considerate DXer's where the rare ones are so they know what frequency to tune their amplifier on and where to entertain the rest of us with assorted sound effects. It also makes for a great gathering place for the megacycle cops with their incessant "up up"s.

This rant has been successful in dropping my blood pressure by a few points. Thank you for the bandwidth.

DX Summit and relatives really do provide a valuable service. They collect
all the "what expeditions are on now" information in one place, and they
allow you to get the WWV numbers without waiting for 18 after the hour.

As for actually trying to work anything that's been spotted, on the other
hand...

Hi Guys:

I've been using DX Summit for a few weeks now and I have no problems with it. The tune up nuts were here long before the internet was. It is also not an "ugly american" thing either. I've spent some time in Germany and listened to pileups from that end and they are just the same as from this end, and I couldn't hear one USA signal. Bad OP's are all over the world, and they are not going away.
Anyway tonight I worked 2 new ones for me from spots on DX Summit, both on my first call. I have only a modest station, TS450sat, Denton MLA-1200 amp and a Tennadyne T6 log periodic at 40', I listen, pick my spot and make my call, 80% of the time I get through on my first call.
Life is good...

Pretty close to mine, I have only slight advantage. 15 or so year old
Icom 735 to an A3 at 20 or so feet. When most are giving 59 on 20 Im
hearing echo/flutter because my beam is not near as high as it should
be. Rarely do I break big pileups unless Im very lucky and he asks for
last two of QZ or Somthing Zulu then Ill try.

that it Modest.

I live about 3 miles from a station with 3 or 4 180' towers (I forget how many) plus a few shorter ones, with yagis all over them and legal limit amps on all bands. That is a non-modest station. When they come on, my front end groans.

The T-6 is only a 12' boom antenna, its smaller than most tri banders. Its feed with 145' of Davis RF bury flex 9914. I never cheap out on feed line. I wish I had bought the T-8 but I think that the T-6 will blow the pants off most normal tri banders.
Also your FT-1000 is a better radio than mine, I wish I had one.

I put the Log up July 28 this year, I have a 142 countries so far, (avg. 1 new country a day) with 34 of them confirmed.

My plans for the station in the future, get a better radio, (TS-20000 maybe), get a legal limit amp, take the township to court so I can put the antenna up at 48 feet with my 2/440 vertical on top. The township limits the height of all structures to 40' so I can't put anything above the T-6, replace the bury flex with hard line. Then I will have a non-modest station too.

Yes and not bad. You need a couple of $$$'s and send it International
registered mail. wait about 6 months and you should have a card. From
time to time a group of people get together to send a batch of cards to
Abu backer to help defray costs.

However, be aware of the following (from the Ohio/Penn DX Bulletin):

5A1A - Abubaker Alzway; he will be using the same direct QSL
information until he goes to Germany in the next few weeks.
So, he will announce his new German address later. Also, any
QSL sent to his address in Libya will be answered 100% while
he is moving to Germany.

Peter,

What "vertical" do you use?
Multiband, linear loaded, trapped, homebrew, wire, with tuner...

Just curious...
de Franki ON5ZO

152 countries CW in just under 10 months, with TS-850SAT barefoot and:
* an "inv V" dipole for 20m CW and a tuner
* since 3 weeks: 3el monobander by ON4BAI for 10m @ 8m high (high Q for 100kc of CW bandportion)
* since yesterday: homebrew vertical for 30m with 44 radials but 100 planned...
* this is it because my landlord / dad is already going crazy!

It's a Cushcraft AP8A 8 band lambda 1/4 vertical located on top of an
appartment building in downtown Berlin, about 25m above
streetlevel. About 30 radials of different length, one of them for 80m.

What are people using for CAT control of this radio? I would _LIKE_ to have a computer screen that has a radio face and allows me to control the radio. I would also like to see if there is a program that will allow me to watch Telnet packetcluster.

Is there such a thing?

Thanks!

Kent, K9EZ

Hi Kent!

I don't have any logs or info, but boy that really brings back some memories. I worked KZ5DON back in my novice, early General class days, 1977-1978 and I can't recall the gentleman's name but I do remember he was a fireman in the Air Force I believe.

Will have to keep an eye on this thread. HI!

No, we referred to them as "AC rated"- as I recall this was clearly spelled out my Robert C. in the (quoted) post. I follow your logic in all this, I'm not sure I understand how I you're suggesting we should modify all of the numerous radios that came with such bypass caps *from the factory*. Do you simply leave them out ?

AMATEUR RADIO NEWSLINE(tm) REPORT #1268 - NOV 30, 2001

Amateur Radio Newsline report number 1268 with a release date of
Friday, November 30th, 2001 to follow in 5-4-3-2-1.

The following is a Q-S-T. A enforcement issue involving a contest station and lots of news on ham radio in space are first on this weeks Amateur Radio Newsline report number 1268 coming your way right now.

(Billboard Cart Here)

**

ENFORCEMENT: SPLIT FREQUENCY OPERATION BRINGS INTERFERENCE WARNING NOTICE FROM THE FCC

If you are operating split frequency and another ham calls you on the phone to tell you that you are interfering with his QSO, listen to what he or she says. It could save you from getting a citation from the FCC. This advice comes from many operators after the FCC's chief ham radio rules enforcer Riley Hollingsworth says he's letting stand a Warning Notice he sent to a Pennsylvania radio amateur after receiving allegations of deliberate interference that took place during a contest.

--
Hollingsworth: "We reaffirmed our Warning Letter to Joseph Brue, K3NM, of Pennsylvania in the case of interference he caused when operating split on 40 meters during a recent contest."
--

The background on this story is quite complicated and will take a few minutes to explain it in detail. This is because it is very important to any ham who operates spit frequency in a contest or while chasing D-X.

The issues involves Joseph Brue, K3NM. He was sent the Warning Notice on September 12th after a Louisiana ham named John King, K5PGW, officially complained about a September 9 incident on 40 meter SSB. King claims that K3NM was operating split mode on during the Worked All Europe Contest. King says that during part of that contest period he was in QSO with Roy Ezell, K9ROY, in Kentucky when K3NM came on frequency. King says that K3NM did not bother to ask if the frequency was clear before beginning to call C-Q contest.

King says that he and K9ROY attempted to contact the operator at K3NM and alert him about the QRM. Unfortunately. he was listening outside the US phone band. Since neither King or Ezell could reach K3NM by radio, K9ROY reverted to an older form of communication. He telephoned Brue, to let him know that his station was interfering with his contact and asking him to move. In fact, King

claims that there were two calls made to K3NM but that station never did change frequency.

And here is where it all gets a bit more complex. You see, the person operating K3NM’s station at the time of the incident was not Joseph Brue. Rather a guest in the person of the Matt Vanni, callsign LU9AY. And it was Vanni who first responded to the FCC. He said that he could not hear K5PGW or K9ROY. So, even though he acknowledged the phone calls, he continued operating the station on the same transmit frequency. He also told the FCC that he always monitors his transmit frequency whenever he operates split frequency. Brue later confirmed Vanni's version of what happened to the FCC. But he also acknowledged receiving the two telephone calls from the complaining hams.

So why issue a warning letter? Hollingsworth explains it in the reaffirmation message itself. His key words to Brue are these:

"The fact remains, however, that both you and Vanni had notice, directly from the complainant operator in two separate telephone calls, that your station was indeed interfering with specific ongoing communications."

Hollingsworth added that based on the phone calls from Ezell that it was not good Amateur practice for the K3NM operators to ignore the complainant and continue operating the station. At least not without a good faith attempt at compromise or taking corrective action.

And the bottom line for all hams may be what Hollingsworth wrote in the original September 12th letter to Brue. There he said that Amateurs are responsible for taking steps to make sure they do not interfere with ongoing communications, and contest participants have no greater rights to any specific frequency than other hams. (RAIN, FCC)

**

RADIO LAW: TACOMA BANS NON FCC CERTIFIED CB GEAR

Tacoma Washington may be the first city to prohibit Class D 11 meter C-B operators from using non-FCC certified transmitting equipment. Adopted last September 12th but only now becoming widely known, Tacoma City Ordinance 26851 amends Chapter 8.38 of their Municipal Code in two ways. First is Section 8.38.010 which directly prohibits use of non-approved radio equipment by CB’ers. And if a CB’er breaks the new law he or she is subject to Section

8.38.020. This makes using such a radio a misdemeanor punishable to a fine of up to $500, and/or up to 6 month imprisonment.

Tacoma enacted Ordinance 26851 based on an earlier amendment to the Communications Act of 1934, as amended, which was adopted by Congress a couple of years ago. As this was a Congressional action, not an FCC action, any challenges by C-B operators to the new Tacoma local law would have to go through the federal courts. As far as we can determine, the new law is carefully crafted to affect only C-B operators and no other radio operators in the Tacoma area. (Various news sources)

**

LEGAL ISSUES: ANTENNA LAWS WILL BITE SOUTH AFRICAN AMATEURS

Ham radio operators in South Africa have something new to worry about. Expensive antenna regulation and added costs for evaluating an antenna installation. Q-News Graham Kemp has the details:

--

Following a lecture on Antenna regulation and planning, South African Clubs in many provinces have been urged to meet and appoint a mutual provincial representative to work in this field.

Tim Ellam, a Telecommunications lawyer, sketched the situation in Canada but the hams in ZS land soon discovered they are worse off! Amateurs there could soon be paying in access of Rand 10 000 to have a scooping study done before submitting plans for approval.

That is the reason the SARL installed the CPAS committee, a body with members representing each province to monitor development so that timely intervention can put the case for Amateur Radio Towers. This was successfully accomplished in the KwaZulu-Natal.

CPAS now has KZN and Eastern Cape and Western Cape represented. Will the rest of the country wait till it is too late?

--

According to Kemp, Tim Ellam put forward many useful suggestions and dealt extensively the South African situation. For our listeners in South Africa, C.P.A.S. itself is on e-mail at cpas@intekom.co.za (SARL via Q-News)

BREAK 1

This is ham radio news coming to you from the United States of America. we are the Amateur Radio Newsline, heard on great bulletin stations around the world, including the 145.21 MHz repeater serving Andover Minnesota.

(5 sec pause here)

**

HAM RADIO IN SPACE: EXPEDITION 4 CREW ON ITS WAY TO THE ISS

A new crew is headed to the International Space Station and could be there by the time this newscast goes to air. This time a Russian is in command of two Americans and all three have an interest in ham radio. Amateur Radio Newsline’s Roy Neal, K6DUE, gives us some insight into the Expedition 4 crew and what to expect while they are on board the I-S-S.

--

The new crew board the International Space Station plan to work in some hamming between work sessions of their sixteen hour daily schedule. Astronauts Dan Bursch and Carl Walz, both Flight Engineers are KD5PNU and KC5TIE and their commander, Cosmonaut Yuri Onufrienko once spent 193 days on the Mir Space

Station and was on the radio a lot.

They plan to use NA1SS, the amateur station on board the ISS, whenever they get a chance. If they come close to the records set by Frank Culbertson and Susan Helms of the last two station crews, it will be surprising. That's because they have a very ambitious work schedule.

Among other things, they are charged with delivering and installing a huge 356 foot long girder-like truss. They plan at least eight space walks, two of which will be used to install new ham radio antennas outside the space stations crew quarters.

Add a few such things as changing out the stations command and control computers with new, solid state memory units and playing host to two visiting shuttle flights and a Russian Progress taxi mission, plus more than 400 hours of carrying out scientific experiments, and you begin to get the idea. When the Expedition 4 crew comes back to Earth next May..they'll need a rest. Meanwhile, we hams look forward to at least a few contacts with them on 2 meters, via NA1SS, the ham radio station on board.

For the Amateur Radio Newsline, I'm Roy Neal. K6DUE.

--

A new crew is not the only ham radio change taking place on board the International Space Station. According to ARISS Chairman Frank Bauer, KA3HDO the new ham radio antenna system mentioned in Roy's report has been approved for flight and manifested to be flown on the STS-108 flight. Once installed around the perimeter of the Russian Service Module early next year, the new I-S-S ham radio antennas will cover the H-F, VHF, UHF and microwave bands up to 2.4 Gigahertz.

**

HAM RADIO IN SPACE: AMSAT THANKS DONAHUE

Newly elected ARRL Southeastern Division Vice Director Sandy Donahue, W4RU, has received his first award. In fact he got it before the ballots had even been counted.

The recognition came at the recent 2001 AMSAT Symposium awards which included a presentation to in grateful appreciation for work as the ARRL Liaison for the event. W4RU's dedicated service and hard work in this role was also well noted.

**

CONVENTIONS AND HAMFESTS: RSGB STOPS ORGANIZING TRADE SHOWS

The Radio Society of Great Britain says that its no longer going to organize ham radio trade shows. Instead it will participate at conventions organized on a local level. That a major change in policy as we hear from Jeramy Boot, G4NJH:

--

With the continuing success of the RSGB Regional organization it is becoming possible for the RSGB to have a presence at an increasing number of amateur radio events, rallies and trade shows around the country. In view of this enhanced activity, the RSGB has decided that it will no longer itself organize amateur radio trade shows.

The RSGB believes that there is a need for more convention-style meetings where radio amateurs can discuss new techniques and other innovations in seminar-like events and that such events represent a better use of the RSGB's resources.

Jeramy Boot, G4NJH.

--

In other words, the moneys saved can go into other projects aimed at furthering the cause of ham radio in the U-K. (RSGB)

**

CONVENTIONS AND HAMFESTS: GREENFIELD INDIANA

Things are a lot better here in the USA where there’s a hamfest almost every weekend. And Brad Hewson KB9VZL tells Amateur Radio Newsline that the Hancock County Amateur Radio Club Hamfest December 9th from 8 am to 2 p.m. It all happens at the Greenfield Indiana at the Greenfield Central High School with talk-in on the 145.33 MHz W9ATG repeater. For more information please contact Brad by e-mail to kb9vzl@excite.com. (KB9VZL)

**

CONVENTIONS AND HAMFESTS: HAM RADIO UNIVERSITY 2002

New Yorkers attention. Mark down Sunday, January 20, 2002, for the next Ham Radio University session. The first 2002 session will be a part of the ARRL’s New York City and Long Island Section Convention. Sponsored by the Great South Bay Amateur Radio Club, both events will be held at the Babylon Town Hall Annex in North Babylon, Long Island. Ham Radio University 2002 will be a technical education forum featuring twenty one-hour presentations along with special forums geared to the non-ham as well as the experienced Amateur Radio operator. The focus will be hands on, with many demonstrations including emergency communications. For more information, contact Chairman Phil Lewis N2MUN or New York City Long Island Section Manager George Tranos, N2GA at their callbook address. (K2DO)

**

RADIO AT WAR: SHORTWAVE RETURNS TO AFGHANISTAN

A new shortwave radio station is broadcasting to Afghanistan. According to the Media Network e-newsletter, the arrival of Radio Voice of Afghanistan seemed to surprise just about everyone except those behind it. Who are they? As of airtime, they have chosen not to reveal their identity.

It was Glenn Hauser's DX Listening Digest that broke the news to the world. Then a Mexican listener to Radio Netherlands Spanish service, Adolfo Murrieta González, claimed credit for the first logging on November 17th. Clandestine

Radio Watch was soon on the chase as well with Takuya Hirayama of it's Japan Bureau listening in. Hirayama understands Pashto and Dari. He wrote a summary of the broadcast on November 22nd. Read more in the Media Network Afghanistan media dossier at http://www.rnw.nl/realradio/html/afghanistan.html. If you want to listen to the audio sample go to http://www.omroep.nl/cgi-bin/streams?/rnw/medianetwork/rvoa011123.rm (Media Network)

**

RADIO IN THE USA: CLEAR CHANNEL BUYING ACKERLY

The United States largest radio broadcaster, is getting a lot bigger. This as Clear Channel Communications Inc., announces that it is buying the Ackerley Group, which owns billboards and other outdoor advertising as well as radio and television stations.

Clear Channel, operates about 1,180 radio and 18 TV stations in the United States, already is involved in events promotion and billboard advertising. It is paying about $500 million in stock to acquire Ackerly. (Broadcast Weekly)

**

NOAA WEATHER RADIO: CRAIG AND DONNA NOT MUCH BETTER THAN PERFECT PAUL

Two well respected broadcasters who also happen to be ham radio operators have voiced their opinions on the new voices tapped by the National Weather Service to replace the not so perfect -- Perfect Paul. For those not aware, Perfect Paul is the nickname given to that mechanical sounding computerized voice that currently voices NOAA Weather Radio. Take a listen:

--
Perfect Paul Audio Here
--

The closest thing to it our world of Amateur Radio are the automated voices heard on many repeaters. You know, those announcements that say this is the W-A-3-such and such repeater. The ones that users are always complaining about.

In the case of Perfect Paul, the NOAA Radio received so many complaints that he will soon be replaced by two new and far less computer sounding voices named Craig and Donna. This came after months of evaluating voice technologies and receiving public input, including over 19,000 Internet survey comments. Based on this input, NOAA awarded Siemens Information and Communication Network a $633,615 contract for the voice improvement software product, known as Speechify. Siemens teamed with SpeechWorks International of Boston to provide software that combines phonetic sounds with natural language modeling. Heres a sample:

--
Audio Here
--

A lot better than Perfect Paul? Some say yes but Richard Rudman, W6TIA, is not that enthusiastic. Rudman is the chairman of the EAS National Advisory Committee and the Los Angeles County local emergency committee. He is quoted in the November 21st issue of the trade publication Radio World as saying he wished that the committee choosing the new voices for NOAA Weather Radio would have waited for something better to come along. W6TIA says that the new voices chosen are an improvement, but still have major shortcomings with regard to quality and inflection issues that bother him.

Also quoted in the Radio World article is Chris Boone, WB5ITT. He says that the voices still sound computer-like and canned. Boone says he can hear the digital artifacts in them and would not put them on a broadcast station. Even so, the computerized Craig and Donna would be a welcome change to the automatic I-D voices used on most ham radio repeaters today. (Radio World, NOAA, NWS, others)

**

HAM RADIO ON THE BOOKSHELF: TUNE IN THE UNIVERSE

“Tune In The Universe” is a new book on CD-ROM by SETI League Director H. Paul Shuch, N6TX. The book is unique in that it is both interactive with the reader and because it can be read using any web browser. No special reader software is required.

Why a book now? N6TX tells Amateur Radio Newsline that its kind of overdue:

--
Shuch: “Ive been on the lecture circuit for SETI for the past seven years and everywhere I go people ask if I have a book about all of this. Well, we have a website but not everybody has an Internet connection and some other peoples download speeds are a bit slow. So I took the best material from seven years of running the SETI League and tried to put it together in one convenient place.”
--

And that’s exactly what Dr. Shuch has done. Called a ham radio operators guide to the search for extraterrestrial intelligence, the book is divided into six sections that cover every aspect of ham radio’s involvement in SETI as well as the ongoing search itself. Also included are a mix of photos and even some songs that Dr. Shuch says should educate as well as entertain. Why music you ask? N6TX says that its a fun way to learn about anything:

--

Shuch: “As any teacher knows, memory is enhanced and multiple learning styles are accommodated by invoking as many different sensory pathways as

possible. That is, we educators try to stimulate the students auditory, visual and tactile systems all at once to maximize the learning experience. Why do you think we are always writing on a chalk-board and asking you to take notes while we drone on in a monotone?

Somewhere along the line in my teaching career I figured out that music was another sensory pathway worth stimulating. And, just maybe would make my lectures a tad less monotonous. So I began introducing songs as learning aids.

--

Tune In The Universe" is published by the American Radio Relay League and is priced at under $25. For more information visit the League's website at www.arrl.org. More about the SETI League is also to be found in cyberspace. It's at www.setileague.org. (N6TX, SETI League, ARNewsline(tm))

HAM RADIO AND EDUCATION: FAR ANNOUNCES SCHOLARSHIPS

Speaking of education, the Foundation for Amateur Radio, in Washington, D.C. says that it plans to administer 62 scholarships for the 2002 through 2003 academic year. The foundation, which is made up of more than seventy-five Amateur Radio Clubs fully funds seven of these scholarships using the income from grants and its annual hamfest. The remaining fifty-five are administered without cost to the donors. For more information or an application, please contact the F-A-R Scholarships, PO Box 831, Riverdale, Maryland. The zipcode is 20783. You can also check the website at www.amateurradio-far.org (FAR elease)

**

HAM RADIO ON THE INTERNET: NEW FLYING HAMS REMAILER

Joe Della Barba, N3HGB says that he has started a new Internet mailing list for anyone interested in airmobile ham radio. In a web posting, Joe says that he has been operating 2 meter airmobile for years now and finds it to be lot of fun. Joe notes that A-P-R-S adds a whole new dimension to airmobile operations these days as well. To become a part of that discussion and lots more you sign up by sending an e-mail to cqairmobile-subscribe@yahoogroups.com. (CQAIRMOBILE)

**

INTERNATIONAL - CANADA: DISABLED EXAMS

On the international front, word that an Industry Canada document pertaining to the examination of disabled candidates will be ready for incorporation into rules by January 31, 2002. This document, based on a proposal from Radio Amateurs of Canada, will provide guidance to medical doctors when asked to justify an exemption for disabled candidates for the Canadian Amateur Radio examination process. (RAC)

**

INTERNATIONAL NEW ZEALAND: RADIO EDUCATION TRUST

Amateur Radio Newsline’s South Pacific Bureau correspondent Jim Meachan, ZL2BHF reports that a charitable foundation called the NZART Radioscience Education Trust, founded in January 1998 is taking root. Jim explains that the trust was formed to help and encourage persons wishing to further their education in the science of radio. ZL2BHF says that the trust is financed from income produced from invested donations. More information can be obtained from the NZART web page at http://www.nzart.org.nz/nzart/nzart/trustweb.html (NZART)

**

DX

In the DX department, K5OE reports that OM5CM in the Slovak Republic has been active the AMSAT Oscar 10 satellite. Also, ZS2ACP in South Africa recently created a weekend pile-up on
AO-40, operating when both Europe and North America were in his window. (GB2RS)

Meantime, a little bit lower in frequency, well, take a listen:

--
6 m audio here
--

That was N0JK portable HC8 working the world the weekend of November 24th. And he was not the only D-X being heard. The VHF Reflector was loaded with reports from around the world of unexpected F 2 openings as more and more hams buy radio gear and discover the magic of the Magic Band. (VHF Reflector - audio supplied by KC6WFS)

And an Internet posting from the ARRL’s Wayne Mills N7NG says that an operation from war torn Afghanistan has been approved for DXCC credit. Mills post says that The DXCC Desk has received acceptable documentation for YA5T operated by ON4WW, ON6TT, S53R or SM7PKK. The documentation is for QSOs made November 20, 2001 and after. No other callsigns or operations have been approved as of this date. (VHF Reflector, OPDX, other DX remailers)

**

THAT FINAL ITEM: A REPEATER CONTACT CONTEST?

And finally this week, while we here in the United States frown on contesters interfering with repeater contacts, down-under its a different story. Can you believe that Australia has a contest where only contacts made over repeaters count toward the final score? Well they do and Q-News Graham Kemp, VK4BB, is back again with the details:

--

Westlakes unique CQ Repeater Contest where amateurs are encouraged to put a little life into usually quiet repeaters. The aim of all contests is to promote good will between amateurs and to encourage on air activity. The big difference

with this CQ Repeater contest is that all contacts MUST be made on repeaters.

The rules have been even simpler. Contest numbers do not have to be exchanged - just keep a record of the station spoken to and on which repeater and at what time the contact was made.

Contest Period is from 0001 local from 1st of January 2002 to 2359 local on the 7th January. The bands are 10 Meters, 6 Meters, 2 Meters and 70 centimeters. The mode is FM only ad scoring is 1 point for each contact. It doesn't get any simpler than that!

For the Amateur Radio Newsline, I’m Graham Kemp, VK4BB, of Q-News Australia.
--

Could such a contest be successful in North America? Maybe, but we do not know of any repeater owners who really want to find out. (Q-News)

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address
is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at
Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

All amateurs Novice through Extra are eligible. Awards are decided by the Awards Committee, based partially upon the information received. Magazine articles, newsletters, newspaper clippings, videos and the like are appreciated but cannot be returned. The deadline for nominations is January 31, 2002. Nominations can be submitted by US Mail to Post Office Box 964, Dayton Ohio 45401 or by completing the convenient e-form on the web at www.hamvention.org.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jeff Clark, K8JAC, saying God Bless America, 73, and we thank you for listening."

There is no registered mail service from the UK to Libya. I just sent
a QSL in a normal letter with $1 and got a reply in about 5 weeks.

What is this story about Abubaker moving to Germany? Is this a
permanent move?

3041. If the 40 meter band is moved....?

Newsgroup: rec.radio.amateur.dx
Date: 2001-12-01 17:15:25 UTC
From: "Peter J. Bertini" <commquart@home.com>
Message-ID: <Ne8O7.86514$Y6.9410270@news1.rdc1.ct.home.com>
Source record: 15446

For discussion:

There has been a lot of talk about moving the 40 band down 100kHz,
so it begins at 6900 kHz instead of exactly at 7 MHz.

I am wondering how this will work out, since there are sooooo many
legacy 5-band radios, and even some newer WARC capable units,
out there that cannot be modified to transmit below 7 MHz. My JRC
twins are a perfect example!! Will the current CW DX operations
continue to take place in the 25 kHz corridor from 7.000 to 7.025?
Or, will they shift down to 6900 to 6925?

Just asking for what others are thinking about this matter. I have no
urge to upgrade my equipment since I am very pleased with it and
no one is offering seperates these days.

Dunno about everyone else, but I think about the same of this brilliant idea as I did of Prose Walker's idea of the WARC bands. which went something like, "What can we do to generate a bunch of business for the manufacturers by making every piece of existing equipment obsolete?" The fact that all the US manufacturers were already on the ropes trying to compete with $0.50 per hour labor rates and the Japanese were the only ones who could take advantage of the opportunity wasn't even on his radar . I'd gladly trade all the WARC bands for the other 50 KHz of 20 meters that we used to have.

Besides, my super homebrew single conversion transceiver uses 5.2 MHz crystal filters. Guess where the next band is being dumped.

W4ZCB
You COULD make a transverter of course.

Source record: 15302

No. Guess again. The NRD515 uses bandpass filters and going
100kHz out of band on 40 meters causes a bit of attenuation. There
are other issues involved; when tuned to a 1 MHz band that doesn't
contain a ham band the units will no longer work in transceive mode
either. The receiver has full 0-30 MHz coverage in 1 MHz bands, the
TX doesn't. You might get 6-7 MHz to work on the TX at the expense
of losing 7-8 MHz coverage.

There have been several attempts to eliminate/move the amateur 40 meter band over the years. The EU broadcasters want us off 'their band'. In at least one attempt
the western hemisphere countries, after being out voted on the issue, simply stated
that they would continue to support amateur use of 40 meters in this region and the
whole thing was dropped.
I'd wait and see what happened before I got to concerned. If there are changes, I'm
sure there will be lots of discussion about band planning before implementation.

Not quite. The band won't be moved, an ADDITIONAL 100 kHz will be allocated as a world wide phone band. The problem is that outside of the Americas, we use the high side of our 7000-7100kHz band for phone.

From your side it is filled with digital transmissions. If we go below the digital, it does not matter as you can only answer us by working 100 kHz up, e.g. we talk on 7.077 and you talk on 7.177. Not very usefull to us as 7100 on up are swamped by brodcasters here.

So if your rig can't go down to the new allocation, you DON'T LOSE anything, and if it does you gain a wholde bunch more 40m phone contacts.

We also have the same problem on 80m, but that probably won't change. :-(

May not be that big a problem, especially with the wide presence of Japanese radios. I purchased an ICOM xvcr when I was stationed in Japan 1990-93. It transmitted on only the Japanese amateur bands, which are somewhat different from the US bands -- thus, it did not cover the full US amateur bands. No problem. Many ICOM units (and I assume Yaesu and Kenwood are the same) are manufactured to be sold in Japan, Europe, US, and elsewhere for amateur, military, and civilian use. The freq range is determined by a diode matrix and jumpers. In my case, I opened the rig and snipped two leads on the circuit board. It now transmits from 1.2 MHZ through 30 MHZ without a break in coverage.

The filters in the radio are narrow and only permit signals within the amateur bands to pass. One evening, I hooked it up to my Bird wattmeter and a dummy load and ran the VFO up and down, checking the output at various points. I do not recall the specific results, but it had output throughout the entire range, albeit greatly reduced (down to as little as 2 watts) as I went outside the amateur bands. Close to the amateur band edges, the output was same as it was inside the band.

If the shift takes place, manufacturers of rigs that can be modified are likely to publish modifications for the owner to do, or they will invite you to ship it in for modification.

So far it has been mostly talk, since the "moving" (actually a reallocation with a significant world-wide expansion) involves one of the most heavily used and sought after bands. Therefore, there are a lot of interested parties involved, with the strong opposition coming from the countries that have some HF real estate to lose while gaining nothing (in their perspective). WARC is like the UN: a lot of talk, little action.

First of all, it would be selfish and arrogant to try to impede the obvious advantage of having an exclusive world-wide 300 kHz allocation on 40 m simply because some rigs can't be modified. Second, any possible reallocation is *years* away (>10), if it happens at all. Third, the reallocation will most likely not affect the CW portion of the band, at least for some foreseeable future. It would be only natural.

Ideally (for me), 6.9 to 7.0 would be allocated to digital use, where
legacy rigs are less than ideal, anyway, and the majority of hams
wouldn't be affected, except by our absence.

Working the south pacific (vk/zl) on 10m during the North America east coast morning (7-10am EST) is generally only possible by longpath, and that doesn't occur too often, owing to relatively few operators trying to make contacts from those areas at that time of day. Your best bet would be during our afternoon/evening (anytime after sunrise in VK or ZL) through a few hours after our sunset (very approximately around 3PM-9PM EST) at this time of year.

I guess you didn't read what I asked.

Let me ask you this: do you expect
every DXer to go buy a new radio just to work 40 meters?
Do you think DXpeditions will operate exclusively at 6902
listening up 13 kHz, and thus miss thousands of potential
QSOs? I doubt every ham will dump his equipment, especially
many foriegn stations, just to keep up with the Jonse's.

It has nothing to do with holding up "progress", but rather what
the short term ramifications will be once it does occur.

I agree that the change shouldn't be impeded.

But, my question was what would happen when this transpires.

My curiousity is whether the DX window for 40 meter CW would,
by necessity, remain between 7000 and 7025 for practical reasons.
I guess you concur with my personal views that the CW band may
stay where it is for some time.

If you have packet radio capability, locate a dx cluster and see what is on. If no packet, try the dx cluster on qrz.com. With the wierd propagation on 10 meters at times, you never know when the VK's and ZL's will show up. From the central US (Nebraska) I have the best luck in mid to late afternoon.

From the east coast of North America? That doesn't make much sense as VK/ZL
are roughly 180 degrees opposite that direction.

Long path.....

Think about where the sun is on the earth.....

In "our" winter, the =southern hemisphere is in their "summer". Which means they have more daylight..... hence the higher bands (20 meters and higher) are open longer. That usually means that the path to a station on the other side of the world can be reached by that path.

I hope that explanation helps.

I'm very familiar with longpath on 10m. It's just that longpath at our local sunset on 10m for VK/ZL just doesn't happen. Longpath is generally very viable to VK6 (western Australia) around and after our local sunrise at various times of the year. Longpath to eastern Australia and New Zealand on 10m also happens, but not very frequently, around the same time (a few hours after our sunrise). I think that you may be confusing grayline with longpath propagation. Again, that isn't too relevant on 10m.
At our local sunset, shortpath to Australia and New Zealand is perfectly viable on 10m through much of the year at these levels of solar activity. There's no benefit for looking for longpath at that time of day.

Assuming that you've just worked EP3SMH, he mentions in his entry at
http://www.qrz.com/database?callsign=ep3smh that dollars are preferrable to
IRCs, owing to difficulties exchanging the IRCs in Iran. I've also read in
the dx-qsl mailing list (on qth.net) that registered airmail seems to have
better luck getting to him.
I was able to get a QSL from Mohsen by sending the request via standard
airmail.

Hi Max,

during December this year you could try ..

VK ~16..20 UTC
good chance for VK4/Brisbane, short path, beaming ~275'
medium chance for VK6/Perth, short path, beaming ~310'
low chance for VK2/Sydney, short path, beaming ~265'

ZL ~17..19 UTC (medium chance) and ~23..01 UTC (low chance),
both times short path ~245'

Good luck and 73 de Waldemar, DK3VN

I didn't know that area was a "dx window". I thought it was just the "extra" cw portion. Actually, I haven't heard of any specified dx window on 40 cw, although it seems quite a few like to hang out just above 7.025 so they can work generals too. Myself, I don't care what they do as long as they can get us all on one page, and get us away from the BC bunch. I'd say 75% of the old rigs will work most of the 6900-7000 kc spectrum with no mods at all. Most cover a bit under and above the normal areas to account for MARS users. My drake twins will cover it no problem. My TS-830 goes exactly down to 6900 as does my ic-730 I believe. I notice my 706g goes down to 6900 before the out of band cutout kicks in. So it will work it without having to open up the rig for MARS use. In a nutshell, all my rigs can work it as they are. And 3 of them are fairly old. I think they should just shift the whole mess down 100 kc and keep the same appx order. IE: CW would then drop to 6900-7000, and they could dump the novice band as it's kaput. The rest could go to fone with maybe a digi area at the 7000-7050 area???. That would still leave 150 kc for fone same as now. I've been wishing they would do this for years. 40 meters is too good a band to be trashed with BC and have the world split up using different parts of the band. It's been a mess for too long. MK

Yup, he may have been, but if this occured during the CQWW CW
Contest (Nov 25-25), it's almost certainly HG1S. Believe it or
not, sometimes guys actually send their own callsign incorrectly.
I checked the cluster and there are zero spots for 5G1S and
many, many spots for HG1S. The 5G prefix would have been
Morocco. You can bet that if there had actually been a 5G1S
active during the contest, he would have been spotted.

Sorry.

Good one Jim.
Also here is a web site that gives distance and bearing from your QTH to
all DXCC entities plus more:
http://mdxa.org/dxcclist.html
By Randy, W5UE

Returns Prefix, Country, Short Path Bearing, Long Path Bearing, Miles,
Latitude, Longitude, Continent, CQ Zone.

You will need to enter your Latitude and Longitude (GPS if you have it) or
you can find it at http://www.qrz.com/
At QRZ -- Enter your call then click on detailed info to obtain a good
approximation of your long - lat.

Much more on Beam Headings, Distance, Bearing, etc at URL:
http://ac6v.com/opaids.htm#BEAR

3120. advice needed on heathkit dx-60 crystals

Newsgroup: rec.radio.amateur.dx
Date: 2001-12-12 00:38:13 UTC
From: paper342@yahoo.com
Message-ID: <VFxR7.14$YE4.3887@newshog.newsread.com>
Source record: 15225

Hi,

I am in the process of purchasing a heathkit dx-60 for my fiancee's son. It's his xmas present. Anyway, he's got his novice license, and the plan is for him to be able to xmit cw on the 40 meter band. Currently he has a mfj 1040 rig, but he's studying for his tech plus and possibly even his general license.

I know a bit about Ham and radio, but haven't gotten a license yet myself. Anyway, I'll need to get some crystals for this rig. I talked to a few people... one person said he thinks the sockets might be hc-17/u sockets. Is that correct?

I think I read once that transmitters don't necessarily transmit on the frequency on the crystal. Instead they often use a multiplier or something on the crystal. Can someone clear this up for me? What frequencies are pretty popular in the 40 meter band and how do I do the math to calculate the actual frequency being transmitted on based on the crystal, or is the frequency of the crystal I stick in the socket going to be the frequency I am xmitting on?

Also, can someone verify for me what kind of crystals I need for the sockets in the Heathkit dx-60? I'm aware that we could track down a vfo somewhere, but the crystal idea just seems neat for some reason, sorta a making do with minimal equipment.

Please cc responses to paper342@yahoo.com so I don't miss any

Thanks

As a novice operator from the early 1960s, (novice bands were 80, 40, and 15) I can tell you that the crystals for 80 and 40 were fundamental frequency crystals, but those for 15 typically operated at the three times the crystal fundamental frequency, meaning that the crystal selected was 1/3 the desired frequency on 15 meters.

I don't recall the socket designation, but I do recall the pin spacing was something like .487 inch, which would be consistent with a 17/u socket.

In the USA, 7040 kHz is the most popular frequency for low power CW communication. Crystals for that frequency are readily obtainable for a dollar or two. Be careful, though ... does his present license allow him to use that portion of the 40m band? (I thought Novice licenses had been stopped!)

By putting a small coil and a variable capacitor in series with the crystal, the frequency can be "pulled" by +/- 2 or 3 kHz ... this is called a Variable Crystal Oscillator and would enable him to dodge any interference from other stations around the frequency of the crystal.

Don't forget your local print shops - in some of them you'll get a much better deal than from the ham-dedicated QSL businesses. When I lived in Toronto, a shop on Elm Street gave me a hell of a deal on the quantity of 5000 cards *and* they accepted my artwork design (unlike the clone QSLs ham businesses dish out). No ham QSL business even came close. Shop around.

Happy Holidays all. I am working on a Cushman CE-4 and need to know if anyone might have a manual that can email or snailmail me a copy of one or two pages. I have found out that there is a problem with a board on the bottom of the unit. The 0710-7001 board had two transistors that went up in smoke. I cannot find my manual for this model and the CE-6 seems to have different boards.
It is the fourth board on the bottom front row, counting from the bottom

as the unit is on the bench facing you. It has three pots and a horizontal potted coil, and two IC's on it. There are a bunch of transistors located near the edge connector, toward the right side of the board. I need to know the numbers of the transistors and some of the values of the parts. Thanks Don KB6GQA

3133. DX-Central betrays it's $$$ contributors

Newsgroup: rec.radio.amateur.dx
Date: 2001-12-13 20:38:58 UTC
From: Charles Johnston <ctj92@cableone.net>

Source record: 15238
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment

After they ask and receive who knows how much $$$ through voluntary contributions they now switch software to some one-of-a-kind never-before-heard-of "WinCluster Lite" node software.

Nearly _all_ the user-side cluster commands are no longer available such as custom login commands and filters. That's right ..no user-side filters. In fact there are only 10 user commands available. With either CLX or AR cluster software there are 2+ printed pages of user commands.

The reason as explained to me (by the software author) is that contests put such a load on the software it wasn't able to keep up. Well duh....I thought all this time I was contributing to a DX cluster and not a CONTEST cluster. There are DX spots going on every day...contests are only once-in-a-while.

Is it me or is this a case of the tail wagging the dog? Are they transforming a DX cluster service into a CONTEST cluster service without regard for DX'ers? Maybe they are contesters themselves and "to hell with the DX'ers"

Then I was told (after being one of the first to contribute $$$) that since I left the cluster I am now a 'taker' and not a 'giver'. I have informed them I want my money back..I suggest others may want to make the same demands. This will give us all a chance to see their true colors...

I was told (before contributing $$$) I would be helping to improve and support a DX cluster..not some CONTEST cluster with half-baked software....

So..if you are missing user features you have come to expect through the years then you better look elsewhere.....DX-Central ain't the same anymore.....

They asked for contributions for the upgrade of equipment at DX-Central. I gladly gave what I could with the understanding the DX Cluster would be upgraded. Apparently they had enough funds to buy new hardware (and they are still begging for $$$) but they did away with the existing full-featured software (CLX).

The explanation I got was that now (after the hardware upgrade I helped pay for) their software (CLX) was all of a sudden no good. So they removed a full featured cluster software package and substituted a software product that does not have near the number of user-side custom settings like filters,automatic login scripts, being able to block spots originating outside of USA etc...the list goes on....it is best described as some kind of beginner and / or basic cluster software...a stripped down gutted-out cluster software package....it is also a one-of-a-kind...no other DX cluster on the planet uses it. Why would they? It has basically no usable features compared to what has already been available for years!

This "upgraded" software (WinCluster Lite) is a very bare bones application that does not even begin to retain the level of performance we have all grown accustomed to over the years. They ask for contributions to improve the service and what we got was a HUGE downgrade in the software to the point it is unusable for anyone serious about DX'ing....

Bottom line.....
What I got and everyone else got for their $$$ is a crippled hardly usable dx cluster. It is a gigantic step backwards....it has in reality REMOVED many.many vital services and features.....WinCluster Lite is a joke for serious DX'ers....trying to work DX with it as a service is ridiculous....

|Bottom line.....
|What I got and everyone else got for their $$$ is a crippled hardly
|usable dx cluster. It is a gigantic step backwards....it has in reality
|REMOVED many.many vital services and features.....WinCluster Lite is a
|joke for serious DX'ers....trying to work DX with it as a service is
|ridiculous....

"Vital services"? Air, water and food are "vital". Can you not find and work your own DX without a cluster calling you into the ham shack, putting your rig on frequency and turning your beam----oops---I forgot you use an "official" W9INN dipole. If you quit wasting your $$$ on clusters, you could afford a beam. Of course you would have to figure out which direction to point it to all on your own.

Good grief, what has ham radio come to. FMers don't realize you can actually make a VHF contact without using a repeater, CW ops need a keyboard or CT to send Morse and "Serious DXers" can't find and work DX without a cluster. Pathetic.

What we need is a new award. The "Worked 'em without a Cluster Crutch" DXCC.

Hello Wes,
I choose to put technology to work for me just as Hams have always done for decades within the scope of their abilities. The "old way" is rarely the best way Wes...unless you are talking about 50 year-old hooch...

Hams are by nature innovative and are always looking for and / or creating better ways to do things.
Without using DX cluster spotting services one finds themselves at the bottom of the "DX Feeding Chain"

If that is where you want to wallow then more power to you......

AMATEUR RADIO NEWSLINE(tm) REPORT #1269 - DEC 7, 2001

Amateur Radio Newsline report number 1269 with a release date of Friday, December 7, 2001 to follow in 5-4-3-2-1.

The following is a Q-S-T.

The FCC says no to a Winter Olympics special call sign and a new Extra class exam starts next summer. Learn what's in it on Amateur Radio Newsline report number 1269 coming your way right now.

(Billboard Cart Here)

**

THE 2002 WINTER OLYMPICS: FCC SAYS NO TO SPECIAL CALL SIGN

An idea for a special events call sign to celebrate the 2002 Winter Olympics has drawn a negative response from the FCC. Tom Schaefer, NY4I, of Sandy, Utah, had requested that the agency allow amateurs Utah hams to substitute the number 2002 or 02 for the 7 in their callsign. This, for the time period preceding and up to though the 2002 Winter Olympics in Salt Lake City. But after mulling it over for a few months the Schaefer says the agency responded with a definite no:

--
Schaefer Here:
In-Q: I wrote a letter...
Out-Q:...as a different prefix.

The letter to Schaefer was signed by D'wana R. Terry. Terry is Chief of the Public Safety and Private Wireless Division of the Wireless Telecommunications Bureau. Among the reasons Terry stated in refusing the special call sign request was that the block of special event callsigns requested did not fall into the commission's special event callsign format. Also, that the request was inconsistent with International Radio Regulations. Schaefer says that he is disappointed at the FCC decision to deny, and also a bit surprised:

--
Schaefer Here
In-Q: The letter I...
Out-Q:...unable to do that.

Does this mean that there will be no ham radio involvement in the 2002 Winter Olympic Games? Not by a long shot. According to Schaefer members of the local ARES groups will be assisting in providing communications for the event. And

there’s a good chance that someone will pick up the ball and get some sort of special call sign using the established call sign administrator program.

By the way, you can hear more with Tom Schaefer NY4I about ham radio at the Winter Olympics on this weeks RAIN Report. Its on the web in Real Audio and Windows Media at www.rainreport.com and by telephone at 847-827-7246. That’s 847-827-RAIN. (ARNewsline(tm))

**

THE ARCTIC WINTER GAMES

Another event called the Arctic Winter Games are also in their planning stages. In this case, ham radio is an important part of the event. Q-New Graham Kemp, VK4BB, tells us the who, the what and the where:

--
Greenland and the call-sign OX1AWG is on the air from Nuuk Greenland as a participant of the Arctic Winter Games going to be held in Iqaluit Nunavit and Nuuk Greenland 17th - 23rd of March 2002.

OX3HX, Rene tells us any Hams bringing a valid License original will be welcome to use the local club station OX3NUK for a small fee. If you would like to have your own OX3-call, ship a copy of the license but they need to have the papers 3 weeks in advance. Hams who like to operate OX/Home call or OX1AWG are welcome too, and have only to show up with original valid license.

For the Amateur Radio Newsline, Im Graham Kemp, VK4BB, of Q-News Australia.
--

For those planning to visit Greenland for the games, Rene Witkowsky, OX3HX will be available at one of the many Help Booths around the city. (Q-News)

**

DX RECORD: 73 KHZ DISTANCE RECORD INCREASED

Yet another new low frequency record has been achieved on the 73 kHz band. Jeramy Boot, G4NJH, has more:

--
“On the 21st of November, just before midnight UTC, W1TAG received extremely slow CW from G3AQC. This was the first time that a complete callsign had been copied, though partial calls were identified the previous night.

The opening lasted around two hours and was the culmination of several weeks of testing. At a distance of 5291 kilometers, G3AQC smashed his own record of 4408 kilometers when his 73kHz transmissions were received by VE1ZJ last June. He was running 200 milliwatts ERP.

The transmission was in Differential Frequency CW, where the dots and dashes are the same length but on slightly different frequencies, and with no space between them.

Jeramy Boot, G4NJH”
--

The Differential Frequency C-W communications system used for this contact holds the promise of extending this record even further. (GB2RS)

**

BREAK 1

This is ham radio news coming to you from the United States of America. We are the Amateur Radio Newsline, heard on great bulletin stations around the world this week honoring the Antelope Valley Amateur Radio Club Wednesday Night Net serving Lancaster California.

(5 sec pause here)

**

HAM RADIO IN SPACE: EXPEDITION 4 HEADS TO THE ISS

Amateur Radio is keeping an eye one space this week. On the International Space Station to be more exact, as we witness a changing if the guard. The third group of Astronauts and Cosmonauts headed by Frank Culbertson, is getting ready to come home. They’ll be back on Earth December 16th, after being in orbit since last August.

Expedition 4, Yuri Orufrienko, Dan Bursch and Carl Walz will take over and be up there until next May. Onufrienko once operated from the Mir Space Station; Bursch is KD5PNU and Walz is KC5TIE. So hams can look forward to contacts with them.

Amateur Radio on the International Space Station; ARISS; will continue on the air with two meter voice and packet. Voice contacts with schools all over the world have been well served and those exciting contacts will continue at a rate of one or two a week once the new crew settles in.

In addition to operating ham gear, the new crew has also carried new Amateur Radio antennas to the station. They were designed and built in Italy to Russian specifications, then space-qualified and shipped to the United States.

The Astronauts plan at least eight space walks, two of which will be used to install those antennas outside the crew quarters. They should provide a wide range of frequencies and vastly improved coverage of the ham bands for the ARISS station.

The space station call, while flying over the United States is NA1SS. The 2 meter downlink frequency is 145.80 MHz. Look for the new crew on the air from orbit in the near future. ARNewsline(tm))

**

HAM RADIO TESTING IN THE USA: NEW EXTRA CLASS EXAM QUESTION POOL RELEASED

If you are planning to upgrade to Extra class, now might be the time to do it. This is because a new and somewhat more difficult Extra Class exam will go into

effect next summer. Amateur Radio Newsline’s Norm Seeley, KI7UP, has the details:

--
The National Conference of Volunteer Examiner Coordinators Question Pool Committee has released a revised and expanded set of Element 4 Amateur Extra questions. Use of these questions begins next summer and replace the current Extra class question pool released back on April 15, 2000. That’s the day Amateur Radio ''restructuring'' became effective.

The new Element 4 pool expands the number of questions by more than 20 percent. The new test pool has 806 questions as opposed to 665 in the current Extra class pool. It also contains more technical material. In fact, more than half of the questions cover electrical principles, circuits, signals and emissions.

The 50 questions in an Extra class examination are drawn from the question pool. FCC rules say that an applicant must correctly answer at least 37 questions of the 50 to receive a passing grade.

The new Extra class question pool becomes effective July 1, 2002, and must be used to generate all Extra class written examinations administered on or after that date. The questions are available on the ARRL Web site and will remain valid through June 30, 2005.

For the Amateur Radio Newsline, I’m Norm Seeley, KI7UP.
--

The Question Pool Committee now will turn its attention to developing an outline for the Technician class Element 2 question pool. A draft version is scheduled for public release and
comment next spring. The ARRL website address is http://www.arrl.org/arrlvec/pools.html to find the Question Pool. (ARRL Bulletin, NCVEC)

**

HAM RADIO TESTING IN THE U-K: UPGRADING MORSE TESTS UNDERWAY

Meantime overseas, the United Kingdom is in the process of administering a lot of slow speed Morse code exams. This, following the an announcement by that nations telecommunications agency that U-K Full and Intermediate Class B license-holders can operate on the High Frequency bands under the new Foundation license by simply passing a code test.

Called a Morse Assessment exam, the Radio Society of Great Britain is arranging for sessions to be held nation-wide. The RSGB hopes that at least two sessions per region will take place between now and the end of December.

The RSGB says that these tests are open to both members and non-members of the society. So far twelve sites have been approved for training and testing of the new U-K Foundation License. (GB2RS)

**

ENFORCEMENT: AMATEUR RADIO ROAD RAGE MUST STOP

The FCC's chief ham radio rules enforcer has told those attending the Ft. Wayne Indiana Hamfest that the time for on the air arguments has come to an end. Riley Hollingsworth, the FCC's Special Counsel for Amateur Radio enforcement told the forum that Amateur Radio road rage must stop now and that the bickering on our frequencies can do nothing but hurt Amateur Radio in the long run.

Hollingsworth also says its time for more hams to get involved in public service. Jack Parker, W8ISH, of Amateur News Weekly, has that part of the story:

--
"Hollingsworth says that it is now time for hams to use frequencies responsibly. He adds that now, more than ever, is the best time for all Amateur Radio groups to seek out and establish working relationships with local emergency response agencies.

Since September 11th, Amateur Radio and its potential has moved into a prominent position on the national front. But he stresses that we must move quickly at a local level to establish our place in the overall emergency response plan.

Reporting from the Ft. Wayne Hamfest, for amateur News Weekly, I'm Jack Parker, W8ISH."
--

Hollingsworth's views are echoed by many who are already involved in organizing ham radio emergency communications on a local level. They say you can never have to many well trained volunteers. (Amateur News Weekly)

**

SPECTRUM USE: FCC OPENS UP MORE SPECTRUM TO COMMERCIAL USERS

The government has moved to eliminate a cap on how much spectrum any one wireless company can own in a given market. The decision opens the way for mergers between major carriers and allows them to provide more mobile services such as high-speed Internet access.

The Federal Communications Commission had previously limited the amount of spectrum that an operator could own in a particular geographic area, in an effort to prevent a single giant company from squelching competition in that market. But in a recent 3 to 1 vote, the agency decided to immediately raise the amount of bandspace a company can own from 45 MHz to 55 MHz. This is an increase of more than 20 percent. The FCC plans to completely eliminate the limit in January 2003. (FCC)

**

HAMVENTION 2002: TIME TO NOMINATE REMINDER

Another reminder that the Dayton Amateur Radio Association has opened the nominating period for the 2002 Dayton Hamvention Awards. There are three

awards presented each year. They are the Radio Amateur of the Year, Special Achievement, and Technical Excellence.

All amateurs Novice through Extra are eligible. Awards are decided by the Awards Committee, based partially upon the information received. Magazine articles, newsletters, newspaper clippings, videos and the like are appreciated but cannot be returned. The deadline for nominations is January 31, 2002. Nominations can be submitted by US Mail to Post Office Box 964, Dayton Ohio 45401 or by completing the convenient e-form on the web at www.hamvention.org. (DARA)

**

NEW HAM TECHNOLOGY: THE ELECRAFT RIG CONCEPT DESIGN CONTEST

Want to design the ham rig of the future and maybe win a prize? Well, Elecraft says that it will be giving three of its new EC1 project enclosures to those who submit the most interesting suggested designs concepts.
--
Eric Swartz WA6HQQ: “There’s quite a strong building and homebrewing community inside of the QRP’ers -- the low power operators -- these days. In fact, that is how we got our start.

We have broadened our audience past that and have pulled a lot of hams from the mainstream higher power groups to it also, but those guys (the QRP operators - ed.) build an awful lot of stuff. We are continually seeing folks talking about new project ideas and new things to design. It is quite a fertile group of people so I think we are just kind of servicing that need.”
--

Elecraft says its taking this rather unusual step to away to help stimulate the creative process within the ham radio community. According to Elecraft’s Wayne Burdick, N6KR and Eric Swartz, WA6HHQ, design concepts submitted can be for virtually any ham-related application, but they must be compatible with the Elecraft EC1 enclosure. The EC1 is the same size and color as the K1 transceiver. No schematics are required and designers are under no obligation or expectation to actually build the proposed projects. More information on this unique design contest along with all the rules is on the web at www.elecraft.com. (Elecraft)

**

ELECTRONIC BUSINESS: AILING POLOROID FILES CHAPTER 11

Polaroid has been known to generations of consumers for its instant cameras and film, and more recently as a supplier of digital imaging products. Now Poloroid has filed for Chapter 11 bankruptcy protection.

According to news reports, the company was unable to keep up with the new digital technologies of the photography world. It also has struggled with nearly $1 billion in debt. (Published reports)

**

BREAK 2

News never goes home for the holidays and neither do we. We are the amateur Radio Newsline with links to the world at our only official website - www.arnewsline.org.

**

EMERGING TECHNOLOGY: BRAIN DISEASE SUPERCOMPUTER

The University of California at San Diego will coordinate a consortium of interests banding together to build the first nationwide computer network for studying diseases of the brain. The network will enable researchers to share information on neurological diseases such as multiple sclerosis, schizophrenia, Alzheimer's disease and Parkinson's disease. The National Center for Research Resources, part of the National Institutes of Health, awarded the consortium more than $20 million for the project, which will enable researchers to share brain images via a high-speed network. (UCSD release)

**

HAM RADIO IN SPACE: FREE UPDATED TRACKING SOFTWARE

An updated version of the PREDICT satellite tracking and orbital prediction program is now available. This latest updated corrects some errors that have caused instability under certain conditions in the past. The program's documentation has also been updated, and new versions in Portable Document File and HTML have been added. PREDICT is free software.

The latest DOS version may be downloaded from ftp://ftp.amsat.org/amsat/software/PC/tracking/predict2.zip >. Further information on PREDICT software is available at http://www.qsl.net/kd2bd/predict.html.

Also, new Linux version is currently being prepared for release as well. (KD2BD)

**

INTERNATIONAL - SOUTH AFRICA: NO HT’S IN THIS CAR

Radio Amateurs in South Africa can no longer use a hand held radio in a vehicle unless its attached to a hands free operating system. This is the result of a new law that says that no person will drive a vehicle on a public road while holding a cellular telephone or any other communications device in one or both hands.

To operate mobile, hams and non hams alike now must use a radio permanently mounted in the vehicle and adapted to hands free operation. The law permits mobile radio operators to use such devices as a permanently mounted microphone and speaker or other specialized gear to comply. (SARL, Q-News)

**

INTERNATIONAL-UK: MARCONI 100TH ANNIVERSARY

The 100th anniversary of the reception of the first trans-Atlantic radio signal by Guilermo Marconi at Signal Hill in St. John's, Newfoundland, takes place on Wednesday the December 12th. In celebration, a number of United Kingdom special event stations will be active to commemorate the event.

Most of the operations will take place on the 12th of December itself. Even Great Britain’s Radiocommunications Agency is getting into the act. It will be operating GB100WT from its laboratory site at Whyteleafe, Surrey, during part of December including, they hope, the full 24 hours of the 12th of December. The Radiocommunications Agency expects to be operational on the High Frequency bands as well as 2 meters and 70 centimeters. The station will be operated by Radiocommunications Agency staff in addition to members of local radio clubs and will welcome QSOs with stations worldwide. (RSGB)

**

RADIOSPORTS: WRTC-2002 REMINDER AND UPDATE

A reminder that the next World Team Radiosport Championship will take place next July in Finland. The games will be hosted by the Finnish Amateur Radio Society and the Contest Club of Finland. WRTC brings together over fifty two man teams made up of the best contest operators from around the world. The actual on-the-air competition pits two man teams operating from a common geographic area using identical equipment, power and antennas.

To get a good idea of what goes on at the World Radiosport Team Championship games, film-maker Dave Bell has produced a half hour documentary video titled “The Ham Radio Olympics.” Its priced at only $19.95 and is available on video CD or VHS tape from the American Radio Relay League. More information is on the web at www.arrl.org. (WRTC, ARRL, W6AQ)

**

DX

In D-X, word that wore torn Afghanistan is back on the air following the ouster of Taliban forces from most of that nation. Q-News Graham Kemp, VK4BB, is back with the details:
--
Graham Kemp VK4BB:

“World traveller Peter Casier, ON6TT (5X1T), has been in Afghanistan for the last few days and has now obtained permission to operate in this worn torn nation.

On November 21 he was QRV as YA/ON6TT/M operating in a convoy. The foreign ministry of the Islamic Republic of Afghanistan (Northern Alliance) issued the call YA5T, which can be used on all bands by Peter, ON6TT, Matts, SM7PKK, and Robert, S53R.

Wayne Mills, N7NG, will have to look at the permission, once it is received. His initial reaction was that it should be good for DXCC. Peter will hopefully be contacting Wayne and submitting the documentation. Meantime, look out for these three operating as YA5T.”
--

And late word from the ARRL's DXCC Desk is that it has already received acceptable documentation for YA5T and has approved it for credit. (Q-News)

Several DX newsletters report that N6TJ is active as ZD8Z from Ascension Island again. He is expected to be there through the 18th of December. QSL as directed on the air. (OPDX, Modern DX'er)

Lastly, word that high seas have forced the Ducie Island DXpedition team to abandon its already-delayed effort to reach that DXCC entity located in the South Pacific. According to the RSGB, the team was some 80 nautical miles from its destination and facing high seas when the decision was taken to turn around and head back to Pitcairn Island. (GB2RS)

**

THAT FINAL ITEM: STRANGE SCIENCE - FAT BIRDS FLY BETTER

About twice a year we bring you stories about radio tagged migratory birds. In most cases its those ever elusive Burrowing Owls. Now we have a totally different kind of bird story. It still involves radio tracking, but this time to see if bigger birds or smaller birds have a better chance to survive in flight. Amateur Radio Newsline's Joe Moell, KO0V has more:

--
European scientists have discovered what seems like a contradiction about migrating birds. They found that the fatter the bird, the more efficiently it appears to fly.

Researchers at Lund University in Sweden have studied several small species including the Red Knot. In our hemisphere, these 20-ounce wading shorebirds travel 18,000 miles every year, to the tip of South America and back to the Arctic. On the way north, they stop on the shores of New Jersey to feast on the eggs of horseshoe crabs, to build up energy for the last 2000 miles of their northward trip, which they make non-stop. On these binges, the Red Knots can double their normal body weight.

Over the past few years a number of European Red Knots were radio tagged and tracked by the Swedes as they prepared for a similar trip between the British Isles and the Russian Arctic. The study indicates that building up of fat deposits to be burned as fuel during the migration is more than worth the energy that it takes to carry the additional weight. The heavier birds apparently use their muscles more efficiently. Just why this is so remains a mystery. Even stranger is that the results seem to 'fly in the face' of a central theory of aerodynamics -- no pun intended of course.

So what does this have to do with ham radio? Well, it points out that research always seems to yield unexpected results, and it gives me a chance to remind you that dozens of ham operators in western states are listening for the VHF radio tags on endangered Burrowing Owls this winter. You could help out too. Find out by visiting my Web site -- www.homingin.com. Who knows, maybe a ham will make a similar startling discovery about the migration habits of these unique critters. That's homingin -- one word -- for the Web site, homingin.com.

For Amateur Radio Newsline, in southern California, this is Joe Moell - K-zero-Oscar-Victor saying, "no jokes about birdbrains, please."
--

All of this really goes to show that the more mankind uses science to discover the secrets of Mother Nature, the more amazed man is at what he learns. (Ecology Today)

A couple nights ago, in the middle of heavy QRM I worked 3B2GF. All I managed to exchange was signals before the some nearby +30 stations obliterated him. I'm quite sure I copied the call correctly, and he confirmed that he was on Mauritius, but I can find no record of his call in any of the Pathfinder links. Was this guy legit? Anyone know how to get a QSL route on him?

Thanks.

A short delay echo is almost certainly a long path / short path thing. What is really spooky is when you hear your own signal several seconds later. That is still unexplained so far as I know. It happened to me once in the 60s late at night on 20 meters and I have heard others describe the same.

|hooch...

I don't reject new technology. I spent 33 years of my life designing, testing
and supervising the construction of, state-of-the-art tactical missiles. I was
using and programming an H-P computer, running HP Basic, to build automated test
setups when the only DOS PC in the building was located in the engineering
manager's office.

|
| Hams are by nature innovative and are always looking for and / or
|creating better ways to do things.

Yeah, I "innovated" a two-meter station that except for 50 feet of RG-17 was
entirely designed and built by me. Antenna, crankup mast, rotor, transmitter,
receiver, etc. With this station I made my first EME QSOs. A friend and I were
the first hams in AZ and maybe much of the southwest to operate SSB on VHF, when
SSB was proven to be "a better way" than AM.

| Without using DX cluster spotting services one finds themselves at the
|bottom of the "DX Feeding Chain"

Somebody has to be first to hear the DX station and generate the spot. I
believe that proves my point that DX can be found and worked without using
clusters. I also believe that puts one "at the top of the feeding chain." It's
waiting for the spots that keeps you at the bottom.

World-wide internet spots can be of interest in seeing where the propagation is,
just as the NCDXF beacons are similarly useful. Online DX newsletters and QSL
info services are also useful. So I don't reject out-of-hand some of these
tools. I simply contend that a cluster is not "vital" to the ability to work
DX. I do not use a cluster and I still find and work DX.
|
| If that is where you want to wallow then more power to you......

Well, I'm a pretty casual DXer. If I was a "real" DXer, I wouldn't be wasting
my time writing to you. Nevertheless, you claim 299 on your web site, I'm
"wallowing" around at 305, not counting deleted countries, but counting
4L4FN/P5. You do have him don't you? Or did you wait until he was spotted and
then found the pileup to be too big to bust with your "official" W9INN dipole

<g>.

BTW, the "biggest" HF antenna I've ever had is the homebrew (is that "innovative") 20 meter beam at 45' that I currently use. Viewable on my simple home page at:

http://users.triconet.org/wesandlinda/

Cheers,

N7WS

I would guess that this was 3B8GF. The OH2AQ web site shows that he was on
20m SSB on 12/12.

DX clusters are the worst thing ever to happen to ham radio. Just listen (don't talk, there's enough QRM) to the nightly abomination when the P5 comes on 10 meters. What a sad state of affairs.

Isn't "the hunt" interesting? Just sitting back while your cluster software tunes you to the DX is being pretty lazy. Maybe that's why all the "wrong VFO" callers - they aren't paying attention to what they are doing because the software "does it all fo them" (albeit poorly)?

This is correct. I have also experienced this effect ... only once in over 40 years on the air. It happened at about 0915 UTC one winter morning in 1966 on 21 MHz SSB, when I was operating the London Science Museum station GB2SM. The beam heading was just east of north (I guess about 15 degrees) and the output power was 400 watts PEP. The band was open to VK and ZL via the short (polar) path. I began to observe echoes of my own signal at the end of each transmission, delayed by just over a second and audible at good strength. The delay was long enough to say "Hello", allow the VOX to drop, the hear the complete word "Hello" come back. I tried sending single characters on CW, with the same result. There was no significant doppler shift of frequency. The effect persisted for about 3 or 4 minutes, then the echoes quickly faded and disappeared.

A very strange effect. The delay on the echoes was far too long to be explained by a single round-the-world path. (At about 1.25 seconds, it was almost half the delay typical of earth-moon-earth echoes over a 480,000 mile round-trip path!) I have always believed the signal somehow got trapped between two ionospheric layers at high altitude and experienced multiple reflections between the layers until eventually being released after more than a second's delay. However, that theory remains unproven. It seems to be a very rare phenomenon, but has been witnessed and documented by several observers over the years.

There have even been suggestions that the high-power "Woodpecker" over-the-horizon radar in use by the Soviet Union at the time had something to do with it ... possibly by causing some kind of ionospheric "heating". Who knows!

Hello Paul,
It seems like any mention of augmenting one's DX searches with a spotting cluster or web site immediately brings forth messages like "sitting back and letting the cluster do all your work" . Well this is not the case at least for me. I run the cluster through DXBase 2002 so that if a new one gets spotted I am notified. While that goes on in the background I am "searching and pouncing" just like the "old-timers" would like me too.

Often I am working 2 or 3 DX stations at a time. How can that be? If there are pileups and if I don't get through on the first 2 or 3 calls I write down the call and freq of the DX station and move on to another one or two doing the same with them if needed. Then it is a simple thing to check my sheet and tune the ones back in I didn't get on the first few calls. This works a treat....I just hopscotch between 3 or so stations until I get them or they fade or go qrt.....it is really quite effective...

So..there is no need to ridicule anyone for using the cluster or working DX however in the hell they please....

Hello all,

can somebody tell me the contact person of the
ARRL that is responsible for the Cabrillo-
Format?

In my LM contest software I have to extend the
format for contests with two control numbers
(e.g. RST + QSO-number + DL-DOK).

So I would like to contact the ARRL OMs.

Thanks
Frank, DL8WAA

The real crux of my comment is you can tell as soon as some juicy DX station shows up on the cluster because things go to hell on the band. It turns into utter chaos. People start chattering away on the wrong VFO (I assume they failed to notice the station is working split). Then the "cops" chime in. And then I tune out.

Hello Paul,
Your comments of course are correct. But don't blame the cluster spots for human behavior patterns. I have to agree with you...often times the apparent mentality in a DX pileup is like a pack of hungry dogs salivated and fighting over the same piece of meat. But hey..if you want the DX in your log what are you going to do?

One of the DX Tips on the DX Page of my site offers a remedy for such a scenario....

To add fuel to the flames, remember that before the days of Packet Clusters there was DX clubs that had all the members phone numbers and "one ringers" were common when rare DX appeared.

Then came the DX repeaters (2M) where DX announcements were made 24 hours a day!

And since day one (maybe later) DXers subscribed to DX News Letters to get the latest DX operations - freq and time.

So don't tell me about OT's that found all there own DX, but some did.

But obtaining Honor Roll without DX Packet Clusters --- good luck Charlie!! Better quit work, get a divorce and stay up all night. But I'm sure many did.

Then there is DX Nets -- No Comment

It seems to that this could be taken a bit further. Search the band through
a computer controlled radio. When a signal is detected, the computer would
lock onto that frequency and send a signal. On receipt of a reply, it would
log the station and move on. That way you could watch TV, mow the lawn, or
whatever and just check your computer from time to time to see how its
going.

Actually I would think that the clusters would prevent more "wrong VFO" type people. Most spots say "up X". More it is just poor operating. Not the cluster itself.

Kent, K9EZ

PS - I am not even trying the P5. It will be there. And it will come back after the first of the year. We will all get the chance. Though we may not be first.

Hello Rod,
Thanks for posting your perspective on this "controversy". I know that even with my simple station my country count skyrocketed when I first connected to the N7CIX cluster (Phx,AZ) via the AA7MH repeater on our local Spruce Mt. (Prescott,AZ) It was and still is a great aid....

I would only like to add that even though one can receive the spots that does not mean one's station is up to the task. There is nothing "automatic" about getting the station in the log just because one has been notified that the DX is qrv....

"You still gotta have the Fire to the Wire" and some operating skill for good balance.....

No kidding. I was tuning 20 CW a couple of days ago and heard E29AL CQing. He got jumped on by some JAs and I dropped my call in a few times with no luck. Then he must have been "spotted" cuz it suddenly got real busy. Propagation wasn't on my side so I just listened a bit longer and he just quit. Still guys were calling like crazy.

I resumed tuning and lo and behold, a few KHz down the band was E29AL calling CQ. Got him on the first call. Heh heh, I guess I "spotted" him first.

Doesn't work at all?? Seems like it should be working with the normal
2.4 default filter. "Which would end up 4.8 kc on AM". Unless I'm
missing something here, it should work as is on AM. Just kind of
narrow filtered is all. I have a service manual for the 430 somewhere.
I'll see if I can dig it up later and see what they say. Something
doesn't sound right if the AM doesn't work at all. If they do make a
AM filter for the 430, you'll have to find it used, or get one from a
xtal/filter company like international or something unless a newer
filter could be made to work. I don't know if the 440/450 uses the
same filters or not...The 430 was a pretty good radio for it's time.
Still is I guess... MK

Six hasn't been overly lively lately. Don't expect to hear a flood of dx, it's very sporadic. Most of the time it will be dead, but when it opens it can be wall to wall signals. You just never know. Most dx on 6m is ssb/cw etc, so yes, you would want an all mode rig. FM is mostly local, although some do work dx with it. Most of the hard core guys are on ssb/cw at the low end of the band. 50.125 being the ssb call freq. There are beacons from 50.000 to 50.1 so that can give you an idea if the band is open. I never worked 6m until I recently bought a ic-706g. So I'm fairly new to that band myself. The 706 does pretty well as long as you have a resonant antenna. I built a 3 el yagi for 6m, and it did well. The only time I had problems with the 706 on six was when using an HF antenna . The low band images crop up on six meters if you do that. With the yagi, it was quite clean. I can't really tell you what rigs are good, as I haven't tried many of them. I can say the 706 did ok with a decent antenna, and also works HF-70cm in one box. So that can make one pretty versatile. I doubt I would buy a six only rig here, as I'm not on there enough to justify it. The band isn't open enough for one thing. I'd just as soon buy an HF rig, that also covered 6m. IE: ic-706, ic-746,ft-100, ts-2000, etc, etc. You'll be more likely to get your moneys worth with the all band rigs. Only for real hard core performance would I consider a single band six meter rig. MK

Check with Kenwood, but they only made and sold narrow ssb and cw filters.
Have never heard of an am filter for any Kenwood. Maybe you need an
outboard dsp filter to trim the noise??

If you were serious about DXing you would tune your own receiver instead of waiting on other to spot dx for you. Better yet, tune multiple receivers on multiple bands.

If you dont know what you are contributing $$ for, dont contribute. its as simple as that. Your idea of an improvement isnt necessarily the same as others. Perhaps you now know that. Some may feel its of more value to have a cluster that wont crash or that is more real time than one that has all the "bells and whistles" you want.

nm5k@wt.net (Mark Keith) wrote in message The 706 does pretty
> well as long as you have a resonant antenna.

Actually, I should have said if you use a tuned 6m only antenna. You could have a long dipole that could be resonant on 6m, and give you HF image problems. You need an antenna that is 6m only such as a 6m only vertical or yagi, etc. You want the antenna to be fairly dead to HF. This will greatly cut the HF images in the 706 on 6m. I'm not sure how great this problem is on other all band rigs. I wouldn't be surprised if the ft-100 did it also. This may not be much of a problem with tight 6m only rigs. The 706 plays pretty well on my 3 el 6m yagi. It's terrible using my large HF wire antennas even though it's fairly resonant on 6m believe it or not. Image city from the strong HF SW-BC stations.
The yagi cuts 95% of the crud due to being fairly dead to HF. MK

Robert, the serial number was part of the contest. The next guy he
worked was 2246 and so on. If you submit a log you have to include the
serial number of DX stations and the state or providence of North
American stations plus Hawaii that you work.

Great fun for some, hated by others. :-)

Howdy,

I'm new to DXing. Done a little HF, but all stateside (US) to this point.

This weekend I worked a dude in Luxembourg during the 10 meter contest. During the QSO he gave me a number, 2245 (twenty two forty five was the way he said it). What is up with this number?

Thanks from a new DXer.

Robert / N4IXT

I had the same thing 11 years ago on ten meters.
I think that I reveived my own transmission after it made the travel around
the world. It could happen when propagation is quite good and the delay is
made by the skips.

On October 15th, I mailed a money order to Jordan Arndt,
VE2SWL in the amount of $116.00 for two turns counters,
a front panel, and a tuned input circuit for an amplifier.
The items have not shown up, and Mr. Arndt refuses to
contact me or refund my money. I have filed international
mail fraud charges with local law enforcement and the
U.S. Postal Service. All amateurs who can put pressure
on Mr. Arndt to send my items or a refund please act!
Do not buy anything from Mr. Arndt until he follows
through on his promise. If you want to see what kind of
person he is, look at his E-bay feedback! Let's put this
thief OUT OF BUSINESS!!!

Kindest regards, -Webster D. Williams in Myrtle Beach, SC

Well that first post was informative wasn't it? Now on with the show...

Got my W2IHY Noise Gate and 8-band EQ just today. I purchased the fully assembled model along with Kenwood cable. This accessory really gives the op full control over their transmitted audio. I prefer Astatic D-104's and 10-DA's and this unit can EQ those mics to render DX pile-up busting / ear-piercing audio at the flick of a switch. It works great! On the other side of the coin without changing mics I can tailor the audio for a smooth , warm and full sound even on a D-104!
Tomorrow I'll see what can be done with the stock hand mic...should be interesting.
This W2IHY box also has a very nice noise gate. My on-the-air tests qso's were astounded at the reduction in background noise. The decay time and sensitivity of the gate are each individually adjustable.
I suppose I'll be trying the sweet, sexy.smooth sound out too.....this unit is so powerful and versatile you could very well use the same mic for all your needs.....
BTW the unit sits on top of my TS450 and is only inches away from the 811-H. I set things up qrp and did not need to readjust anything for full qro operation. It is RFI bulletproof as the web site says. Here is the URL...

Are you using your D104's amplified or with the amplifier bypassed? This
sounds like a nice little accessory.

3204. QSLing on old QSOs

Newsgroup: rec.radio.amateur.dx
Date: 2001-12-18 17:25:43 UTC
From: Robert Lyons <boblyons@umich.edu>
Message-ID: <3C1F7C18.CE32967E@umich.edu>
Source record: 15108

I'd appreciate people's experiences on getting QSL cards for fairly old contacts. I've never been very persistent about getting a card. For some good DX contacts I never bothered to try, while for others I didn't receive a reply on the first try and never tried again.

So how far back in time has anyone ever reached back and still been able to get a QSL card from a DX? a few years, maybe?

What's a fairly routine time-lag? do you routinely send out cards after, say, 6 months or a year?

Lately I've been more keen on QSLing, and have started writing out the card immediately on completion of the QSO. DXCC doesn't seem too difficult, especially if I can get some of those cards from back in '97 - '99.

Hi Robert -- I have re-submitted cards as old as 10 years and got them back. Most hams keep a permanent log book for ever and unless they are a silent key or given up the hobby - they do respond from my experience.

I send all QSL cards for a new one immediately.
I answer all received cards from the bureau within 3 months.

Yep -- DXCC in a week end is possible during a contest -- many here in our contest/Dx clubs have done it.

I can give you a cut on that from this end as well. Before I was collecting wallpaper, I worked W9IGW/CE0 San Felix in the ARRL test in 1972. In the 80's, needed him and found that I had worked him in the log, but couldn't find him. At the DX dinner in Miami in 1984, seated at a table for 8 or 9, I asked the assembled if any of them knew what had happened to W9IGW. Maybe 4 of them responded with "He's W9GW now". I seemed to be the only one that wasn't a personal friend. I went to a call book, got him and called, he still had his logs, I sent my card and I had my San Felix 12 years late.

Let me ask a related question. Has anyone ever thought of returning old QSL cards to their originators? Here's what I did - I'm an informal collector of old QSL cards. I bought a batch a few months ago off of Ebay, some going back as far as '38. Just for kicks, I searched each of the calls to see if they were still active. I found three calls that were active, and the current name and address seemed a close match for what was on the card. On a whim, I sent the cards back to those I believed were the original owners. All three hams responded and were absolutely delighted to get back an 'oldie' (in one case a real oldie, dated 1939!). All three were also still active hams (two sent me one of their current cards). I was pleased and surprised at the response, and now plan to go through every batch of cards I find that are pre-1950, see who's still got an active call and send them back to the original owner. Puts a smile on the face of an old ham, for sure!

Yup - I wrote out the QSL card wrong. When I went back to the logs, it
was definitely 3B8, not 3B2. Thanks.

Hello Vytas!

I received one card direct last week, for a QSO in August 2001. QSL
direct with 1 IRC to:

Ralph Karhammar
P.O. Box 9274
Dar es Salaam
Tanzania

Good luck!

Most likely it had an AM filter which was removed and sold seperately.
If you can find him the service manual, he can replace the resistor that
was removed and the move back the jumper that was moved when the AM
filter was installed.

Here is part of the answer,

Pin 8 is Ground
Pin 3 is Push to talk
Pin 4 is audio out
Pin 5 is AFSK TX data
Pin 9 is FSK TX data

Remember how that jack is numbered..

4 8 12 16 20 24
3 7 11 15 19 23
2 6 10 14 18 22
1 5 9 13 17 21

Thats from the back of the plug.. This is used for TNC connections.

Dear Friends,
I do research work in the area of auroral sounds. People have often
reported about strange sounds heard under Northern Lights.
Thus why we do audio recordings during aurora nights in Finland!
One night the audio tape included a mysterious radio signal, music and
singing! The system should not detect the electromagnetic waves.
I am asking your help!
Could you listen the sound and help me to find the radio station in
question!
Could you recognize the music?
The web-page is:

Kent wrote:

> What frequency were you listening to?

Well, my measuring system is NOT a radio receiver! It should just record audio signals from the atmosphere.
The frequency range of the mic is 2Hz-16 kHz.

Thus I do not have any idea about the frequency band of the radio station in question.

In VLF technique we know that SW AM stations are some times modulated down to audio range during the aurora.

In Finland VLF experts have received fractions of broadcastings, e.g., from Israel during an aurora borealis.

I have included a short description of my "radio receiver" on the web-page with some further comments:

http://www.acoustics.hut.fi/projects/aurora/SoundMystery.html

Also, I will publish on the page the most relevant feedback given by the audience (without the names - of course).

Thank you,

ukl

Perhaps someone can educate me on this stuff. You were "turned down due
to lack of documentation". I suspect the 3W7CW card was OK, but the DXCC
'authorities' (ARRL, presumably) didn't accept 3W7CW as a legitimate
operator? If I'm correct so far, what constututes adequate documentation?
Were I ever to go to a 10-most-wanted location (yeah, right), what would
I have to do for my cards to be acceptable for DXCC credit?

Bob, KI8AB
Michigan isn't exotic enough, I guess.

I found the manual. It's not readily apparant which he would check as
they don't discuss anything about installing filters in the service
manual. May be in the owners manual or the sheet that came with the
filters. The AM filter for the 430 is the YK-88A. In the schematic I
see a few resisters that are probably the ones for each filter. I also
see a few diodes that are probably clippable as they show little
curved thin leads. For the AM filter I'm guessing if a resister is
cut, it's probably R-17, which is right next to where the filter
mounts. I see two diodes, D80 and D82 which "may" have something to do
with that also. If they are clipped, they possibly may need to be
reconnected. But I'm not sure about those. No info... MK

That is like the most interesting thing ever!

I would have said 'the coolest thing' but its so like, I dunno, young
sounding ya know?

It is really neat. I would love to see the lights but making that discovery
has got the send chills to ya as well..
What a phenomenon!

You can also hear dogs barking in the back ground. That makes it all to
spooky and real sounding like you said of the paraboloic mic.

And beyond that, they tend to be built to exceptionally low standards of spectral purity and offer no band switching because they were designed to operate on a single band.

You would have to present documentation in the form of a copy of your license or grant permitting you to operate from that location from the government controlling the site, and might have to show in the case of some islands that you had permission to land......

All transmitting equipment, built for sale, that isn't a one-of-a-kind
hobby project, needs to be approved by the FCC. That's the law.

FCC rules part 47 section 2.815 makes it illegal to sell or offer for sale
such items, with a few loopholes for amateurs that do not apply in this case.

They are illegal to sell commercially. And indeed there are 2 key issues.
An exception allows sales of an uncertified amp if it is truly one amateur to another and not a business. Homebrew amps are sold all the time and there is nothing wrong with that.

Second issue - the rule does not say they are illegal to use, just illegal to sell commercially. You can use them so long as you do so in accord with your license priviledges and you take responsibility for their spectral purity.

So if you pick up one of these "illegal" amps, you can use it but you must be sure it is not generating harmonics, spurs or other relics that could get you trouble. You do that by not overdriving it, and by using a high Q antenna like a Hamstick that will only radiate on one band and not a multi band antenna like a Hustler.

Or use bandpass filters, such as contesters use. Checking for
linearity is a very good idea, also, if you're really using it as a
linear.

Except that contesters usually put the bandpass filters between the exciter and amplifier, rather than between the amplifier and the antenna. (keeps the power-handling requirements down - these days, the amplifiers are cleaner than the exciters anyway!)

Something else that should be mentioned about illegal CB amps.. is safety.

A local ham once obtained one as part of an estate sale; he wanted me to evaluate whether it was worth keeping. Before I did anything else, I hooked a voltmeter between the chassis and the cap of the nearest tube.

It read 400 volts.

The original owner had been dead for two weeks, the amplifier hadn't been plugged in in that long.

There were no bleeder resistors. There were no interlocks. That was an amazingly dangerous piece of gear.

Rumor is that the possibility of getting any more amateur operation from
either of them is stymied because they are now totally protected as
wildlife sanctuaries, similar to certain islands near Antarctica in the
Australian fold. Secondly, getting that changed or thought about
requries tons of money .. in advance .. with no promise of success ..

So rumored .. gloom.

AMATEUR RADIO NEWSLINE(tm) REPORT #1271 - DEC 21, 2001

Amateur Radio Newsline report number 1271 with a release date of Friday, December 21st, 2001 to follow in 5-4-3-2-1.

The following is a Q-S-T. A national ham radio society is asked to train new hams for government service. This story is first on this weeks Amateur Radio Newsline report number 1271 coming your way right now.

(Billboard Cart Here)

**

THE EDUCATION SCENE: HAM TRAINING LEADS TO SA GOVERNMENT JOBS

A government agency has asked a national ham radio society to help train new hams. The reason. careers with that agency. Its happened in South Africa as we hear from Q-News Graham Kemp, VK4BB:

--

In South Africa, their Department of Communications contacted the SARL with the request to train seventeen post graduate students as amateur radio operators. These students had already qualified in different fields, some technical and some in the Information Technology fields. There were nine ladies and eight men. From next year they will be employed by the Department of Communications, and the idea was to give them some experience in the field of radio communications.

Training was done by Henry Chamberlain, ZS1AAZ, over a period of one full month. In addition to lectures, the students could see practical demonstrations of amateur radio and they spent one period building and testing a Morse Code practice oscillator. They also visited ZS1AAZ's home shack. The seventeen students had already proved their ability by passing their previous studies successfully. It was therefore no surprise that they ALL passed the amateur examination.

For the Amateur Radio Newsline, I’m Graham Kemp. VK4BB, of Q-News.

--

The seventeen will be assigned specific jobs with the South African Department of Communications in early 2002. (SARL, Q-News)

**

SPECTRUM SHARING: FCC SAYS YES TO HIGHER POWER UNLICENSED TRANSMITTERS AT 2.4 GHZ

The FCC has approved issued new rules permitting certain unlicensed Part 15 devices operating between 2405 and 2450 MHz to use higher power, but under significant restrictions. The band is allocated to amateurs on a co-secondary basis. Amateur Radio Newsline's Norm Seeley, KI7UP, takes a look at the FCC action:

--
According to the C-Q Magazine website, the decision was adopted on December 11Th. In it, the FCC approved a petition by Sierra Digital Communications, Inc. to permit unlicensed fixed point-to-point transmitters in the band to operate at field strengths of up to 2500 millivolts per meter. This is a tenfold increase over past power limitations.

Sierra Digital Communications manufactures and sells equipment for wireless data communications, including high-speed wireless computer networks and Internet links. The ARRL had opposed Sierra's petition on the basis of increased risk of interference to amateur and amateur satellite operations. This is because the downlink from the AO-40 satellite is in the 24 GHz band.

But the FCC said it believed the restrictions it is imposing on the higher-power transmitters will provide sufficient protection to other users. This includes industrial/scientific/medical equipment, radar and Earth exploration satellites, in addition to amateur radio. The new rules require highly directional antennas and high frequency stability of transmitters.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP.

--

In its decision, the FCC singled out an ARRL comment where the League clamed that Part 15 devices are permitted by the Communications Act of 1934 only where they have no interference potential to licensed services. The Commission called the League's interpretation of the law overly conservative. It said that its rulings to date appropriately provide a means for allowing unlicensed devices to share spectrum with licensed services with little risk of interference and adequate protection to licensed service. (CQ)

**

HAM RADIO AND THE WAR: MARS ON THE AIR FROM THE WAR ON TERROR

Ham radio is making it possible for those fighting the war against terrorism to phone home. This as the ARRL Letter announces that Army Special Forces on duty in Islamabad, Pakistan, and in other undisclosed locations have begun keeping in touch with home via MARS -- the Military Affiliate Radio System.

Phone patches provided by the Military Affiliate Radio System make it possible for troops to call their families in the US from areas where commercial communications channels are not available. Amateur Radio operators enrolled in MARS provide the connection between the Military Affiliate Radio System stations deployed overseas and the telephone system back home.

During the Vietnam War, phone patches were a major source of comfort to families and service members alike. MARS also responded during Operation Desert Storm. (ARRL)

BREAK 1

Wishing you a Happy Holiday from the United States of America, we are the Amateur Radio Newsline, heard on bulletin stations around the world, including the Great South Bay Amateur Radio Club repeater, W2GSB, serving West Babylon New York.

(5 Sec Pause Here)

**

HAM RADIO AND THE WAR: GODDARD ARC FEELS THE PINCH

The Goddard Amateur Radio Club says that it has been having serious problems with manpower lately and the war on terrorism is partly to blame. This is because new security restrictions imposed after September 11th require all visitors to Goddard to be escorted by a badged employee at all times.

According to Dan Schultz, N8FGV writing to the Amsat Bulletin Board, the clubs WA3NAN ham shack is located on government property we are bound by the new restrictions. This says Schultz makes it much harder to bring in control operators who are not Goddard employees. As a result, WA3NAN which for years has been the primary rebroadcaster of shuttle communications on the ham bands is not there as often as it would like to be.

Schultz also notes that the Goddard Amateur Radio Club currently has no president because no one has stepped forward to accept the job. The position of Shuttle Retransmission Director is also vacant, this is the person who makes the phone calls to get operators lined up to pull shifts at the retransmission facility.

Schultz says that the long term technical solution will be to automate the station with remote controls and telemetry for the transmitters so that the retransmission operator can operate from his home. But adds N8FGV, but that is still a little ways off in the future. As a result, WA3NAN is not there as much as it used to be. (AMSAT-BB)

**

AMERICA AT WAR: NEW HOMELAND TERRORIST ALERT SYSTEM PROPOSED

Homeland security chief Tom Ridge is considering a multistage system for terrorism alerts. Ridge is also weighing how to reimburse states for the costs of increased security since the terror attacks.

Since the September 11th terrorist attacks on New York and Washington, Ridge has issued three general warnings. None of the alerts identified specific targets.

Now, according to news reports, Ridge will propose a four-stage Threat Alert Network similar to the military's DEFCON'' system. DEFCON alerts military personnel to the seriousness of a threat. A private sector version would be aimed at helping state and local law enforcement personnel determine the level to react to a Federal government issued terror warning.

The proposal came to light after California Governor Gray Davis met with Ridge about a week and a half ago. Davis told Ridge he had proposed such a similar system for California, and said Ridge had asked him to wait pending a national model. Ridge told Davis that he hopes to unveil the national system by January 15th of 2002. Whether or not ham radio will play any part in such an alert system is not known as we go to air. (Published news reports)

**

AMERICA AT WAR: CONFERENCE HELD ON ALERTING THE PUBLIC

Still in there area of alerting the public, more than 120 leaders from the emergency warning community met November 30th and unanimously called for the creation of a public-private partnership. This, aimed at improving the delivery of timely and accurate emergency information to people at risk. Don Wilbanks, KC5MFA reports:

--

The group came together at a special conference arranged by the National Warning Organizing Committee. This is a group of emergency warning advocates representing the public and private sectors.

Those attending included federal, state and local government officials, not-for-profit organizations, and representatives from the private sector. And in the end the group has tasked itself to improve the delivery of warnings and emergency information to the public. This, through better education, research, standards creation and policy recommendations.

The Committee Chairman is David Liebersbach, Director of the Alaska Division of Emergency Services. He has appointed Peter Ward, formerly of the U.S. Geological Survey and chair of a White House-appointed working group on natural disaster information systems, to head up a committee to determine the new organization's structure and governance. Ward also serves as the new organization's spokesman. More news on the work of this committee as information is released.

For the Amateur Radio Newsline, Don Wilbanks, KC5MFA, in New Orleans.

--

The conference was hosted by The MITRE Corporation in McLean, Va. MITRE is a not-for-profit national technology resource that provides systems engineering, research and development, and information technology support to the government. (MITRE)

HAM RADIO AND EDUCATION: HAM RADIO MASS BALLOON LAUNCH

The Timberlane Regional High School, in Plaistow New Hampshire will be taking part in a high altitude experiment next spring. This with an announcement that the Coordinated Algebra II and Physics classes taught by Lorainne Mascioli, N1VYQ, and Lou Broad, N1RCA, are planning thier third year of ham radio and high altitude balloons in May of 2002.

Six student teams will attempt to launch their balloons at the Hosstraders Ham Fest at the Hopkington Fair Grounds in New Hampshire. Each team is responsible for design, construction, and operation of their system. Each balloon will carry a GPS receiver, a packet reporting system and several experimental payloads. This could include cameras, video, amateur television and cross band repeaters. At maximum altitude such systems will have a range of 300 miles and should easily cover all of New England and more.

The class has grown to 34 students and they are planning to launch six balloons in a two day period! This could make it a record breaking event in both ham radio and high altitude ballooning. For more information check out the CAPSAT Website located in cyberspace at
http://www.mv.com/ipusers/llb/capsat.html (Via Internet)

HAM RADIO SPOTLIGHTED IN POUGHKEEPSIE JOURNAL

New York’s Poughkeepsie Journal has highlighted ham radio in a December 6th front page article. The piece focused on the public service aspects ham radio with quotes and pictures.

According to Andrew Schmidt, N2FTR, who is an ARRL Assistant Director in the League’s Hudson Division, many Poughkeepsie area local hams spent time at Ground Zero or at the Red Cross centers in the greater NYC area following the September 12th terrorist attacks. Andrew says that their work is well highlighted in the article. The link is:
http://www.poughkeepsiejournal.com/thursday/community/stories/co120601s12.shtml. (Via Internet)

**

A SPECIAL AM EVENT: THE HEAVY METAL RALLYE

This is Paul Courson WA3VJB with news of an operating event Saturday night, December 22nd. It's the Heavy Metal Rally, featuring big iron, vacuum tubes, and the warm and inviting sound of AM on the shortwave ham bands.

Starting around local sunset listen for rigs in the 250 watt or 250 pound category to populate AM gathering points on 160, 75 and 40 meters.

Jim, W8MAQ was testing HIS 1947 Collins 300-G a few days ahead of the Heavy Metal Rally. The retired broadcast transmitter re-tuned to 75 meters sounded like this:

In-Q: it's been great to get on... 300-G..
Out-Q: forward to that

--

Prizes include a trophy, pictured as a posting on QRZ.com, for the best sounding station.

Last year more than a hundred stations took part -- and the winner was Mike, WN3B, on a Gates 250-C. He gave Jim an audio report the other night:

--
In-Q: It's got more highs....
Out-Q: Shure 55
--

The Heavy Metal Rally is sponsored by Electric Radio, a magazine featuring vintage ham radio, and published by Barry N6CSW. The event was pioneered by Bill, KD0HG of Colorado, a broadcast engineer with a knack for big homebrew rigs that sound great.

Frequencies and a website are listed on the news page of QRZ.com.
Paul Courson, WA3VJB, Annapolis Maryland.

**

HAM RADIO HISTORY: COLLINS RADIO CENTER NOW OPEN

The new Collins Radio Center which is the headquarters for the Collins Radio Association is now officially open for guests and visitors. Located near Johnstown, Pennsylvania, the Collins Radio Center includes a representative collection of Collins radio equipment, from the 1930's to the present. There are other classic and antique radios on display as well. More information is on the web at www.collinsra.com. (Collins RA Press release)

**

HAM RADIO BUSINESS: CITY ELECTRONICS - RIP

Alex Stalinsky, WA5UHT, who owns City Electronics, a small parts outlet in Houston for almost 50 years, has decided to call it quits. According to Chris Boone, WB5ITT, this place was one of the main sources of parts, components in Houston long before the likes of Mouser and Digikey took off in mail order sales.

Chris tell Amateur Radio Newsline that he bought many parts from City Electronics in his early days of repeater building. In fact, Chris says his mother claimed that he owned half of the local Radio Shack but she was wrong. It was really like he was a part of City Electronics as were many other young Houston area hams and Chris tells Amateur Radio Newsline, it will be missed. (WB5ITT)

BREAK 2

By telephone, satellite and the World Wide Web, we are the amateur Radio Newsline with links to the world at our only official website - www.arnewsline.org.

**

EMERGING TECHNOLOGY: INTELS NEW WARP SPEED CHIP

In another step toward faster computers, Intel Corp. has developed two new technologies that will help the tiny transistors inside microprocessors run cooler, use less power and operate more efficiently. The new designs

complement several recent breakthroughs in building minuscule transistors that form the basis of all modern computing as they switch on and off billions of times a second. Earlier this year, Intel unveiled transistors just 20 nanometers wide. Today's Pentium 4 has 42 million transistors, each about 180 nanometers. For reference, a manometer is about 10,000 times narrower than a human hair. (Intel)

**

EMERGING TECHNOLOGY: DTV ROLLOUT UPDATE

Roughly two-thirds of commercial television stations plan to broadcast a digital signal by a federal government deadline of May 1, 2002. This, according to the National Association of Broadcasters.

In a report to the Federal Communications Commission, the industry group said that many of those that won't make the deadline are waiting for equipment to be delivered and expect to have digital broadcasts on the air in the months afterward. But some stations in smaller markets are having a hard time paying for the upgrade, the association says.

Right now, most home television sets in use receive only analog signals. But congress has mandated that broadcasters must give up their analog channels to the government by 2006. As a result, there are concerns that consumers won't have made the costly upgrade to televisions that can receive digital signals by that date. (Broadcasting Daily)

**

HAM RADIO IN SPACE: EXPEDITION 4 CREW NOW ON THE ISS

An all ham crew is now in charge of the International Space Station and will be for the next six months.

Three astronauts and cosmonauts now running the ISS. They are Russian Commander Yuri Onufrienko, RK3DUO, along with American Flight Engineers Dan Bursch, KD5PNU, and Carl Walz, KC5TIE. They make up what is called the Expedition 4 crew and all three are expected to be on the air regularly for school contacts and possible open QSO times made available to talk with hams worldwide, as time permits.

The Expedition 3 crew comprised of United States Commander Frank Culbertson, KD5OPQ, along with Russian Flight Specialists Mikhal Tyurin and Vladimir Dezhurov is now back on good old Mother Earth. They returned on Monday, December the 17th aboard the space shuttle Endeavour. (AMSAT-NA, ARISS)

**

HAM RADIO IN SPACE: EDUCATIONAL ASSISTANCE FROM VK5ZAI

Attention educators. If you are thinking about teaching the International Space Station, here is a bit of assistance.

Tony Hutchison, VK5ZAI has updated his web pages with links to help schools in obtaining educational programs associated with the I-S-S and space science in

general. Hutchison says that this should be of interest students and teachers alike especially if they are contemplating applying for a ham radio contact with the astronauts on the station.

Hutchison is the Australian ARISS Coordinator. His website in cyberspace at www.electric-web.org (VK5ZAI)

**

SPACE AND SCIENCE: CHINA ON THE BRINK

Space Daily reports that China is getting ready to launch its third unmanned spaceship. This, to pave the way for sending that nations first astronaut into space sometime next year. China is reportedly also in final testing and preparation to launch a new satellite dedicated to study ocean colors and related phenomena. (Space Dailey)

**

DX

In DX, 9V1YC reports that he and eleven other hams will be activating South Georgia and South Sandwich Islands in January and February of 2002. The operation will be strictly on the high frequency bands. Exact dates, call signs and QSL managers are not being made public until the group is actually on the air. The New Zealand registered vessel "Braveheart" of ZL9CI fame will be supporting this team for the entire 30 day trip. (RSGB)

A bit higher in frequency, Jeff Klein, K1TEO reports that December 6th was another great D-X day on the 6 meter band. Jeff who lives in Connecticut says over the VHFReflector that the band was open for a solid two hours beginning at 7:30 am local. And talk about D-X. On his very first C-Q he landed HB9QQ who was operating portable HB0. Even better, Jeff says that the fifth caller was 4X1RF. (VHF Reflector)

Over in Great Britain hams are actually D-Xing for charity. Jeramy Boot G4NJH, reports from Nottingham in the U-K.

--

Every year in September, the British Wireless Fund for the Blind -- a registered charity - organises a fund-raising event in which amateur radio clubs and individuals are sponsored for the number and distance of the contacts that they make. As of the 11th of December, the British Wireless for the Blind Fund reported that 'Transmission 2001' had raised £6681.48, with more coming in every day. They say that they hope the final total will reach £7000. The charity offers prizes to the club and individual raising the greatest amounts.

This year the Cray Valley Radio Society operating as GB2FB and taking part for the first time, won the prizes for the club raising the most money and for making the most contacts. Robert Guscott, M5GUS, operating as GB0WB, won the prize for the leading individual.

Jeramy Boot, G4NJH.

--

The bottom line. This is another way that hams can not only enjoy their hobby, but can help others at the same time. (G4NJH)

**

THAT FINAL ITEM: A HAM RADIO CHRISTMAS STORY

And finally this week, the story that we wait all year to tell you. Its the ongoing story of hams who care about hospitalized children and what they do to bring a bit of holiday cheer to those kids who cannot make it to the mall to spend a few moments with old Saint Nick. Here’s Amateur Radio Newsline’s Joe Moell, K0OV:

--

As most hams know, propagation is very good this time of year. It's so good that it's easy to make contact with the North Pole. Many clubs around the country are taking advantage of these propagation conditions to set up QSOs with a very special North Pole station. They're making these contacts from hospitals and rehabilitation centers, and they sound like this:

--
Santa and Kids Audio Here
--

That's what the North Pole Network sounds like in southern California, where it's celebrating its 25th anniversary at Childrens Hospital of Orange County. In the past few days, I've heard from other clubs in the North Pole Network, including the AkSarBen ARC in Omaha and the Southwest Missouri ARC in Springfield. And YOUR club could bring holiday joy to hospital patients. There's a how-to article on the subject, with a dozen suggestions for your best North Pole Network ever, currently running on ARRL's Web site. That's arrl.org, of course. And there's even more about North Pole Network in southern California, plus lots of photos showing a quarter century of holiday fun, at the Hospital Disaster Support Communications System Web site, www.hdscs.org. Check it out, and start planning for your own North Pole Network joy.

Does anyone in here do any AM/MW band Dxing? I am relatively new at this but was wondering if anyone could email or post a list of stations that can be pulled in easily from the NYC area.

I am in the NYC region and I have both a CC radio and a Sony ICF-SW7600G.

Can anyone send me some of the stations they have logged?

Thanks!

***Thanks for all of the replies. It appears that past Andaman Island operations used VU4, VU7 and VU9. I have a card from VU4APR for an 1987 QSO. But need them on ten meters. Im using the DX Monitor and had programmed in VU for DX alert. Unfortunately, there are a lot of VUs out there causing the alert to activate. To avoid that, I simply wanted to put in the prefix that is associated with the Island(s). Guess I have two choices (1) program in the 3 above or continue to use just the VU....Happy holidays and again thank you.

When I went to Tahiti (French Polynesia) a few years ago, I was amazed how many of the CA, OR and WA broadcast stations (AM broadcast band) could be received there after dark. Lots of Central and South Americans too. But the biggest surprise was that there was a good path to central Africa every day (early mornings) on Tropical Band 4 - 5 MHz. That's a real long way from FO!

You can safely set alerts to VU4 and VU7 since those are the unofficial prefixes. However, it is very unlikely that you'll hear them any time soon and it will be a major DX news announcement when it eventually happens.

There was a thread a while back about the best way to send a QSL from the USA.

Is it still the concensus that registered mail is the only way? Anyone have luck without going registered? Eight dollars for postage and a couple more for Abubaker is a bit steep.

Or should we ship our cards to Walt in the UK and have him forward them <g>.

73 and Happy New Year

I have confirmed 3 contacts with Abrubaker. All were sent registered
along with some $$. It all depends on how much you want 5A confirmed.
My big boss in DC, went that way and received a card within about 4
weeks. I did read that he is moving to DL land for school. I would
think think that you might want to hurry to make your choice. Just
remember I think until recently he was the only Ham in Libya. Abrubaker
has trained some new hams but I have not seen (DX Spots) or heard them on
the air for at least a month.

LOL! No thanks! I only have one card from 5A1A, but then I only ever
sent for one. :-)

I heard that Abubaker has gone to Germany on a 3-year university
course, so maybe you can't get cards from his Libyan P.O. Box any more
- not sure.

Good luck and a Merry Xmas!

Wes,
Its a steep price but it does work. I sent mine registered and included a
$5 green stamp and SASE and got the card in about 3 months.

3284. PSK or RTTY from Mellish Reef in April 2002?

Newsgroup: rec.radio.amateur.dx
Date: 2001-12-26 11:00:52 UTC
From: Adam MAURER <vk4cp@bigpond.com>
Message-ID: <n0iW7.15413$HW3.15146@newsfeeds.bigpond.com>
Source record: 15189

Hello all

We are interested in comments regarding whether we should run either PSK-31, RTTY, or neither during our DXpedition to Mellish Reef in April 2002.

RTTY and PSK-31 both have pros and cons. We are simply asking which mode you would prefer us operate on, as it can only be one or the other in order to do it justice.

If neither is desirable then of course we can spend more time concentrating on CW and phone operation.

Let us know your thoughts in the Poll we are conducting.
Visit:
http://www.qsl.net/vk9ml/2002/
and let us know.

If you only respond here then your preference won't be counted - visit the site & vote!

Phil,

I would be utterly surprised if 3W7CW did not have all his papers in good order.
His name i Tomasz Rogowski and he is a Polish diplomat, a former counsellor at the Embassy of Poland in Hanoi. Recently, he moved to to their consulate in
Ho Chi Minh City. I have served at the Embassy of Sweden in Hanoi and met Tomasz several times. There must be some misunderstanding somewhere!

Happy Holidays,

Hrane (YT1AD), and Voja (YU7AV) just came back from P5 land.

They have the license to operate from P5, together with two other
operators starting March 5. 2002.

In return they will instruct future Korean ham radio operators.
Minimum of 20 novice operators are expected to attend.

Callsigns are known, and will be published when the expedition
begins.

Source record: 15193

On my trip from the States to India, i did enquire with a few old ham buddies
on the possibility of getting a VU4 or a VU7 temp permit to activate.
The answer is that a lot of folks have tried and failed. The Islands have
been handed over to the control of the Indian Defence. The main reasons
being the Ecological impact of issues such as poaching of the Andaman & Nicobar
Islands. To add to it, is the security issues related to other activities going on
down
south in 4S7 land.

I knew of another ham buddy who worked on an All India Radio transmitter site in
VU4, - VU2JPS.
He had worked a number of stations in the past as a portable from VU4. But he is no
longer on the
island.

Hope to hear a station from VU4/VU7 some day and if that day ever comes, the amateur
community
will know in a big way. If not, anyone else that you might work could be a pirate
and hence save
your $$ and aggravation.

Hello Peter,
You might get quite a boost in your hearing abilities with the ClearSpeech Base Unit DSP Noise Filter. It has worked great here. Just today , as an example, I was able to work 3XY6A for an all-time 'new one'. His signal here was so weak I could not hear a trace of him with the ClearSpeech unit turned off. But with it on he was easily q5 and I was able to 'put him in the log!'

Check them out at www.amcominc.com The ClearSpeech homepage

AMATEUR RADIO NEWSLINE(tm) REPORT #1272 - DECEMBER 28 2001

==========

A NOTE TO THOSE WHO ONLY “READ” AMATEUR RADIO NEWSLINE(tm)

For those of you who only know of the Amateur Radio Newsline (tm) as a text newsletter we would like to invite you to listen to the audio version. This Amateur Radio Newsline (tm) script is actually written for the “spoken word.” It is recorded each by professional broadcasters and is available for private listening or rebroadcast over your repeater. Three methods of delivery are available: Streaming audio using RealAudio, FTP RealAudio or dial-in telephone. Please visit our website at http://www.arnewsline.org for a list of telephone numbers (you have to pay your own long distance charges) and links to audio servers providing our voice newscast (for free).

de
The Newsline Production Team

==========

Amateur Radio Newsline report number 1272 with a release date of Friday, December 28th, 2001 to follow in 5-4-3-2-1.

The following is a Q-S-T.

A not so welcome FCC Christmas present for several hams and an ARRL survey says that most hams no longer want the novice bands. These stories are first on this New Years week edition of the Amateur Radio Newsline coming your way right now.

(Billboard Cart Here)

**

ENFORCEMENT: FCC DESIGNATES KEVIN MITNICK, N6NHG, LICENSE RENEWAL APPLICATION TO PUBLIC HEARING

A convicted computer hacker now has to face an FCC if he wants to keep his ham radio license. This, as the regulatory agency designates the Amateur Radio license renewal application of Kevin David Mitnick, N6NHG, for hearing. We have this report:

--

According to the FCC, Kevin David Mitnick is best known to the world as a hacker who admitted that he broke into a number of computer systems and stole proprietary software belonging to Motorola, Novell, Fujitsu, Sun Microsystems and other companies. He has also admitted using a number of means to commit

his crimes including social engineering, cloned cellular phones ad sniffer programs placed on a victims computer system. Mitnick even acknowledged altering the programming of computer systems belonging to the University of Southern California and using these computers to store programs that he had misappropriated.

Mitnick was sentenced to forty six months in federal prison for his August 9th 1999 conviction. He had previously been sentenced to twenty-two months in prison for possessing cloned cellular phones after his arrest in North Carolina in 1995 and for violating his supervised release that had been imposed after his conviction for unrelated computer fraud in 1989. He is currently on probation following his release from prison in January of 2001. And in December of 1999, Kevin David Mitnick, N6NHG, applied for renewal of his Amateur Radio Station and his General Class Operators License.

His license expired on December 12th 1999. The FCC put the renewal application on hold pending further inquiry. Now the agency has made public that it intends to challenge Mitnick's right to hold a ham radio license and has issued a Hearing Designation Order. In plain English, that means Kevin David Mitnick has to prove to the government why it should renew his ham ticket or have his license cancelled.

The FCC is challenging Mitnick's license renewal request on the ground that his past criminal behavior raises a substantial and material question as to whether Mitnick possesses what the it terms as the requisite character qualifications to remain a Commission licensee. The FCC says that in the context of broadcasting licenses, it has long held that evidence of any conviction for misconduct constituting a felony will be considered as relevant to its evaluation of an applicant's character. It also says that the broadcast character qualifications standards have been used as guidelines in the evaluation of non broadcast licenses including those in the Amateur Service and that the courts have upheld the Commission's right to do this.

The agency cites two recent cases. That of Herbert L. Schoenbohm, the ex-KV4FZ and Leslie Brewer who used to be KC4HAZ. Brewer, also known as the Tampa Party Pirate lost his ticket because of his unlicensed broadcasting in the commercial F-M band . Schoenbohm lost his based on a fraud conviction of using an unauthorized telephone access device. And the FCC says that any conviction for fraudulent conduct calls in question a licensee's ability to act in a manner consistent with FCC regulations.

And so the FCC has ordered that a hearing be held before an Administrative Law Judge to determine the effect of the criminal convictions of Kevin David Mitnick on his qualifications to be a Commission licensee. It also says that pursuant to provisions of the Communications Act, the burden will be on Kevin David Mitnick, N6NHG, to provide proof that his license renewal application should be granted. Mitnick was given 20 days of the mailing of the Hearing Designation Order to file a response.

For the Amateur Radio Newsline. I'm Andy Jarema, N6TCQ.

--

The hearing designation order on Mitnick’s license was adopted by the Commission on December 11th but not released until Friday, December 21st. Ironically, less than twenty-four hours earlier, Mitnick had made a guest appearance on Art Bell’s Coast to Coast A-M where he discussed his future plans. At that time he was apparently unaware that the FCC had some plans of its own in regard to whether or not N6NHG will remain a radio amateur and Commission licensee.

The complete text of the Mitnick FCC Hearing Designation Order is on the web at: http://www.fcc.gov/Daily_Releases/Daily_Business/2001/db1221/fcc01359.txt (FCC)

**

ENFORCEMENT: GERRITSON LICENSE PLACED ON HOLD PENDING POSSIBLE HEARING

Kevin Mitnick, N6NHG, is not the only person hearing from the FCC in recent days. So have a number of others including another Southern California resident who could face the same kind of a hearing. Riley Hollingsworth, K4ZDH, is the FCC’s Special Counsel for Amateur Radio Enforcement:

--
Hollingsworth: “We notified a Bell California licensee; Jack Gerritson, ex-KG6IRO, that the Wireless Telecommunications Bureau, had set aside his Technician grant so that a recent conviction for radio interference could be evaluated. Now, he has no authority to operate Amateur Radio equipment until the matter is resolved.”
--

The action to place Gerritson's license up for hearing was taken November 14, 2001 and is based in part upon complaints about the operation of his station and questions regarding Gerritson's qualifications to be a Commission licensee. The FCC says that both issues were raised as the result of Gerritson's 1999 arrest and year 2000 conviction for interference to police radio communications. (FCC)

**

ENFORCEMENT: FCC REOPENS KY-W.VA REPEATER CASE

The FCC is also continuing its crackdown in the area of repeater interference issues. In fact it is taking a second look at a coordinated versus uncoordinated issue in the Tennessee and West Virginia border area. Again, Riley Hollingsworth, K4ZDH:

--
Hollingsworth: “We notified parties in a repeater dispute in West Virginia that we would be reopening that case after information that one of the repeaters is coordinated after all. We had declined to intervene earlier this year in that case.”
--

The letter stating that the FCC is reopening that case went to Michael Horn, KB8GDF, of Lenore West Virginia, Kenneth Brown KF8HL of Davin West Virginia and Carl Tussey, KB4UCE of South Williamson Kentucky. Back on January 24, 2001,

had notified the three that it had received a complaint that they were operating an uncoordinated repeater on 145.390 MHz in Mingo County, West Virginia, and that this repeater was causing interference to the coordinated KC8FKP repeater operated by the Portsmouth Radio Club that uses the same frequency. The matter was closed when the FCC interpreted a notation in the South-Eastern Repeater Associations Repeater Journal that the status of the KC8FKP repeater was not known and interpreted this as meaning that the repeater was also was not coordinated.

But now the FCC says that it has recently come to it's attention that although in the SERA Repeater Journal says that the KC8FKP repeater may be listed as unknown, it is still a coordinated system. Therefore, the FCC is re-opening its review of the issues in this matter. (FCC)

**

ENFORCEMENT: IS A GOVERNMENT AGENCY RUNNING A HAM REPEATER?

Is a government agency operating ham radio repeaters in violation of Part 97 rules? Specifically, the FCC wants to know who is really running the KD6LSO and W6SON repeaters in Sonoma County California.

The FCC says that it has received allegations that the county is in charge not the hams whose call signs appear on the machines. Since a county governmental entity cannot be an Amateur licensee, the FCC is collecting information in order to determine if there are breach of its rules. (FCC)

**

BREAK 1

This is ham radio news coming to you from the United States of America. We are the Amateur Radio Newsline, heard on bulletin stations around the world, including Rocky Mountain Radio League repeaters serving Denver and Bloomfield Colorado.

(5 Sec Pause Here)

**

RESTRUCTURING: ARRL STUDY SAYS NOVICE BANDS MAY NOT BE NEEDED

An ARRL study group has recommended doing away with the current novice bands and divvying them up among the remaining licenses classes. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

An ARRL Novice Spectrum Study Committee has recommended that the League petition the FCC to eliminate the CW novice subbands. It also wants a rules change that will allow Novice and Technician licensees with element 1 credit to be permitted to operate Morse code on the General 80, 40, 15 and 10 meter C-W allocations at up to 200 watts power out.

These are just two of the suggestions contained in a report that will be presented to the Leagues Board of Directors when that group convenes in mid January. The study committee will also suggest recognizing portions of the 80, 40, 15 and 10 meter Morse bands for what it calls ''slow CW operation.'' The committee says that this would aid new operators in enhancing their Morse code skills.

Finally, the panel also recommends re-farming -- that’s another way of saying reapportioning -- reapportioning the current Novice and Tech Plus subbands in part. This, to allow expansion of the phone allocations on 80, 40 and 15 meters.

What will the ARRL Board of Directors do? We should know in less then a month.

For the Amateur Radio Newsline, I’m Norm Seeley, KI7UP

--

The committee's determinations were based on opinions expressed by 4744 hams who respond to an ARRL Novice Spectrum Study survey launched last June. Those expressing their opinions included ARRL members and also non-members. What’s really interesting is that nearly 61% of those responding were Extra class licensees. (ARRL bulletin)

**

FCC INSPECTOR GENERAL'S REPORT: THE NAMES THE SAME

The latest report of the FCC's Office of the Inspector General contained very few items of intrigue. But according to the C-G-C Communicator, one of the more colorful incidents involved a person who allegedly used the name of an FCC employee to obtain the government-rate for a hotel room in conjunction with a government-sponsored event.

Well, it turns out that the subject was legitimately attending the event, was entitled to the government room rate and just happened to have the same name as the FCC employee. The bottom line: Case dismissed.

The complete report is on the FCC website at http://www.fcc.gov/oig/Semiannual093001-1101.pdf (CGC Communicator)

**

AMERICA AT WAR: NYC PHONE SERVICE STILL SPOTTY

It's been almost four months since the attack on the World Trade Center, and telephone service near ground zero in lower Manhattan is anything but normal.

According to news reports, repair people have restored service to most customers, but thousands of lines still aren't working. As a result, customers complain that some business lines can call out, but customers can't call in.

The collapse of Seven World Trade Center crushed thousands of underground cables at Verizon's nearby switching station. About 200-thousand telephone lines and three-point-five million data circuits were affected. The company says it'll spend as much as one-point-nine billion dollars to repair the

damage. (Telecommunications Online)

**

INTERNET SECURITY: PROBLEMS WITH XP

If you just bought a new computer equipped with the Microsoft X-P operating system, or have upgraded your old one, listen up. The Federal Bureau of Investigation says that you should take certain steps to protect yourself against hackers who might try to take advantage of major flaws that have been found in X-P.

The bureau's National Infrastructure Protection Center says that in addition to installing a free software fix offered by Microsoft on the company's Web site, consumers and corporations using Windows XP should disable the product's universal plug and play features as well. The FBI also warned computer system administrators to actively monitor for specific types of Internet traffic that might indicate an attack was under way.

The FBI did not provide detailed instructions how to disable plug and play. Outside experts also caution that disabling the affected Windows XP features threatens to render unusable an entire category of high-tech devices about to go on the market. This includes a new class of computer printers that are easier to set up. But the same experts also acknowledge that disabling plug and play in X-P could afford some protection against similar flaws discovered in the future.

Microsoft considers disabling plug and play options as being unnecessary but the company does acknowledge that Windows X-P suffers from serious problems that can let hackers steal or destroy data files across the Internet or implant their own unwanted software. The FBI says that the glitches were unusually serious because they allow hackers to seize control of all Windows X-P operating system software without requiring a computer user to do anything except connect to the Internet. (Published news reports)

**

THE LAW: A FIGHT AGAINST GRAY MARKET ELECTRONICS

A group of American high-tech companies is opening the year 2002 with a campaign to protect consumers from unwittingly buying consumer electronic products intended for foreign markets. Electronics that the manufacturers claim may not work in the United States.

Compaq Computer is one of the companies involved in the campaign. It says that the group will warn consumers about the dangers of buying such products, and how to avoid getting duped. The other companies in the group are Hewlett-Packard, 3 Com, Nortel Networks, and Xerox. The effort may prompt more lawsuits against distributors who resell so called gray market items in the United States. (Computer Products Daily)

**

SPECIAL EVENTS: USS ARIZONA K7A A SUCCESS

Steve Gurley, KJ7WK the coordinator of the USS Arizona Special Events Station K7A tells the Amateur Radio Newsline that the event was an overwhelming success. Gurley says that the memorial station contacted amateurs in all 50 states, and 8 other countries while handling over 2600 QSO's. In fact says KJ7WK, the sponsoring group has already received certificate requests from 609 stations as we go to air. There were ten operators in three counties in the Phoenix Arizona metroplex operational during most of the three days K7A was on the air. (KJ7WK)

**

SCHOLARSHIPS: DARA SCHOLARSHIPS FOR 2002

The Dayton Amateur Radio Association says that the nominating period for its annual scholarship program is now open. The deadline to receive applications is June 1, 2002 and the announcement of winners will occur around June 15, 2002. Applications are available from the DARA Scholarship Committee, 9873 Lower Valley Pike, Medway, Ohio 45341. Please note that this is a new address from years past. Again it is the DARA Scholarship Committee, 9873 Lower Valley Pike, Medway, Ohio 45341. Also, for more information on the Dayton Amateur Radio Association and its programs, please visit www.dara-w8bi.com on the world wide web. (DARA)

**

AWARDS: DARA OPENS NOMINATIONS FOR HAM OF THE YEAR

The Dayton Amateur Radio Association also asks that we remind you that the nominating period for the 2002 Dayton Hamvention Awards is now open. There are three awards presented each year. They are the Radio Amateur of the Year, Special Achievement, and Technical Excellence.

All amateurs Novice through Extra are eligible. Awards are decided by the Awards Committee, based partially upon the information received. Magazine articles, newsletters, newspaper clippings, videos and the like are appreciated but cannot be returned. The deadline for nominations is January 31, 2002. Nominations should be sent to Post Office Box 964, Dayton Ohio 45401. They can also be submitted by completing the e-form on the web at www.hamvention.org. (DARA)

CHANGING OF THE GUARD: BADGER STATE SMOKE SIGNALS EDITOR JIM ROMALFANGER, K9ZZ - SK

I’m Bill Pasternak, WA6ITF.

The ham who put the state of Wisconsin on the ham radio map has passed away. This, with word that Jim Romelfanger, K9ZZ died Saturday evening December 22nd of an apparent heart attack..

According to Romalfanger's close friend Ken Ebneter, K9EN, Jim has been in declining health for some time. Romalfanger had a stroke a few weeks ago, affecting his right arm which was already weakened by polio. But Ebneter says that K9ZZ seemed to be improving until just recently. Ebneter says that Romalfanger had been in the hospital early last week but was home when he passed away of an apparent heart attack. In fact, K9ZZ had stopped by to visit a ham radio friend that afternoon. Another friend found him dead that evening when he stopped by to visit.

His full name was Arthur James Louis Romelfanger but to the world of ham radio he was Jim, K9ZZ. And Jim Romalfanger made Wisconsin a ham radio household word by editing as three decade state-wide ham radio monthly newspaper called Badger State Smoke Signals -- and doing so as a volunteer.

Notice we said newspaper and not newsletter. This is because Smoke Signals is just that. A newspaper that at its peak ran up to 40 pages filled with articles about ham radio in the Badger State. In addition to being the 32 year editor of Smoke Signals, Romalfanger was nationally published over the years in CQ, QST, 73, Ham Radio, Popular Electronics, and other magazines.

Jim Romalfanger was first licensed January 1958 in Pacific Beach, California, as KN6LWB. Upgraded to General in May of 1958. He returned to Wisconsin that summer and became K9PKQ. In 1977, changed call to K9ZZ and held that call sign the rest of his life. Funeral services were scheduled for Friday, December 27th at St. Joseph Catholic Church in Baraboo Wisconsin.

Jim, from all of your friends at the Amateur Radio Newsline: We are going to miss you. (The Baraboo News Republic, K9EN, WB9QZB, and other friends of K9ZZ contributed to this report.)

AMAZING DISCOVERIES: CIRCLES WITHIN A CIRCLE

One of the most curious pure mathematical discoveries for 2001 was announced in the easy-to-read article at an incredibly long website. In brief the article says that research has led to some remarkable geometric findings involving interrelationships between tangent circles and spheres. In other words, mysterious circles within a circle.

As one researcher put it, "Where do these numbers come from? What's going on here?" Find out by going to www.sciencenews.org/20010421/bob18.asp (CGC Communicator)

**

INTERENATIONAL - CANADA: NEW ALBERTA SM

On the international front, word that Thomas Martens, VE6TRM, has been appointed the new Radio Amateurs of Canada Section Manager for the province of Alberta and the North West Territories. Martens replaces Alan Faint VE6QQ will

be stepping down from the position due to personal reasons. Martens will serve the remainder of Faint’s term which runs through June 30th, 2003. (RAC)

**

INTERNATIONAL-AUSTRALIA: CSIRO MICROTURBINES

Australian hospitals, restaurants and schools could soon source clean, reliable energy from mini power generators that operate independent of the main grid. This as CSIRO has installed Australia's first commercial microturbine, at their North Ryde Laboratory, Sydney.

The size of a small refrigerator, the turbine produces 30 kilowatts of power, independent of the electricity grid. And it does this with reduced greenhouse and other gas emissions. Thirty kilowatts is enough to power a medium commercial building such as a restaurant.

Along with fuel cells, gas engines, storage technologies and some renewable technologies, microturbines can be used to generate power close to the end-user and provide major gains in reliability and power quality. Once the design can trickle down to the home user level and price range, it could offer hams a way of always having emergency power always at hand. (Q-News)

**

SHORTWAVE MONITORING : RADIO NORWAY CLOSES

The Board of Directors of the Norwegian Broadcasting Corporation has decided to stop its own programs by Radio Norway International. This is effective as of December 31st of 2001.

According to DF5SX and G3VGW, Radio Norway’s final show was hosted by veteran broadcaster Einar Lie on New Years Eve. Also, the 1200 kilowatt Medium Wave transmitter on 1314 kHz on Kvitsoy was supposed to cease operation by December the 31st as well.

The Norwegian Broadcasting Corporation will have to negotiate with transmitter providers Norkring and Radio Denmark to close down as well. The Norwegian Broadcasting Corporation and Norkring have a contract for running the transmissions that goes through December 31st, 2003. The agency also has a leasing agreement with Radio Denmark for the same period. (Media Network)

**

DX

In D-X, keep an ear open for King George Island in the South Shetland group. HFZ0POL is reported on all H-F bands, including the newer ones, using CW, SSB, RTTY and PSK31. QSL HF0POL via SQ5TA.

And the United Arab Emerates has been heard lately A61AJ. He has been QRV on 40 meters CW around 1400 UTC. Q-S-L A61AJ via N4QB. (Various DX sources)

**

THAT FINAL ITEM: RILEY SAYS THANKS

And finally as the year 2001 comes to an end, the FCC’s Chief Rules enforcer, Riley Hollingsworth has some words of praise for the ham radio community. He passed them along through his bi-weekly Enforcement Log at www.rainreport.com, and thanks to them, we have is words for you:

--
Hollingsworth: “I would like to point out Hap, that this is the end of the third year of Amateur Radio enforcement and I will honestly say that the overall level of compliance in the Amateur Radio Service is outstanding. The Amateur licensees do a great job and they do a great job of showing that the Amateur Radio Service is -- indeed -- the only fail-safe communications system in the world and we are very proud of them.”
--

And if I can take off my reporters hat for a moment and editorialize a bit, I guess I speak for many who truly appreciate what you have done to return the Amateur Radio bands to the law abiding members of the nations ham radio community. (ARNewsline(tm), RAIN)

3302. Trance-Formation of America: Epilogue

Newsgroup: rec.radio.amateur.dx
Date: 2001-12-28 22:06:26 UTC
From: alexandra@trance-formation.org
Message-ID: <MPG.48abc58f7687@195.238.3.180>
Source record: 15057
Cross-posted to: rec.aviation.ultralight,rec.radio.amateur.dx,rec.travel.africa,rec.radio.amateur.homebrew

The safety and serenity of Alaska provided an atmosphere conducive to deprogramming, despite the pandemonium that ensued. Mark Phillips was the first man who not only did not abuse us, but cared for our welfare and well being. His patient, gentle manner was therapeutic, while his propensity for handling weapons and apparent intellect kept us safe against all odds. Through his noble actions, Mark taught Kelly and me that the world of human interaction in which we had existed for so long was contrary to most human behavior. We learned that goodness does exist on this Earth, and that there were those in Washington, D.C. who refused to tolerate the mind-control atrocities they witnessed us and others enduring.

As my eyes opened and I woke up to reality, I became enraged. Enraged for the traumas inflicted on my daughter. Enraged for a lifetime of abuse at the hands of our country's so called "leaders". Enraged that the American public had no idea as to who and what was/is running their country. Mark helped me refocus my rage in a productive direction when he told me, "The best revenge is total recovery."

I began recovering at the rate of 18 hours a day through intensive therapy destined to restore my memory and, ultimately, my mind. I learned the ins and outs of my own mind and recovered my memories in a journal. The stack of journals grew as over a decade of White House/ Pentagon-level abuse flooded my mind and intruded on my thoughts. Pictures from my past flashed across my mind as neuron pathways opened in my brain. I was regaining access to my own mind and control over my future by recovering my memory of my past.

Best of all, I was falling deeply in love with Mark Phillips. Why wouldn't I fall in love? He rescued my daughter and me from certain demise, restored my free will, and was helping me recover in total safety, and was the polar opposite of my abusers. He treated me with love, respect, and thoughtful consideration . Equally as important, Mark proved to be an ideal father figure to Kelly. He provided here with unconditional love and deep understanding. Through him, Kelly caught a glimpse of how kind men could be--and how good life could be. I had long since ceased to know that such a man even existed.

The love factor in my recovery is considerable. Not only did Mark Phillips save my life, but now I had a reason to live it! The love we share kept me going at times--like when Kelly was institutionalized in 1989 for homicidal/suicidal behavior. The loving relationship that Mark shared with Kelly during our short year together as a family was sufficient to arm here with the strength to survive her ensuing ordeal

as a victim of the so-called mental health and criminal justice system.

Kelly, now 15, remains a political prisoner in the custody of the State of Tennessee where she is denied qualified therapy for the MK-Ultra Project Monarch Mind-Control abuses she endured. The state of Tennessee, under the politically powerful influence of Kelly's abusers, is in violation of numerous laws and basic civil rights in their determined efforts to keep Kelly from qualified therapy and the family she loves.

While many of those in positions to make a difference in Kelly's case operate on a "Need to Know" basis rather than deliberately conspire with the bad guys, a closer look into Kelly's case history should raise serious questions in their minds. Questions like; "What could a child have to do with the so called "National Security" of our country?" The Juvenile court judge presiding over Kelly's case closed the doors to the media and onlookers for "reasons of National Security" while gross and blatant violations of laws and rights ensued.

For over three long years, Kelly and I have been denied our right to an unbiased attorney while court-appointed advocates and so-called "guardians" join forces with attorneys paid off by me pedophile father. My own court-appointed attorney, who doubles for the Juvenile Court judge when he takes a day off, has yet to represent my interest. My interest is in Kelly's well being and future-- and if she will have a future at all.

While Kelly is still amnesic with regard to most of her past, she is deliberately denied therapeutical access to her past, due to who and what she will recall. I am denied access to Kelly for fear she would be triggered into remembering by my mere presence. As for my deliberately "triggering" Kelly to remember what she was supposed to forget, as her abusers fear, it has been my experience that recovery must come from the inside out. Not from outside input. I want no less for Kelly that the piece/peace of mind I have gained through qualified rehabilitation. Which raises the questions: Why has the Juvenile court prohibited us from saying the name "George Bush?" Why is the "Wizard of Oz" a taboo subject for Kelly while the State of Tennessee provides her with Stephen King horror novels? Why are Kelly and I forbidden by the court to say the words "President," "politics," New World Order", and "mind-control"?.

In an attempt by state employees to "normalize" our relationship, Kelly and I are forbidden to discuss the past, my immediate efforts to affect her dire and desperate situation, or future plans as a family.

Most appalling and unjust in Kelly's view is the State of Tennessee's refusal to allow her any contact whatsoever with Mark Phillips. While I am hindered from having private conversations with my daughter due to court ordered supervisions and censorship, Kelly is denied the right to even wave to Mark across the parking lot. Considering that, like me,

Mark has never been named as an abuser, declared unfit, or violated any court orders, the questions must be asked: "Why does the State of Tennessee go to such lengths to ban all communication between Kelly and the man who rescued her and taught her the meaning of unconditional love?"

Kelly has asked these questions for years to no avail. The State of Tennessee refuses to even acknowledge her request for"an unbiased attorney who will represent her interests instead of those of the state". Kelly's pleas for an attorney to represent her go no farther than the deaf ears of the assigned state social worker "managing" her case. This social worker is operating on a "Need to Know" basis that has no basis, and she "Needs to Know" that she, along with the State of Tennessee, will be held accountable in the event that Kelly hurts someone or herself.

Kelly's frustrations have mounted beyond her ability to cope. I applaud Kelly for her determined but weakened efforts to stay in control of her own mind despite being denied qualified rehabilitation for the devastating results of Project Monarch Mind-Control abuses. Kelly's daily attempts to accomplish the impossible by psychoLOGICALLY managing her psychiatric disorder is proportionate to her high intellect and willful determination. But it is not enough to fend off the Psychological Warfare that has been waged against her through CIA Damage Containment practices designed to keep her contained in amnesic silence. She needs help. She needs a collective voice.

Kelly can be helped through public outcry and through abolishment of the 1947 National Security Act (and 1984 Reagan Amendment to same) that has destroyed the true security of our once great nation. You can write the State of Tennessee demanding to know why Kelly is being denied her right to qualified rehabilitation.

Thank you. - Cathy O'Brien

Every submitted comment of encouragement will be greatly appreciated!

3303. Alliance HD73 - Need info ASAP!

Newsgroup: rec.radio.amateur.dx
Date: 2001-12-29 00:08:29 UTC
From: Scott McClements <yetbbwa@grove.iup.edu>
Message-ID: <3C2D097D.6B5F275B@grove.iup.edu>
Source record: 15058
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.amateur.homebrew,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.space

Hopefully somebdy can help me with this one quick before I fall off my tower into a snow bank!

There was some remodeling done in my room where my rotot box was once hooked to my Alliance HD73. Problem is, the wires were removed from the control box without being marked.

So, here is the good part, I broke down, in 20 degree weather, with snow flying, wind blowing, I climbed to the 30 foot height and opened up the rotor wire cover to see what wires went where.

Here is the part I couldn't totally confirm for sure, I could only see a number "2" mark on one terminal connection.

So, here is the terminal connections as if the rotor was oriented as it were mounted in a tower and you where standing on the ground looking at it:

A 2 C
X X X

X X X
D E F

The "X"'s represent the terminal hookups. The letters represent the terminal (number) hookups in question. The "2" was the only terminal I could confirm.

So, the question is, which terminal is which number?

My rotor is the latest model, the HD-73-1, I believe its called. I found the manual online (ftp://bama.sbc.edu/downloads/alliance/hd-73/) - but it was for the HD-73. I went to the troubleshooting section and found where it tells you was resistance to look for between the wires to help straighten out which wire is which. All the resistance values checked out except the last note on the troubleshooting section where it says "Also, leads 1,3, and 6 should not show continuity to leads 2,4, or 5"

I see a some resistance between all combinations of these leads they state should show "no continuity" (open?)

Help, please!

Scott.

What is this obsession lately with giving out a name and a QTH to dx stations who clearly are trying to run the pile-up with signal reports only? Do you think that the dx is going to make a special effort of jotting down your state in the log and remember you five years down the road: "Oh, yeah, it's Joe, he's from *Idaho*!!!"

It used to be bad enough for all those waiting for their turn to listen to the ego-trips of the lunatics who just had to QSO the same dx for the tenth time in two months to give him the breaking news that his signal today is 59+30 (a whole 5 dB better than on Monday).

Might as well read him a few pages from "War and Peace" while you're at it. It's just a new country for all those waiting.

73 .... Zoran WA7AA

scott i use to own one but dont remember
try emailing the guys at rotordoc at www,.rotordoc,com
they are pretty good at repling

Just happen to have one on the bench that I want to sell. All cleaned and re-greased. Below is the wiring:

1-2-3
4-5-6
No need to fall off the tower :-)

***Zoran,
The practice of giving one's name/QTH is not new. I recall the exchange decades ago and it was, to your credit, very frustrating to listen to. Thousands of DXers biting at the bit to get a contact; any contact with a very rare station, and they had to sit there and listen to "This is W----, five, nine. Name is ------ and located in ----. Good talking to you (again). Thanks. This is W --------." In that space of that time, maybe one or two more Qs could have been made. What was even more frustrating was when the ham was a slow talker. Hams with the patience of "Job" found themselves pounding their fists on desk tops and uttering a few choice words.

Some might say the hams was just being polite and courteous. Fair enough.
But the timing is wrong. The name of the game here is to get in and out as quickly as possible so that others may enjoy the benefit of hearing their call come back from the DX station. If you want to be polite just end the exchange with a quick "Thanks", or Thank You, Good Luck". It works. Seasoned and thoughtful DXers do this; their timing is right.

Well, I agree that one can be extreme, but I always acknowledge the report given me, give them their report and give my state.

de kr5f qsl tu 599 tx

When I am running dx here in the morning many dx stations like to give me their name

de p5dx 599 joe

I appreciate the extra .. only took a sec, personalized the qsl

For experienced DXers and Expeditions, this is no big deal ...

But, like each of you, I do get frustrated when w43xx works a DX station in a pile up for the 8 time in two days on the same band .... That is for ego and machismo :-)

Hi all:

Some of this is the DX station. If the DX station is giving their name and location, and many do, then I feel free to give mine.
My main peeve is DX stations that seem to ashamed to give their call. Last night I tuned across a DX station that was calling by call districts and was calling my district, so with out knowing his call I worked him.
I didn't want to take up the time to ask what his call was (also didn't want to look too dumb for working a guy whose call I didn't know), so I just listened until he gave is call, it took 20 minutes, and then it was someone who had more guts than I did and asked what his call was! This is not unusual, if I was DX I would give my call often and clearly using standard phonetics. I would make things go smoothly.

3310. ON6DP QSL-Manager Database 29th December 2001 Update

Newsgroup: rec.radio.amateur.dx
Date: 2001-12-29 23:10:53 UTC
From: DD3KF <info@norbert-graf.de>
Message-ID: <a0lic8$lkoc0$1@ID-17085.news.dfncis.de>
Source record: 15065

Hello everyone,

the 29th December 2001 update of the ON6DP QSL-Manager Database is ready for download:

New: The QSL-Manager Database is now also available in MS-Excel format!

Pse note the additional information from Paul, ON6DP:

The well knowing QSL Manager W4FRU passed away and he is replaced by K4JDJ for QSL Service.

http://www.dd3kf.de

A second download site is ready for you now:

http://home.nexgo.de/dd3kf/on6dp.htm

vy 73 and a happy and succesful New Year 2002!

Norbert, DD3KF

I pretty much agree. As a "W7" I figure that adding AZ might give some useful propagation info to the DX, as 7 includes eight states and an area from the Pacific Northwest to the desert Southwest. (The county I'm in is bigger than some states. And now that I think about it, we have an Indian reservation bigger than some states <g>)

I must also admit that in some cases, I'm workin' 'em twice if possible because the DX seems to be getting more sloppy and I'm getting too many QSLs returned with "not in the log" when I'm absolutely 100% positive I made a QSO. If they have an on-line log to check and I'm in it then I keep my trap shut unless they're begging.

Does anyone know the QSL route for JX7DFA. I know LA7DFA and JX7DFA are the same person, but I saw a listing for LA2KD as manager. Has anyone had success with either?

From his QSL card:

Opr + QSL Mngr: LA7DFA

Per-Einar Dahlen
Royskattv. 4
N-7670 Inderoy
Norway

As I recalled I emailed him and learned that they get mail something
like twice a year there, so be patient.

Hi,

The ON6WL webpage has been updated with a report on the SV9 (EU-015
and EU-187) expedition by ON4BB, ON5JE and ON5KH.
follow the link to 'activities', then choose 'logsearch' or click the
10-21 september link.

Bye Maurice
Merry Xmas, Happy 2002

Nah, I'm just a big old warm Grandpapa.

3320. Looking for a good radio

Newsgroup: rec.radio.amateur.dx
Date: 2001-12-31 20:43:24 UTC

Hello i love listen to short wave radio and i just discovered this group. I listen on an old radio with a 2 metre indoor antenna. i do not know about radio antennas/details etc...

i am looking for very good short wave radio with the following details: the radio should possess SW,LW (if possible),FM. The tuner should be digital. the radio should be sophisticated but not too complicated. Also advise on the best Short wave outdoor antenna that will go perfectly with it.

Also if possible let me know of any online company that sells these items online with delivery worldwide.

Many thanks,

i will be waiting for your answers :))

RayOfLight
